## SUNMARK COMPANIES

### Products we offer:

- Native, Turf, Erosion Control Seeds and Custom Seed Mixes
- Permamatrix Biotic Soil Amendment
- Envirolok™ Vegetated Slope Protection Systems
- Players Choice™ Soil Amendments
- Players Choice™ Engineered Soils and Clay Based Soil Blends
- Custom Soil Blends
- EcoLive™ and EcoBiotics™ Organic Amendments
- EarthLite™ EcoRoof Soil Media
- EarthLite™ Stormwater Filtration Media
- Ecology Embankment Material
- Sand Bags, Rock Bags, Soil Bags

### Services we offer:

- Seed Consultation
- Mixture Formulation
- Engineered Plans and Permit Facilitation
- Erosion Control
- Environmental Consulting and Resource Management Services
- Streambank Restoration
- Restoration Design, Installation, and Management
- Sports Field Soil Testing
- Athletic Field Design Consulting
- Sand Bagging
- Custom Bagging Operations

Sunmark is in business to provide products and ideas to protect, enhance and create native plant communities providing biodiversity that adds value to our natural areas, while enhancing and protecting the environment in which we live. We also are committed to creating safe playable parks and sports fields which enhance our relationship with each other and the environment around us.

### We guarantee the following:

**EXCEPTIONAL SERVICE:** We don't simply take your order. As specialists in the Seed and Soils industry, we offer the expertise and knowledge that it takes to choose the best possible products or services for your project.

**SUPPORT:** Our mission is to arm you with the appropriate knowledge and then provide you with the best possible products at an affordable price. And, with helpful tips, an on-line resource manual, newsletter, and online ordering, our catalog and web site are your 24-hour resource.

**VALUE:** With bulk facilities and warehouses located across the Northwest, it is our goal to offer some of the out-of-hand freight costs back to our customers. Simply put, we want our products and services to be affordable.

**PERFORMANCE:** We hold our products to the highest standards and your satisfaction is our ultimate goal. If a product does not live up to your standards, plain and simple, we want to know about it, so we can work with you to resolve any issues.

BEFORE

We have the answer! Introducing PermaMatrix® biotic soil amendment (BSA). A hydraulically applied BSA containing biochar, PermaMatrix is changing the way we look at soil restoration, renewal and reclamation. PermaMatrix is turning nutrient deficient bare dirt into productive soil faster and at a lower cost than topsoil and compost ever has or will.

It's Cheaper Than Dirt!

1 YEAR GROWTH

# Cheaper Than Dirt!

As a Contractor how do you increase revenue, reduce cost, and mitigate risk on your construction site?

As an Agricultural Professional how do you reduce cost, increase yield, manage sustainability, and promote green awareness?

As a Regulator or Design Professional how do you increase performance, reduce cost, and mitigate risk on your reclamation and restoration projects.

As a Reseller how do you increase your bottom line, find new revenue opportunities, and expand your client base?

A hydraulically applied **BIOTIC SOIL AMENDMENT**

Patent Pending

Made in the USA with recycled materials

AFTER

### What is Biochar:

Biochar is pyrolyzed biomass, or biomass that has been burned in the absence of oxygen. This process creates a highly porous structure that provides the optimum host for soil microbes. Biochar also holds 50% of the biomass's carbon and when applied to soil, sequesters that carbon for centuries, reducing the overall amount of atmospheric CO<sub>2</sub> by removing it from the active cycle. Biochar also enhances plant growth which absorbs more CO<sub>2</sub> from the atmosphere. Overall, these benefits make the biochar process carbon negative.

### How does it work:

Biochar stimulates the activity of a variety of agriculturally important soil microorganisms, and can greatly affect the microbiological properties of soils. The pores in biochar provide a suitable habitat for many microorganisms by protecting them from predation and drying while providing many of their diverse carbon (C), energy and mineral nutrient needs. Since soil organisms provide a myriad of ecosystem services, adding biochar to soil may affect soil ecology and is critical for assuring that soil quality and the integrity of the soil rhizosphere are maintained.

### How it's used:

The natural process of biochar is found in soils around the world as a result of vegetation fires and historic soil management practices. Intensive study of biochar-rich dark earths in the Amazon (terra preta), has led to a wider appreciation of biochar's unique properties as a soil enhancer. Biochar also improves water quality and quantity by increasing soil retention of nutrients for plant and crop utilization. More nutrients stay in the soil instead of leaching into groundwater and causing pollution.

### Helps Farmers

Biochar has consistently shown an increase in yields for most agriculture crops and is a preferred amendment in organic farming. There is also evidence from thousands of years of traditional use of charcoal in soils. The most well-know example is the fertile Terra Preta soils in Brazil, but Japan also has a long tradition of using charcoal in soil, a tradition that is being revived and has been exported over the past 20 years to countries such as Costa Rica. The Brazilian and Japanese traditions together provide long-term evidence of positive biochar impact on soils.

# EnvirolokNW

The ecologically advanced Envirolok vegetated system provides permanent erosion control.

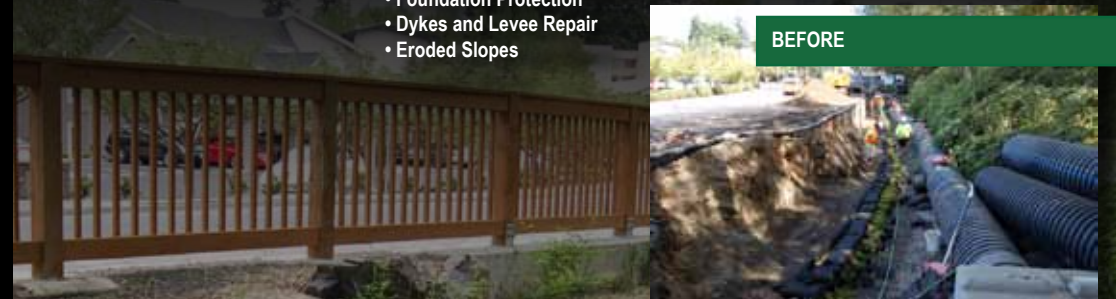

Using Envirolok™ to Establishing Sustainable Natural Eco-Systems

#### Where to Use Envirolok

- Streambank Restoration
- Shoreline Enhancement
- Bioswales
- Landfill Caps
- Road Slips
- Green Walls
- Culvert Protection
- FishWay Rx System
- CritterCross System
- Cultural Resource Protection
- Wind Erosion Sites
- Water Erosion Sites
- Bridge Embankments
- Piling Protection
- Foundation Protection
- Dykes and Levee Repair
- Eroded Slopes

Envirolok's patented system provides immediate stabilization, erosion control, and a permanent vegetated solution. Envirolok is adaptable to water or dry land sites.

Envirolok's encapsulated soil bags and spikes combined with the engineered strength of soil reinforcing materials supply the connection necessary for an ecological vegetated solution.

## HOW TO PURCHASE SEED

**Placing an order:** Place your order by telephone, fax, or through our website at [www.sunmarkseeds.com](http://www.sunmarkseeds.com). We accept checks, VISA, MasterCard, Discover and cash. Canadian accounts: remit in U.S. funds. International accounts: remit via wire transfer of U.S. Funds Irrevocable Letter of Credit, VISA, or MasterCard. Most orders are shipped within 48 hours of receipt of order.

**Shipping and Handling Policy:** All seed is shipped F.O.B. Portland, Oregon. Domestic shipment is by UPS, Federal Express, or truck for best delivery. International shipment is by Airborne, Federal Express, or United Parcel Service on LTL quantities; ocean-going vessel for full container quantities. On web orders freight is automatically included and shown on shipping list. We do not ship C.O.D.

**Claims:** Claims for damage, error, or shortage must be made in writing within seven days of product receipt.

**Pricing:** The prices in this catalog are for wholesale trade only. Prices are in U.S. dollars. **Prices may change without notice due to changing market conditions.** We reserve the right to prorate deliveries in case of shortage or to be released from delivery entirely in case of crop failure or other causes beyond our control.

**Bulk Seed Pricing:** Additional discounts are available for bulk quantity orders as follows:

Turf	2,000 pounds
Restoration & Erosion Control	2,000 pounds
Legumes	500 pounds
Wildflower	50 pounds
Natives	50 pounds

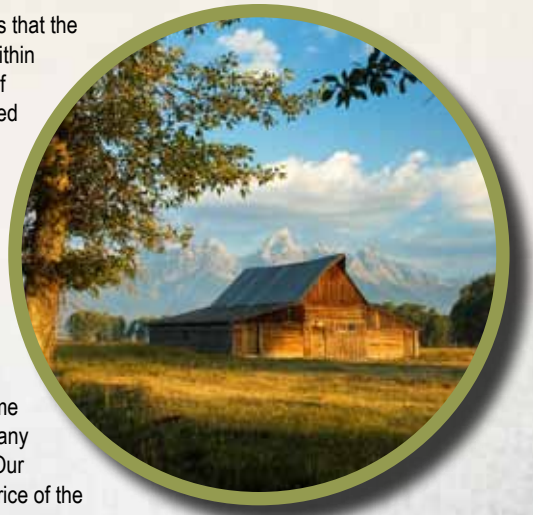

Call for special order quantities and custom seed mixing.

