Flanges to ASTM and DIN
- Carbon / Alloy Steel Flanges to ASTM and DIN
- GRP-Pipe systems, -fittings, -flanges
- Valves and fittings made from steel,
stainless steel and special materials

Engineering services and assembly work

It goes without saying that engineering services and assembly work in projects also count among our capabilities, such as modifications, coatings and procuring customised products to customer specific designs.

Individual process cost optimisation

The BUHLMANN GROUP ensures individual process cost optimisation with its innovative ideas in accordance with customer instructions.

Consulting service for our customers

If needed, the BUHLMANN GROUP will even undertake the complete construction of pipeline systems in the building of chemical plants and power stations, from planning to actual construction and beyond, and to providing other supplies.

Logistics in line with demand

The BUHLMANN GROUP delivers directly to wherever the materials are needed, as specified by the customer, e.g. to the construction site. Of course, special transport is possible at any time on request.
