MY PICTURE PATCH

Here's a collection of easy to grow perennial plants & wildflowers seeds to plant in a sunny border.

The colourful long-lived perennials will increase every year and slowly fill the entire area. In the meantime the wildflowers will provide excellent ground cover to save weeding as well as giving soft, natural colour. They will seed down and come back each year as well to provide many years of beauty and enjoyment. You will need about 1 square metre, but this can vary - just add more wildflowers for a larger area. The effect will be bolder colour at the back drifting to pastels in the front. Just gorgeous! Planting details included in each pack.

Back: Penstemon King George plant plus Papaver - Shirley Poppies seeds.
Middle: Penstemon Stapleford Gem & Lupin Gallery White plants plus Annual Gypsophila seeds.
Front: Gaura Ballerina Blush & Coreopsis Moonbeam plants plus Malcomia - Virginia Stock seeds.

INTRODUCING RUSTY ROOSTER

HERE WE HAVE OUR FIRST RELEASES
MORE WILL BE COMING

Many years ago my grandfather was painting his red hay barn and this peaky rooster kept hanging around his feet and getting in the way. Next minute he trips up, paint goes flying everywhere and lands, you guessed it, all over the rooster. Rooster scurries off squawking wildly and we laughed and laughed. Thereafter that rooster was called Rusty!

So in the spirit of our fathers and grandfathers, country living and home baked goodness, we present our own brand of respectful fine food preserves and condiments. We have merged traditional values with modern flavours to bring you this range of gourmet delights. Here we have our first releases – more will be coming in our Summer Catalogue. None have artificial colours or flavours.

Go on, try them with a good old fashioned picnic, BBQ, Sunday lunch or, well just about anything.
Discover why Rusty Rooster will make you smile!
