## **TERMS & CONDITIONS OF SALE**

TERMS	All prices set forth herein are subject to change without notice and all orders will be invoiced at the price prevailing at the time of shipment.
TRADE CUSTOMS	All sales are subject to recognized paper trade customs, including overruns and under runs. Any exceptions must be agreed to in writing.
CLAIMS	All claims of any nature pertaining to shipments must be made in writing within fifteen (15) days after receipt of merchandise; otherwise claims will not be allowed. No claims will be allowed after paper is cut, ruled, printed, punched or otherwise altered.
LIABILITY	<p>We will not be liable for any default or delay arising from or out of any cause or contingency beyond our control or the control of our suppliers affecting either ourselves or our suppliers, including, but not limited to, strikes, lockouts, riots, sabotage, insurrection, terrorism or threats of terrorism, floods, droughts, fires, wars, embargoes, acts of God, Government priority or regulations, delays of transportation or inadequate supply of goods.</p> <p>All merchandise sold by us is sold subject to Public Law 95-473(HR 10965) and I.C.C. Regulations on Freight Claims (Ex Parte 263H 9CFR 1005). We will not recognize any claim for damage to merchandise caused by any transportation company, including parcel post, railroad or air shipments, etc., unless you shall note exceptions covering such damage against the carrier at the time you accept delivery from the carrier in full compliance of the above laws and regulations.</p> <p>All orders or contracts are accepted with the understanding that they are subject to our ability to obtain supplies of finished products, and all orders or contracts as well as shipments applicable thereto are subject to our supplier's current mill schedules, and other government regulations, orders, directives and restrictions that may be in effect from time to time.</p> <p>In any such event we will be free to deliver any goods remaining or becoming available to fill any orders, in whole or in part, without any requirement of allocation of such goods among different customers. In no event will we be liable for any consequential or incidental damages.</p>
FINANCIAL CONDITION	We reserve the right to alter or suspend credit, to defer shipments, in whole or in part, to recall goods in transit, re-take same, and repossess all goods which may be stored in our possession for the Buyer's account, and to cancel any and all unfilled orders at any time, without the necessity of taking any other proceedings, when, in our opinion, Buyer's financial condition warrants it or Buyer consents that all merchandise so recalled, re-taken or re-possessed shall become our absolute property, provided Buyer is given credit therefor. The foregoing shall not be construed as limiting, in any manner, any of the rights or remedies available to us because of any default of the Buyer under the Uniform Commercial Code as in force and effect in the State of Texas on the date of this acknowledgment.
TAXES	Buyer is liable for and shall pay all taxes or charges imposed by local, state or federal governments which are payable by reason of a sale or delivery made by us.
WARRANTIES	<b><u>NO REPRESENTATIONS, AFFIRMATIONS, SPECIAL ARRANGEMENTS, PROMISES OR STATEMENTS MADE BY US OR BY ANY OF OUR SALESMEN OR AGENTS NOR ANY EXPRESS WARRANTIES OR IMPLIED WARRANTIES WHETHER OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR USE OR OTHERWISE, WILL BE BINDING UPON US UNLESS ENDORSED BY US ON OUR ORDER OR ACKNOWLEDGMENT FORMS.</u></b>
CANCELLATION	An order once placed with and accepted by us can be cancelled only with our consent and upon terms that will indemnify us against loss.
RETURNS	Arrangements must be made with sales or customer service prior to returning product. All returns subject to freight or delivery charges to and from customer dock, plus a 15% restock charge. Stock must be in saleable condition upon return.
GOVERNING LAW	This Agreement shall be governed by and construed in accordance with the laws of the State of Texas. Any action or proceeding to enforce this Agreement shall be brought only in the state or federal courts located in Dallas, TX. The parties waive trial by jury. In any such action or proceeding, Western-BRW Paper Co., Inc. and Bosworth Papers, Inc. shall be entitled to recover their reasonable attorneys' fees and expenses..
GENERAL	These terms and conditions shall supersede any provisions, terms and conditions contained on any confirmation order, or other writing the Buyer may give or receive, and the rights of the parties shall be governed exclusively by the provisions, terms and conditions hereof. Any attempt to alter or omit any of such terms shall be deemed a rejection and a counter-offer.

## **WE ARE AN EQUAL OPPORTUNITY EMPLOYER**

## USEFUL INFORMATION

---

### BASIC WEIGHT:

The weight of one ream or 500 sheets of the base size.

### EQUIVALENT WEIGHT:

The weight of one ream or 500 sheets, of other sizes larger or smaller than the basic size.

### SHEET AREAS OF BASIC SIZES

---

KIND OF PAPER	SQUARE INCHES	BASE SIZE
Bonds, Ledgers, Thin papers		
Writings	374	17x22
Cover Papers	520	20x26
Blanks	616	22x28
Printing Bristols	641	22.5x28.5
Kraft, Newsprint	864	24x36
Book Papers, Offset, Text	950	25x38
Index	778	25.5x30.5

### HOW TO FIND THE EQUIVALENT WEIGHT

#### Formula:

Length x width of sheet size x basic weight, divided by length x width of basic size, result is the equivalent weight.

#### Example:

What is the weight of a 32 pound ledger paper size 28 x 34?

