

Index to Volume 58, 1973

The single alphabetical index which follows combines subject entries (in Roman type), author's names (in capitals), and titles of books reviewed (in italics). Minerals are entered alphabetically by name. Where the name has a prefix such as α -quartz or alkali-feldspar, the mineral is indexed as quartz, α - or feldspar, alkali-. The page number cited repre-

sents the first page of the article associated with the entry.

The Editorial Office will welcome suggestions and corrections from users of this index. A similar form and style will be used for the Decennial Index (Volumes 51-60, 1966-1975) which, like this one, is being compiled by Dr. Wen H. Huang, aided by Mary Holliman, Maureen Foulds, and Vera Good.
