

HP Digital Projectors

If your presentation looks good, you look good.

HP digital projectors are perfect for professionals who present in conference or training rooms onsite or on the road—to small audiences or large.

- Color by HP—What you see on your laptop is what you see projected on the screen—accurate in all light conditions.
- Texas Instrument's Digital Light Processing (DLP) technology provides superb image quality year in and year out.
- Legendary HP reliability and support—24/7 support seven days a week means you get the help you need when you need it, where you need it.

Mobile projectors for the road

From small, lightweight, value priced models to deluxe executive models with wireless and network connectivity, HP's mobile line is ready to present whenever and wherever you are.

- Up to 2000 ANSI (max) lumens of lighting power
- Super lightweight micro-portables—as light as 2.2 pounds and small enough to slip into the pocket of your carry-on
- Advanced features like automatic keystone correction, image optimization and unique tower design to set you apart from your competition

Versatile portable for your classroom or training room

From your home to the classroom or board room, these versatile projectors are loaded with features to keep your audience's attention.

- Up to 2000 ANSI (max) lumens of lighting intensity for images bright enough to be effective even in rooms with the lights on
- Versatile connections (includes monitor pass-through) supporting multiple inputs and VGA pass-through for mixed use environments
- Image optimization for truly mixed use with impressive business graphics and stunning video color

Powerful installed models for professional environments

From large classrooms to board rooms, these powerful projectors offer features not available from anyone but HP.

- Up to 3100 ANSI (max) lumens (3750 in greyscale) of brightness for large screens and large audiences
- The industry's only dual color wheel technology for unmatched theater color or super bright business graphics and a black and white mode for specialty applications like medical and satellite imaging
- Easily interfaced to all major room control suppliers and multiple lens options to work in any environment
- IT friendly network manageability and HP presenter software for easy presenting from the network, wirelessly or wired, or from a memory device—as easy as it is from a VGA cable
