# Samsonite

BY YOUR SIDE

We are happy to share with you the brand new Samsonite® campaign, as pictured on the catalogue cover. It's all about the magic of travelling. Capturing the moment of happiness when you return to the people you love. When you can finally share your stories and hold close what has been so far away. While you hold on to the things that matter to you, your Samsonite suitcase also holds on to the things that matter to you. As you live life's most interesting adventure: travelling. Samsonite. By your side.

## History

When Jesse Shwayder founded Samsonite in 1910, travel was reserved for only an exclusive few, those who had the means to see the world. Given this exclusiveness, travel was a high quality experience from the transportation, to the attention to service, to even the accessories used to carry one's belongings. As one of the original brands in travel, Samsonite has continued to leverage its craftsmanship and heritage as an innovator for the past 100 years, to create stylish and high quality solutions for the world traveller.

Today, Samsonite continues to lead the luggage category with the same core principles, further expanding Shwayder's vision globally with design and innovation into product categories and consumer targets.

By identifying trends and interpreting the continuing evolution of travellers' needs, Samsonite continues to lead the market with innovative, high quality and stylish designs. And now, thanks to the launch of Firelite™ and Litesphere™, the lightest Samsonite hardside and softside ranges ever, Samsonite establishes itself as the leader of lightness in the luggage industry.

# Milestones

Ever since its earliest days, Samsonite has been the most innovative luggage manufacturer in the world. It has led the industry in using new materials and creating new designs. Here are just a few of the luggage landmarks that Samsonite has created over the years, as part of its tradition of innovation.

# i The Curv manufacturing process

1.

2.

3.

1. Made of 100% virgin polypropylene grains. These grains are melted into a thin sheet of polypropylene.
2. This sheet is cut into thin strips of about 1 cm wide.
3. The strips are then stretched 10 to 15 times to make them incredibly thin and strong.

4.

4. The strips are woven together, in the same way as cotton is woven. The end result is a layer of stretched and woven polypropylene fabric.

5.

5. Several layers of woven polypropylene fabric are partially melted and hot compressed in order to form an incredibly light and strong sheet.
6. Made in Germany by Propex Operating Company, LLC.
