Archiving Solution for Small and Medium Enterprises

The development of optical storage technology has advanced rapidly in recent years. Thanks to the latest Blu-ray technology, currently 100 GB can be written on a $5^{1/4}$ true WORM Blu-ray Disc.

The combined DISC scanfabrik solution offers a complete solution for electronic record management and archiving of e-mails, documents and related SAP/Office documents.

ArXtor *series*

The DISC scanfabrik solution provides a complete archive storage solution with an integrated Windream server to ensure compliant storage of all electronic, business-relevant data
It facilitates different "object types" (e.g personnel records, invoices, contracts, delivery notes, e-mails) and automated life cycle control and management of all your digital content.
The integrated tiered storage configuration with the true WORM optical Blu-ray storage and configurable HDD memory offers optimal performance, in particular for businesses which require compliant archiving.
The DISC ArXtor Series offers a low TCO while optimizing long-term data storage with the lowest data storage energy consumption solution available today.

DISC ArXtor 1000

ArXtor Serie	ArXtor 1000	ArXtor 4000	ArXtor 7000
Number of Media Slots	15 - 105	145 - 370	510 - 660
Number of Drives	2	2 - 6	2 - 10
Storage Capacity (in TB)*	1,5 - 10,5 TB	14,5 - 37 TB	51 - 66 TB
Integrated Internal HDD**	8 x 1 TB / 2,5" Disk	16 x 1 TB / 2,5" Disk	16 x 1 TB / 2,5" Disk

* 100 GB BDXL Media   ** Optional Storage Expansion

The DISC SmartPack™ Removable Media Technology offers the perfect solution to protect and manage bare optical media in and outside the DISC Optical Libraries. Each SmartPack™ can hold 15 media (1.5TB) and is inserted into one of four locations on the front of the DISC libraries.
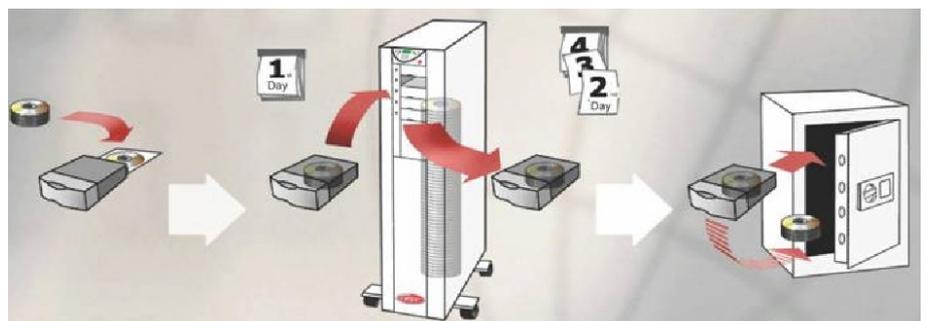

Each SmartPack™ contains a worldwide unique serial number & bar code stored on label and on smart memory chip, so that the storage management software can track the SmartPack™. Unlimited virtual capacity is offered through the efficient handling of the libraries off-line media storage capacity.
