**Walb** Organmesser kommen hauptsächlich in der Pathologie zum Einsatz. Mit ihnen werden Körperteile sowie Organe durchtrennt. Zur guten Handhabung haben **Walb** Organmesser einen schweren Griff, welcher mit Holzschalen ausgestattet ist.

**Walb** organ knives are used in pathology. With those knives, body parts and organs will be cut. For better handling the **Walb** organ knives have a heavy wooden handle.

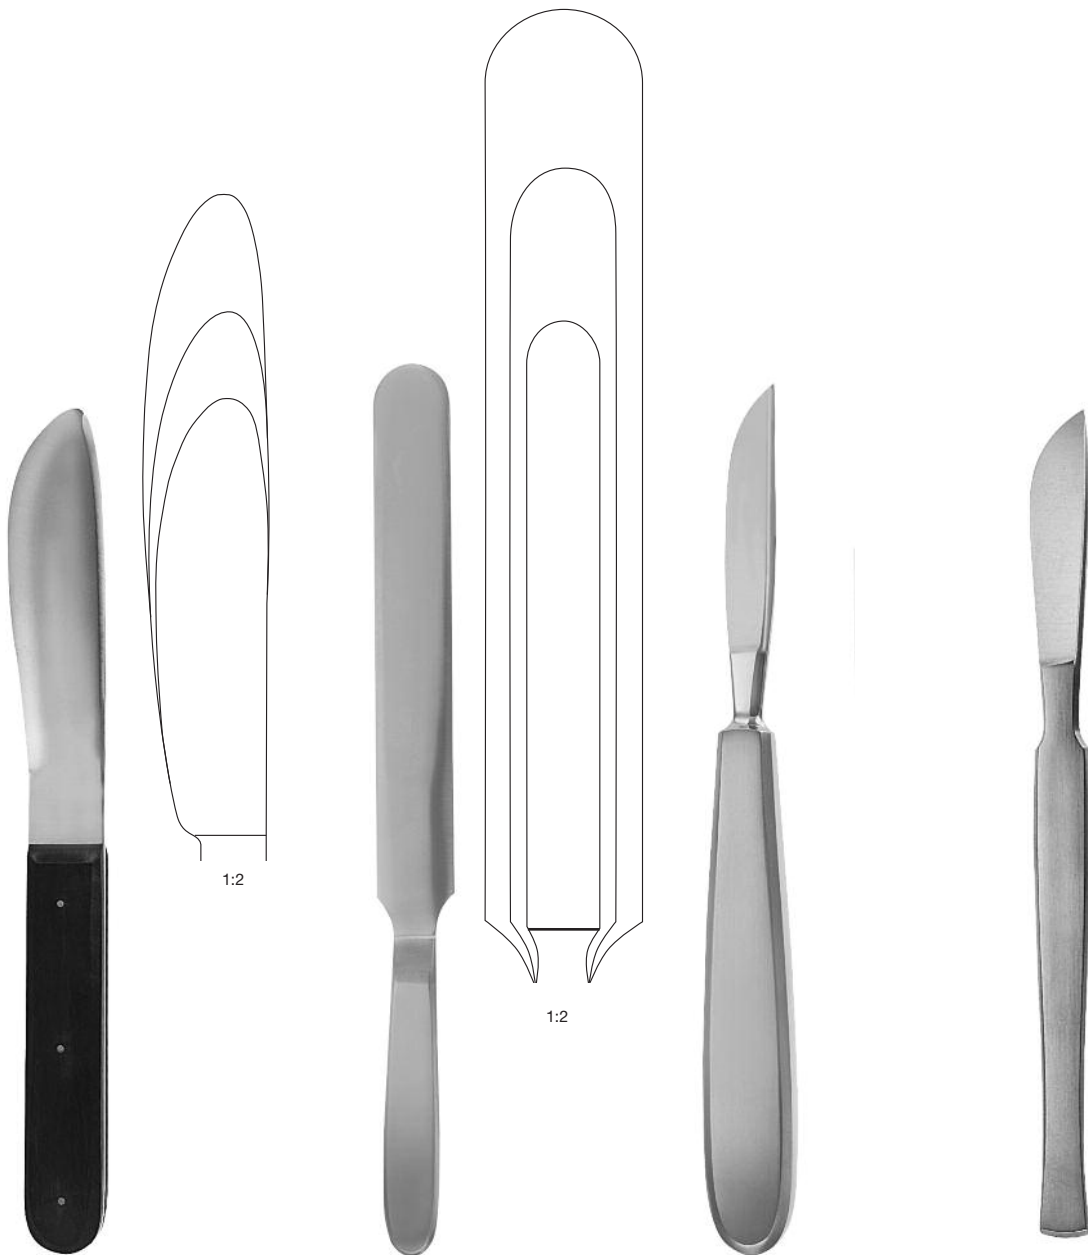

Mit Hirnmessern nach **Virchow** werden in der Pathologie Hirnteile durchtrennt.

