

# LexisNexis® Virtual Identity Search and Report

Take Accurint® for Government to the next level with social networking information.

## Access social networking information

LexisNexis® Virtual Identity Search and Report provides agencies with an alternate view of a person of interest: that person's virtual presence. With this enhanced search functionality, you can determine if a virtual identity or Web footprint exists for your person of interest within seconds, without having to access multiple sites—helping save you and your agency significant time and effort. Investigators and researchers can now input a subject's email address into Accurint® for Government which will indicate whether that email address may be linked to certain social networking sites (e.g., Facebook®, Yahoo!®, LinkedIn®).

The screenshot displays the LexisNexis Virtual Identity Search and Report interface. On the left, a report titled "Virtual Identity Report" dated 01/18/2011 03:47 PM shows subject information for JOHN DOE (DOB: 05/31/1950) and lists several email addresses: JOHN.DOE@COMCAST.NET, JOHN\_DOE@ARTLINK.NET, JOHN\_DOE@BIRDO.COM, JOHN\_DOE@YAHOO.COM, and JOHN.DOE@VIRIDOC.COM. Below this, subject information includes Name, Height (5'6"), Age (50), and Images. A section for "Relevant Links to Subject" is also visible.

The main interface is titled "LexisNexis® Accurint® for Government" and features a navigation menu with tabs for My Accurint, People, Business, Assets, Licenses, Courts, Phones, and Healthcare. The "Virtual Identity" tab is selected. The search form allows users to find a virtual identity by Name & Address or Email Address. The form includes fields for Last Name (DOE), First Name (JOHN), Middle Name, SSN, Street Address, City, State (CA), Zip, and DOB. A LexID field is also present. A "Reference:" field is at the bottom. A "SEARCH" button and a "CLEAR FORM" button are located to the right of the form. A note on the right states: "Important: The Public Records and commercially available data sources used in this system have errors. Data is sometimes entered poorly, processed incorrectly and is generally not free from defect. Read More."

## Social Network Sites Searched:

Wishlist	LiveJournal	TigerDirect
Bebo	Match.com	Twitter®
BlackPlanet	metroFLOG	Vox
CafeMom	Multiply	WordPress
Care2	Myspace	Yahoo!®
Costco	myYearbook	Youku
Dailymotion	NBA	
Facebook	Netlog	
Flickr®	Pandora	
Flixster	PerfSpot	
Friendster	Photobucket	
hi5	Plaxo	
Hotels.com	Playlist.com	
Hyves	Tagged	
Los Angeles Times®	The New York Times®	
LinkedIn	The Washington Post®	

Additionally, when you request a Virtual Identity Report in Accurint, you will receive a list of all matching social network and/or virtual identity public-facing pages (URLs) when a match is found between the search subject's email address and a site's "registered" email address.

## Capture a more complete view

- Expand your "go-to" investigative tool with access to more than 40 social networking sites.
- Access a single tool through which you can search public records and social networking information.
- Fuel your investigations by uncovering virtual identities and Web footprints for persons of interest.
- Enhance your view of subjects and persons of interest by identifying virtual relationships and associations.

The Accurint for Government is not provided by "consumer reporting agencies," as that term is defined in the Fair Credit Reporting Act (15 U.S.C. § 1681, et seq.) ("FCRA") and does not constitute "consumer reports," as that term is defined in the FCRA. Accordingly, Accurint for Government for may not be used in whole or in part as a factor in determining eligibility for credit, insurance, employment or another purpose in connection with which a consumer report may be used under the FCRA.

Due to the nature of the origin of public record information, the public records and commercially available data sources used in reports may contain errors. Source data is sometimes reported or entered inaccurately, processed poorly or incorrectly, and is generally not free from defect. This product or service aggregates and reports data, as provided by the public records and commercially available data sources, and is not the source of the data, nor is it a comprehensive compilation of the data. Before relying on any data, it should be independently verified.