#### Solution:

Filling in the known factors in the formula, the following equation is obtained – 952 x 32 divided by 374, which equals 81.4 the equivalent weight. Thus 28 x 34 - 81 lb., is equal to 17 x 22-32 lb. or one ream of the 32 lb. paper in size 28 x 34 weight 81 lbs.

## USEFUL INFORMATION

---

## HOW TO FIND THE WEIGHT OF AN ODD NUMBER OF SHEETS

Formula:

Weight of 1000 sheets x number of sheets divided by 1000 results in total weight.

Example:

What is the weight of 1475 sheets of 17 x 22-28 lb. stock?

Solution:

Filling in the formula:

$28 \times 1475$  divided by 1000 equals 82.6 lbs.

The 1475 sheet weight 82.6 lbs.

## HOW TO FIGURE BASIS WEIGHT

When sheet size and ream weights are known.

Formula:

Length x width of basic sheet size x ream weight divided by length x width of sheet size results in basis weight.

Example:

What is the basis weight of a ream of book paper sheets 23 x 29 weighing 56 lbs. Per ream?

Solution:

$23 \times 29 \times 56$  divided by  $23 \times 29$  equal 5350 divided by 667 equals 80 lb. basis weight.

## HOW TO FIGURE REAM WEIGHT

When sheet size and basis weights are known.

Formula:

Length x width of sheet x basis weight divided by length x width of basic sheet size equals weight per ream.

Example:

What is the ream weight of sheets of 20lb basis weight bond paper 22 x 25 ½?

Solution:

$22 \times 25 \frac{1}{2} \times 20$  divided by  $17 \times 22$  equals 1122 divided by 374 equals 30 lbs. per ream.

**ILLUSTRATION:**

Find the weight of Bond paper 20 lb. basis – size 20x28

NOTE: Result will be plus or minus one lb. to 1 M sheet total

**SOLUTION:**

20X28 = 560 (square inches).  
 560 x 1070 (1000 sheet factor =59.920 or 60lbs.  
 for 1000 sheets)

## USEFUL INFORMATION

### HOW TO FIGURE PIECES PER SHEET

Formula:

Place the dimensions of the size desired under the dimension of the sheet, then divide both vertically and diagonally. The larger of the two whole numbers is the answer.

Example:

How many 5 x 8 cards can be cut from a 25 ½ x 30 ½ sheet?

DIVIDE VERTICALLY

25 ½ x 30 ½

5 x 8

5 x 3 equals 15 cards

THEN DIAGONALLY

25 ½ x 30 ½

5 x 8

6 x 3 equals 18 cards

#### DETERMINATION OF THE NUMBER OF YARDS IN A ROLL OF PAPER

The approximate number of lineal yards in a roll of paper may be calculated from the following formula:

$$A \text{ equals } \frac{B \times 13,194}{C \times D}$$

Where,

A equals lineal yards

B equals weight of roll in inches

C equals width of roll in inches

D equals basis weight

Example: A roll of 60 lb. paper (25 x 38 – 500) 50 inches wide weighing 4000 lbs.  
4000 x 13,194 equals 17,592 yards.

The above calculation was based on the nominal basis weight. Variations in basis weight in actual practice will cause the yardage to vary slightly.

## USEFUL INFORMATION

---

### FORMULA FOR COMPUTING THE WEIGHT OF A ROLL WHEN THE DIMENSIONS AND BASE WEIGHT ARE KNOWN.

The approximate weight of a roll of paper may be computed from the following formula:

A equals  $(B \times 2 - C \times 2) DE$

Where,

- A equals weight of the roll in pounds
- B equals diameter of the roll in inches
- C equals diameter of the core in inches
- D equals width of the roll in inches
- E equals factor as per table below

### FACTORS

Regular Offset	.023	Pigmented papers	.026
Antique Offset	.018	Hi bulk papers	.016
E F Book	.027	Bible papers	.024
Eggshell Book	.018	Coated papers	.033

Example: Find the weight of a roll of regular finish paper, 50 inches wide wound on a 3 inch core.

Weight of roll equals  $(50^2 - 3^2) \times 50 \times .023$   
Equals  $(2500 - 9) \times 50 \times .023$   
Equals  $2491 \times 50 \times .023$   
Equals 2864 lbs.

### HOW TO DETERMINE THE NUMBER OF REAMS THAT CAN BE SHEETED OUT OF A GIVEN ROLL OF PAPER.

To determine the number of reams of a given size and weight that may be sheeted out of a roll of paper, divide the weight of the roll by the weight of the ream. This will be only approximate as the weight of the core, plugs and normal trimming losses are not taken into consideration.

Example:

Roll weight 1185 lbs.  
Ream weight  $25 \times 38 - 45/500$   
 $1185/45$  equals 26.3 reams

## USEFUL INFORMATION

### METRIC SYSTEM

Here are a few points to help you interpret the metric system as it pertains to printing papers.

1. Paper sizes are expressed in millimeters (mm).
2. Basis weight is expressed in grams per square meter ( $g/m^2$ ).
3. Total weight is expressed in kilograms or metric tons.