**Virchow** Hirnmesser besitzen stets einen Hohlgriff, und sind extrem leicht. Die Schneide ist besonders lang und dünn.

**Virchow** brain knives are used in pathology to cut parts of the brain. **Virchow** brain knives have an extremely light hollow handle. The blades are especially long and thin.

**Resektions- und Knorpelmesser** werden zum Resezieren, sowie zum Durchtrennen von Extremitäten verwendet. Da diese Körperteile nicht sehr voluminös sind, besitzen beide Messer relativ kurze Schneiden.

**Resection and Cartilage knives** are used for resection and cutting of small parts of the body. These parts are normally not very big, therefore the cutting blades are relatively short.

Auf speziellen Wunsch können wir auch sterile Ersatzklingen für die Dermatome liefern.  
On special request we can also supply sterile spare blades for the dermatomes.

Alle Scheren mit RZ-Dur Cut Hartmetalleinlagen zeichnen sich durch eine über lange Zeit gleichmäßige, weiche und dauerhafte Schnittgenauigkeit aus. Alle Scheren mit Hartmetalleinlagen haben zur Kennzeichnung vergoldete Ringe und sind in unserem Katalog mit gelber Farbe unterlegt.

All scissors with RZ-Dur Cut tungsten carbide inserts are distinguished by a uniform, smooth and accuracy cutting. Scissors with tungsten carbide inserts are identified by gold-plated rings and adjusted in yellow color in our catalog.

Alle **Metzenbaum / Metzenbaum-Nelson** Präparierscheren mit RZ-Dur Cut können auch mit dem speziellen RZ-Wellenschliff geliefert werden. Der Wellenschliff verhindert das Ausgleiten des zu schneidenden Materials, ohne die Schneidfähigkeit zu reduzieren oder die Schnitthaltigkeit zu beeinträchtigen. Bei der Bestellung ist diese Angabe besonders zu vermerken. Diese Scheren haben einen schwarzen und einen goldenen Ring.

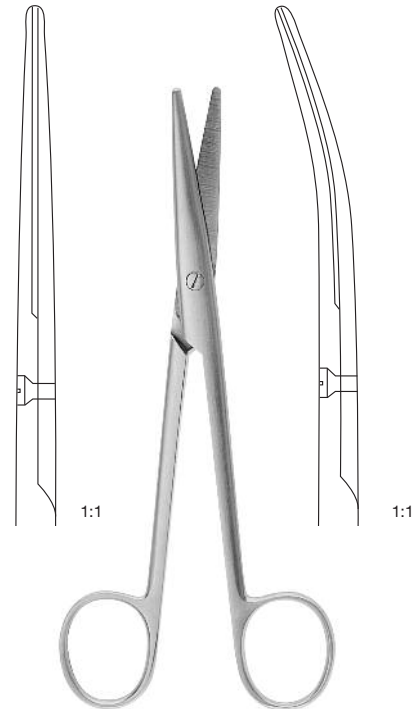

All **Metzenbaum / Metzenbaum-Nelson** Dissecting Scissors with RZ-Dur Cut can be also delivered with the special RZ-corrugated grinding. This corrugated grinding prevents the material to be cut from slipping out without reducing the actual cutting or the durability of the scissors. Please indicate on your order the type / pattern you require. Those scissors have one black and one gold ring.

Das RZ-Super-Cut Blatt besitzt eine einzigartige rasierklingscharfe Schneidekante, zum mühelosen Schneiden des Gewebes.

Das untere Blatt besitzt eine ganz feine Riefung, die das Abgleiten des Gewebes verhindert.

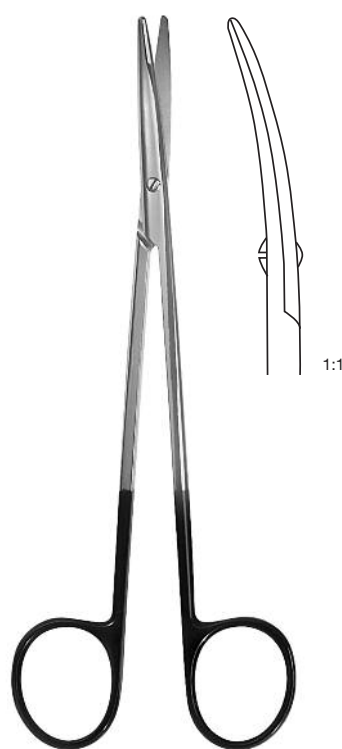

Zur leichten Identifizierung hat die RZ-Super Cut Schere schwarze Ringe.

The RZ-Super-Cut blade has a uniquely designed razor sharp edge to cut effortlessly through tissue.

