

HORTUS BOTANICUS UNIVERSITATIS POSNANIENSIS  
INDEX SEMINUM

2014-2015

*ANNO 2014 COLLECTORUM QUAE HORTUS BOTANICUS UNIVERSITATIS POSNANIENSIS MUTUO COMMUTANDA OFFERT*

OGRÓD BOTANICZNY UNIWERSYTETU IM. ADAMA MICKIEWICZA  
UL. DĄBROWSKIEGO 165  
PL – 60-594 POZNAŃ

## Informacja

Rok założenia – 1925

Aktualna powierzchnia około 22 ha w tym około 800 m<sup>2</sup> pod szkłem

Liczba taksonów – około 7500

1. Położenie:

zachodnia część miasta Poznania

szerokość geograficzna – 52° 25'N

długość geograficzna – 16° 55'E

wysokość n.p.m. – 89.2 m

2. Typy gleb:

– brunatna

– murszowa na podłożu mineralnym

– szara gleba leśna

## Information

Year of foundation – 1925

Area about 22 ha, at this about 800 m<sup>2</sup> greenhouses

Number of taxa – about 7500

1. Location:

the Botanical Garden of the A. Mickiewicz University is situated in the W part of Poznań

latitude – 52° 25'N

longitude – 16° 55'E

the altitude is 89.2 m a.s.l.

2. The types of soils:

– brown soil

– rot soil on mineral ground

– gray forest soil

1. Poznań town - Os.  
Szczepankowo-Splawie
2. Uroczyńska Puszczy  
Zielonki (Nature 2000  
number: PLH300058)
3. Zielonka-Głęboczek

**Agreement on the Supply of Living Plant Material<sup>1</sup> for Non-Commercial Purposes**

**Leaving the International Plant Exchange Network**

Against the background of the provisions and decisions of the Convention on Biological Diversity of 1992 (CBD) and in particular those on access to genetic resources and benefitsharing, the garden is dedicated to promoting the conservation, sustainable use, and research of biological diversity. The garden therefore expects its partners in acquiring, maintaining, and transferring plant material to always act in accordance with the CBD and the Convention on the International Trade in Endangered Species (CITES).

The responsibility for legal handling of the plant material passes on to the recipient upon receipt of the material. The requested plant material will be supplied to the recipient only on the following conditions:

1. Based on this agreement, the plant material is supplied only for non-commercial use such as scientific study and educational purposes as well as environmental protection. Should the recipient at a later date intend a commercial use or a transfer for commercial use, the country of origin's prior informed consent (PIC) must be obtained in writing before the material is used or transferred. The recipient is responsible for ensuring an equitable sharing of benefits.
2. On receiving the plant material, the recipient endeavours to document the received plant material, its origin (country of origin, first receiving garden, „donor“ of the plant material, year of collection) as well as the acquisition and transfer conditions in a comprehensible manner.
3. In the event that scientific publications are produced based on the supplied plant material, the recipient is obliged to indicate the origin of the material (the supplying garden and if known the country of origin) and to send these publications to the garden and to the country of origin without request.
4. On request, the garden will forward relevant information on the transfer of the plant material to the body charged with implementing the CBD<sup>2</sup>.
5. The recipient may transfer the received plant material to third parties only under these terms and conditions and must document the transfer in a suitable manner (e.g. by using the documentation form, such as provided in Annex 1.3).

\_\_\_\_\_

I accept the above conditions.

\_\_\_\_\_

**Date, Signature**

\_\_\_\_\_

**Recipient's name and address, stamp**

<sup>1</sup> According to the CBD "genetic resources" means genetic material of actual or potential value. This definition covers both living and not living material. The Code of Conduct and the IPEN covers only the exchange of living plant material (living plants or parts of plants, diaspores) thus falling in the definition of genetic resources.

<sup>2</sup> ideally, the national focal point in the garden's home country