**Oregon: (503) 241-7333 Toll Free: 1-888-214-7333**

**Visit our website at: [www.sunmarkseeds.com](http://www.sunmarkseeds.com)**

**Warranty:**

Sunmark Seeds International, Inc. warrants that the seeds are as described on the container within recognized tolerances in the trade and is of high quality. The seeds have been described under State and Federal seed laws and have been tested by a registered seed laboratory. This is the sole warranty; we make none other, expressed or implied. We cannot guarantee establishment of plants due to various factors over which we have no control. No liability hereunder shall be asserted unless a buyer or user reports to Sunmark Seeds International, Inc. within a reasonable period of time (not to exceed 45 days of receipt of seed) any conditions that might lead to a complaint. Our liability is limited to the original purchase price of the seed only.

## NATIVE SEED MIXES

Sunmark's Native Grass Mixes are formulated based on seeds per square foot. These mixes have been appropriated to give a true balanced mixture, or to emphasize a species that would be found prevalent on a particular site. Sunmark's Native Mixes have been carefully formulated to fit specific adaptations for several regions, moisture requirements, soil types, and elevation zones. These mixes are generally in stock and are ready for immediate shipment. Give us a call and our staff will help to identify where the specific mixture should be used. We can also help with a custom Native Mixture based on your species selection.

Mix Name	Mix Botanical Name	Common Name	Composition
 <b>\$29.95 per lb.</b> <b>Seed Rate</b> <b>1.5 lbs per 1000 sq ft.</b>	Hordeum brachyantherum	Meadow Barley	40.00%
	Bromus carinatus	California Brome	26.00%
	Lupinus albalculis	Sickle Keeled Lupine	20.00%
	Camassia quamash	Camas	4.00%
	Festuca romerii	Romers Fescue	3.90%
	Carex obnupta	Slough Sedge	3.50%
	Deschampsia caespitosa	Tufted Hairgrass	2.00%
	Juncus tenuis	Slender Rush	0.10%
	Agrostis exerata	Spike Bentgrass	0.50%

**Coastal Grasslands** mixture is specially formulated for the coastal areas between the sand dune flats up to a 4000' elevation. An excellent seed mixture for all wet lying or brackish waters along the coast, from Northern California to Southern BC. Native biofiltration, rainwater garden, or wet meadow.

 <b>\$25.50 per lb.</b> <b>Seed Rate 1.5</b> <b>1.5 lbs. per 1000 sq. ft.</b> 	Bromus carinatus	California Brome	25.00%
	Lupinus albaculus	Sickle Keeled Lupine	25.00%
	Elymus elymoides	Slender Wheatgrass	19.00%
	Gaillardia aristata	Gaillardia	12.00%
	Lotus purshianus	Spanish Clover	8.00%
	Festuca occidentalis	Western Fescue	4.00%
	Eschscholzia californica	California Poppy	4.00%
	Koeleria cristata	Prairie Junegrass	1.50%
	Clarkia unguiculata	Elegant Clarkia	1.00%
	Achillea millefolium	Western Yarrow	0.50%

**Eco Prairie** is a Native Eco mix that has been designed for low maintenance / no maintenance sites. Eco Prairie has a high percentage of wildflowers and legumes which provide excellent nitrogen fixation. This combination of low growing native grasses and low growing wildflowers is very drought tolerant.

 <b>\$118.50 per lb.</b> <b>Seed Rate</b> <b>.5 lb. per 1000 sq. ft.</b>	Pseudotsuga menziesii	Douglas Fir	40.00%
	Abies grandis	Grand Fir	25.00%
	Mahonia nervosa	Tall Oregon Grape	15.00%
	Oemleria cerasiformis	Indian Plum	11.00%
	Sambucus cerulea	Blue Elderberry	6.00%
	Thuja plicata	Western Red Cedar	2.50%
	Holidiscus discolor	Ocean Spray	0.25%
	Gaultheria shallon	Salal	0.25%

**Fir Forest Mix** is used when a diverse fir community is desired. These species are slow to establish and it is recommended that a native erosion control mix be used in combination. In time this mix will add excellent biodiversity and a sustainable ecosystem. EcoLive™ organics w/mycorrhize is recommended with this mixture.

 <b>\$9.95 per lb.</b> <b>Seed Rate</b> <b>1 lb. per 1000 sq. ft.</b>	Elymus glaucus	Blue Wildrye	40.00%
	Bromus carinatus	California Brome	40.00%
	Festuca rubra rubra	Native Red Fescue	15.00%
	Deschampsia caespitosa	Tufted Hairgrass	5.00%

**Grasslands** mix is designed as a native for areas of emerging wetlands, and provides excellent biofiltration in natural vegetated swales. Excellent for erosion protection and large natural areas.

 <b>\$12.50 per lb.</b> <b>Seed Rate</b> <b>.5 lb. per 1000 sq. ft.</b>	Agropyron riparium	Sodar Streambank Wheatgrass	25.00%
	Festuca ovina var Covar	Covar Sheep Fescue	25.00%
	Poa ampla	Sherman's Big Bluegrass	16.00%
	Agropyron spicatum	Bluebunch Wheatgrass	16.00%
	Poa canbyi	Canbar Canby Bluegrass	9.00%
	Lupinus albalcalus	Sicklekeeled Lupine	9.00%

**Great Basin** is a native introduced upland habitat builder and erosion control mix. This mix is a primary upland mix of ODOT.

Mix Name	Botanical Name	Common Name	Mix Composition
 <b>\$161.50 per lb.</b> <b>Seed Rate</b> <b>.5 lb. per 1000 sq ft.</b>	Carex obnupta	Slough Sedge	27.00%
	Carex microptera	Small Wing Sedge	25.00%
	Carex stipata	Awl Sedge	29.50%
	Eleocharis palustris	Creeping Spike Rush	15.00%
	Scirpus microcarpus	Small Fruited Bulrush	3.00%
	Juncus tenuis	Slender Rush	0.50%

**Marsh** is a native wetland mix designed for a balance of site stabilization and wetland mitigation. Marsh combines wetland rushes and sedges that provided both food and shelter to a wide variety of wild game. It provides wetland species that establish easily in disturbed sites.

 <b>\$16.95 per lb.</b> <b>Seed Rate</b> <b>1 lb. per 1000 sq ft.</b>	Bromus carinatus	California Brome	50.00%
	Festuca ovina	Sheep fescue	18.00%
	Eschscholzia californica	California Poppy	8.00%
	Gaillardia pulchella	Indian Blanket	5.50%
	Achillea millefolium	Western Yarrow	5.00%
	Deschampsia caespitosa	Tufted Hairgrass	5.00%
	Lupinus bicolor	Bicolor Lupine	4.00%
	Koleria cristata	Praire Junegrass	3.50%
	Linaria maroccana	Spurred Snapdragon	1.00%

**Meadow** mix is a native grass wildflower combination. Excellent erosion control mix for large disturbed sites. Establishes quickly, and provides good habitat for wildlife.

 <b>\$13.95 per lb.</b> <b>Seed Rate</b> <b>1lb. per 1000 sq.ft</b>	Hordeum brachyantherum	Meadow barley	40.00%
	Bromus carinatus	California Brome	35.00%
	Festuca rubra rubra	Native Red Fescue	20.00%
	Deschampsia caespitosa	Tufted hairgrass	3.00%
	Agrostis exerata	Spike Bentgrass	2.00%

**Native E/C Mix** is used when a quick establishing native erosion control mix is required. We recommend using Native EC in combination with all our woody plant mixtures, along with EcoLive™ organics. This mix will provide a dense and fibrous root structure and will establish easily and quickly.

 <b>\$21.25 per lb.</b> <b>Seed Rate</b> <b>1 lb. per 1000 sq ft.</b> 	Festuca rubra rubra	Native Red Fescue	45.00%
	Bouteloua gracilis	Blue Grama	25.00%
	Buchole dactyloides	Buffalograss	20.00%
	Koeleria macrantha	Prairie Junegrass	7.00%
	Trifolium fragiferum	Strawberry Clover	3.00%

**Eco Turf** is a Native Eco Lawn mix that has been designed for low maintenance / no maintenance sites. Use this new mix when a Native Eco Lawn is desired. Similar to other "EcoLawns" but this one is NATIVE!!

 <b>\$55.95 per lb.</b> <b>Seed Rate</b> <b>.5 lb. per 1000 sq ft.</b>	Calamagrostis canadensis	Bluejoint Reedgrass	10.00%
	Alopecurus geniculatus	Water Foxtail	25.00%
	Alisima plantago aquatica	Water Plantain	15.00%
	Helianthus annuus	Sunflower	36.00%
	Scirpus microcarpus	Small Fruited Bulrush	3.00%
	Deschampsia elongata	Slender Hairgrass	10.00%
	Typhia latifolia	Cattails	1.00%
	EcoLive™ Organics	EcoLive™ Organics w Mycorrhize	

**Native Mix PhytoRemediation** describes the treatment of environmental problems (bioremediation) through use of plants. It is an excellent native seed mix with very hardy and large plants. This mixture is used for removing heavy metals, pesticides, solvents, explosives, petrochemicals, and their derivatives. The addition of EcoLive™ organics will develop the root structure and increase rhizofiltration, a form of bioremediation that involves filtering water through a mass of roots to remove toxic substances or excess nutrients.

Mix Name	Botanical Name	Common Name	Mix Composition
 <p><b>\$58.50 per lb.</b>  <b>Seed Rate 1</b>  <b>1 lb. per 1000 sq.ft.</b></p> <p><b>New Seed Mix</b></p>	Nemophila menziesii	Baby Blue Eye's	20.00%
	Hordeum brachyantherum	Meadow Barley	18.50%
	Gailardia aristata	Indian Blanket	18.00%
	Layia platyglossa	Tidy Tips	13.00%
	Lupinus rivularis	River Lupine	10.00%
	Camassia quamash	Camas	7.00%
	Deschampsia caespitosa	Tufted Hairgrass	4.50%
	Rudbeckia hirta	Black Eyed Susans	3.50%
	Lobularia maritima	Sweet Alyssum	2.00%
	Achillea millefolium	Western Yarrow	1.75%
	Erigeron speciosus	Aspen Daisy	1.25%
	Holidiscus discolor	Ocean Spray	0.50%

**Native Pollinator Mix** is a beautifully designed wildflower-grass mixture that attracts native pollinators such as honey bees and butterflies. The wildflowers make up over 70% of this mix and will provide the habitat to encourage pollinators to do their thing. Native plants can serve as larval host plants for some species of pollinators.