The lower blade has very fine serrations to prevent tissue slippage. For easy identification RZ-Super-Cut scissors have two black rings.

Abgewinkelte Gefäßdilatoren können sowohl als Nadelhalter als auch als Nahtpinzetten verwendet werden. Um bessere Eigenschaften beim Halten eines Objektes zu erreichen, kann man die Spitzen dieser Pinzetten mit Diamantstaub beschichten.

Angled vessel dilators can be used as needle holders or tying forceps. All forceps can be modified to include diamond dust on tip for superior holding characteristic.

**mit Atrauma-Zahnung**

**General Instruments**  
**Bulldog Clamps**  
**with Atrauma Serration**

Die atraumatische Zahnung schützt Gewebe sowie Gefäße vor Verletzungen und garantiert einen sicheren und standhaften Halt

Atrauma serrations prevents damage to tissue and vessels. It also ensures a safe and firm grip of tissue.

Spezialbesteck für die Transvaginale Injektion bei Paracervical- und Pudendusanaästhesie inklusive Führungshülse und Nadel

Special Set for transvaginal injection for paracervical anaesthesia as well as anaesthesia of the pudendus incl. guide sheath and needle

Nach Applikation der Führungshülse am Injektionsort wird die Kanüle (mit aufgesetzter Spritze) durch den Trichter bzw. durch die Hülse hindurchgeführt und ins Gewebe eingestochen. Verletzungen der Vagina werden hierbei vermieden, da die Einstichtiefe nur ca 10 mm erreicht.

After introducing the guide sheath at the spot to be injected, the needle (mounted on the syringe) is then passed through the guide sheath and the tissue is injected.

Injuries of the vagina are thus avoided, because the depth of puncture is limited to approximately 10 mm.

RZ-Spritzen werden den Forderungen der ärztlichen Praxis in Einfachheit und Zuverlässigkeit im Gebrauch in jeder Weise gerecht.

Vorzüge:

- Kolben und Glaszylinder der RZ-Spritzen sind untereinander beliebig austauschbar; Ersatzteile können in stets passender Ausführung nachgeliefert werden.
- Der Zylinder ist glasklar und zeigt, ebenso wie der Kolben aus nichtrostendem Stahl, selbst nach langem Gebrauch keine Zeichen der Abnutzung.
- Keine Bruchgefahr, wenn die RZ-Spritze zum Sterilisieren nicht auseinander genommen wird.
- Eine neuartige Kolbenbremse in der Sechskantkappe erübrigt den Kolbenring. Der Kolben ist glatt und gewährleistet daher eine erhöhte Dichtigkeit.

RZ Syringes fulfill the demands of medical practice in simplicity and reliability in every way.

Features:

- Plunger and glass cylinder of the RZ Syringes can be interchanged as desired. Replacement parts can be supplied subsequently to fit.
- The cylinder is transparent and even after long use shows no signs of wear, as does the stainless steel plunger.
- There is no danger of breakage if the RZ Syringe is not taken to pieces for sterilising.
- A new type of plunger brake in the hexagonal cap allows a piston ring to be dispensed with. The plunger is smooth and so ensures enhanced tightness.

Vorteile der RZ-Medizintechnik Nadel:

- Für die Herstellung von RZ Nadeln werden nur hochwertige Materialien verwendet.
- Eine hochglanzpolierte Fläche verleiht der Nadel eine bessere Gleitfähigkeit und verringert dadurch die Traumatisierung.
- Der Durchmesser der Nadel ist so ausgelegt, daß nur eine minimale Perforation des Gewebes stattfindet. Hierdurch wird eine bessere Heilung erfolgen.

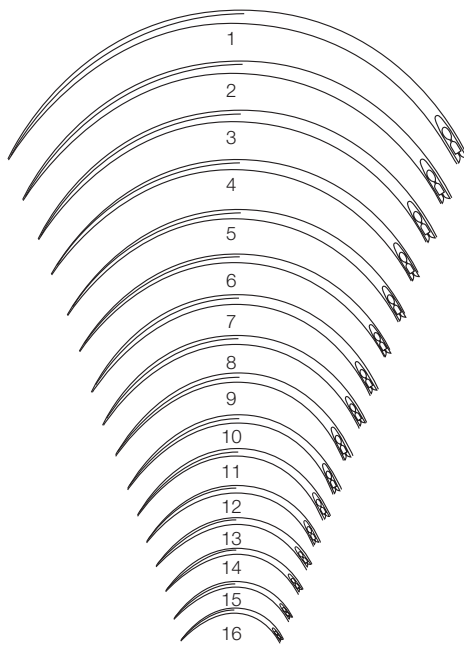

Advantages of RZ-Medizintechnik needles:

- For the production of RZ needles only high quality materials will be used.
- A mirror finish surface gives the needle a better slide and reduces any trauma.
- The diameter of the needle is kept to a minimum, allowing a minimum of perforation. Thus assisting the healing process.

