KX-NSX - Unified Communications Server

The Panasonic KX-NSX series delivers the next generation of communication systems to meet today's work style. KX-NSX provides services integrated with the user's work style. Users are classified into three groups to better facilitate their management: Normal users, Mobile users and Advanced users. KX-NSX has UC Pro support, video communication functions, a built-in call centre function (external CTI servers not required), partner application linking, and more. These functions make business communication more efficient and enable users to utilise limited resources effectively.

KX-HTS32 - Compact Hybrid PBX

The KX-HTS32 is an advanced Hybrid IP-PBX for SMB. It has a capacity for up to 24 extensions to exactly meet the scale of SMB market. Priced affordably while possessing all the necessary standard functions built-in. The KX-HTS32 is a SIP trunk ready system, and no external devices need to be purchased for IP usage. Another unique feature is the built-in router and Wi-Fi access point. The KX-HTS32 works as a voice processing platform and also as a network device. A full line-up of terminals is available for the KX-HTS32, enabling optimal communication for SMB businesses. This system also achieves exclusive simplicity for setup and maintenance. Even for business trends such as BYOD (Bring Your Own Devices), the KX-HTS32 brings you a solution with built-in functionality.

Estos Applications

ESTOS MetaDirectory

The MetaDirectory is a LDAP server for quick access to contact data. It merges different databases into a single, consistent LDAP directory that can be used across the company. As a result, relevant data, such as telephone numbers and other contact details, are available to all employees. The intelligent data processing allows for easy searching and the fast presentation of results - even with large databases.

ESTOS UC Connect Mobility & Web Service

UCConnect is a cloud platform by estos. It offers companies that use the hybrid cloud and therefore run a mixture of their own hardware and cloud software components, a variety of building blocks. UCConnect includes modules for the hybrid cloud. The online services available via UCConnect simplify the installation of the app or the communication via the contact portal or multimedia business card.

Ferrari electronic AG Applications

Call recording is important for a number of industries and service providers.

- Financial institutions need to provide proof for any orders placed or any contracts closed during a phone call.
- Professionals providing consulting services in legal matters or health care may be liable for miscounselling and a recording of the phone call could help to document the conversation.
- Call centers may need to demonstrate to their clients that the quality of their customer communication is indeed high.
- Operators of emergency phone numbers (police, fire brigade, ambulance) are legally required to record any emergency calls.

OM CallRecording VoIP

OM CallRecording VoIP records Voiceover-IP telephony calls. The software allows the operation of devices for traditional phone lines (such as ISDN BRI, ISDN PRI, analog lines) simultaneously with the VoIP recorder using the same data base and client software. The solution offers state of the art call management and real time monitoring functions (line status display, discreet listening, manual recording control). A number of codecs (G.711, GSM, MP3, G.729a) are available for interoperability on a wide range of SIP trunks. Fax recovery works for both T.30 over G.711 pass-through mode and T.38.