Mix Name	Botanical Name	Common Name	Mix Composition
 <p><b>\$14.95 per lb.</b>  <b>Seed Rate</b>  <b>1.5 lbs. per 1000 sq. ft.</b></p> <p><b>New Seed Mix</b></p>	Hordeum vulgare var Poco	Poco Barley	50.00%
	Elymus wawawainensis	Secar Bluebunch Wheatgrass	8.00%
	Agropyron spicatum	Bluebunch Wheatgrass	8.00%
	Lupinus albicaulis	Pine Lupine	7.00%
	Festuca idahoensis	Idaho fescue	5.00%
	Nassella viridula	Green Needlegrass	5.00%
	Elymus elymoides	Bottlebrush Squirreltail	4.00%
	Purshia tridentata	Antelope Bitterbrush	3.00%
	Poa ampla var shermans	Sherman's Big Bluegrass	2.50%
	Poa sandbergii	Sandberg's Bluegrass	2.00%
	Balsamorhiza sagittata	Arrowleaf Balsamroot	1.50%
	Koeleria cristata	Prairie Junegrass	1.50%
Achillea millefolium	Western Yarrow	1.50%	
Eriogonium umbellatum	Sulfer Buckwheat	1.00%	

**Rangeland** is a combination of native grasses and forbs designed for habitat establishment with an emphasis on forage ability. Provides high quality forage for Deer, Elk and Upland Birds.

Mix Name	Botanical Name	Common Name	Mix Composition
 <p><b>\$8.95 per lb.</b>  <b>Seed Rate</b>  <b>3 lbs. per 1000 sq. ft.</b></p> <p><b>New Seed Mix</b></p>	Hordeum vulgare var Poco	Poco Barley	40.00%
	Hordeum brachyantherum	Meadow Barley	28.00%
	Bromus carinatus	California Brome	18.00%
	Festuca romerii	Roemers Fescue	5.50%
	Trifolium fragiferum	Strawberry Clover	4.00%
	Clarkia amonea	Dwarf Godieta	1.50%
	Oenothera hookerii	Evening Primrose	1.50%
	Deschampsia caespitosa	Tufted Hairgrass	1.00%
	Agrostis exerata	Spike Bentgrass	0.50%

**Roadside Native Salt Tolerant Mix** helps with successful vegetation along roadsides accomplishes several goals, from maintaining visibility and safety for travelers to minimizing erosion and maintenance costs. Research demonstrates that native plants are particularly well-suited to these tasks. Sunmark's Roadside mix is a quick establishing native erosion control mix. This mix is highly salt tolerant with the potential to dramatically lower overall maintenance costs.

Mix Name	Botanical Name	Common Name	Mix Composition
 <p><b>\$15.50 per lb.</b>  <b>Seeding Rate</b>  <b>2 lbs. per 1000 sq. ft.</b></p> <p><b>New Seed Mix</b></p>	Hordeum brachyantherum	Meadow Barley	50.00%
	Bromus carinatus	California Brome	30.00%
	Festuca romerii	Roemers Fescue	8.00%
	Deschampsia caespitosa	Tufted Hairgrass	1.50%
	Agrostis exerata	Spike Bentgrass	1.00%
	Trifolium fragiferum	Strawberry Clover	5.50%
	Clarkia amonea	Dwarf Godieta	2.00%
	Oenothera hookerii	Evening Primrose	2.00%

**Native Salt Tolerant Mix** is a quick establishing native erosion control mix that is an excellent performer in high saline environments. Salt tolerant grasses and flowers provide beautiful seed mixtures that are suitable for planting where soils have high concentrations of salt such as roadsides and near oceans.

Mix Name	Botanical Name	Common Name	Mix Composition
 <p><b>\$14.95 per lb.</b>  <b>Seed Rate</b>  <b>1 lb. per 1000 sq. ft.</b></p> <p><b>New Seed Mix</b></p>	Elymus glaucus	Blue Wildrye	50.00%
	Festuca rubra rubra	Native Red Fescue	15.00%
	Hordeum brachyantherum	Meadow Barley	10.00%
	Glyceria occidentalis	Western Mannagrass	10.00%
	Beckmannia syzigachne	American Sloughgrass	10.00%
	Deschampsia caespitosa	Tufted Hairgrass	5.00%

A **Native Vegetated Swale** is a broad, shallow channel, densely planted with a variety of trees, shrubs, and grasses. They are designed to attenuate and in some cases infiltrate runoff from adjacent impervious surfaces, allowing pollutants to settle out in the process. Sunmark's Native swale mix has been designed to accentuate this purpose. It is comprised of native species that establish quickly and provide phytoremediation of stormwater.

Mix Name	Botanical Name	Common Name	Mix Composition
 <p><b>\$14.25 per lb.</b>  <b>Seed Rate 1</b>  <b>1 lb. per 1000 sq. ft.</b></p> <p><b>New Seed Mix</b></p>	Elymus glaucus	Blue Wildrye	50.00%
	Festuca rubra rubra	Native Red Fescue	30.00%
	Bromus carinatus	California Brome	10.00%
	Agrostis exerata	Spike Bentgrass	10.00%

**Native Uplands Mix** is an excellent native dryland mixture that is easy to establish and maintain. This mix is a simple combination of drought tolerant, native grasses that once established will provide cover and erosion protection for many years.

Mix Name	Botanical Name	Common Name	Mix Composition
 <p><b>\$12.95 per lb.</b>  <b>Seed Rate</b>  <b>1 lb. per 1000 sq. ft.</b></p>	Elymus glaucus	Blue Wildrye	46.00%
	Festuca rubra rubra	Native Red Fescue	38.00%
	Deschampsia caespitosa	Tufted Hairgrass	12.00%
	Glyceria occidentalis	Western Mannagrass	2.00%
	Beckmannia syzigachne	American Sloughgrass	2.00%

**Native Water Quality** is a salmon friendly native mix will perform well in the bottom of drainage swales, storm water retention ponds, and bio-filtration swales. This mixture will range from the continuously wet lowlands up into the riparian zone, offering erosion control and habitat development.

Mix Name	Botanical Name	Common Name	Mix Composition
 <p><b>\$23.95 per lb.</b>  <b>Seed Rate 1</b>  <b>1 lb. per 1000 sq. ft.</b></p>	Hordeum brachyantherum	Meadow Barley	35.00%
	Glyceria occidentalis	Western Mannagrass	20.00%
	Festuca rubra rubra	Native Red Fescue	20.00%
	Alopecurus geniculatus	Water Foxtail	13.00%
	Eleocharis palustris	Creeping Spike Rush	5.00%
	Beckmannia syziganche	American Sloughgrass	4.00%
	Deschampsia caespitosa	Tufted Hairgrass	2.50%
	Agrostis exerata	Spike Bentgrass	0.50%

**Native Wetlands Mix** is a native wetland grass mixture that is less expensive than Marsh. Comprised mostly of wetland grasses this mix will establish readily and provide good erosion control and improved habitat. Use in the lower areas of bioswales and the low lying flood plain in the wetland zone.

Mix Name	Botanical Name	Common Name	Mix Composition
 <b>\$61.75 per lb.</b> <b>Seed Rate</b> <b>1 lb. per 1000 sq. ft.</b>	Acer macrophyllum	Big Leaf Maple	30.00%
	Arbutus menziesii	Pacific Madrone	20.00%
	Quercus garryana	Oregon White Oak	15.00%
	Pinus ponderosa	Ponderosa Pine	15.00%
	Lupinus polyphillis	Many Leaved Lupine	10.00%
	Elymus glaucus	Blue Wildrye	3.05%
	Arctostaphylos uva-ursi	Bearberry	3.00%
	Balsamorhiza sagittata	Arrowleaf Balsamroot	2.00%
	Symphoricarpus albus	Snowberry	1.80%
	Spirea douglasii	Douglas Spirea	0.10%
	Agrostis exerata	Spike Bentgrass	0.05%

**Oak Savannah Mix** is an excellent blend of native shrub trees and grass mixture for reclamation of natural oak shrub scrub sites, providing excellent habitat enhancement and erosion control. Oak Savannah mix may be used in native plantings for reclamation throughout the Pacific Northwest. EcoLive™ organics w/mycorrhize is recommended with this mixture.

 <b>\$115.95 per lb.</b> <b>Seed Rate</b> <b>.75 lb. per 1000 sq. ft.</b>	Pinus monticola	Western White Pine	30.00%
	Pinus ponderosa	Ponderosa Pine	25.00%
	Abies concolor	White Fir	25.00%
	Pinus contorta var murrayana	Lodgepole Pine	6.00%
	Pseudotsuga menziesii	Douglas Fir	5.00%
	Arctostaphylos ura-ursi	Bearberry	3.00%
	Picea pungens glauca	Blue Spruce	2.00%
	Symphoricarpus alba	Snowberry	2.00%
	Ceanothus velutinus	Snowbrush	1.50%
	Chrysothamnus nauseosus	Rubber Rabbitbrush	0.50%

**Pine Forest Mix** will flourish in the colder drier temperate regions of the Pacific Northwest. These species are slow to establish and it is recommended that a native erosion control mix be used in combination. This mixture has good fire tolerance and should be used in restoration and habitat enhancement. EcoLive™ organics w / mycorrhize is recommended with this mixture.

