## RIOT SERIES

The RIOT SERIES is the perfect opening price point amplifier. RIOT offers great looks and superb performance at a most affordable price. These amplifiers are great for the first time car audio buyer wanting to add bass and enhanced sound to their system. RIOT amplifiers enter further proof, just why, BOSS AUDIO SYSTEMS is one of the largest providers of amplifiers in the world today.

# CAPACITORS

Your car's factory electrical system, alone, does not provide the maximum power source needed for amplifiers. Dimming headlights, distortion, and weak bass may be an indicator your amp isn't getting enough power. A BOSS AUDIO SYSTEMS capacitor quickly releases stored electricity when your amp needs it most (like during heavy bass notes). Our digital voltage meter let's you know the available power.

# SUBWOOFERS

BOSS AUDIO SYSTEMS has been building and delivering subwoofers for over 27 years. If you're looking for the perfect subwoofer for your sound system, you'll find it here in the 2015 catalog. Our engineers design all of the percussion needed to make your favorite music come alive with perfection. Whether you're building a great wall of subs, or simply need a little bottom end BOSS AUDIO SYSTEMS offers all the choices necessary to satisfy your particular taste.

The BOSS logo is positioned in the lower right quadrant of the page. It consists of the word "BOSS" in a bold, white, sans-serif font, enclosed within a white, thick, curved line that forms a partial circle. The logo is set against a dark, textured background that appears to be the interior of a subwoofer, with visible curved surfaces and a metallic rim.

## PHANTOM SERIES

Low frequency sound reproduction is the first thing you'll notice when you hear a super-sub. The percussion you feel is the second, and in the case of our PHANTOM Subwoofers maybe even the third. Combine that with extraordinary cosmetics and our PHANTOM Subwoofers will guarantee you a position in the winner's circle.

Our Waketower Speaker Systems are built to deliver superior performance in the toughest conditions. Polypropylene cones and rubber surrounds are impervious to moisture. A blast of salt water will not hurt these speakers. A protective coating is applied to block UV rays, maintaining material integrity and keeping the speakers looking new.

## BOSS AUDIO SYSTEMS

Because an in-store display is the most efficient way to demo product, BOSS AUDIO SYSTEMS engineering has redesigned our display to look better, sound better, sell better, and present more audio and video units than in previous years. We will custom build each display to your specific product selection.

Our full-component display is set to house four in-dash receivers/DVD players and an equalizer of your choice.

The upper section of the display is built to house two flip down monitors or headrests. New for 2015 our countertop head rest display will showcase our 7", 8", and 9" head rests (with or without DVD).

In the center section, which houses the receivers, EQ, and DVD unit you'll have room to select one pair of speakers, (6" x 9", 6-1/2", 5-1/4") and for 2015 a pair of 4" as well. The bottom section positions the two 12" subwoofers, at a studio-monitor angle designed to optimize the listening field at 4 or 5 feet.

In the section below the speakers, you may choose three or four amplifiers to supply all the audio power needed.

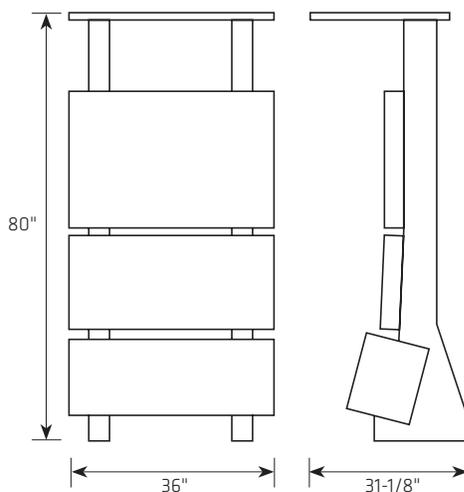

For systems with multiple monitors we use a BV-AM5 to boost the video signal. For radio reception we'll install a MRANT-10 (AM/FM antenna) and an antenna splitter (for the multiple receivers).

Your BOSS AUDIO SYSTEMS in-store display will be delivered with all products installed. To have your display plug-in-ready, a power supply will also be installed at an additional cost.

Please contact your account manager for additional information concerning our display purchase program.
