

# INDEX

## Arsenic minerals (in which As is essential to the crystal structure)

*Formulae of selected arsenic minerals are listed in Chapter 2, APPENDIX I (p. 174-183).*

|                              |                                     |                                |
|------------------------------|-------------------------------------|--------------------------------|
| abernathyite                 | 145                                 | 274, 280-282, 295, 297, 301,   |
| adamite                      | 23, 31, 39, 44, 115, 116, 118, 240, | 304, 317, 350, 355-357, 359,   |
|                              | 243, 311, 474, 476, 594, 610-615,   | 361, 366, 436, 473-475, 477,   |
|                              | 620, 624, 627                       | 483, 486, 490-492, 494-497,    |
| adelite                      | 23, 111, 112, 476, 477, 519         | 537, 539, 542, 544, 546, 549,  |
| aerugite                     | 130                                 | 554, 559, 561-564, 567, 571,   |
| agardite                     | 75, 111, 624                        | 574-578, 581, 624              |
| akrochordite                 | 23, 88, 95, 96                      | arsenovanmeersscheite          |
| alarsite                     | 26, 84, 85, 90                      | 145                            |
| algononite                   | 23                                  | arsentsumebite                 |
| alacranite                   | 28, 29                              | 95, 610-613, 624               |
| allactite                    | 23, 24, 104, 124                    | arsenuranospathite             |
| alumopharmacosiderite        | 39, 43, 75, 109                     | 145                            |
| andyrobertsite               | 100, 101, 624                       | arsenuranylite                 |
| angelellite                  | 26, 33, 36, 118, 312, 348, 364      | 145                            |
| annabergite                  | 23, 26, 48, 51, 57, 69,             | arthurite                      |
|                              | 73-76, 96, 274, 476, 627            | 120, 121, 144, 474, 476        |
| arakiite                     | 143, 144                            | asbecasite                     |
| ardennite                    | 25                                  | 24, 133, 139                   |
| arhbarite                    | 107                                 | asselbornite                   |
| armangite                    | 23, 131, 138, 141, 142              | 145                            |
| arsenbrackebuschite          | 95, 624                             | atelestite                     |
| arsendescloizite             | 112, 476, 624                       | 128                            |
| arsenic, native or elemental | 3, 4, 218,                          | attikaite                      |
|                              | 248, 266, 272, 274,                 | 75, 144                        |
|                              | 357, 475, 476, 612                  | auriacusite                    |
| arseniopleite                | 23, 122                             | 118                            |
| arseniosiderite              | 23, 33-36, 38, 40, 41,              | austinite                      |
|                              | 48, 50, 51, 55, 56, 68, 76,         | 23, 112, 244, 474, 476, 594,   |
|                              | 77, 102, 146, 147, 274, 284,        | 612, 613, 620, 624, 627        |
|                              | 309, 356, 363, 474, 476,            | barahonaite-(Al)               |
|                              | 513, 564, 572-574                   | 75, 144, 146                   |
| arsenoclasite                | 23, 104, 123, 476, 624              | barahonaite-(Fe)               |
| arsenocrandallite            | 106                                 | 146                            |
| arsenoflorencite             | 21                                  | barian tomichite               |
| arsenoflorencite-(Ce)        | 106                                 | 140                            |
| arsenoflorencite-(La)        | 106                                 | bariopharmacosiderite          |
| arsenogorceixite             | 106, 476                            | 23, 33, 34, 109                |
| arsenogoyazite               | 75, 106, 624                        | baumhauerite                   |
| arsenohopeite                | 624                                 | 23                             |
| arsenolite                   | 28-31, 33, 35, 37, 38, 40,          | bayldonite                     |
|                              | 42, 43, 48, 49, 51-53, 59, 61,      | 65, 67, 74, 75, 97, 244, 476,  |
|                              | 62, 69, 70, 73-75, 77, 218,         | 594, 602, 603, 610-613,        |
|                              | 221-224, 227, 228, 283, 357,        | 617-619, 621, 624, 627         |
|                              | 476, 477, 479, 487, 489,            | bearsite                       |
|                              | 491-494, 498, 539, 545              | 84, 87                         |
| arsenopyrite                 | 3, 20-23, 27, 33-43, 45-53,         | bendadaite                     |
|                              | 54-59, 61, 62, 68-71, 73-75,        | 120                            |
|                              | 77, 78, 147, 246, 265, 272,         | bergsлагite                    |
|                              |                                     | 23, 84, 85, 88                 |
|                              |                                     | berzeliite                     |
|                              |                                     | 23, 24, 85, 104                |
|                              |                                     | beta-roselite                  |
|                              |                                     | 94                             |
