

# Data Sheet FUJITSU Server PRIMERGY RX300 S8 Dual socket 2U rack server

The versatile 2U powerhouse

The Fujitsu Server PRIMERGY RX Rack Server family is the perfect platform to form dynamic infrastructures for your business processes today and in the coming decade. You will thus benefit several times over from our recognized experience in optimized data center technology and our innovative strength in developing energy-efficient and cost/performance-optimized rack systems for universal use. PRIMERGY rack servers, built upon industry standards, focus from a functional viewpoint on core features: energy efficiency, reliability, optimized for virtualization, ease of operation and maintenance, flexibility for your future. And thus they notably meet your requirements for outstanding cost efficiency. Optimal operating costs and long-term usability comply with the IT quality required by your customers. Our responsibility goes way beyond the hardware as our tailor-made service packages mean that you can rely on the best support for your IT during its whole lifecycle.

### PRIMERGY RX300 S8

The Fujitsu Server PRIMERGY RX300 S8 is a dual socket rack server, focusing on versatility and scalability. The new modular concept supports excellent expandability with up to 16 hard disk drives, up to 7 PCIe Gen 3 cards and up to 1536 GB RAM, all in one single 2U rack housing. Furthermore, the new Intel® Xeon® E5 product family delivers the top performance to ensure today's demand while being prepared for future requirements thanks to the upgrade kits as well as the cost-saving Modular LAN options. Thanks to the power supply units with 96% efficiency and the new power management this will result in lower operational costs. This 2U power house is the right choice for all types of business applications and

consolidations.

### Features & Benefits

### Main Features

### Meet today's demand and be prepared for future requirements

■ Intel Xeon E5-2600 v2 product family with up to 12 core processors and Turbo Boost 2.0

### Lifecycle investment protection

- Expanded scalability of up to 24 DIMMs with 1536 GB memory, up to 16 hard disk drives and 7 PCIe slots Gen3
- New modular concept for the base unit as well as a choice for LAN controller, RAID controller and power supplies
- Upgrade kits for hard disk drives, backup devices as well as LTO drives

### Cost efficient operations

- Comprehensive power management including pre-defined power profiles and a scheduled mode to switch between the profiles automatically
- 2 hot-plug PSU with 94 % efficiency (96 % planned)
- Cool-safe<sup>™</sup> Advanced Thermal Design enables the operation in a higher ambient temperature
- Fujitsu ServerView Suite offers tools for installation and deployment, permanent status monitoring and control. A wide range of integration packs allow a seamless and easy integration in widelyused enterprise management systems

### **Benefits**

- High performance for an efficient datacenter
- 50% more cores compared to the previous generation enables to run significantly more virtual machines
- Optimized for business applications, cloud and virtualization
- Maximum scalability to meet future demand
- Individual and cost-saving configuration of the server according to the need of today with upgrade option to meet the demand of tomorrow
- Upgrade kits save budget as the system can be upgraded when the company grows and thus protect the investment
- Ability to protect the data by integrating LTO drives
- Simplified power management that adjust the power consumption accordingly to the current usage or to the given power policy
- 5°C higher ambient temperature enables savings of up to 27% on power and cooling
- Fujitsu ServerView Suite provides all the functions for fail-safe, flexible and automated 24x7 server operations and improves enduser productivity via intelligent and innovative system management solutions.

### More information

### **Fujitsu OPTIMIZATION Services**

In addition to Fujitsu PRIMERGY RX300 S8, Fujitsu provides a range of platform solutions. They combine reliable Fujitsu products with the best in services, know-how and worldwide partnerships.

### Fujitsu Portfolio

Build on industry standards, Fujitsu offers a full portfolio of IT hardware and software products, services, solutions and cloud offering, ranging from clients to datacenter solutions and includes the broad stack of Business Solutions, as well as the full stack of Cloud offering. This allows customers to leverage from alternative sourcing and delivery models to increase their business agility and to improve their IT operation's reliability.