To convert: Pounds to kilograms – multiply by .4536  
Pounds to metric tons – multiply by .0004536  
Tons to metric tons – multiply by 1.102

To convert from inches to millimeters – multiply by 25.4

---

INCHES	MILLIMETERS (Rounded)
8 ½	216
11	279
14	356
17	432
17 ½	445
19	483
20	508
22	559
22 ½	572
23	584
24	610
25	635
26	660
28	711
29	737
34	864
35	889
38	965
40	1016
45	1143
50	1270

## USEFUL INFORMATION

### METRIC SYSTEM (cont.)

---

Converting basis weight:

To convert basis weight to grams per square meter (gms):

**(Basis Weight) (1406.5)**

**Basic Size (in.<sup>2</sup>)**

**Basic sizes**

**Writing** 17 x 22 = 374 sq. in.

**Text/Offset** 25 x 38 = 950 sq. in.

**Cover** 20 x 26 = 520 sq. in.

**Tag** 24 x 36 = 864 sq. in.

Example: 80 lb. cover

$$\frac{(80) (1406.5)}{20 \times 26} = \frac{112,520}{520} = 216 \text{ gsm}$$

To convert grams per square meter (gms) to basic weight:

$$\frac{(\text{gms}) (\text{Basis Size [in.}^2\text{)})}{1406.5}$$

Example: 104 gsm. What basis eight is 104 gsm equivalent to in Text/Offset?

$$\frac{(104) (25 \times 38)}{1406.5} = 70\# \text{ Text/Offset}$$

How to determine pieces per sheet.

Write down the sheet size that you are cutting down. Under that, write down the desired sheet size. Divide both vertically and diagonally. The larger of the two numbers, disregarding fractions, is the number of sheets with the least amount of waste.

Example: How many 4 x 9 sheets can be cut from a 19 x 24 sheet?

Divide:

Vertically

$$\begin{array}{c} 19 \times 24 \\ \begin{array}{|l} \hline \downarrow \\ \hline 4 \times 9 \\ \hline \end{array} \\ \hline 4 \times 2 = 8 \text{ out} \end{array}$$

Diagonally

$$\begin{array}{c} 19 \times 24 \\ \begin{array}{|l} \hline \diagdown \quad \diagup \\ \hline 4 \times 9 \\ \hline \end{array} \\ \hline 6 \times 2 = 12 \text{ out} \end{array}$$

## USEFUL INFORMATION

### PRINTING GRADES CLASSIFICATIONS

Grade No.	Brightness
Premium	88 and above
1	85 to 87.9
2	83 – 84.9
3	79 – 82.9
4	73 – 78.9
5	72 and below
Supercalendered	69

<b>Groundwood Specialties</b>	<b>65 – 80</b>
<b>Directory</b>	<b>59</b>
<b>Newsprint</b>	<b>59 – 65</b>
<b>American Paper Institute Classifications</b>	

### **GRADE DIFFERENTIATION OF COATED SHEETS**

Coated grades of paper are assigned grade numbers 1-5 based mainly on brightness levels. The higher grades, numbers 1-3, contain only pulp made using a chemical process that removes the lignin from the wood pulp. (Lignin is the natural “glue” that holds the fibers together in the tree and tends to darken the color of the pulp.) This type of chemical pulp is referred to as “kraft” which is the German word for strong because it provides good strength characteristics to the finished paper. The pulp is then bleached to a specified brightness level. These types of papers are sometimes called free sheets or wood free grades.

Grades 4 and 5 contain some kraft, but also contain pulp made using a mechanical process which is usually referred to as groundwood, although it can be manufactured in a number of different ways. The lignin remains with the pulp and therefore it can not be bleached economically to the same brightness levels of kraft pulp. These grades are usually called groundwood papers.

The brightness level of coated grades is dependent on the blend of fiber (pulp) types as well as coating make-up. These materials are balanced to produce a product which is designed to meet customer expectations for both runnability and print quality.

### **GRADE DIFFERENTIATION OF UNCOATED SHEETS**

The uncoated grades of paper also contain a combination of kraft and mechanical pulp, with the exact percentages of each determined by the end use, brightness requirements, and cost constraints. Normally, the SC grades would have the highest kraft content, followed by directory paper and newsprint. These grades also contain fillers such as clay, talc, and other mineral type materials, which provide sheet density, brightness, and smoothness. The SC grades would have the highest level, followed by the directory and newsprint grades. The amount of filler is sometimes referred to as ash content.

## General Information

### HANDLING PAPER IN THE PRESSROOM

#### TEMPERATURE CONDITIONING\*

Temperature conditioning means that the paper is stored in the plant and is not unwrapped until it reaches the same temperature as the pressroom where it will be used. Required storage time depends on the size of the skid, carton or rolls and its temperature on arrival. Do not remove or tear the wrapper during storage. Seal rips and holes with tape. To know how long paper should stand before you unwrap it, determine the following two figures and consult the chart.

FIRST: Determine the difference in the paper’s temperature and the temperature of the room where it will be unwrapped.

Cut a small slit in the wrapper and insert a thermometer into the pile. (When you remove it, seal the slit with tape.) If you cannot do this, use the outdoor temperature when the paper arrived as the paper’s temperature.

SECOND: Determine the cubic volume of the skid, carton or roll.

For the cubic foot volume of paper on a skid or case, multiply length x width x height (in inches) and divide by 1,728. For the volume of roll paper in cubic feet, multiply roll diameter x roll diameter x roll length (all in inches) x 3.14 and divide by 6,912.

If a calculation for cubic feet falls between two numbers in the chart, use the next higher number in the chart. Example: If the volume is 32 cubic feet, use the number of hours on the 48 cubic feet line (in the chart below).

