*This seminar is dedicated to*

*Elton Smith*

*who has dedicated his time and effort over the years.*

*Elton is the ultimate example of PIRCO's spirit of Giving.*

*He has arranged for sites and discount hotel prices for many of our seminars.*

*He has given his time to all clients who came to him for help.*

*And, he has never asked for, or received any compensation for travel, for meals or for accommodations.*

*We salute you Elton,*

*Thanks!*

## THE GOALS OF THIS SEMINAR

TO NARROW EACH RACE DOWN TO  
THE VIABLE CONTENDERS

TO SELECT  
PACE LINES TRULY REPRESENTATIVE  
OF WHAT THOSE CONTENDERS ARE  
MOST LIKELY TO DO TODAY!

IF one can do this only 60% of the time, wagering TWO horses, or about 30% of the time with 1 horse, that person – according to every expert in the handicapping field – *qualifies as a PROfessional!*

To help you reach these goals, we present only those teachers who have won recognition for achieving them themselves.

Thoroughbred Handicapping TODAY

The  
**PARADIGM SHIFT**  
**KEYNOTE SPEECH By**

"Doc" Sartin

Paradigm defined:

"An accepted working  
Model or Procedure."

The OLD Paradigms:

Before 1975:

An eclectic model dominated  
by **CLASS & Current Form**

1975 - 1982

Speed Ratings derived  
from **FINAL** time  
and Daily Varaint  
(The Beyer Era)

\*

1982-1987

Pace defined as  
Incremental Velocity  
&

Energy Distribution  
as presented at Expo '84

By Doc Sartin

1987-1991

We pioneered the Paradigm  
Shift from Velocity to

The NON-Linear: Energy!

With few exceptions,  
most notably Mark Cramer,  
the handicapping establishment  
denied the paradigm shift.

Linear, Left-Brained concepts  
continued to dominate.

Speed ratings were expanded  
to incorporate what are  
called Pace Ratings.

For the most part  
Pace Ratings are numbers  
applied to Second Call &  
Final Time - with Final  
Time dominating. Static  
numbers that do not change  
regardless of the mix and

match of contenders. Our Phase I (TPR)

numbers are Pace Ratings,  
but they incorporate 2nd  
Call & 3rd fraction ratings  
and NOT Final Time.

Advanced Sartin members  
abandoned Static Figures in  
1987 because they accurately  
predicted the outcome of  
races that unfolded in a  
logical, sequential way.

Such races seldom produce  
double digit mutuels.

Most higher paying races do  
NOT unfold logically and  
sequentially because of  
**CHAOS.**

Predicting the outcome of  
such races requires the  
application of the principles  
inherent in the new Physics  
Of CHAOS:

Most important of these principles is  $\Sigma$ NTROPY  
In essence, Entropy is the measurement of Unavailable Energy, - in handicapping lexicon - DECELERATION Ratios relative to Available Energy. THIS is the NEW PARADIGM!

Energy & Deceleration  
Employing the new Physics of CHAOS & Entropy.  
The Sartin Methodology  
T O D A Y !!  
Aspects of the Sartin Methodology that have been incorporated by leaders of the OLD PARADIGM that remain valid today:

\*Incremental Velocity  
(fractional times)

\*\* 2nd Call Velocity as a Key Pace Figure.  
\*\*\*Turn Time (2nd Fraction Velocity) and its influence on the total race. (A factor never explored prior to the Advent of the Sartin Methodology.  
\*\*\*Final Fraction Parameters.  
\*\*\*\* Percentage of Energy Exertion  
Early & Late - factors original to the Sartin Method

\*Pace bias Profiles as  
determined by track surface.

\*\*Counter-Energy  
finding the Place horse &  
Exacta Success.

Factors NOT accepted by  
the Mainstream:

\*The "Dream Race" as an  
optimal means of determining  
Race Pairs & Variants.

\*\*Transposing Incremental  
Velocity into ENERGY  
Exertion figures.

**ENTROPY!**

Incorporating Equine ENERGY  
UNAVAILABLE into potent  
DECELERATION Ratios.

Plotting DECELERATION--A MORE consistent  
means of predicting equine  
performance - AND less  
subject to variations caused  
by tracks, surface, bias or  
differentials in pace &  
Final Times.