with Tungsten Carbide Inserts

10

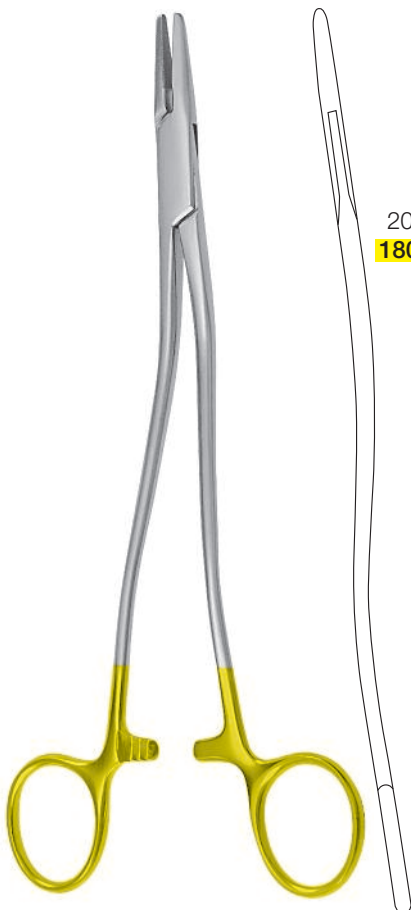

Diese Nadelhalter mit extra schlankem Maul sind auf die Anforderungen der Gefäßchirurgie abgestimmt.

These needle holders with extremely delicate jaws meet with the particular conditions in vascular surgery.

### Mini-Assistent

165 x 90 x 20 mm

**180-959-000**

komplettes Besteck, in Metalletui, mit Stegen für Instrumente im Etui

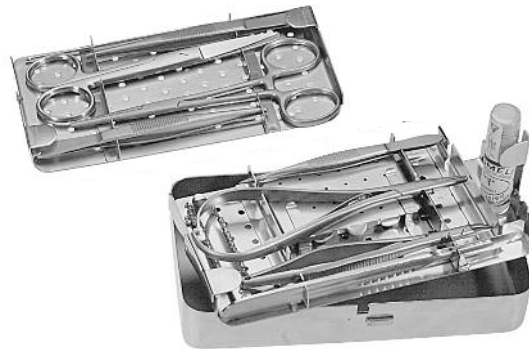

**Inhalt:**

- 1 Nadelhalter Mathieu, 14.0 cm
- 1 Nähseide in Alkohol
- 3 Nähnadeln, sortiert
- 1 Nadeldose 50 x 25 mm, gelocht
- 1 Wundklammerzange Michel
- 20 Wundklammern auf Halter
- 1 Skalpellgriff mit Klinge
- 2 Klingen, auswechselbar
- 1 gerade Schere st./sp., 13.0 cm
- 1 feine anatomische Pinzette, 12.5 cm

complete set in metal case  
with interior instrument rack

**Contents:**

- 1 Mathieu Needle Holder, 5 1/2"
- 1 Flacon with sterilized silk in alcohol
- 3 Suture Needles, assorted
- 1 Needle Case, 50 x 25 mm, perforated
- 1 Michel Suture Clip Forceps
- 20 Michel Suture Clips with Clip Holder
- 1 Scalpel Handle with Blade
- 2 Scalpel Blades, interchangeable
- 1 Scissors, straight, blunt/sharp, 5"
- 1 Dressing Forceps, fine, 5"

### Assistent Standard

165 x 90 x 28 mm

**180-960-000**

komplett, in Metalletui, mit 2 herausnehmbaren gelochten Einlagen mit Stegen für Instrumente

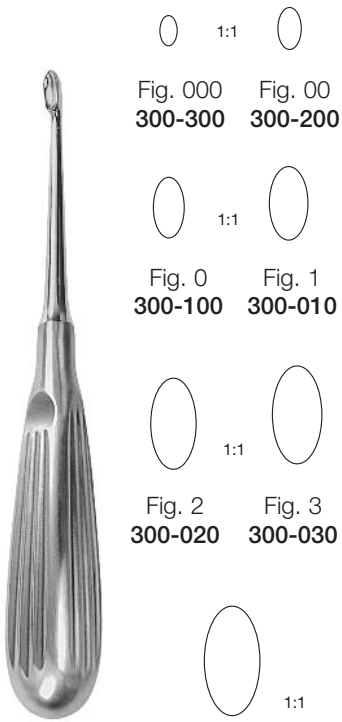

**Inhalt:**

- 1 Nadelhalter Mathieu, 14.0 cm
- 1 Nähseide in Alkohol
- 6 Nähnadeln, sortiert
- 1 Nadeldose 65 x 42 mm, gelocht
- 1 Wundklammerzange Michel
- 20 Wundklammern auf Halter
- 1 Skalpellgriff mit Klinge
- 3 Klingen, auswechselbar
- 1 gerade Schere Fig.2., 13.0 cm
- 1 anatomische Pinzette, 11.5 cm
- 1 Hakenpinzette, 12.0 cm, 1 x 2 Zähne
- 1 Splitterpinzette Hunter, 10.5 cm
- 1 Arterienklemme Kocher, 13.0 cm
- 1 Myrtenblattsonde, 13.0 cm

