# FOR RELAXING BREASTFEEDING

also available unbranded

Available in three sizes: S, M and L

## NUK Ready-to-Use 24-h Nipple Shield

**Clinically tested\***. Ready-to-use. Sterile in accordance with the European Pharmacopoeia (Eur.Ph.). If used hygienically, the Nipple Shield can be used by the same user several times. Dispose of after max. 24 hours. Follow instructions for use.

Individually packed, sterile

### The advantages at a glance:

- Optimised shape for more skin contact (92% of mothers confirm that the NUK Nipple Shield gives the baby's nose enough space.\*)
- With a variety of surface structures and four openings for a calm, natural drinking sensation
- Secure hold in any breastfeeding position
- Made of gossamer-thin silicone

\* Tested by 95 mothers and 33 nurses in an independent clinical trial in Germany 2017

# NUK SOOTHERS FÜR PREMATURE BABIES

**NEW**

## NUK Soothers for Premature Babies

Clinically proven\* special soothers completely made of extra soft silicone in food-grade quality. Available in two extra-small sizes, adapted to respective mouth size for stimulation and training of the natural sucking reflex. Suitable for CPAP ventilation and the use of feeding tubes. Hygienically individually packaged, germ-free (EO-free method) and ready to use.

### The advantages at a glance:

- Clinically proven\* special soothers
- Easy handling for users due to various gripping options
- High softness due to 100 percent extra soft silicone in food-grade quality
- Low weight (only 3.5 g for size XS)
- Soft mouth shield:
  - > suitable for CPAP ventilation and use of feeding tubes
  - > compliments the shape of the little face and offers a seamless transition to the orthodontically shaped baglet
- Medical devices (CE) Class 1, for clinical use only and restricted use due to small mouth shield (not compliant with EN 1400)

# FOR HEALTHY OVERALL DEVELOPMENT

**NEW**  
Available from  
June 2022

## NUK Star Disposable Soother made of latex or silicone

The NUK Star Soother has an anatomically shaped mouthshield and is particularly breastfeeding-friendly\*. The NUK Star nestles gently against the palate thanks to the special soft zone on the top. 99% of babies can be soothed by it.\*

The NUK Star Soother is also available in size 0. This special size has been developed in collaboration with medical experts and is for small and low-weight babies aged 0-2 months. Available as sterile, ready-to-use in individual packaging. Soothers comply with the European safety standard EN1400. Latex Soothers are made of natural rubber latex.

### Latex ...

Latex is a natural plant product (natural rubber latex). Thanks to its softness and warmth, it comes close to the texture of a mother's breast. At the same time, latex is very bite and tear resistant.

### ... or Silicone.

Silicone is a proven synthetic material which is especially clear and transparent. In addition, silicone is absolutely neutral and has no taste or smell.

## The NUK Soother Size Concept

The system which matches the natural development of your child's jaw in an optimal way

Size 0 (0-2 m)  
Special size for small newborns from 0-2 months

Size 1 (0-6 m)

Size 2 (6-18 m)

Age recommendation only – please consider the individual development of your child.

# PROVEN A MILLION TIMES OVER IN HOSPITALS

## NUK Disposable Teats for Premature Babies (weighing less than 1,750 g)

A clinically tested and orthodontically shaped special teat made of especially soft natural latex material, adjusted to the small cavity of baby's mouth. Available with two different feed hole sizes. Sterile, individually packed and ready-to-use. Latex teats are made of natural rubber latex.

## NUK Classic Disposable Teats of TPE (Thermoplastic Elastomer)

Teat and screw ring come in one piece. Sterile, individually packed and ready-to-use.

### The different teat hole sizes

are indicated by the screw ring colours with all NUK Disposable Teats.

- Yellow = small feed hole  
For thin liquids, such as tea, breast milk, etc.
- Green = large feed hole  
For thicker feeds
- White = medium feed hole  
For formula milk
- Orange = cross-cut  
For thicker feeds and dietary needs

## FOR SPECIAL REQUIREMENTS ...

### NUK First Choice Disposable Teats

It is not only the orthodontic shape of NUK First Choice Disposable Teats, but also the softness of the material which supports the natural drinking sensation. Latex teats are made of natural rubber latex.

### NUK Cleft Palate Teat for Classic and Wide-Neck Bottles

A teat for infants with untreated cleft palates. With arched top to close the open cleft of the palate whilst preventing food from reaching the respiratory tract. Enables food to be mixed with saliva, which is important for good digestion.

**Teat feed hole needs to be punctured individually according to the requirements and advice of the doctor.** Latex teats are made of natural rubber latex.

### NUK Cleft Lip Teat for Classic and Wide-Neck Bottles

A teat for infants who have a unilateral cleft with implemented palate plate (drinking plate) or – exceptionally – also bilateral clefts with implemented palate plate. The NUK Cleft Lip Teat promotes the sucking, chewing and milking action of the infant and, in this way, helps infants achieve an almost totally natural sucking process. The often experienced symptoms, such as choking, burping or even vomiting, are reduced considerably. Pre-surgery orthodontic treatments will not be affected. Latex teats are made of natural rubber latex.