The OLD Paradigm  
Vs, The NEW---  
The Mainstream Does  
NOT accept the New  
Paradigm.

Most important to us  
is the sad truth that  
consistently successful  
handicapping comes

NOT from following trends acceptable to the  
general handicapping public,  
but from **DEVIATING** -  
almost to the opposite degree -  
from popular trends.

Only through such deviation  
can we hope to have  
continuing future  
**SUCCESS** in pari mutuel  
fund investing.

To paraphrase the dean  
of Mainstream handicapping  
authors, James Quinn:  
"No field of endeavor has  
ever attracted more people  
who are totally UN-equipped  
and under-educated in the  
factors essential for success  
than thoroughbred handicapping"

He goes on to state that:  
While the Sartin Methodology  
has developed selection tools  
that are **FAR SUPERIOR** to  
any other in the field,  
Sartin practitioners suffer  
from the inability to apply  
those superior tools to the  
proper mix of contenders  
taken from viable running  
(Pace) lines.

\*\*\*\*\*

Think about that statement:  
**HOW** does it apply to  
**YOU????**

In a later treatise he added

"I once felt that this was

a phenomenon limited to

the Sartin group. More recently, as I work

with a larger group of

aspiring handicappers, I have

come to realize that ---

except for a limited group

of proven professionals ---

the problem is

**UNIVERSAL!"**

Several hundred Sartin practitioners have clearly demonstrated that once the problems of contender and pace line selection have been overcome, ALL of our Advanced computer programs will produce winners far in excess of their wildest dreams.

These successful users do NOT apply a universal technique for contender & pace line selection.

Here are a few of the Methodology tools they DO apply to their procedures:

- 1: APV & Class along with
- 2: Factor W (Top 5) produce 86% win.
- 3: KGEN graphs. (top 5)
- 4: Thoromation Stop Action screens. (Top 4)
- 5: Phase 1 (top 5) by designated category.
- 6: Entropy (top 4 Dc/V) \*

\*So far the most popular technique for less sophisticated users.

- 7: The visual matchup as perfected by Jim "The Hat"
- 8: The Brohamer guidelines: The perfect mating of the Old & New Paradigms.
- 8: The super cautious Spencer Toner approach.
- 8: The dynamic new S/WF Factor.

Each of our teachers will elaborate on the specific technique used to make them eminently successful. All of these processes are designed to produce winners from the widest range of races. Those who limit their "play" to the more formful races, while denying themselves of higher ave. \$, will be able to employ Old Paradigm procedures.

**A Word of Caution:**

Our teachers are about equally divided between those who wager to WIN only & those who play Exactas and bet place & Show as well as WIN.

Please be warned that procedures designed to pick WINNERS ONLY are NOT necessarily applicable for picking Place & Show horses so essential in Exacta, Quinella & Trifecta wagers.

\*\*\*\*

Be sure to quiz each speaker on the kinds of wagers he makes before adopting ANY technique as your own.

FOUR good reasons to  
focus on winning the  
less formful races  
AND  
learning how to isolate  
Place/show horses.

- 1: Plethora of Maiden Races with 1st time starters.
- 2: Days when at least 1/2 of the card is won by low price favorites.
- 3: When ave. place exceeds win \$\$\$.
- 4: When going can only be justified through exotic \$\$\$\$.

Here's a sample of such a day.

SLERP, also devoid of early speed, entered the stretch six wide and rallied. REGAL GROOM, in contention early, threatened along the inner rail in the last furlong but did not quite have the needed response in deep stretch. JIMMY S TRICK and BAILARIN dueled for the early lead and weakened a bit late. GUNDAGHIA, in contention early and wide down the backstretch, came into the stretch five wide and lacked the necessary response in the drive. STAR OF THE CROP (2) was withdrawn. All wagers on him in the regular, late double and exacta pools were ordered refunded and all of his pick six, pick nine and late triple selections were switched to the favorite, GUNDAGHIA (7).