complete set in metal case with 2 removable perforated  
trays for instruments

**Contents:**

- 1 Mathieu needle holder, 5 1/2"
- 1 Flacon with sterilized silk in alcohol
- 6 Suture needles, assorted
- 1 Needle case, 64 x 42 mm, perforated
- 1 Michel suture clip forceps
- 20 Michel suture clips with clip holder
- 1 Scalpel handle with blade
- 3 Scalpel blades, interchangeable
- 1 Scissors, straight, Fig.2, 5"
- 1 Dressing forceps, fine, 4 1/2"
- 1 Tissue forceps, 4 1/2", 1 x 2 teeth
- 1 Hunter splinter forceps, 4 1/8"
- 1 Kocher artery forceps, straight, 5"
- 1 Probe with myrtle leaf, 5"

Die Alan Park Anal- und Sphinkterotomie Retraktor Kombination hat den Vorteil, daß alle Valven austauschbar sind und somit sowohl für Erwachsene als auch für Kinder geeignet ist. Alle Valven sind speziell geformt, um den anatomischen Bedingungen des Körpers gerecht zu werden. Sie sind aus dünnwandigem Material hergestellt, um das Einführen zu erleichtern.

The Alan Park anal and sphincterotomy retractor combination provides interchangeable blades for use in children and adults. All blades are specially rounded and shaped to meet anatomical requirements. They are slightly tapered and lipped to facilitate insertion.

Die Randall-Nierensteinzange wird zum Entfernen von Nierensteinen im Nierenkelch verwendet. Die schematische Darstellung des jeweiligen Instrumentes in der Niere zeigt, wie wichtig die zweckentsprechende Biegung ist, um den richtigen Kelch zu erreichen. Zusätzlich zu den vier Standardbiegungen haben wir noch zwei Neuerungen aufgenommen, welche einen längeren Schaft haben, um auch tiefer sitzende Steine zu erreichen.

The Randall kidney stone forceps are used to remove kidney stones in the kidney cup. The illustration shows, how important the correct angle of the instrument is to remove the stones out of the cup. In addition to the four standard angulations we have two new patterns, with a longer shaft to access to the deeper cups.

**RZ Lateral Retraktor**  
350-340-000

Jeder Gynäkologe hat bereits die Erfahrung gemacht, den Gebärmutterhals zu beobachten trotz eines Kollapses der seitlichen Vagina-Wände. Einige Ärzte haben sogar versucht Zungendrucker und Kondome, die Sie über das Spekulum stülpen, zu benutzen um die Wand zurückgezogen zu halten. Jetzt endlich gibt es eine Lösung des Problems.

RZ-Medizintechnik bietet einen seitlichen Vagina-Reetraktor an, der in Ihr Spekulum paßt. Der seitliche Retraktor verringert oder eliminiert sogar den Kollaps der Vagina-Wände im Blickfeld um einen totalen Einblick in den Muttermund zu gewährleisten. Dies ist ein unschätzbare Vorteil bei einer Gebärmutterhals-Untersuchung, einer Kolpophotographie und verschiedenen Laser- sowie HF-Chirurgie-Eingriffen. Der Retraktor hat auch einen Sperrenmechanismus, der ein einfaches Öffnen und Schließen erlaubt.

Every gynecologist has experienced the problem of trying to view a patient's cervix despite the collapse of the lateral vaginal walls. Some have even resorted to using tongue depressors or condoms over their speculum to try to keep the walls retracted. Finally there's a convenient way to solve this problem.

RZ-Medizintechnik introduces the lateral vaginal retractor, a vaginal spreader that fits inside your speculum. The lateral vaginal retractor reduces or eliminates the collapse of the vaginal walls into the field of view, providing complete visualization when examining the cervix. It is invaluable for gaining a wider field of view, when performing cervicography, colpophotography, laser or electrosurgery procedures.

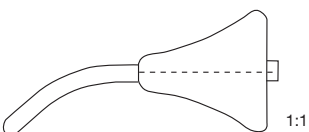

It also features a convenient locking mechanism with a thumb-ratchet release that keeps it open and in place.

Die Cohen Uterus Sonde wird zur Manipulation des Uterus verwendet. Eine federnde Zangenhalterung garantiert, daß die Sonde zusammen mit einer Hakenzange verwendet werden kann.