## AND FOR MEDICAL PRACTICE

- 1 **Soother size 1 silicone**  
with affixed silicone tube and opening in baglet
- 2 **Mouthshield**  
anatomically shaped
- 3 **Button**  
with channel for securing strap
- 4 **Silicone tube (40 cm)**  
for injecting suitable contrast media
- 5 **Tube adaptor (fem. Luer Lock)**  
for placing syringe with contrast media
- 6 **Elastic securing strap**  
for securing to the infant's head

### NUK X-Ray Soother

The NUK X-Ray Soother is a radiologic aid helping diagnosis of diseases and malformations of the gullet. It has been especially developed to facilitate administration of contrast media, thus enabling x-ray examinations with babies and infants.

The special soother enables exact dosing of the contrast media for injection. Baby's natural urge to suck ensures that the contrast media goes via the tube and soother into the mouth.

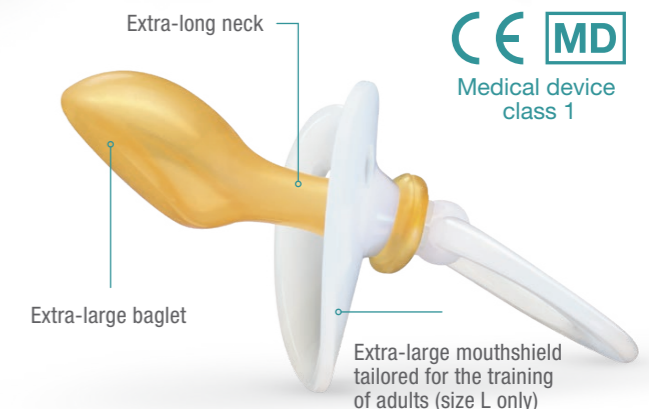

**Important note:** A smooth application of the NUK X-Ray soother requires using contrast media which is water soluble, low osmolar and contains iodine. For more information please read the instruction leaflet.

### NUK Therapeutic Trainer

Applied as therapeutic instrument, it helps children and adults to normalise malfunctions in oral motor activity, e.g., in cases of oral breathing, disorders of sucking, chewing, swallowing, speaking as well as mimic gestures. Can be used in myotherapeutic training according to Beatriz A. E. Padovan. Latex teats are made of natural rubber latex.

# AS QUICK AS BABY'S APPETITE

**NEW**

## NUK Hospital Bottle Warmer

A new generation of bottle warmers – uses light technology to bring baby food to the right feeding temperature in a matter of minutes: uniform, gentle and safe heating of baby feeding bottles with infrared light.

The NUK Hospital Bottle Warmer is easy to operate with just one button and can also be used directly in the patient's room.

- **For all NUK bottles**  
From the 45 ml hospital bottle to the 260 ml Nature Sense bottle.
- **Hygienically safe**  
No need to add water.
- **No overheating of baby food**  
All the precious nutrients in breast milk are preserved.
- **Automatic keep-warm setting**  
Bottle remains at feeding temperature for up to 60 minutes.
- **Thawing function**  
Sensor technology detects frozen baby food.
- **Easy to clean**  
Suitable for standard hospital wipe disinfection (e. g. Schülke mikrocid sensitive wipes; more see instruction for use).
- **Fits hospital wall rail systems**  
Fixing clamp included in scope of supply.
- **Anti-theft device**  
Security slot on rear of device.
- **Protection from ingress of dust and particles**  
Replaceable filter (class 3) and filter holder in base.

**FOR HOSPITAL STAFF AND PARENTS**

Button with LED indicating the operating status.

Designed for wall mounting or to stand on a table.

Fixing clamp for wall rail systems.

**PRE-STERILISED AND READY-TO-USE**

# POPULAR PRODUCTS FROM THE NUK RANGE

## NUK Vario Express

Bottles and accessories are reliably sterilised in only 6 minutes (without heating-up phase). A particularly gentle method of sterilising using hot steam and requiring no chemicals at all. Maximum flexibility thanks to removeable basket and 6 moveable poles – accepts large and small items. If the lid remains closed after sterilisation, the contents remain germ-free for up to 24 hours.

# FOR HYGIENIC ULTRASONIC EXAMINATIONS

Latex Cover

## Latex Cover

Latex Covers made of pure natural rubber latex ensure maximum hygiene during vaginal ultrasonic examinations. They are placed on the ultrasonic probe and can be rolled down up to a length of 18 cm. Despite the thin material, the covers are extremely resilient and elastic.

All products have a diameter of 34 mm, are packed germ-reduced, ready-to-use and for single-use only. MAPA protective sleeves have exceptionally good physical properties. Nevertheless, the thin material's load-bearing capacity is limited, especially in the case of local overstretching. The instructions for use must be observed!

Latex Cover, 100 pcs box