Cold paper in a warm room chills the air around the pile and raises its relative humidity. Uncovered edges of paper quickly pick up moisture. Sheet paper edges become wary; roll paper edges become slack. Moisture condenses on very cold paper as it does on a glass of ice water. As the paper warms up, some but not all of the moisture is given off. Waviness or slackness will be reduced but will not disappear with normal conditioning.

### HOURS REQUIRED TO TEMPERATURE CONDITION PAPER\*

Cubic Volume of Paper in Skid, Case or Roll	Difference in Temperature of Paper and Temperature of Room in which it is opened							
	10	15	20	25	30	40	50	60
	Hours paper should stand							
6 cubic ft.	5	9	12	15	18	25	35	54
12 cubic ft.	8	14	18	22	27	38	61	78
24 cubic ft.	11	16	23	28	35	48	67	100
48 cubic ft.	14	19	26	32	38	54	75	109
96 cubic ft.	15	20	27	34	41	57	79	115

\*Above information from Lithographic Technical Foundation Research Progress No. 44

## General Information

### PAPER TESTING

#### BASIS WEIGHT

The designation given to a sheet of paper in terms of weight of 500 sheets (one ream) in the standard size for that grade: Offset – 25” x 38”; Reprographic – 17” x 22”; Tag – 24” x 36”; Vellum Bristol 22 ½ “ x 28 ½ “.

Example:

The basis weight of a typical grade of reprographic paper is 20 lb. Bond (indicating 500 sheets, 17” x 22” weighing 20 pounds)

#### CALIPER

The caliper (or thickness) of paper at a given basis weight determines its bulk and is affected by processing done to get smoothness and porosity. Variations in caliper across the sheet will cause problems such as loose edges, baggy areas and misregister.

Caliper is measured by a micrometer having a foot diameter of 5/8” that is clamped against the sheet at a pressure of 7 psi. Results are reported in ten-thousandths (.0001) of an inch. A caliper reading is usually the average of several tests across the sheet.

### SMOOTHNESS

The smoothness is a measure of paper surface irregularities. This property affects many end uses, particularly the appearance of printing. The test is conducted by clamping the paper against a flat surface and measuring the rate of airflow passing between the two surfaces.

The Sheffield Instrument is the most commonly used and a higher number indicates a rougher sheet. Some typical smoothness values are: 10 – 30 for very smooth coated paper; 100 – 150 for smooth offset and 200 – 250 for Vellum offset.

### POROSITY

Porosity is an indication of the openness of paper, as measured by resistance to the passage of air through the sheet.

Two types of instruments are generally used to measure porosity: Gurley and Sheffield. The Gurley Instrument measures the seconds required for a given volume of air to pass through a single sheet of paper and is generally used for porous papers. A high reading indicates a less porous (more dense) paper. A typical Gurley porosity test for 50lb. smooth offset is 10 – 20 seconds. Sheffield porosity measures the flow rate of air through a single sheet and is generally used for a non-porous or dense sheet. A high Sheffield reading indicates a more open paper. A typical Gurley porosity test for 50 lb. smooth offset is 10 – 20 seconds. Sheffield readings for 60 lb. coated paper would be 10 – 20 units of airflow.

Lynx Opaque Ultra features all the qualities you love about Lynx Opaque-accelerated. With improved print quality, sheet formation, brilliant 96 brightness and true-white shade, Lynx Opaque Ultra is a perfect match for rendering true-to-life skin tones, attractive natural shades and noticeably brighter colors. Lynx Opaque Ultra is the ideal choice for showcasing great ideas on high-quality paper.

In addition to being a remarkable value, Lynx Opaque Ultra is also a responsible choice for the environment. As a prestigious member of the Domtar EarthChoice family of products, Lynx Opaque Ultra sheets and rolls are FSC-Certified as well as SFI Fiber Sourcing Certified.

Lynx Opaque Ultra is available in popular sizes and weights, in smooth or vellum finishes. Recycled Lynx Opaque, with 10% post-consumer fiber, allows you to be environmentally conscious without sacrificing quality or performance.

Lynx Digital Opaque is available in sizes specially tailored for today's digital equipment. When it comes to value, dependability and quality, no other opaque can catch Lynx.

Features:

- FSC Certified
- Excellent opacity for minimal show-through
- Smooth, uniform surface for better resolution
- Consistent runnability on press

## SAPPI FINE PAPER NORTH AMERICA

## Flo Dull Text

Build your brand without breaking the bank—Flo Sheets is a beautiful marriage of quality and affordability.

A dull finish exudes sophistication and refinement. Good ink hold-out allows for true dot, low bleed and low absorption into the paper. Dull finish also offer high readability and create soft, rich, images that add a sense of warmth and familiarity.

## SAPPI FINE PAPER NORTH AMERICA

## Flo Gloss Text

Who better to create the next great economy paper? When we set out to create a best-in-class economy paper, we listened to what customers wanted: a straight-forward, practical, cost-sensitive paper that performs again and again on press.

Flo makes anything printed on it more compelling and more desirable. Outstanding printed ink-gloss adds depth and dimension to images. A blue-white shade and a new brightness of 90 enhance and enrich colors. It's the perfect background for a lot of images and a lot of ink.

Flo is stocked in many sizes for our Perfect Paper System and sheeted on our world-class sheeters. Please call to have a custom size sheeted to meet your special paper needs.

