PREFACE.

LITTLE explanation is required of the arrangement followed in this Volume, beyond calling attention to the division of this Volume into two parts: the first forms a combined Index to the three Volumes of the Memoirs, the Special Papers, the Jerusalem Volume, the Flora and Fauna of Palestine, and the Geological Survey; and the second is an Index to the Arabic and English Name Lists. This division was considered advisable in order to avoid the continual use of reference letters to the Name Lists, which would otherwise have been required. The large number of entries rendered it absolutely necessary to make them as brief as possible; but it is hoped that it will be found that perspicuity has not been sacrificed to brevity. A full explanation of the reference letters used will be found on the first page.

The short Hebrew Index at the end of the Volume has been kindly furnished by Dr. W. Aldis Wright.

PREFACE TO ELECTRONIC EDITION.

More than a hundred years after the publication of the Survey of Western Palestine, its continued value is well-known and is evidenced by the recent reprint and librarians' propensity to store the work in restricted areas of the library. Production of this electronic edition of the index thus makes it more accessible to students and researchers. In addition, the search capabilities of an electronic work are a significant advantage.

This index was created manually, with hundreds of hours of typing from various contributors including Rebecca Bange, Jamie Erselius, Cynthia Hawkins, Kelly Hermann, Lidia Kotenkov, A. D. Riddle, Seth Rodriguez, and Andrei Tsvirinko. The entire index was typed by hand and the whole was checked and double-checked. The challenge of creating this electronic index was not only in its size but in the foreign words and numerous accent marks. The work of each contributor is gratefully acknowledged.