 <b>\$7.95 per lb.</b> <b>Seed Rate 1.5</b> <b>1.5 lb. per 1000 sq. ft.</b>	Agropyron spicatum var Anatone	Anatone Bluebunch Wheatgrass	35.00%
	Elymus elymodies	Slender Wheatgrass	30.00%
	Festuca idahoensis	Idaho Fescue	20.00%
	Oryzopsis hymenoides	Indian Ricegrass	10.00%
	Festuca ovina	Sheep Fescue	5.00%

**Prairie Native Seed Mix** has been designed as a native upland habitat builder, combining winter hardy, drought resistant prairie grasses that establish easily and provide excellent erosion control. Native Prairie is an inexpensive native mix that works well for highway roadsides and low rainfall areas.

 <b>\$86.95 per lb.</b> <b>Seed Rate</b> <b>1 lb. per 1000 sq. ft.</b>	Crataegus douglasii	Black Hawthorne	35.00%
	Fraxinus latifolia	Oregon Ash	30.00%
	Symphoricarpus albus	Snowberry	12.00%
	Glyceria elata	Tall Mannagrass	10.00%
	Cornus stolonifera	Red-Osier Dogwood	7.00%
	Carex obnupta	Slough Sedge	4.00%
	Alnus rubra	Red Alder	1.80%
	Populus tremuloides	Quaking Aspen	0.10%
	Populus trichocarpua	Black Cottonwood	0.10%

**Riverside Woods Mix** is an excellent native shrub, tree and grass mixture for reclamation of natural low lying sites. Providing excellent habitat enhancement and erosion control. Riverside Woods mix may be used in native plantings for reclamation throughout the interior valleys of the Pacific Northwest. EcoLive™ organics w/mycorrhize is recommended with this mixture.

Mix Name	Botanical Name	Common Name	Mix Composition
 <b>\$36.50 per lb.</b> <b>Seed Rate</b> <b>1 lb. per 1000 sq. ft.</b> 	Hordeum brachyantherum	Meadow barley	38.50%
	Bromus carinatus	California Brome	20.00%

	Spirea douglasii	Douglas Spirea	2.50%
	Mahonia aquilifolium	Tall Oregon Grape	3.50%
	Holidiscus discolor	Ocean Spray	0.25%

**Shrub Swamp** is an excellent mix for native seeding projects that requires a quickly establishing grass-forb mix with woody plants. Over time, the woody plants in Shrub Swamp will take over and create a shrub and tree community. Excellent for streambank and shoreline applications.

 <b>\$10.00 per lb.</b> <b>Seed Rate 1</b> <b>1 lb. per 1000 sq. ft.</b>	Elymus glaucus	Blue Wildrye	60.00%
	Festuca rubra rubra	Native Red Fescue	30.00%
	Bromus carinatus	California Brome	10.00%

**Stream Bank** provides excellent erosion protection in the riparian zone. Also performs well on well drained dryer sites.

 <b>\$12.95 per lb.</b> <b>Seed Rate 1.5</b> <b>1.5 lbs. per 1000 sq. ft.</b>	Festuca rubra rubra	Native Red Fescue	50.00%
	Bromus carinatus	California Brome	20.00%
	Elymus glaucus	Blue Wildrye	20.00%
	Lupinus rivularis	Streambank Lupine	10.00%

**Streambank Plus** provides excellent Erosion protection with the added benefit of Lupine, a perennial forb.

 <b>\$15.50 per lb.</b> <b>Seed Rate .75</b> <b>.75 lb. per 1000 sq. ft.</b> 	Pseudoroegneria spicata	Bluebunch Wheatgrass	20.00%
	Bromus carinatus	California Brome	16.50%
	Festuca idahoensis	Idaho Fescue	15.00%
	Elymus elymodies	Slender Wheatgrass	15.00%
	Elymus glaucus	Blue Wildrye	15.00%
	Glyceria occidentalis	Western Mannagrass	10.00%
	Deschampsia caespitosa	Tufted Hairgrass	3.00%
	Lotus purshania	Spanish Clover	2.50%
	Eleocharis palustris	Creeping Spike Rush	1.00%
	Lupinus albaculus	Sickle Keeled Lupine	1.00%
Agrostis exerata	Spike Bentgrass	1.00%	

**Wapiti Pasture** is a native habitat builder consisting of a perennial grass-legume mix. It provides excellent nutrition for deer and elk and many other browsing species. Wapiti Pasture is easy to establish and has very deep roots that make it drought tolerant. This mix works well in wet pastures and dry sites alike as it is a combination of FACW species and FACU species. Many of the species are recommended by Fish and Wildlife for restoration of native forage areas.

Mix Name Botanical Name Common Name Mix Composition

Mix Name	Botanical Name	Common Name	Mix Composition
<b>Wetland Prairie</b> \$54.95 per lb. Seed Rate 1lb. per 1000 sq. ft.	Horedum brachyantherum	Meadow Barley	25.00%
	Danthonia californica	California Oatgrass	25.00%
	Glyceria occidentalis	Western Mannagrass	15.00%
	Deschampsia cespitosa	Tufted Hairgrass	7.00%
	Sisyrinchium idahoense	Blue Eyed Grass	6.00%
	Camassia quamish	Camas	5.00%

	Sambucus racemosa	Red Elderberry	9.00%
	Alnus rubra	Red Alder	3.00%
	Holiduscus discolor	Ocean Spray	0.25%

**Woodlands Mix** is an excellent Native Tree/Shrub mix for site stabilization and erosion control of steep vegetated-slopes. Woodlands is also used in Native plantings for reclamation of forested understudy where a non-grass community is desired. EcoLive™ organics w mycorrhize is recommended with this mixture.

## REGREEN

\$6.00 per lb.  
50 lbs per acre

**Regreen**, a wheat x wheatgrass hybrid that produces a sterile plant. After it dies out it does not leave a new generation of plants behind to compete with the slower growing perennial species. A highly versatile temporary cover crop, Regreen can be planted in either the spring or fall in most climates. A large seed allows Regreen to germinate quickly and get one step ahead of any potential weeds. A dense, fibrous root system enhances Regreen's ability to stabilize the soil surface and provide vigorous seedlings. A deep root system also allows the plant to be drought tolerant, winter hardy and adaptable to varying soil and moisture conditions.

# EROSION CONTROL MIXES

EROSION CONTROL MIXES

EROSION CONTROL MIXES

Sunmark carries a full line of erosion control seed and seed mixes. These mixes are formulated to offer a high degree of erosion protection with extremely fast germination for use on areas which are subject to wind and water erosion. These mixes include the newest species varieties available and will provide better protection for highly erodible sites. Please contact us for consultation on your individual projects.

Mix Name	Botanical Name	Common Name	Mix Composition
	Rubra rubra	Cindy Lou Creeping Red Fescue	22.50%

	Agrostis stolonifera	Creeping Bentgrass	3.00%
	Bellis perennis	Dwarf English Daisy	2.00%

**\$40.00 per lb.**  
**Seed Rate**  
**.75 lbs. per 1000 sq. ft.**

**Green Roof Ecology Mix** is specialized ecolawn for greenroof applications this mix does well in low profile and poor soils. Short vertical growth habit will add beautiful color to your greenroof.

Mix Name	Botanical Name	Common Name	Mix Composition
 <b>Green Roof Ecology Mix II</b> \$63.50 per lb. Seed Rate .5 lbs. per 1000 sq. ft. 	Limnanthes douglasii	Meadowfoam	33.00%
	Nemophila menziesii	Baby Blue Eye's	20.00%
	Prunella vulgaris	Self Heal	12.00%
	Festuca ovina	Sheep Fescue	10.00%
	Clarkia amoena	Dwarf Godieta	6.00%
	Cerastium biebersteinii	Snow in Summer	6.00%
	Myosotis sylvatica	Forget-me-not	6.00%
	Poa sandbergii	Sandberg's Bluegrass	4.00%
	Bellis perennis	Dwarf English Daisy	2.50%
	Agrostis stolonifera	Creeping Bentgrass	0.50%

**Green Roof Ecology Mix II** is a new mix that has a high percentage of herbaceous plant species. Meadowfoam is a primary component of this mix that adds fireworks to the wildflower display in the spring and fall. With over 80 percent of the mix consisting of wildflowers and forbs, this mix does extremely well in poor, shallow green roof soils. Very drought tolerant and little need for synthetic fertilizer makes this mix is an excellent re-seeder.

 <b>Lawn Bloomers</b> \$18.75 per lb. Seed Rate 1 lbs. per 1000 sq. ft.	Lolium perenne var Celebration	Celebration Perennial Rye	50.00%
	Festuca brevifolia var Spartan	Spartan Hard Fescue	17.00%
	Festuca ovina var Azay Blue	Azay Blue Sheep Fescue	10.00%
	Trifolium fragiferum	Strawberry Clover	6.00%
	Lobularia maritima (dwarf)	Royal Carpet	4.00%
	Trifolium repens	Dutch White Clover	5.00%
	Anagallis arvensis	Pimpernell	3.00%
	Eschscholzia caespitosa	Dwarf California Poppy	4.00%
	Silene armeria dwarf	Dwarf Catchfly	1.00%
	Bellis perennis	Dwarf English Daisy	1.00%

**Lawn Bloomers** provides incredible color with a quick establishing, low maintenance turfgrass. Lawn Bloomers is a supreme mix for low mow and no mow areas. Low fertilizer requirements and excellent drought resistance.