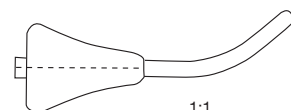

The Cohen Uterine Cannula is used for manipulating the uterus. A spring-loaded fixation guarantees, that the cannula can be used together with a tenaculum forceps.

 350-614-270

Die charakteristische S-Form der Van Doren und Thoms-Gaylor Biopsiezangen gewährleistet eine freie Sicht auf das Operationsfeld, wodurch der Operateur eine scharf begrenzte Probeentnahme durchführen kann.

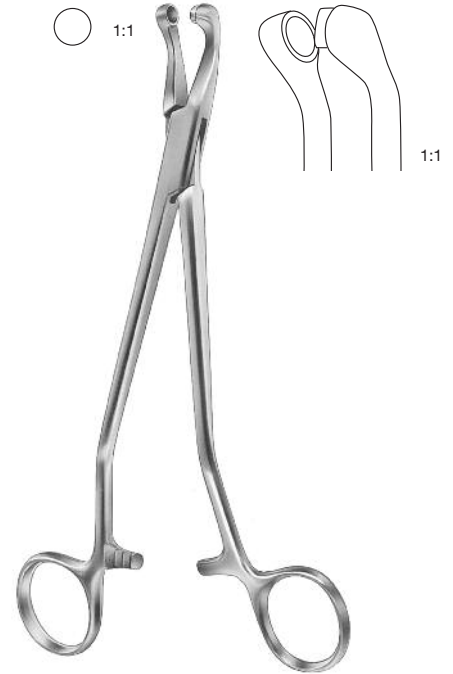

The typical S-shaped design of the Van Doren and Thoms-Gaylor biopsy forceps allows a clear view on the operation field to take a fine, precise probe

**Van Doren**

350-847-260

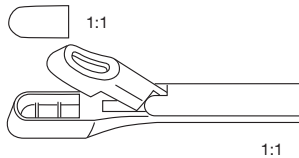

Die folgenden Biopsiezangen sind besonders gut für eine Kolposkopie geeignet, da man mit ihnen auch in tiefere Zonen eindringen kann.

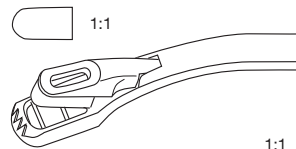

The following Biopsy Forceps are specially suitable for Colposcopy, because with the long shaft you also come to deeper fields.

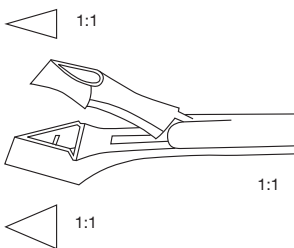

**Kevorkian**  
24.0 cm, 9 1/2"  
9 x 3 mm  
310-730-240

**Eppendorfer**  
20.0 cm, 8"

**Schumacher**  
24.0 cm, 9 1/2"  
Fig. 1, 4 mm  
310-729-001  
Fig. 2, 6 mm  
310-729-002

Der Vorteil der **Schumacher** Biopsiezangen ist, daß diese durch ihre Nase an der Spitze einen Anhak-Effekt auslösen, und hierdurch das Gewebe sehr gut erfassen können. Des weiteren haben die **Schumacher** Biopsiezangen einen sehr großen Öffnungswinkel, und können so auch an narbigem, flachem Scheidengewölbe angesetzt werden. Ebenfalls haben sie einen glatten ziehenden Schnitt, wodurch sich die Wunde wieder selber schließt und so gut heilen kann.

The advantage of the **Schumacher** Biopsy Forceps is, that the small crook on the upper jaw gives a kind of hoking effect, which grasps the tissue safely. Another advantage is, that angle of opening is also very large, so it can also be used for scarred, flat vaginal vault. Further they also have a smooth steady cut, to get a self-sealing wound which heals well.