MARBLE MAIDEN, close up early, took the lead going into the backstretch when full of run, drew clear after the opening quarter, lugged out badly turning into the stretch to come into the stretch five wide, responded gamely late and prevailed by a small margin. SUIVI set the early pace, yielded the lead to MARBLE MAIDEN turning into the backstretch, the steered from along the inner rail early in the drive, resolutely kept to her task and lost a close decision. PARTY CITED, outrun early but not far back, came home willingly. GOLD FLEECE, near the early pace, did not have the needed punch in the drive. MISS TURKANA, close up early, gave way and was four wide into the stretch. JOLIE BAND was outrun. GRAVIERES, devoid of early speed, failed to rally. VISIBLE GOLD (4), AMOROUSLY (6), SOUTHERN TRUCE (7), AVIAN ASSEMBLY (10) and APPRECIADA (12) were withdrawn. All wagers on them in the regular, late double and exacta pools were ordered refunded and all of their pick six, pick nine and late triple selections were switched to the favorite, MARBLE MAIDEN (1).

First: Look at the race the way client Vaughn Youtz actually handicapped it.

Effective Use of Entropy - Vaughn Youtz

The first thing I do is APV's, form cycles and visual running styles and make any eliminations I can at this point.

Let's look at what we have at this point: Remember, today's track is sloppy.

Haloshine - APV/Class 113/.76. Acceptable form and class, questionable if it will like an off track.

Farbet - APV/Class 101/1.24. Acceptable form and class.

Icy Cuddle - APV/Class 132/1.58. Very suspect form, but this class dropper has been facing some good times. Let's leave it in for now.

Lanky Lord - APV/Class 130/1.14. Improving sort, class and form acceptable.

Jigging Monarch - Scratched.

Prime Glade - APV/Class 303/2.67. This figure off Lifetime, has no form now, OUT.

Matagorda - APV/Class 82/1.07. Acceptable form and class.

Our Moment In Time - APV/Class 141/1.47. No form after layoff and doesn't like an off track. OUT.

Boldandcayerless - APV/Class 148/3.19. Looks to be a sprinter, but has class and last race not too bad. Let's leave in for now.

Pirate's Affair - Scratched.

Liberty Offiftysix - APV/Class 82/1.74. Class and form acceptable.

Bob's Promise - APV/Class 33/.33. Eliminate either by form or class. OUT.

Even before one line is run through the computer, we have this field down to six - Haloshine, Farbet, Icy Cuddle, Lanky Lord, Matagorda, and Liberty Offiftysix. Remember, on no form calls, be sure to run the last line through the computer to verify the call.

Next, I begin running lines on the horses in Phase I. In addition to making further eliminations, my pacelines are selected during this program. Two things of note at this

junction. ALWAYS run the last pace line. If there is justification to go back, do it. Point two here is ALWAYS try to find a confirming paceline, one that compliments the selected paceline. Normally I'm looking at 6-8 horses at this point, depending on the size of the field..

At this point the following horses are confirmed no form types. Icy Cuddle, Prime Grade, Our Moment In Time (even with #1 FFR, too many in here are close to that figure.), and Bob's Promise. These are eliminations. In addition, Haloshine can be eliminated also. Boldandcayerless, though showing no form, made it into the top five with its last line. It stays in for now.

Let's look at the pacelines I selected for each remaining contender.

Farbet - 2nd back. Last line reflects a final time that's too slow. Confirmed with line #3.

Lanky Lord - Last line, line 9 confirms.

Matagorda - 2nd back, no confirming paceline.

Boldandcayerless - Last line, no confirming line.

How Many  
would I would Not

Liberty Offitysix - Used line 6. This requires some explanation. First the last line is from a muddy track. Although it played fast and fair, I still preferred to go back. The next logical line would be the 7.5 f race 5 back. However, 7.5F races cannot be projected accurately. So, I use #6, confirming with #5.

Next, enter the data from the selected running line for each contender. make a hard copy of the raw line data and proceed through the program. I just look at the race without any adjustment to see how the contenders stack up and then go to the beginning of the program to the automatic projector and select yes. The raw energy factors screen comes up. Here I look at %MED (which I model) and at the program generated running (ESP) styles. Please note that it's a great idea to set up your model by running styles at each particular distance. The modeling factors become self-evident when doing it in this fashion.