 <b>Odot mix</b> \$1.50 per lb. Seed Rate 1 lbs. per 1000 sq. ft.	Lolium perenne	Perennial Ryegrass	39.00%
	Festuca commutata	Chewings Fescue	25.00%
	Festuca rubra	Creeping Red Fescue	25.00%
	Agrostis tenuis	Highland Colonial Bentgrass	7.00%
	Trifolium repens	White Clover	4.00%

**Oregon Department of Transportation Mix** is quick to establish and provides good coverage.

 <b>Odot e/c mix</b> \$1.95 per lb. Seed Rate 2 lbs. per 1000 sq. ft.	Lolium multiflorum var TXR	TXR Annual Ryegrass	60.00%
	Festuca rubra var Sealinks	Sealinks Slender Creeping Red Fescue	18.00%
	Festuca brevifolia var Spartan II	Spartan II Hard Fescue	15.00%
	Trifolium repens	White Clover	4.00%
	Puccinellia pumila	Fults Alkaligrass	3.00%

**Oregon Department of Transportation Erosion Control Mixture** for dry regions of the state.

 <b>Odot upland mix</b> \$5.75 per lb. Seed Rate 1 lbs. per 1000 sq. ft.	Elymus lanceolatus	Thickspike Wheatgrass	32.00%
	Elymus lanceolatus ssp. psammophilus	Sodar Streambank Wheatgrass	32.00%
	Agropyron cristatum	Crested Wheatgrass	24.00%
	Festuca ovina var covar	Covar Sheep Fescue	7.00%
	Poa ampla var shermans	Sherman's Big Bluegrass	5.00%

**Oregon Department of Transportation Upland Mix** is an upland wheatgrass mix consisting of excellent performing wheatgrasses with extended root depths for deep soils.

 <b>SALT TOLERANT</b> \$1.95 per lb. Seed Rate 3 lbs. per 1000 sq. ft.	Lolium perenne	Allstar III Perennial Ryegrass	61.00%
	Festuca rubra var.Sealink	Sealink Slender Creeping Red Fescue	30.00%
	Puccinellia pumila	Fults Alkaligrass	5.50%
	Agrostis stolonifera	Seaside Creeping Bentgrass	3.50%

**Salt Tolerant Mix** is designed for quick establishment and provides excellent cover on high salt sites. This mix is an excellent choice for bioswales, roadsides and any other areas where a dense vegetative cover is desired.

 <b>Stabilizer E/C MIX</b> \$1.35 per lb. Seed Rate 10 lbs. per 1000 sq. ft.	Lolium perenne var. Turfnet	Turfnet Perennial Rye	40.00%
	Lolium multiflorum var TXR	TXR Annual Ryegrass	40.00%
	Festuca rubra	Creeping Red Fescue	16.00%
	Trifolium repens	White Clover	3.75%
	Agrostis tenuis	Highland Colonial Bentgrass	0.25%

**Stabilizer E/C Mix** is for site stabilization and erosion control where quick establishment, low growing characteristics are desired.

 <b>supreme plus mix</b> \$1.50 per lb. Seed Rate 4 lbs. per 1000 sq. ft.	Festuca arundinacea	Crossfire 3 Turf Type Tall Fescue	40.00%
	Lolium perenne	Turfnet Perennial Rye	30.00%
	Festuca rubra	Creeping Red Fescue	25.00%
	Agrostis tenuis	Highland Colonial Bentgrass	5.00%

**Supreme Plus Mix** is a highly effective erosion control seed mix that establishes quickly. Develops a dense thick vegetative cover and provides a long lasting erosion control solution.

 <b>Xeriscape ecolawn mix</b> \$16.50 per lb. Seed Rate 2 lbs. per 1000 sq. ft.	Festuca brevifolia	Spartan II Hard Fescue	40.00%
	Festuca ovina var. Covar	Covar Sheep Fescue	15.00%
	Petalostemum purpureum	Purple Prairie Clover	15.00%
	Centaurea cyanus dwarf	Dwarf Bachelor Buttons	12.00%
	Poa sandbergii	Sandberg Bluegrass	6.00%
	Nemophila menziesii	Baby Blue Eye's	5.00%
	Trifolium repens	White Clover	2.00%
	Lobularia maritum dwarf	Alyssum Carpet of Snow	2.00%
	Sphaeralcea coccinea	Scarlet Globmallow	2.00%
	Achillea millefolium	Dwarf White Yarrow	1.00%

**Xeriscape EcoLawn Mix** has been developed as a very low growing, extremely drought tolerant grass/wildflower ground cover. This mixture has a very high ratio of wildflower to grasses and will flourish in very low rainfall areas. This unique mixture of sod and clump grasses, legumes, and wildflowers has been designed to provide an ecological alternative to typical turfgrass lawn.

Sunmark provides turf seeds for athletic fields, golf courses, commercial landscaping, parks, roadsides, and fine residential lawns. Our mixtures use the newest varieties available and continually push the envelope of supreme performance and beauty. Sunmark's association with the leaders in commercial and university seed breeding provides new species that are constantly evaluated in the field and with the National Turfgrass Evaluation Program. **Sunmark's Celebration** (3-way perennial ryegrass blend) has set new standards with a darker green color and the latest improvements in perennial ryegrass. **DOT Multipurpose** and **Northwest Supreme Lawn Mix** are our supreme low maintenance mixes and our **Sun** and **Shadow** mixes are outstanding turf performers in their respected areas. Please contact us for information on the best use of each of our premium turf seed mixtures.

	Festuca arundinacea	Bullseye Turf Type Tall Fescue	20.00%		Festuca arundinacea	Crossfire 3 Turf Type Tall Fescue	33.00%
	Festuca arundinacea	Turbo RZ Turf Type Tall Fescue	20.00%		Festuca arundinacea	Corona Turf Type Tall Fescue	33.00%
	Lolium perenne	Buena Vista Perennial Ryegrass	10.00%				
	Lolium perenne	Fusion Perennial Ryegrass	10.00%				
<p><b>Graze Manager</b> is a good choice for airports, athletic fields, parks, school grounds, golf course, and other lower maintenance industrial turf areas. ADVANTAGES of Graze Manager are its high entophyte content. Entophyte's are a beneficial fungus that resides in the plants. This fungus is not palatable to grazing animals or birds, keeping the nuisance of grazing animals to a minimum.</p> <p><b>Team Jr.</b> is a high-quality tall fescue turf with slower growth characteristics. It combines the attributes of Pickseed's finest turf-type tall fescue varieties to produce a blend of maximum genetic diversity and adaptability. With some of the highest-performing dwarf and semi-dwarf varieties available to choose from, Team Jr. outperforms all other tall fescue blends.</p>							
 <p><b>NORTHWEST SUPREME</b> LAWN MIX</p> <p>\$1.40 per lb. Seed Rate 8 lbs per 1000 sq. ft</p>	Lolium perenne	Cutter II Perennial Ryegrass	35.00%	 <p><b>TURF NET</b></p> <p>\$1.60 per lb. Seed Rate 10 lbs per 1000 sq. ft</p> <p>New Seed Mix</p>	Lolium perenne	Fiesta 4 Spreading Ryegrass	34.00%
	Lolium perenne	Dasher III Perennial Ryegrass	35.00%		Lolium perenne	Dasher 3 Spreading Ryegrass	33.00%
	Festuca rubra	Garnet Creeping Red Fescue	15.00%		Lolium perenne	Seville 3 Spreading Ryegrass	33.00%
	Festuca rubra spp. Longifolia	Windward Chewings Fescue	15.00%				
<p><b>Northwest Supreme</b> is the premier seed blend for the Pacific Northwest. It is a good choice for home lawns, athletic fields, parks, school grounds, and golf courses. Less water is needed because of the deep root system. It adapts well to heat, shade and cold and stands up to heavy traffic.</p> <p><b>Turf Net</b> Spreading Perennial Ryegrass is known for quick establishment, excellent wear tolerance and high turf quality. This new sub species of tillering perennial ryegrasses is transforming athletic fields across the country. Now you can establish or over seed a strong rhizomatous perennial rye that has excellent wear characteristics and rapid repair abilities!</p>							
 <p><b>SUNMARK PROSPORTS</b> An Elite, Durable Turf For Premier Sports Fields</p> <p>\$1.60 per lb. Seed Rate 8 lbs per 1000 sq. ft</p>	Lolium perenne	Dasher III Perennial Ryegrass	50.00%	 <p><b>TURF WORX</b></p> <p>\$1.05 per lb. <p><b>Pro Sports</b> is recommended for use wherever high profile, high traffic premium turf grass is needed. It is a good choice for home lawns, athletic fields, parks, school grounds, and golf courses. Excellent recovery makes this mix best for athletic field turf.</p> <p><b>Turf Worx</b> is an excellent, inexpensive, quick establishment contractor mix. Turf Worx is a blend of 60% TXR Transitional Annual Ryegrass, 30% Perennial Ryegrass, and 10% Creeping Red Fescue. It is an excellent choice where quick establishment is required along with high erosion protection. This mix is best used for quick establishment of vegetation for a low cost.</p>							

# FORAGE MIXES

FORAGE MIXES

FORAGE MIXES

Sunmark provides improved forage, legumes and cover crop seeds to farmers, erosion control experts, wildlife biologists, livestock producers and horse professionals. We have focused on improved cultivars that are bred to produce more tonnage, withstand intensive grazing, provide superior erosion protection, and offer higher feed value. Sunmark's forage varieties and mixes have been evaluated by the top agricultural universities in the United States. Please give us a call for help on selecting the correct forage mixture for your project.

