GO-SLOW! ANTI-GULPING DOG DISH

- Great solution for dogs who eat and drink quickly
- Encourages eating / drinking at a slower pace preventing indigestion, vomiting and bloating
- Dishwasher safe

Capacity
Small: 300 mL
Medium: 600 mL

Dogs are well known for gulping down their food or water quickly. Because they swallow excess air along with their food or water, this rapid eating can cause indigestion, vomiting, and in extreme cases, a painful condition called gastric dilation volvulus (GDV or “bloat”) which can be life-threatening. The Dogit® Anti-Gulping Dog Dish encourages your pet to eat or drink at a slower pace. This slower pace helps reduce excess air intake, leading to improved digestion and reducing the risk of bloat. The Dogit® Anti-Gulping Dog Dish can be used as either a water or food dish (suitable for wet or dry food).
