

UPPSALA
UNIVERSITET

RUDBECK SEMINAR

Tumor biology, genetics and molecular biology

Rudbecksalen, C11
Thursday June 1 at 13:00

Paul Northcott

St. Jude Children's Research Hospital, Memphis,
USA

“Multidimensional Genomic Portraits of
Medulloblastoma Subtypes”

Host: Fredrik Swartling

This Plenary Seminar Series is also a Research Course open to all graduate students.

Johanna Andrae – Anna Dimberg – Magnus Essand – Martin Ingelsson
Masood Kamali-Moghaddam – Petra Magnusson – Patrick Micke – Marika Nestor
Richard Rosenquist – Lene Uhrbom

rudbeckseminars@igp.uu.se

The Rudbeck Seminar Series at Uppsala University started in 2000, and we have since then hosted many distinguished speakers including several Nobel laureates. The scope of the Rudbeck Seminars is broad including genetics, tumor biology, immunology molecular and cell biology. The seminar series serves the dual purpose of being a graduate course for PhD students, as well as a seminar series for senior researchers.
