

## PHENOLOGY

THURSDAY JULY 19, AFTERNOON

**46** Phenology and habitat characterization of the endangered species *Chamaecrista glandulosa* var. *mirabilis* (Leguminosae: Cesalpinioidea)

**Marrero-Solís Solimar, López Colon Jonathan A. and Dávila Eva**  
[smarrerosolis@yahoo.com](mailto:smarrerosolis@yahoo.com)

**67** Reproductive phenology Vs. fruit biomass and richness: Differences that matters for Atlantic rainforest conservation

**Galdino Graciliano and Mendes Pontes Antonio Rossano**  
[ggaldino@gmail.com](mailto:ggaldino@gmail.com)

**69** Reproductive phenology of Central Amazonia pioneer species in Cecropia-dominated secondary forests

**Vizcarra Bentos Tony, Mesquita Rita C.G., Williamson G. Bruce and Camargo Jose L.**  
[vizcarra@inpa.gov.br](mailto:vizcarra@inpa.gov.br)

**91** Phenological patterns in a tropical Andean cloud forest

**Rios Margarita M., Londono Gustavo A., Kattan Gustavo and Munoz Marcia C.**  
[gmargaritarios@gmail.com](mailto:gmargaritarios@gmail.com)

**270** Reproductive phenology, fruit biomass and dispersion syndromes in two Atlantic rainforest fragments with different conservation status

**Galdino Graciliano and Mendes Pontes Antonio Rossano**  
[ggaldino@gmail.com](mailto:ggaldino@gmail.com)

**394** Periodicity of radial stem growth in evergreen tropical trees

**Yanez-Espinosa Laura, Lopez-Mata Lauro and Terrazas Teresa**  
[lauro@colpos.mx](mailto:lauro@colpos.mx)
