

# Native Plant Species in Te Urewera National Park

This list of 563 plant species is drawn from a number of published and unpublished lists prepared by various authors over the last few decades. The species names have been updated where necessary. It provides, as far as possible, a comprehensive list for the botanist as a tool for plant appreciation, research and education. The plants have been divided up into major life-form groupings and common names have been provided as a guide for the non-specialist.

The plants in this list were drawn primarily from: W.B. Shaw, 1990, Vascular Plant Species Lists For Te Urewera National Park, FRI Rotorua; AP Druce, various dates, Botany Division DSIR Lower Hut and in the Bulletin of the Wellington Botanical Society; and Mike Thorsen, unpublished reports, DOC East Coast Hawke's Bay. Where necessary plant names were updated to those used in the New Zealand Plant Conservation Network's indigenous vascular plant species list which appears on their website. Synonyms, and where appropriate common names, were identified using the 'Landcare Research New Zealand Plant Database "Nga Tipu O Aotearoa" which appears on their web site.