**HOLMEN IGGESUND****Invercote Creato Cover C2S**

Creato has a premium double-coating on each side with a silk finish and a smooth surface. This product is excellent when used for CD covers, brochure and catalogue covers and folders. Choose Invercote products for upscale projects that require sophistication, strength and beauty. Invercote is an extremely high quality paperboard that is significantly whiter than other paperboards.

Invercote doesn't crack or flake, even with the deepest embossing, heaviest creasing or most intricate laser cuts. Unlike standard boards, it's constructed of three bleached fiber layers with longer fibers at the core for strength and shorter fibers on the outside for an optimum surface. Available in several finishes with a variety of coatings, one of the Invercote products should be perfect for your next project.

## Features:

- Exceptional embossing and creasing properties
- Acid-free and of archival quality
- Manufactured to ISO 9001 and ISO 14001 standards
- FDA Approved
- FSC® certified - Available upon request

## Recommended Applications:

Ideal for all graphic applications including brochure and catalogue covers, cards, folders, tags and points of sale materials.

**CTI PAPER USA., INC.**

**Kromekote Coated Cover**

The FSC-certified Kromkote Collection features the most complete offering of cast-coated papers for use in production-rated color copiers, offset presses and HP Indigo presses.

Kromekote is ideal for attention-grabbing print promotions, direct mail, brochures, book covers, business cards, presentation folders, invitations, greeting cards, retail packaging, labels and more.

Details on the new Kromekote Collection

For offset and dry-toner production equipment, the new Kromekote Collection features a "universal" coated one-side sheet and a coated two-side sheet in a variety of weights and sizes. Kromekote is also available for HP Indigo presses in two calipers and sizes in C1S (RIT-certified for HP Indigo) and C2S (RIT certification pending).

Kromekote is available in colors and foils—and as a C1S label in two basis weights. In addition to FSC certification, Kromekote products are acid-free, lignin-free, elemental chlorine free and, with the exception of foils, recyclable.

**WESTROCK MWV LLC****Tango C1S Cartons**

Tango C1S is unsurpassed in its proven reputation for outstanding runnability, printability, consistency on press and in converting. Add high brightness and an ultra smooth surface and Tango C1S becomes the preferred choice for any printed application where quality matters.

Tango C1S boasts a distinctive clean-white styling that delivers crisper colors and sharper contrast while maintaining optimal color fidelity on press to produce eye-catching graphics that demand attention. The uncoated backside styling matches the coated side for consistent visual appeal.

## Features:

- 92 Brightness
- Exceptional surface integrity
- Ultra smooth surface
- Excellent ink holdout
- Fade resistance
- Higher printed gloss factor than most of its competitors
- SFI Certified
- FSC® Certified available upon request

## Recommended Applications:

- Post Cards & Game Cards
- Brochures & Folders
- Packaging
- Book Covers
- Menus & Signs

We have access to the full line of Tango products and special sizes in all calipers.

**NEKOOSA COATED PRODUCTS,LLC**

**Nekoosa U20 Pre-Collated**

Nekoosa Coated Products has a 50 year legacy and strong commitment to innovation. No one comes close to matching our pioneering spirit and track record of 'firsts' and 'bests' in the carbonless paper market. Nekoosa Coated Products' branded carbonless paper is perfect for printing small or large runs of multipart forms, because we are the only carbonless paper manufacturer to offer three products specifically engineered for your preferred printing platform; U20, Universal and Digital carbonless. Expect reliable runnability, vibrant colorful sheets, dark permanent images that transfer through multiple plies and guaranteed performance when you chose to print Nekoosa Coated Products' branded carbonless paper

U20: The only carbonless brand specifically engineered for offset printing, U20 heavyweight carbonless paper leads the market in runnability, appearance, imaging and sustainability. Also certified by the Rochester Institute of Technology for HP Indigo® digital presses.

Universal Carbonless: Universal carbonless paper was carefully designed for the high pressures of offset printing and the high temperatures of digital printing. No matter the run size or printing platform, Universal carbonless is perfect for all carbonless print jobs.

**CTI PAPER USA., INC.****Aspire Petallics Text**

Aspire Petallics metallic card stock, paper and envelopes

Create something special and add some shimmer to your business cards, greeting cards, folders, and brochures. You'll enjoy cross platform printing in digital, offset, color copy and desktop to add stunning subtle effects. Four-color printing simply glows. Even when printed with just one-color, Petallics is lustrous, lively and lovely.

**DOMTAR INDUSTRIES, INC.**

**Earthchoice Opaque Colors**

product features

- 12 eye-pleasing colors including cream and pastels
- A reliable press performer
- Matches EarthChoice® Colors Multipurpose, Vellum Bristol and Index for use in color-coordinated documents
- 65 lb. Opaque Cover meets USPS requirements for 9 pt. guarantee

EarthChoice Colors cut-size items are guaranteed to run on laser and inkjet printers, copiers and plain paper fax machines within the limitations specified by the equipment manufacturer. The guarantee excludes issues related to form design, converting, post processing or equipment. Selection, handling and conditioning of digital papers consistent with equipment manufacturing recommendations is the responsibility of the end use. Domtar encourages testing of digital papers prior to purchase of large quantities. Samples are available by request.

**DOMTAR INDUSTRIES, INC.****Husky Copy Recycled**

Husky® Copy30 is an economical yet versatile paper for internal documents and everyday use. It contains 30% post-consumer content and offers a pleasing 92 brightness, good opacity, and dependable quality. Husky Copy30 is available in a 20 lb. basis weight, in a wide variety of sizes.