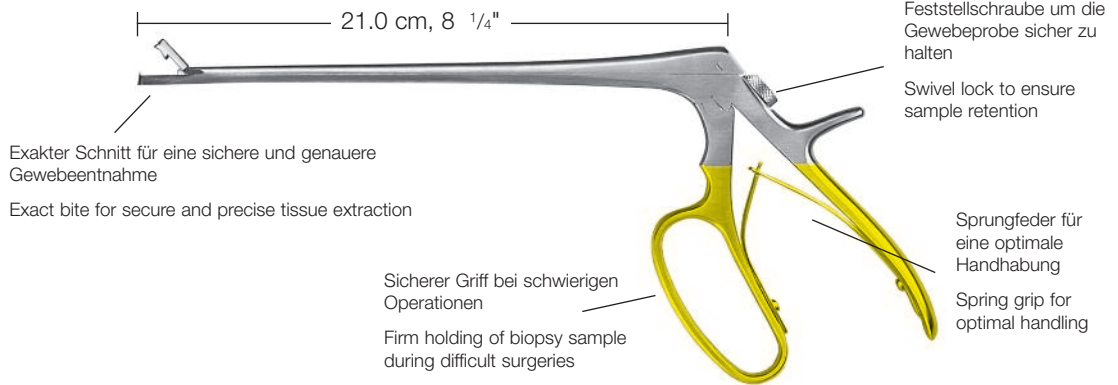

**Alexander**  
28.0 cm, 11"  
310-735-280

Der Vorteil der **Alexander** Biopsiezange ist, daß man bedingt durch die Linksbiegung des Maulteiles eine gute Sicht auf das Operations-feld hat. Des weiteren liegt die Schnittkante direkt im Gewebe, welches zur Folge hat, daß man einen exakten und sauberen Schnitt durchführen kann. Sie hat ebenfalls einen ziehenden Schnitt, wodurch eine gute Heilung der Wunde gewährleistet wird.

The advantage of the **Alexander** Biopsy Forceps is, that the left curvage of the jaw allows a good view on the operating field. Further the cutting edge is planted into the tissue, which helps to make an exact and precise bite. It also has a smooth steady cut, so the wound will heal well.

Vorteile der RZ-Biopsie Stanzen  
Advantages of the RZ-biopsy punches

Exakter Schnitt für eine sichere und genauere Gewebeentnahme  
Exact bite for secure and precise tissue extraction

Sicherer Griff bei schwierigen Operationen  
Firm holding of biopsy sample during difficult surgeries

Feststellschraube um die Gewebeprobe sicher zu halten  
Swivel lock to ensure sample retention

Swivel lock to ensure sample retention

Sprungfeder für eine optimale Handhabung

Spring grip for optimal handling

1:1

**Tischler-Morgan**  
7 x 3 mm  
310-733-001

Die klassische Biopsie-Stanze, die von vielen Gynäkologen gegenüber anderen Stanzen bevorzugt wird. Dieses einzigartige Maul hat einen hervorragenden Schneidemechanismus, der das Gewebe in das Maul hineinzieht und das Herausgleiten verhindert.

The classic biopsy punch, a favorite of many gynecologists. The unique jaw has a superior bite mechanism which draws tissue into the jaw and prevents it from slipping out.

1:1

**Mini-Townsend**  
2.3 x 4 mm  
310-733-002

Diese Biopsie-Stanzen sind besonders geeignet bei Patientinnen mit einem engen, externen Muttermund, wenn eine kleine Schädigung im Scheidenkanal sichtbar ist. Die Stanzen bieten die Möglichkeit extrem kleine Gewebeproben zu entnehmen.

1:1

**Baby-Tischler**  
2.3 x 4 mm  
310-733-003

This biopsy punches are particular valuable in patients with a tight, external os, where a small lesion is just seen inside the vaginal canal. The punches offer the opportunity to obtain very small biopsy samples.

1:1

**Tischler-Kevorkian**  
9 x 3 mm  
310-731-200

Diese Biopsie-Stanze vereinigt die Möglichkeit einer Gewebeprobe mit einer rechteckigen Schnittkonfiguration und dem Vorteil eines Tischler Handgriffs, der eine optimale Handhabung gewährleistet.

The biopsy punch combines the opportunity of taking a square configuration tissue sample and the advantage of a Tischler handle which secures an optimal handling.

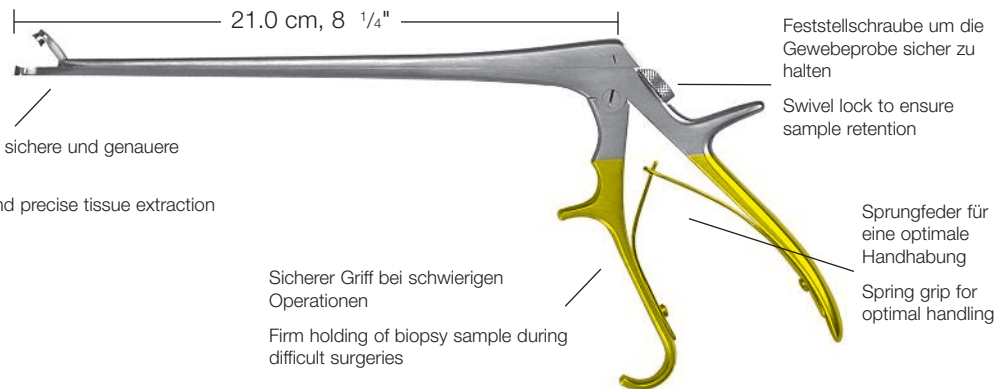

1:1

**Kevorkian-Pacific**  
9 x 3 mm  
310-732-200

Der Schnitt dieser Stanze ist jedem Gynäkologen bekannt, da er geringe Gewebeverletzungen verursacht. Dies ist die alternative im asiatischen Raum zur gewöhnlichen Kevorkian Biopsie Stanze mit Ringgriff.