Mix Name	Botanical Name	Common Name	Mix Composition
 <b>Foothills</b> \$2.25 per lb. Seed Rate 3 lbs per acre	Lolium multiflorum tetraploid	Tetrastar Tetraploid	25.00%
	Lolium perenne	Annual Ryegrass	25.00%
	Dactylis glomerata	Albion Tetraploid	
		Perennial Rye	
		Quickdraw HSG	3.00%
		Orchardgrass	
		Crimson Clover	12.00%
	Trifolium repens	Domino White Clover	10.00%
	Trifolium repens	Ladino White Clover	5.00%

**Foothills** is an adapted seed mix that provides erosion control and good wildlife forage on low to mid-elevation sites. Quick to establish and very nutritious for deer and elk, with a high percentage of legumes. Foothills will provide excellent erosion protection and forageability on weak or disturbed sites.

 <b>Meadow Downs</b> \$1.95 per lb. Seed Rate 3 lbs per acre	Dactylis glomerata	Quickdraw HSG	25.00%	
	Lolium perenne	Orchardgrass		
		Albion Tetraploid	23.00%	
		Perennial Rye		
		Rustler Forage Tall Fescue	Rustler Forage	18.00%
		Lolium multiflorum tetraploid	Tall Fescue	18.00%
		Tetrastar Tetraploid		
		Annual Ryegrass		
	Phleum pratense	Titan Timothy	10.00%	
	Poa pratense	Kentucky Bluegrass	6.00%	
		Forage Type		

**Meadow Downs** is a premium forage seed mix for horses. With the unique nutritional needs of horses, Meadow Downs is specifically formulated for optimum forage value. Meadow Downs mixture provides the horse owner with endophyte-free pastures all season long. Each variety in Meadow Downs was selected to handle the close grazing habit of horses. This mix also performs excellently as a grass-hay pasture in all areas where cool-season forages are grown.

 <b>Sucra Seed Beef Bank</b> \$2.45 per lb. Seed Rate 1.25 lbs per acre	Lolium perenne	AberDart HSG	25.00%
		Perennial Ryegrass	
	Lolium perenne	AberAvon HSG	25.00%
		Perennial Ryegrass	
	Lolium multiflorum	AberEcho HSG Tetraploid	20.00%
		Intermediate Ryegrass	
	Dactylis glomerata	QuickDraw Orchardgrass	15.00%
	Lolium multiflorum	Bandito Intermediate Ryegrass	10.00%
	Trifolium pratense	Medium Clover	3.00%
	Trifolium repens var Ladino	Ladino Clover	2.00%

**Beef Bank** High Sugar Grass pastures allows ranchers to work with nature to improve the health and yield of their livestock, pastures and ranching operations. This proven formula is the preferred choice of forward thinking farmers and ranchers throughout the Northwest, Midwest, Northeastern and Mid Atlantic regions, including grass fed, management intensive grazing, sustainable and organic farmers and ranch operations.

 <b>Sucra Seed Cash Cow</b> \$2.75 per lb. Seed Rate 1.25 lbs per acre	Lolium perenne	AberDart HSG	25.00%
	Lolium perenne	Perennial Ryegrass	
		AberAvon HSG	25.00%
		Perennial Ryegrass	
	Lolium multiflorum	AberEcho HSG Tetraploid	18.00%
		Intermediate Ryegrass	
	Medicago sativa	Perfect Alfalfa	15.00%
Lolium multiflorum	Bandito Intermediate Ryegrass	10.00%	
	Phleum pratense	Kootenai Timothy	5.00%
	Trifolium repens	Ladino Clover	2.00%

**Cash Cow** is being used by progressive dairy farmers throughout the Northwest, Midwest, Northeastern and Mid-Atlantic regions are turning to Cash Cow and Sweet Silage's High Sugar Grass pasture mixes. These proven formulas, beneficial for both organic and non-organic farms, allow dairy farmers work with nature to improve the health and yield of their cows, pastures and dairy operations.

Mix Name	Botanical Name	Common Name	Mix Composition	
 <b>Sucra Seed Great Gains</b> \$2.45 per lb. Seed Rate 1 lb per acre	Lolium perenne	AberDart HSG	28.00%	
	Lolium perenne	Perennial Ryegrass		
		AberAvon HSG	28.00%	
		Perennial Ryegrass		
	Lolium multiflorum	AberEcho HSG Tetraploid	27.00%	
		Intermediate Ryegrass		
		Phleum pratense	Titan Timothy	10.00%
		Chicorium intybus	Six Points Chicory	5.00%
		Trifolium repens	Winter White Clover	2.00%

**Great Gains** High Sugar Grass pastures allow farmers to work with nature to improve the health and yield of their livestock, pastures and farming operations. This proven formula is the preferred choice of progressive farmers throughout the Northwest, Midwest, Northeastern and Mid Atlantic regions, including sustainable and organic farmers.

 <b>Sucra Seed Pasture Sweetner</b> \$2.95 per lb. Seed Rate 1.25 lb per acre	Lolium perenne	AberDart HSG	30.00%
	Lolium perenne	Perennial Ryegrass	
		AberAvon HSG	30.00%
		Perennial Ryegrass	
	Lolium multiflorum	AberEcho HSG Tetraploid	30.00%
	Lolium multiflorum	Intermediate Ryegrass	10.00%
		Bandito Intermediate Ryegrass	

**Pasture Sweetner** is a concentrated mix of High Sugar Grass varieties for use in overseeding existing pastures.

 <b>Sucra Seed Sweet Silage</b> \$2.45 per lb. Seed Rate 1.25 lb per acre	Lolium multiflorum	AberEcho HSG Tetraploid	50.00%
	Lolium perenne	Intermediate Ryegrass	
		AberDart HSG	20.00%
		Perennial Ryegrass	
	Lolium perenne	AberAvon HSG	20.00%
	Lolium perenne	Perennial Ryegrass	
	Trifolium Pratense	Medium Red Clover	10.00%

The **Sweet Silage** mix combines three varieties of High Sugar Grasses, as well as red clover, to create a silage mix that is designed to enhance performance and reduce the overall cost of silage production, while increasing the environmental benefits compared with traditional silage mixes of either alfalfa or red clover.

 <b>Sucra Seed Sweet Spot</b> \$3.95 per lb. Seed Rate 1 lb per acre	Lolium perenne	AberDart HSG	33.00%	
	Lolium perenne	Perennial Ryegrass		
		AberAvon HSG	33.00%	
		Perennial Ryegrass		
	Trifolium pratense	Dynamite Medium	11.00%	
		Red Clover		
		Trifolium repens	Winter White Clover	11.00%
		Brassica rapa	Purple Top Turnips	6.00%
	Chicorium intybus	Six Points Chicory	6.00%	

**Sweet Spot** has hunters and wildlife managers across the US creating high-nutrition food plots that deer simply cannot resist. Sweet Spot mixes feature High Sugar Grasses. These unique perennial ryegrasses can produce bigger racks and as much as 20% more body mass. Sweet Spot is a perennial wildlife mix that establishes quickly, winters well and creates fool-proof food plots year after year. Sweet Spot mixes are more effective on a deer's complex digestive system, which can't process proteins without carbohydrates (sugars). Other plot mixes are packed with proteins, but don't deliver the sugars deer need to process that protein and grow. Sweet Spot is high in both protein and carbohydrate content so deer get optimum nutrition.

	Melilotus officinalis	Yellow Blossom Sweet Clover	2.00%		Scirpus actus	Hardstem Bulrush	1.00%
					Carex obnupta	Slough Sedge	1.00%
			Typhia latifolia	Cattails	0.50%		

**Upland Food Plot Mix** is designed to provide a varied mixture of annuals that provide superior food for the upland game birds. This mixture needs to be replanted every year to provide the optimum food value for game birds.

**Wetland Cover** is designed to provide natural habitat cover mixture for waterfowl. Providing nesting material and cover from predators. Wetland Cover mix will enhance the habitat for all game birds and provide the home they need to improve mortality and encourage nesting. Wetland Cover is a Native mixture that will enhance any wetland area.

## WILDFLOWER MIXES

WILDFLOWER MIXES

WILDFLOWER MIXES

Sunmark Wildflower mixtures are formulated on the basis of climatic conditions (rainfall, temperature range, humidity) and elevation. All mixtures contain 16 to 22 species. Annuals have been included to establish cover quickly and to give color the first year; some may produce new plants the following year (the biennials may also reseed). Perennial plants live for more than two years and flower from the second year onward. All species require full or partial sun, with the exception of those in the Shade Mixture. Sunmark mixtures are blended to give the widest possible range of colors and periods of bloom. Mixtures may vary occasionally from the indicated listing based on availability of individual species.

**Bird & Butterfly Mixture****\$40.00 per lb.**

NEW! This choice mixture provides seeds and nectar to songbirds, hummingbirds and butterflies.

Planting Rate acre 10-20 lbs.  
Planting Rate .5 lbs/1000 sq. ft.

Common Name: Showy Milkweed • Cornflower, Dwarf • Wallflower • Godetia • Lance-Leaved Coreopsis • Dwarf Red • Plains Coreopsis • Larkspur • Purple Coneflower • California Poppy • Perennial Gaillardia • Annual Gaillardia • Candytuft • Gayfeather • Blue Flax • Sweet Alyssum • Perennial Lupine • Lemon Mint • Dwarf Red Coneflower • Black-Eyed Susan • Scarlet Sage

**Brilliant Annuals****\$36.00 per lb.**

This mixture is useful for reseeding purposes where an ongoing annual display is important, or for temporary wildflower plantings.