Husky Copy30 is also enhanced with ColorLok® Technology, providing a better printing surface. It delivers more vivid colors, bolder blacks and faster drying times when printing on inkjet printers and consistent imaging and trouble-free printing on laser printers.

Husky® Copy100 was developed for customers who prefer paper with high recycled content. Ideal for everyday use, this 20 lb., 90 brightness sheet offers the trouble-free printing and reliable performance you've come to expect from Husky Copy.

As a 100% post-consumer recycled content product, you can feel good knowing that all of the fiber used to make this paper was recovered after being used for its original purpose. Additionally, Husky Copy100 is made with Process Chlorine Free (PCF) fiber and carries the Sustainable Forestry Initiative® (SFI®) Chain-of-Custody certification.

**NEKOOSA COATED PRODUCTS,LLC****Nekoosa Digital Coated**

Developed especially for today's rapidly growing digital print market, our versatile Digital Coated papers suit a variety of applications. Exceptionally smooth printing surfaces, superior gloss, high opacity and excellent body deliver true color reproduction plus the outstanding runnability and bindery performance that define Nekoosa Coated Products.

- Guaranteed for offset, dry toner/laser and HP Indigo printing platforms
- Engineered for variable data imaging and on-demand applications and bindery operations
- Balanced bright white shade ensures quality reproduction
- Packaged in moisture barrier cartons
- Double coated for smooth, consistent imaging surfaces
- Fast drying times for quick turnaround projects
- Custom sizes and pre-punched options available
- 10% post consumer fiber, FSC®-certified
- Exceptional coating for smooth, consistent surfaces
- Made in the USA

**NEKOOSA COATED PRODUCTS,LLC****Synaps Digital XM**

Synaps Digital XM is a polyester based synthetic paper engineered for high heat, dry toner digital printing. Toner fuses with the synthetic paper to make the finished product both durable and naturally resistant to water, chemicals and grease. The polyester based material has incredible tear strength, and can hold up in any environmental condition.

## Digital Productivity

- Designed to perform on all dry toner based platforms
- On demand, high quality printing
- Minimal scrap, waste and time compared to lamination

## Ultimate Durability

- Toner fusing creates a naturally resistant surface to water, chemicals and grease
- Polyester base provides incredible tear strength and dimensional stability
- Eliminates frayed edges and de-lamination issues

## SAPPI FINE PAPER NORTH AMERICA

## Flo Dull Cover

Who better to create the next great economy paper? When we set out to create a best-in-class economy paper, we listened to what customers wanted: a straight-forward, practical, cost-sensitive paper that performs again and again on press.

Flo makes anything printed on it more compelling and more desirable. Outstanding printed ink gloss adds depth and dimension to images. A blue-white shade and a new brightness of 90 enhance and enrich colors. It's the perfect background for a lot of images and a lot of ink.

Flo is stocked in many sizes for our Perfect Paper System and sheeted on our world-class sheeters. Please call to have a custom size sheeted to meet your special paper needs.

## Features:

**CTI PAPER USA., INC.****Kromekote Coated Cover**

The FSC-certified Kromkote Collection features the most complete offering of cast-coated papers for use in production-rated color copiers, offset presses and HP Indigo presses.

Kromekote is ideal for attention-grabbing print promotions, direct mail, brochures, book covers, business cards, presentation folders, invitations, greeting cards, retail packaging, labels and more.

Details on the new Kromekote Collection

For offset and dry-toner production equipment, the new Kromekote Collection features a "universal" coated one-side sheet and a coated two-side sheet in a variety of weights and sizes. Kromekote is also available for HP Indigo presses in two calipers and sizes in C1S (RIT-certified for HP Indigo) and C2S (RIT certification pending).

Kromekote is available in colors and foils—and as a C1S label in two basis weights. In addition to FSC® Certified, Kromekote products are acid-free, lignin-free, elemental chlorine free and, with the exception of foils, recyclable.

**WESTROCK MWV LLC****Tango Digital C2S**

Tango C2S boasts outstanding runnability, printability and consistency on press and in converting. Add in high brightness and an ultra smooth coated surface on two sides with more space for sharp graphics and Tango C2S becomes the preferred choice for any printed application where quality matters.

Tango C2S boasts a distinctive clean-white styling that delivers crisper colors and sharper contrast while maintaining optimal color fidelity on press to produce eye-catching graphics that demand attention. The uncoated backside styling matches the coated side for consistent visual appeal.

## Features:

- 92 Brightness
- Exceptional surface integrity
- Ultra smooth surface
- Fade resistance
- Higher printed gloss factor than most of its competitors
- SFI Certified
- FSC® Certified

## Recommended Applications:

- Brochures & Folders
- Advertising & Direct Mail
- Menus & Signs
- Pharmaceutical
- Dry Food

We have access to the full line of Tango products and special sizes in all calipers.

**SPINNAKER PRESSURE SENSITIVE PRODUCT****Spinnaker Offset Die-Cut Labels**

8 1/2 X 11 label products are manufactured with Spinnaker's Advantedge Technology, a unique manufacturing process by which the outer 1/16" edge of the sheet is adhesive-free virtually eliminating the risk of adhesive ooze and contamination in digital equipment.

