

Lenovo® recommends Windows Vista® Business.

ULTIMATE PERFORMANCE TO UNLEASH YOUR FULL POTENTIAL.

THINKSTATION® S20 & D20

From Lenovo's exceptional engineers comes the next generation of ThinkStation®, designed exclusively for specialized professionals using graphically and computationally intensive applications. Its groundbreaking design ramps up parallel workflows, enabling professional users to quickly bring their ideas to life.

Equipped with the latest technology from Intel®, the ThinkStation delivers performance that is simply unattainable with a standard desktop PC. The ThinkStation S20 and D20's powerful and efficient Intel® Xeon® processors speed through even the toughest workloads. Sporting up to eight powerful processing cores, the new ThinkStation comes fully equipped with an on-chip memory controller and Intel® QuickPath Interconnect, allowing you to innovate faster than ever before.

The Lenovo ThinkStation has an environmentally conscious, user-centric design that ultimately results in increased productivity. In addition, the performance and quality-focused Lenovo ThinkStation supports ThinkVantage® Technologies such as Rescue and Recovery™ and Client Security Solution, providing users with superior data security.

EXTREME PERFORMANCE

- Brand-new Intel® Xeon® CPUs on both S and D series workstations deliver unmatched performance with incredible efficiency
- ThinkStation workstations come armed with a full line of bleeding-edge graphics technologies, including the NVIDIA® QUADRO® line, supporting SLI on select D Series configurations, and ATI® FirePro™ graphics
- With up to a 1060W power supply on the D series, ThinkStation delivers all the juice your key components need to maintain peak performance

QUIET AND RELIABLE

- The ThinkStation's 24db idle operating noise level makes it nearly undetectable
- ThinkStation's unique thermal design is engineered for maximum cool air delivery to key components, reducing the risk of hardware failure

ENVIRONMENTALLY RESPONSIBLE

- Both the S20 and D20 are EPEAT™ GOLD, GREENGUARD® Certified
- The ThinkStation S20 and D20 contain more than 50% recycled plastics, including 26% post-consumer content
- All ThinkStation models are RoHS compliant
- Many ThinkStation models are Energy Star® 5.0 compliant

ENGINEERED FOR THE ULTIMATE USER EXPERIENCE

- The ThinkStation's secure premium cover latch makes the cover easily removable, allowing users to make instant upgrades
- The ThinkStation's illuminated front panel and icons make ports easily accessible, especially in studio and office environments
- The ThinkStation's ergonomically designed, removable handle makes it easy to carry, move and manage
- Rack implementation is possible both in the ThinkStation S20 and the ThinkStation D20

TOP REASONS TO OWN

- ◆ THE ULTIMATE USER-FRIENDLY WORKSTATION EXPERIENCE
- ◆ PERFORMANCE THAT TAKES EXTREME SPEED AND EFFICIENCY TO NEW LEVELS
- ◆ COOL AND QUIET
- ◆ POWER AND EXPANDABILITY THAT'S UNATTAINABLE ON A DESKTOP PC
- ◆ TESTED AND CERTIFIED BY ISVs

lenovo®

NEW WORLD. NEW THINKING.™

Lenovo® recommends Windows Vista® Business.

CUTTING-EDGE POWER.

THINKSTATION® S20 & D20

The ThinkStation® is a high performance, high quality workstation designed to run graphically and computationally intensive applications for professional users who require a level of performance unattainable with a standard desktop PC.

TWO WAYS TO INNOVATE

- All Lenovo ThinkStation workstations share common features that showcase Lenovo's dedication to quality, including quiet acoustics, a cool thermal design, RAID standard, back-lit front I/Os and tool-less upgrades. However, both the S20 and D20 also feature unique qualities that makes them a great match for your individual needs.
- The single-processor Intel® Xeon® ThinkStation S20 is the ideal mid-range workstation solution. Offering a robust 625W power supply, even the S20 allows for easy upgrades and offers support for two high-end powered graphics adapters. It is ideal for 2D digital content creators and users of mid-range CAD and EDA applications.
- The dual-processor Intel® Xeon® ThinkStation D20 is a computational powerhouse. Offering 12 DIMM slots and RDIMM technology, the D20 supports up to 192GB* of blazing-fast DDR3 memory and is perfect for users of memory and CPU-hungry applications like high-end CAD/CAM/CAE, 3D digital content creation and professional video editing software. The D20 also offers 1394 and SAS support standard, support for NVIDIA's Tesla™ C1060 GPU computing solution and NVIDIA SL on select Quadro cards, as well as more expandability options than the S Series.

*Pending availability of 16GB DIMMs

TESTED AND CERTIFIED BY ISVs

Lenovo is working closely with leading software partners — such as Autodesk®, Dassault Systèmes® and PTC® — to ensure optimum performance and stability in the demanding applications you use every day. Independent Software Vendors (ISVs) test and certify system and application compatibility, providing you the assurance of a robust and reliable platform.

LEADING INTEL® TECHNOLOGIES

The new performance-driven Intel® Xeon® micro architecture utilizes Intel's new 45nm technology for energy-efficient, multi-core processing.

- More instructions per clock and improved caching
- Dynamic Power Management for less energy consumption during periods of low utilization
- Intel® Turbo Boost technology for additional performance during peak processing

Additionally, Intel's newest Xeon® processors deliver world class performance combined with superior energy efficiency through a large latency decrease and a bandwidth increase over previous generation workstations.