Go to the next screen, the match up profile and glance at the high, lows. Press "H" for a hard copy of the last two screens.

In the next screen you will be asked to select an adjustment type. I always automatically adjust contenders first (1). In this particular race, this adjustment is correct.

Dream Race Velocity Pars. Never overlook this screen. I pay very careful attention to this one. Look at the early contenders Boldandcayerless and Matagorda. To be competitive, they should have high marks in F1. They do not and I am seriously NOT considering them to win at this point. The EP horse, Farbet, should make the lead.

Next, these five are entered into Entropy. I go through the energy generator. Input race information in an orderly fashion. This will save time when recalling a race in the future. First the date enter the month, day and race ( in this example 011305 for the fifth race on Jan. 13). The comments column I use for class and age information. (in this case 16C 4Y0 denotes the race is a \$16,000 claimer for four year olds). The distance line is self explanatory, in this case enter 8.0 for an 8 furlong race. Data OK, enter if OK.

This brings use to data entry. Use the paceline selected in the preliminary handicapping program.. I use a 4 letter moniker and the line number to ID the horse (FARB2 for the second line on Farbet ). This keeps lines and horses from being confused.

Enter the appropriate adjustment number to proceed to the first Entropy screen which contains the adjusted energy factors. On this screen I look at the Far Med and DTE, factors I model by running style. All the horses left in this race fit my current parameters for both Far Med and DTE by running style, so I cannot make any additional eliminations at this point. I go to the next screen.

In this screen, the Matchup and DC Pars screen, the match up shows that the early horses in this race are going to have a tough time making the lead. I make a note of this. Also note the hidden energy deceleration velocity of Liberty. Next screen.

HOWARD - I NEED SOME INSIGHT HERE ON WHEN TO USE THE ALTERNATE ADJUSTMENT AND OR THE MANUAL ADJUSTMENT. I ALWAYS AUTO ADJUST FIRST AND IF THEIR A LARGE DISPARITY IN TOTAL ENERGY, I'LL ALTERNATE ADJUST, JUST TO LOOK AT THE READ OUTS. I NEVER MANUALLY ADJUST, I SUSPECT THIS OPTION IS USED FOR SURFACE AND TRACK TO TRACK ADJUSTMENTS, BUT I'VE HAD GOOD SUCCESS NOT USING IT. YOUR THOUGHTS ON THE ABOVE WOULD BE GREATLY APPRECIATED. ---VAUGHN.

Entropy works regardless of Adj. Because Deceleration Ratios are more stable than Velocity figures.

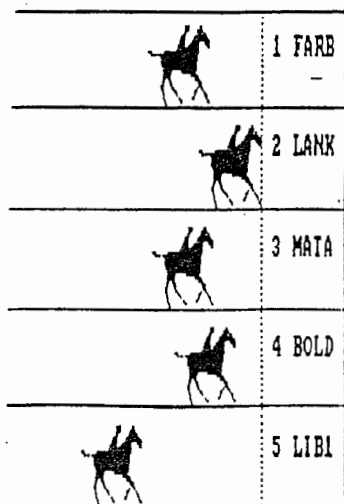

Thoromation calls for 2 Adj. DO NOT be afraid of this call.

Remember, if the total energy from high to low is greater than 2.0 you may need to use the alternate adjustment.

CAUTION

Make sure the horse is a true contender before using the alternate adjustment.

## MECHANISTIC PACE LINE SELECTION USING THOROMATION

by  
Spencer Toner

I've been using EXDC with THOROMATION to get my pace lines. The process I use is to take the last four pace lines of a horse and to enter them into EXDC. Once these pace lines are entered using their actual times and beaten lengths as they appear in the Form, the pace lines are automatically adjusted to the distance of today's race. I then use the number one (1) automatic adjustment since it is the most subtle adjustment and the horse's pace lines are running against pace lines of the same horse. Go on to the THOROMATION graph where the horse's pace lines in animated graphics run across the screen. And when the horses (PACE LINES) stop, the horse (PACE LINE) that reaches the wire first is the pace line I use to represent our horse in the rest of the handicapping process. If a horse has an incomplete pace line or missing data I DON'T go beyond the 4th pace line back. To answer any questions or doubts as I had when researching this technique, *IT WORKS*. The reason it works is THOROMATION, the tool. We did not have this tool in the past. I don't know the THOROMATION formulas, I don't need to know the formulas. I do this process with all of the horses in the race.