## Corrugated Polypropylene

Corrugated Polypropylene is sturdy corrugated plastic sheeting extruded from either polypropylene. It is more durable than corrugated fiberboard, but lighter in weight than wood and solid PVC sheets. Its fluted ribs support both surfaces, making Corrugated Polypropylene lightweight, tough and abuse resistant. It's also chemical and water resistant, making it an ideal choice for numerous commercial and industrial applications.

## NEKOOSA COATED PRODUCTS,LLC

### Synaps Digital XM

Synaps Digital XM is a polyester based synthetic paper engineered for high heat, dry toner digital printing. Toner fuses with the synthetic paper to make the finished product both durable and naturally resistant to water, chemicals and grease. The polyester based material has incredible tear strength, and can hold up in any environmental condition.

#### Digital Productivity

- Designed to perform on all dry toner based platforms
- On demand, high quality printing
- Minimal scrap, waste and time compared to lamination

#### Ultimate Durability

- Toner fusing creates a naturally resistant surface to water, chemicals and grease
- Polyester base provides incredible tear strength and dimensional stability
- Eliminates frayed edges and de-lamination issues

**R. TAPE CORP****VinylEfx**

Decorative and Outdoor Durable, Printable, Metallized Vinyls, VinylEfx® Metallized Media Printable VinylEfx® films allow you to transform ordinary printing into extraordinary printing! If you can print on vinyl, you can print on VinylEfx® films...because it is vinyl. These eye-catching, glittering vinyls set your graphics apart from other printed images. VinylEfx® prints attract more attention, so your marketing message is noticed, read and remembered.

For demanding applications such as truck and boat graphics, Durable Series VinylEfx® films are a superior alternative to the expensive simulated gold leaf films. Decorative Series VinylEfx® films are perfect for extended indoor applications, such as POP graphics and for use in window displays. Items stocked below are all Decorative Series for indoor use.

Vinyl facestock signs will draw attention and command higher selling prices and profits. Available in both indoor and outdoor compatible series

**Features:**

Printable – Eco Solvent, Latex, Solvent, Thermal Transfer, UV Cuts & weeds just like intermediate vinyl

**Applications:**

POP posters & displays, Counter mats, Vehicle graphics, Window graphics & displays, Trade show graphics, Boat decals and graphics, Race car decals and graphics

**SPINNAKER COATING****Print Vinyl - Avery Cast MPI 1005**

Avery MPI 1005 Supercast Series Vinyl is a premium gloss opaque vinyl designed for use in fleet marking and vehicle wrap as well as corporate identity applications.

MPI 1005 Supercast provides superior conform-ability to irregular surfaces such as compound curves and corrugations. Easy Apply and Easy Apply RS features offer the benefits of reduced wrinkling and air entrapment inherent in the application of decals. The RS feature also provides repositionability and slide-ability for exact positioning.

**Features:**

Superior conform-ability to irregular substrates

The air egress technology on Easy Apply and Easy Apply RS films helps eliminate wrinkles and bubbles

RS feature provides slide-ability allows for easy positioning \* High gloss finish

Outstanding durability and outdoor performance \* Dimensionally stable liner for easy converting

Excellent dimensional stability \* Long term removable provides permanent adhesion, but removes cleanly

**Applications:**

Wall Murals, POP/Trade show, Outdoor Signs, Floor Signs, Fleet Vehicle Marine/Watercraft

**MACTAC****Print Vinyl - MPI 2900 Series****MPI 2903 GLOSS**

Glossy 3.0 mil calendared vinyl film which offer exceptional value for applications requiring a mid-term durable product combined with an opaque, permanent adhesive. Up to 4-year durability unprinted; up to 3-year outdoor durability printed with approved printer/inks and overlaminated or clear coated.

**MPI 2923**

A 3.4 mil calendared vinyl film which offer exceptional value for applications requiring a mid-term durable product combined with an opaque, permanent adhesive. Up to 5-year durability unprinted; up to 4-year outdoor durability printed with approved printer/inks and overlaminated or clear coated.

**Features:**

Gray adhesive provides opacity to cover whatever is underneath

\* MPI2903 Gloss Easy Apply gloss finish

\* MPI2923 Matte Easy Apply, matte finish

Great image clarity and color pop

Good durability and outdoor performance for short to mid-term applications

ICC profiles available on Avery website ([www.iccprofiles.averygraphics.com](http://www.iccprofiles.averygraphics.com))

**Applications:**

Wall Murals, POP/Trade Show Displays, Outdoor Signs

Avery MPI 2611 Wall Film

A tough, scuff-resistant, flexible calendared vinyl film designed specifically for wall graphic applications. Avery Dennison® MPI 2611 Wall film is so easy to install and remove, anyone can do it. Safe for most walls, this durable calendared film does not require an overlaminate and offers excellent ink receptivity.

Features: 100% opacity, completely covers whatever is underneath, Matte finish, Great image clarity and color pop, Dimensionally stable liner for easy converting, ASTM E84 Class 1 or A rating.

**Applications:**

Wall murals \* Point Of Purchase Displays \* Trade shows

## Foam Board

Features a resilient polystyrene core that "bounces back" after handling, cutting or mounting. Foam Board is strong yet lightweight...rigid yet versatile. Its paper surface has a double-clay coating that yields an ultra-smooth finish. Having both a brilliant white and a wide range of colors, Foam Board assures you a quality performance no matter how you use it.