The bite of this punch is familiar to all gynecologists because of the little tissue lesion in particular in asian countries. This design is an alternative to the common Kevorkian biopsy punch with the ring handle design.

Zusammen mit zwei Arterien- oder Präparierklemmen wird die Vorhaut über die glockenförmige Schutzkappe gezogen, so daß die Eichel geschützt ist. Nun wird die Flügelschraube so stark angezogen, daß die Vorhaut gequetscht wird. Mit einem Skalpell wird die Vorhaut über der Schutzglocke abgeschnitten. Das Circumcisionsgerät bleibt noch einige Zeit angezogen um eine Blutung zu verhindern. Im Falle, daß doch Blutungen auftreten und eine große Ader, speziell die Eichenbändchen-Arterie, verletzt worden sein sollte, muß eine Naht durchgeführt werden. Hierfür eignet sich hervorragend unser Mini-Assistent, Artikel-Nummer 180-959-000 auf Seite 193. Ein Vorteil bei dieser Methode ist der Kosmetische Aspekt, da nur eine minimale Narbe nach dem Entfernen des kleinen Hautstückes übrig bleibt.

Together with two Hemostats or Ligature Forceps the foreskin is pushed over the bellshaped protection-rod and the glans is placed safely into it. By now, the nut is tightened as close as possible, so the foreskin is annularly compressed. The foreskin is cut off with a scalpel, right next to the compression ring. The compression ring should remain a few minutes to avoid bleeding. In case that any large vein, specially the frenular artery, is cut through, a ligature must be set. The advantage of the method described is the cosmetically favourable scar which is left after rejection of the small necrotized portion.

Die RZ-Medizintechnik Farbbänder stellen eine schnelle und kostengünstige Möglichkeit dar, um chirurgische Instrumente zu markieren. RZ-Farbbänder machen es Ihnen einfach, Ihr eigenes Markierungssystem zu entwickeln, um Instrumente nach ihrer Art, Anwendung oder nach Eigentümer zu kennzeichnen.

Die haltbaren Rollen sind in zehn auffälligen Farben lieferbar. Sie sind sehr leicht anzubringen. Sie wurden klinisch getestet und wurden als sicher bei normaler Flash und Gas-Sterilisation anerkannt.

RZ-Farbbänder sind 6.5 mm, 1/4" breit und werden in 7.6 m, 300" Länge auf Spulen geliefert. Dies reicht aus, um ungefähr 250 Instrumente zu markieren. Jede Spule wird in einer harten Plastikbox geliefert und kann dadurch leicht gelagert werden.

**Anwendung:**

Das Instrument sowie die Hände müssen trocken und frei von jeglichen Mitteln sein. RZ-Medizintechnik Farbbänder müssen abgeschnitten und nicht abgerissen werden. Es muß genug abgeschnitten werden, so daß sich das Band mindestens einmal selber überklebt.

RZ-Farbbänder dürfen nicht gedehnt werden.

Nachdem das Farbband aufgetragen wurde, muß das Instrument sterilisiert werden. Dadurch haftet das Band nun am Instrument und hat sich mit diesem fest verbunden.

Nach dem Gebrauch die Rolle wieder in die Plastikbox legen.

Die Bänder sollten alle 6-8 Monate gewechselt werden.

Bei Scheren muß das Band an den Ringen angebracht werden, so daß die Funktion nicht beeinträchtigt wird.

Um das Band vom Instrument zu entfernen, nimmt man ein Skalpell zur Hilfe und reinigt es anschließend mit einer gewöhnlichen Reinigungsmilch.

RZ-Medizintechnik presents an inexpensive way of color coding surgical instruments. RZ-Coding Tapes make it easy to create your own labeling system for identifying and sorting instruments by type, specialty and ownership.

The durable tapes come in ten highvisible colors. They are easy to apply. They have been clinically tested and found safe for use in conventional flash or gas sterilization units.

RZ-Color Coding Tapes are 6.5 mm, 1/4" wide and packaged of spools in 7.6 m, 300" length. That's enough to code approximately 250 instruments. Each spool comes in it's own hard-plastic box for easy storage.

**Instructions:**

The instrument and the hands must be dry and free from any residue.

RZ-Color Coding Tapes must be cut not torn.

Enough tape must be cut to overlap itself at least once.

The tape must not be stretched.

Upon completing the application of RZ-Color Coding Tapes, autoclave the instruments. The tape will bond itself to the instruments. Replace the roll in its plastic box after use.

Do not put the tape on the shanks of scissors, as this interferes with the function of the instrument. Place the tape on the finger rings of the scissors.

Change RZ-Color Coding Tapes at least every 6-8 months.

To remove the tape, cut with a razor blade and clean with any instrument cleaner.