Planting Rate acre 5-10 lbs.  
Planting Rate .5 lb./1000 sq. ft.

Dwarf Godetia • Clarkia • Dwarf Plains Coreopsis • Chinese Forget-Me-Not • Rocket Larkspur • African Daisy • California Poppy • Bird's Eyes • Candytuft • Spurred SnapUragon • Sweet Alyssum • Texas Bluebonnet • Five-Spot • Baby Blue-Eyes • Corn Poppy • Dwarf Catchfly

**Clubhouse/Gulf Course****\$34.00 per lb.**

This annual mixture provides an ever changing rainbow of colors throughout the season. It is suitable for areas near trees, greens, lakes or around the clubhouse.

Planting Rate acre 6-12 lbs.  
Planting Rate .5 lb./1000 sq. ft.

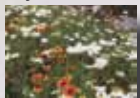

Dwarf Godetia • Clarkia • Dwarf Plains Coreopsis • Chinese Forget-Me-Not • Rocket Larkspur • African Daisy • California Poppy • Bird's Eyes • Candytuft • Spurred SnapUragon • Sweet Alyssum • Texas Bluebonnet • Five-Spot • Baby Blue-Eyes • Corn Poppy • Dwarf Catchfly

**Cool Breeze****\$43.10 per lb.**

All Flower blooms are in the white to blue color range including various shades of purple and lavender.

Planting Rate/acre 15-30 lbs.  
Planting Rate .5 lb./1000 sq. ft.

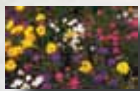

White Yarrow • Polka Dot Mix • Dwarf Godetia • Forget-Me-Not • Sweet William Pinks • Baby's Breath • Dwarf Candytuft • Spurred Snapdragon • Blue Flax • Sweet Alyssum • Dwarf Lupine • Five-Spot • Baby Blue Eyes • Dwarf Catchfly

**Drylands****\$36.00 per lb.**

(10-30 inches rainfall/year)

Planting Rate acre 6-12 lbs.  
Planting Rate .5 lb./1000 sq. ft.

White Yarrow • Desert Marigold • Dwarf Cornflower • Plains Coreopsis • African Daisy • California Poppy • Perennial Gaillardia • Annual Gaillardia • Baby's Breath • Tidy-Tips • Spurred SnapDragon • Blue Flax • Sweet Alyssum • Blazing Star • Corn Poppy • Penstemon • California Bluebell • Prairie Coneflower

**Gulf Coast/ Caribbean Mix****\$35.00 per lb.**Planting Rate/acre 10-20 lbs.  
Planting Rate .5 lb./1000 sq. ft.

Dwarf Cornflower • Wallflower • Dwf. Lance-Lvd. Coreopsis • Cosmos, Dwarf • Sulphur Cosmos • African Daisy • Annual Gaillardia • Annual Baby's Breath • Gayfeather • Spurred Snapdragon • Scarlet Flax • Blue Flax • Sweet Alyssum • Four-O'Clock • Lemon Mint • Black-Eyed Susan • Catchfly • Black-Eyed Susan

**Knee High / Low Profile****\$28.00 per lb.**

This mix is less than 24 inches high and provides a neater appearance than taller mixes. Good for residential or commercial landscaping where height is a factor.

Planting Rate acre 7-14 lbs.  
Planting Rate .5 lb/1000 sq. ft.

Dwarf Cornflower • Siberian Wallflower • Dwarf Godetia • Lance-Leaved Coreopsis • Dwarf Plains Coreopsis • Chinese Forget-Me-Not • Rocket Larkspur • Sweet William Pinks • African Daisy • California Poppy • Perennial Gaillardia • Annual Baby's Breath • Candytuft • Scarlet Flax • Blue Flax • Sweet Alyssum • Corn Poppy • Prairie Coneflower • Black-Eyed Susan • Catchfly • Moss Verbena

**Low-Growing****\$35.00 per lb.**

This mixture is less than 16 inches high and provides a manicured appearance which is ideal for residential or commercial landscaping where height is a factor.

Planting Rate/acre 5-10 lbs.  
Planting Rate .5 lb./1000 sq. ft.

Tussock Bellflower • Dwarf Cornflower • Siberian Wallflower • Dwarf Godetia • Dwarf Lance-Leaved Coreopsis • Dwarf Plains Coreopsis • Cottage Pinks • African Daisy • California Poppy • Candytuft • Spurred Snapdragon • Sweet Alyssum • Forget-Me-Not • Dwarf Evening Primrose • Iceland Poppy • California Bluebell • Dwarf Catchfly • Moss Verbena • Johnny Jump-Up

**Midwest Impressions****\$35.00 per lb.**

U.S.: Illinois, Indiana, Iowa eastern Kansas Kentucky, Michigan, Minnesota, Missouri, eastern Nebraska, Ohio, Wisconsin. Canada: southern Manitoba, Ontario.

Planting Rate/acre 6-12 lbs.  
Planting Rate .5 lb./1000 sq. ft.

New England Aster • Dwarf Cornflower • Shasta Daisy • Lance-Leaved Coreopsis • Plains Coreopsis • Purple Coneflower • Annual Gaillardia • Ox-Eye Sunflower • Thickspike Gayfeather • Scarlet Flax • Prairie Aster • Dwarf Evening Primrose • Corn Poppy • Purple Prairie Clover • Prairie Coneflower • Grey-Headed Coneflower • Claspings Coneflower • Black-Eyed Susan

**Moist Mixture****\$31.00 per lb.**

(Over 30 inches rainfall/year)

Planting Rate/acre" 10-20 lbs.  
Planting Rate .5 lb./1000 sq. ft.

Columbine • Wallflower • Shasta Daisy • Clarkia • Lance-Leaved Coreopsis • Rocket Larkspur • Purple Coneflower • Candytuft • Tree Mallow • Gayfeather • Scarlet Flax • Lemon Mint • Forget-Me-Not • Baby Blue-Eyes • Black-Eyed Susan • Johnny Jump-Up

**Mountain Meadow Mix****\$35.00 per lb.**

Above 7000 ft: Arizona, southern California, Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, Wyoming. All elevations: Alaska, northern Alberta, eastern British Columbia, northern Manitoba, N.W. Territories, northern Saskatchewan, Yukon.

Planting Rate/acre 6-12 lbs.  
Planting Rate .5 lb./1000 sq. ft.

Blue Columbine • Bellflower • Dwarf Cornflower • Wallflower • Shasta Daisy • Dwarf Godetia • Rocket Larkspur • Fleabane Daisy • California Poppy • Perennial Gaillardia • Annual Baby's Breath • Blue Flax • Forget-Me-Not • Palmer Penstemon • Penstemon • Black-Eyed Susan • Catchfly • Showy Goldeneye

**Native Pacific Northwest Mix \$55.00 per lb.**

This mixture is native to the Pacific Northwest and is commonly found inland as far as Central Washington and Oregon. This mix is formulated for bloom period from spring to fall.

Planting Rate/acre 25-30 lbs.  
Planting Rate .5 lb./1000 sq.ft.

Wallflower • Dwarf Godetia • Clarkia • California Poppy • Globe Gilia • Bird's Eyes • Tidy-Tips • Mountain Phlox • Scarlet Flax • Blue Flax • Sweet Alyssum • Yellow Lupine • Many Leaved Lupine • Five-Spot • Baby Blue-Eyes • Corn Poppy • Blue-Eyed Grass

**Native Perennial Mix \$64.00 per lb.**

NEW! This mixture provides a long-lasting, perennial planting filled with a colorful assortment of American natives. For use across the U.S. except southern Florida and extreme southern Texas (see Gulf Coast Mix for these areas).

If weed control is needed the first year, mow every 3-4 weeks or as often as necessary.

Planting Rate/acre 7-14 lbs.  
Planting Rate .5 lb./1000 sq.ft.

Blue Columbine • Eastern Columbine • Butterfly Milkweed • New England Aster • Lance-Leaved Coreopsis • Purple Coneflower • Perennial Gaillardia • Thickspike Gayfeather • Gayfeather • Blue Flax • Perennial Lupine • Dwarf Evening Primrose • Rocky Mtn. Penstemon • Mexican Hat • Prairie Coneflower • Grey-Headed Coneflower • Black-Eyed Susan

**New England Splendor \$35.00 per lb.**

U.S.: Connecticut, Delaware, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, Virginia, Washington DC, West Virginia. Canada: Maritime Provinces, Newfoundland, Quebec.

Planting Rate/acre 5-10 lbs.  
Planting Rate .5 lb./1000 sq.ft.

New England Aster • Dwarf Cornflower • Wallflower • Shasta Daisy • Lance-Leaved Coreopsis • Sweet William Pinks • Foxglove • Purple Coneflower • Annual Baby's Breath • Gayfeather • Spurred Snapdragon • Scarlet Flax • Lupine • Dwarf Evening Primrose • Corn Poppy • Smooth Penstemon • Black-Eyed Susan • Catchfly

**Pacific Northwest Mix \$25.00 per lb.**

(Below 7,000-8,000 ft.) U.S.: northern California, western Oregon, western Washington. Canada: coast of British Columbia.

Planting Rate/acre 8-16 lbs.  
Planting Rate .5 lb./1000 sq.ft.