Amazingly Light Weight \* "Memory" Core  
Ultra Smooth Surfaces \* Double-Clay Coating  
Available in 1/8", 3/16", 3/8", and 1/2"  
in a variety of sizes

### Mighty Core

When you need a durable, extra-strong performer, EnCore® MightyCore® Foam Board is your best bet. The ultra smooth surface provides excellent ink coverage and adherence. The rigid, rock-solid center makes it especially suitable for large fabricated pieces. The construction of MightyCore helps prevent warping, bowing and twisting and creates a "no preparation" surface for printing and applications that need a rigid substrate. Classic White, White-on-Black and Black-on-Black in a variety of thickness and size combinations.

**KOMMERLING USA, INC****Foam PVC**

KOMATEX is a lightweight closed-cell, free foam, rigid PVC sheet. It is homogeneously colored with a matte finish that is tough and versatile enough for many of today's applications. KOMATEX is available in 12 standard vibrant PVC color sheets, plus black and white, and a variety of thicknesses and sizes to fit most uses. The matte surface is the perfect substrate for screen printing, painting, laminating, vinyl lettering and forming projects. KOMATEX can be sawed, drilled, bent and fabricated using ordinary (plastic) tools and fasteners. KOMATEX is manufactured to be used for interior and limited exterior applications.

**PETG Clear**

PETG is a transparent copolyester that offers a unique balance of physical properties and ease of fabrication. PETG is the ideal material for applications that require deep draws, complex die cuts and precise molded-in details without sacrificing structural integrity. It can also be easily decorated by painting, silk screening or hot stamping. PETG is heavily used in the POP display and store fixture industries.

## Polyolith

Polyolith is an extremely versatile, polymer-based material that prints like paper but boasts the best properties of plastic. Polyolith is far stronger than conventional paper and supports a massive selection of grades, gauges, finishes which make Polyolith a serious consideration for almost any application. Take a close look around your house or the next time you walk through a store. There's a good chance what you're holding is made of Polyolith.

Applications :

## NEKOOSA COATED PRODUCTS,LLC

### Synaps Digital XM

Synaps Digital XM is a polyester based synthetic paper engineered for high heat, dry toner digital printing. Toner fuses with the synthetic paper to make the finished product both durable and naturally resistant to water, chemicals and grease. The polyester based material has incredible tear strength, and can hold up in any environmental condition.

Digital Productivity  
Designed to perform on all dry toner based platforms  
On demand, high quality printing  
Minimal scrap, waste and time compared to lamination

Ultimate Durability  
Toner fusing creates a naturally resistant surface to water, chemicals and grease  
Polyester base provides incredible tear strength and dimensional stability  
Eliminates frayed edges and de-lamination issues

**NEKOOSA COATED PRODUCTS,LLC****Synaps OM**

Synaps OM effortless, efficient processing combined with beauty and strength makes Synaps® OM the new standard for offset synthetics. Synaps® OM is a next generation synthetic paper that is made from high grade polyester and high performance printable topcoat. No other product comes close to matching its exceptionally fast drying time and print quality, all with standard offset inks. The polyester film provides tear resistance, excellent dimensional stability, unmatched lay-flat characteristics, along with the look and feel of a luxury paper. Synaps® OM delivers high throughput and quick turnaround using standard inks, which enables offset printers of any size to win new opportunities replacing lamination for menus and POP signage. To top it off, Synaps® OM stands up to the toughest indoor and outdoor environments. Synaps® OM is designed for offset printing applications as well as HP Indigo, screen, flexo, gravure and UV-curable inkjet printing.

- Superior alternative to lamination
- Dries like paper for quick processing
- Exceptional printing using standard inks
- Waterproof, tear proof, and weather resistant
- Lays perfectly flat, even if shipped in a tube
- Look and feel of a luxury paper
- RIT certified for HP Indigo printers

**R. TAPE CORP****Synaps OM Roll**

Synaps is a next generation synthetic print media made from high grade polyester film, not vinyl. Polyester films have superior dimensional stability and unmatched lay-flat characteristics. The result: great looking prints that hold their shape and color without extra laminating or mounting.

Synaps OM features exceptional durability, fast drying times and a UV resistant base stock. The stability and weatherproof qualities of the material allow for a variety of applications including:

Point of sales displays \* Wide format banners \* Indoor and outdoor prints  
Trade show graphics \* Retractable banner stands  
and hanging sign-age that won't bow, curl, delaminate or fade.

Synaps OM is compatible with most UV and latex printers. Printer profile can be found for various HP DesignJet and HP Latex platforms at [www.rtape.com/support/icc-profiles](http://www.rtape.com/support/icc-profiles).

Synaps OM is available in 36" x 100 ft. and 54" x 100 ft. 5, 8 and 10 mil. wide format rolls. Custom rolls, including 14 mil. thickness, are available upon request.

**R. TAPE CORP****VinylEfx**

VinylEfx® films allow you to transform ordinary graphics into extraordinary statements! These eye-catching, glittering vinyls set your graphics apart from other printed images. Signs produced with VinylEfx® attract more attention, so your marketing message is noticed, read and remembered. That WOW factor is your competitive edge. For demanding applications such as truck and boat graphics, durable series VinylEfx® films are a superior alternative to the expensive simulated gold leaf films. Decorative Series VinylEfx® films are perfect for extended indoor applications, such as P.O.P. graphics and for use in window displays.
