

## **Press Release**

### **DLS of Sweden at AMICOM Leipzig 2010**

**DLS of Sweden is known for continuously boosting car audio performance and to set new benchmarks. At AMICOM 2010 the newest line-up of the Super Natural Sound will be introduced to the mobile world.**

#### **DLS Reference RM6.2**

Sound matters! This new Reference speaker generation is the perfect system solution to those audiophiles who like play loud but don't want to miss even the tiniest element of their music favorites. A powerful magnet system, crossovers with selectable tweeter level in four steps, aluminum cone and dual upper surround and the T25 silk dome tweeter - every bit of the new RM6.2 system is designed to play powerful but still with complete control and fantastic sound!

**Furthermore DLS will present their three - meantime well known - champions of the "Nordic Sound Disciplines":**

#### **First: The EISA awarded SCANDINAVIA In-Car Speaker System**

A new range of Super Natural Sound-Milestones was introduced to the mobile audio world by these cutting edge speaker components: With the **SCANDINAVIA** competition line DLS of Sweden is providing a perfectly aligned speaker range delivering a true licence to win sound competitions and to bring great sound performance for audiophile listeners on the road. They come in three units for individual system building. All speakers are especially designed for sophisticated car audio enthusiasts and a perfect choice for competition use. Their outstandingly superb audio performance makes them a winner in every Pro installation. They deliver extreme audio performance, transparent and crystal-clear sound, great imaging and staging capabilities, high resolution and dynamics with plenty of micro details plus extremely low distortion.

## **The DLS Nordica 6.2**

After the successful market conquest of the Scandinavia Speaker Components DLS introduced one more glowing example of a new super natural sound-generation from the DLS think tank! The DLS **Nordica 6.2** speaker kit perfectly implements all requirements on great sound performance - regardless of music taste or listening preferences. Premium components, all perfectly aligned and assembled, add up to another DLS speaker system for great music experience on the road. The Nordica speakers are equipped with die cast basket for precise voice coil alignment. The midbass driver's 1.5 Inch voice coil uses flat aluminum wire, allowing for maximum tightness and precise coil alignment under any application. The **Nordica 6.2**'s Kevlar cone is rubber surrounded which controls linearity. Its high-class 100 mm ferrite magnet system provides solid drive and high efficiency. The 28 mm tweeter plays up to 25 kHz. Thanks to its slide switch the tweeter level is adjustable in four steps. A separate filter box with high class components like ribbon air coils and polypropylene capacitors are rounding up this new audiophile car HiFi revolution from Sweden.

## **DLS Gothia 6.2 and 6.3**

One more Sound-Breeze from the North: The **Gothia 6.2** and **6.3** are DLS' latest 16,5 cm (6,5") component system upgrade holding some smart technical revolutions inside their well-designed chassis. Both speaker systems are designed for stability and dynamics, every speaker component is the result of tough minded design and engineering experience. They come with a solid die-cast basket and a cone body of carbon fibre. The magnet system is equipped with a new T-type T-yoke with integrated copper rings for improved cone control and lower distortion. A powerful ferrite magnet system and 1,5" voice coil, filter boxes with selectable tweeter level in four steps and only high class components are used as well as like ribbon air coils, a 28 mm silk dome tweeter in metal housing with chamber and specially designed grilles.

## **Come and listen...**

...to the DLS way to keep audiophiles happy on the road! An exciting listening demo is expecting you at the DLS booth at AMICOM 2010: The **DLS Revolution** Demo Cars from Finland are available for extensive and convincing listening sessions! Find out more at: [www.dlsrevolution.com](http://www.dlsrevolution.com).

## **About DLS of Sweden**

Established in 1979 DLS of Sweden is famous for continuously striving to improve car audio sound and setting new benchmarks. From the very beginning DLS designed and manufactured audiophile gear for music lovers. DLS amps and speakers won numerous awards and have been outstandingly successful in sound-off championships worldwide. Meantime DLS also fills homes with good sound.

## **DLS is upgrading the X-Program!**

### **X-Program X-A analogue amp series**

The **X-A10, X-A20, X-A30** and **X-A40** analogue amplifiers deliver great sound and huge power at a reasonable price. All new analogue amps of the X-Program are great looking beauties, mainly designed for those who celebrate the marriage between massive look, powerful sound and breathtaking performance on the road.

X-A10 is an analogue mono amplifier giving out 300 RMS Watts at 2 ohm speaker load. It is primarily developed for subwoofers but is also a great team partner to power-load the whole frequency range from 20 Hz to 30 kHz. The X-A20 analogue stereo amplifier delivers 2 x 70 RMS Watts at 2 ohm speaker output, the X-A30 supplies 2 ohm speakers with 2 x 70 RMS Watts on the stereo channels plus 1 x 180 Watt on a mono sub channel. The big babe of the X-A analogue amp range is the X-A40 which is feeding 2 ohm speakers with 4 x 70 RMS Watts.

All amps are equipped with a variable low pass filter, a fixed 25 Hz sub sonic filter and a 3-position high pass filter. Thanks to their high-level input with automatic start function you can forget the line- and remote wires. For some extra cooling X-A10 have a built-in fan.

### **X-Program X-WE 10 and X-WE12 Woofers**

Too sexy to hide: Those terrific looking red devils can really do something to hellfire-up a sound system and to impress friends as well as rivals. **The 10 Inch X-WE 10** and the **12 Inch X-WE12** are the new subwoofers of the X-program, all made for vented enclosures. They are a perfect tool for a journey deep into bass like never heard or felt before! Both come with sturdy cast baskets and strong paper cones ready for high volumes and a punchy bass. Their 3" aluminum voice coil ensures superior power handling capacity and enables them play really, really loud with full control. All new X-Woofers are shipped with port kit and a hot looking red grille.