The following days results are from using this pace line selection method. The past performances that follow are from Santa Anita on Feb 11. The pace lines are underlined and were selected as described above.

The point I'm making about this mechanistic method of picking pace lines is that this procedure will give one a method that is consistent. The results are there. I can now proceed with my contender selection and selection of horses to bet. This day's races doesn't leave me with the old doubts that once haunted me, -'have I picked the correct pace lines?' We've all concluded that there are no "correct pace lines", there are pace lines that work with the procedure that we have found that works for us.

Isn't this awfully time consuming? Anything that gives me peace of mind is not too time consuming. To solve the time problem I've equipped my computer with a numeric key pad. Also since I wasn't knowledgeable with a 10 key pad a computer typing course gave me enough skill and speed to really help my use of time.

Let's look at another race this same day.

### Money Management

Here are some words

From

Dick Mitchell,

While there is some hype  
in the message, there is  
also a degree of wisdom.

Mitchell has known and studied the giants of the handicapping world and promises to "shamelessly steal and use their finest and most profitable ideas." Thanks to this "reality-based" theory of handicapping, winning isn't just possible, it's probable.

## Handicapping Is Only Half The Battle

**TRUE!**

Dear Racing Enthusiast:

If you want to make serious money betting the races, handicapping skills will only get you halfway there. You must master the skills of betting. **Betting Strategy is as least as important as selection strategy. Probably more.**

*Jim "The Hat"  
Tom Brohamer*

### The Best Handicapper In This Country Is A Losing Player!

**NOT SO!**

If you think that winning handicapping is about picking the greatest number of winners, you're doomed before you start. There isn't a handicapper in this country that can bet all the races on every racing card for an entire year and average 33% winners! The public does. Yet, with this amazing performance, if you bet each public selection, you would lose 10¢ on every dollar that you bet. Think about it: the best selector in this country is a losing player!

This message is 1/2 true.

You **STILL** must pick the winners first.

### The Secret To Winning Is Picking Bets - Not Horses!

Ask Dick Mitchell. In the early eighties, he was winning over \$120 a day, on average, yet he knew precious little about thoroughbred handicapping. The best part is that he did it by making place and show bets exclusively. His secrets are yours. Simply read on to find out where you can learn them.

### One Of The Most Amazing Secrets In This Universe Is The Secret Of "Modeling."

So we **FIRST** discovered in  
1975...and Tom Brohamer  
perfected in 1984.

DEAR DR. SARTIN

MY REPORT THIS TIME CONTAINS ONE DAY OF RACING TOTALLY GIVEN OVER TO ENTROPY. I WORKED WITH THE PROGRAM AND STUDIED YOUR ARTICLE EXPLAINING IT IN FU #36 FOR 2 DAYS BEFORE PUTTING MONEY ON IT. I WON 8 STRAIGHT RACES PLAYED MATCHING HORSES FIRST IN THE DREAM RACE VELOCITY SECTION TO CUT THE FIELD TO NO MORE THAN FOUR. THE COMPOSITE SECTION HIGHLIGHTED THE PROBABLE RUNNING ESP OF THE RACE AND INDICATED PLACE POSSIBILITIES IN CONTRA DECLARATION.

I ALWAYS EXPECT HIGH WIN% WHEN MUTUALS ARE LOW, AS THEY WERE THIS WEEKEND. HOWEVER 81% WIN PERCENTAGE EXCEEDS MY HISTORICAL RECORDS STATISTICS DURING SUCH A CYCLE. I LIKE TO THINK I'M A STUDENT OF THE MATCH UP AND USE IT EXCLUSIVELY FOR CONTENDER SELECTION. THIS PROGRAM, WITH SOME MORE IN DEPTH STUDY ON MY PART, FIGURES TO CLARIFY FOR ME AND OTHERS THE VERY HEART OF WHAT IS MEANT BY "MATCH UP". VERY PLEASED DOC.
