

7th February 2015

Welcome to my new seed trade list for 2014-15.

12, 13 and 14 in brackets indicates the harvesting year for the seed. Concerning seed quantity: as I don't have many plants of each species, seed quantity is limited in most cases. Therefore, for some species you may only get a few seeds. Many species are harvested in my garden. Others are surplus from trade and purchase. OUT: Means out of stock.

Sometimes I sell surplus seed (if time allows), although this is unlikely this season.

NB! Cultivars do not always come true. I offer them anyway, but no guarantees to what you will get!

Botanical Name (year of harvest)

NB! Traditional vegetables are at the end of the list with (mostly) common English names first.