Wallflower • Shasta Daisy • Dwarf Godetia • Clarkia • Chinese Houses • Lance-Leaved Coreopsis • California Poppy • Globe Gilia • Bird's Eyes • Tidy-Tips • Mountain Phlox • Scarlet Flax • Blue Flax • Sweet Alyssum • Yellow Lupine • Russell Lupine • Five-Spot • Baby Blue-Eyes • Corn Poppy • Black-Eyed Susan • Blue-Eyed Grass

**Pioneer's Dream \$35.00 per lb.**

U.S.: Colorado, Idaho, western Kansas, Montana, western Nebraska, northern Nevada, North Dakota, eastern Oregon, South Dakota, Utah, eastern Washington, Wyoming. Canada: southern Alberta, southern Saskatchewan.

Planting Rate/acre 8-16 lbs.  
Planting Rate .5 lb./1000 sq.ft.

Dwarf Cornflower • Deertorn clarkia • Clarkia • Plains Coreopsis • California Poppy • Perennial Gaillardia • Annual Gaillardia • Globe Gilia • Candytuft • Blue Flax • Perennial Lupine • Prairie Aster • Dwarf Evening Primrose • Pale Evening Primrose • Corn Poppy • Palmer Penstemon • Penstemon • Prairie Coneflower • Greenthread • Showy Goldeneye

**Rainbow Meadow Mix \$35.00 per lb.**

This spectacular annual mixture blooms in a wide variety of flower colors, shapes and sizes. Plants are 6-24 inches high.

Planting Rate/acre 7 lbs.  
Planting Rate .5 lb./1000 sq. ft.

Godetia • Chinese Forget-Me-Not • California Poppy • Rocket Candytuft • Sweet Alyssum • Dwarf Lupine • Love-in-a-Mist • Corn Poppy • Black-Eyed Susan • French Marigolde • Viscaria • Mexican Zinnia

**Shade \$36.00 per lb.**

This mixture requires strong, filtered sunlight or 1-4 hours of direct sun per day. These plants will not prosper in dense shade.

Planting Rate/acre 7-14 lbs.  
Planting Rate .5 lb./1000 sq.ft.

Columbine • Shasta Daisy • Clarkia • Lance-Leaved Coreopsis • Chinese Forget-Me-Not • Rocket Larkspur • Sweet William Pinks • Purple Coneflower • Annual Baby's Breath • Annual Candytuft • Spurred Snapdragon • Monkeyflower • Forget-Me-Not • Baby Blue-Eyes • Corn Poppy • Johnny Jump-Up

**Short Grass Prairie Mix \$76.00 per lb.**

The short-grass prairie extends east from the Rocky Mountains and south from Montana through the Nebraska panhandle and southeastern Wyoming into the high plains of Oklahoma, New Mexico, and Texas. The short-grass prairie landscape was one of relatively treeless stream bottoms and uplands dominated by blue grama and buffalo grass, two warm-season grasses that flourish in this region. In the mid-1800's the numbers of individuals of native mammal species--bison, prairie dogs, pronghorn, elk, grizzly bears, and gray wolves--rivaled or exceeded those now in the African Serengeti. This mix of short prairie flowers and grasses is ideal for re-creating a low-growing prairie. Best for moderate to drier sites. Plant in late spring or early summer. High ratio of wildflower to grass seed for a brilliant display of color.

Planting Rate/acre 10-15 lbs.  
Planting Rate .5 lb./1000 sq.ft.

Lavender Hyssop • Butterfly Milkweed • White Upland Aster • Lance-leafed Coreopsis • Plains Coreopsis • Narrow-Leaf Purple Coneflower • Annual Gaillardia • Prairie Aster • Dwarf Evening Primrose • Large Penstemon • Purple • Prairie Clover • Prairie Coneflower • Black-eyed Susan • Horary Vervain • Sideoats Grama • Blue Grama • Prairie Junegrass • Sand Dropseed

**Southeastern Pride \$35.00 per lb.**

Alabama, Arkansas, Florida, Georgia, Louisiana, Mississippi, North Carolina, eastern Oklahoma, Tennessee, eastern Texas, South Carolina. (For southern Florida, the Gulf Coast Caribbean Mixture may be appropriate.)

Planting Rate/acre 10-20 lbs.  
Planting Rate .5 lb./1000 sq.ft.

New England Aster • Lance-Leaved Coreopsis • Plains Coreopsis • Sulphur Cosmos • Purple Coneflower • Annual Gaillardia • Annual Baby's Breath • Gilia • Tree Mallow • Gayfeather • Scarlet Flax • Perennial Lupine • Four-O'Clock • Lemon Mint • Corn Poppy • Annual Phlox • Claspng Coneflower • Black-Eyed Susan • Scarlet Sage • Moss Verbena

**Southwest Blooms**

**\$35.00 per lb.**  
 (Below 7,000-8,000 ft.) Arizona, southern California, southern Nevada, New Mexico  
 Planting Rate/acre 6-12 lbs.  
 Planting Rate .5 lb./1000 sq.ft.

Desert Marigold • Clarkia • African Daisy • California Poppy • Annual Gaillardia • Bird's Eyes • Tidy-Tips • Mountain Phlox • Blue Flax • Sweet Alyssum • Arroyo Lupine • Blazing Star • Five-Spot • Pale Evening Primrose • Corn Poppy • Palmer Penstemonk • Penstemon • California Bluebell • Prairie Coneflower • Desert Globemallow

**Sunburst Ground Cover Mix \$65.00 per lb.**

Varieties in this annual mixture have a spreading or mounding growth form which creates an even 12 inch tall carpet of brilliant flowers in sunny hues.  
 Planting Rate per Acre 5 lbs.  
 Planting Rate .5 lb./1000 sq. ft.

Dwarf Calendula • California Poppy • Rocket Candytuft • Dwarf Sweet Alyssum • Wild Petunia • African Marigold • French Marigold • Creeping Zinnia

**Super-Short**

**\$76.00 per lb.**  
 This mixture is less than 10 inches high and is useful where a colorful, carpet-like appearance is desired.  
 Planting Rate/acre 5-10 lbs.  
 Planting Rate for 1/2 acre or less .5 lb./1000 sq.ft.

Basket of Gold • White Rockcress • Purple Rockcress • English Daisy • Snow-in-Summer • Yellow Daisy • Creeping Daisy • Maiden Pinks • Dwarf California Poppy • Perennial Candytuft • Goldfields • Dwarf Sweet Alyssum • Virginia Stock • Five-Spot • Baby Blue-Eyes • California Bluebell • Creeping Zinnia • Soapwort • Nodding Catchfly • Johnny Jump-Up

**Tall Grass Prairie Mix**

**\$70.00 per lb.**  
 Between the Missouri River and the Rocky Mountains lies the grassy expanse once dismissed as the Great American Desert. Early 19th century expansion advocates urged settlers to skip the interior and proceed directly to the far west. A land official wrote in 1868 that the plains were "an obstacle to the progress of the nation's growth...in not yielding that sustenance for increasing population." When homesteader settled in, they discovered what the native Plains tribes had known for centuries: that the "desert" was a mosaic of different regions, each with its own climate and vegetation, each with its own character. Tall Grass Prairie Mix is a historical representation to what was once a great and flowing Prairie. A mix of flowers and grasses from the Tallgrass prairie region. Best for moderate to moister sites. Plant in late spring or early summer. Very high wildflower to grass seed ratio for a showy display of brilliant colors.

Planting Rate/acre 20-25 lbs.  
 Planting Rate .5 lb./1000 sq.ft.

Smooth Aster • New England Aster • Lance-Leaved Coreopsis • Illinois Bundleflower • Pale Purple Coneflower • Purple Coneflower • Rattlesnake Master • Ox-Eye Sunflower • Thichspike Gayfeather • Gayfeather • Perennial Lupine • Bergamot • Smooth Penstemon • Grey-Headed Coneflower • Black-Eyed Susan • Rigid Goldenrod • Big Bluestem • Switchgrass • Little Bluestem • Indiangrass

**Texas/Oklahoma Mix**

**\$35.00 per lb.**  
 (For southern Texas, the Gulf Coast Caribbean Mixture may be appropriate.)  
 Planting Rate/acre 9-18 lbs.  
 Planting Rate .5 lb./1000 sq.ft.

Dwarf Cornflower • Lance-Leaved Coreopsis • Plains Coreopsis • Sulphur Cosmos • Purple Coneflower • Annual Gaillardia • Baby's Breath • Candytuft • Texas Bluebonnet • Lemon Mint • Dwarf Evening Primrose • Showy Evening • Primrose • Corn Poppy • Purple Prairie Clover • Annual Phlox • Prairie Coneflower • Claspng Coneflower • Black • Eyed Susan • Scarlet Sage • Blue Sage

**Xeriscape Mix: Western USA \$46.00 per lb.**

Above 7,000 ft. This mix of native wildflowers is for areas in the western U.S. and western Canada where water conservation is desired.  
 Planting Rate/acre 8-16 lbs.  
 Planting Rate .5 lb./1000 sq. ft.

Dessert Marigold • California Poppy • Perennial Gaillardis • Bird's Eyes • Tidy-Tips • Blue Flax • Arroyo Lupine • Prairie Aster • Blazing Star • Pale Evening Primrose • Palmer Penstemon • Rocky Mountain Penstemon • Prairie Coneflower • Goosberryleaf Globemallow • Greenthread

### Custom Mixtures

In certain cases, a custom blend will be most suitable for your project. We can blend a custom native, turf, erosion control or wildflower mixture according to your specifications. Such mixtures may be based on application, height, climatic conditions, blooming times or other considerations. Seed size, aggressiveness and cost determine proportions of species. Our qualified staff will be glad to assist you in determining your needs.

### Technical Advice

We encourage you to contact us with the specifications of your project. We will be glad to assist you in selecting the mixture best suited to your needs. Our service includes free telephone consultation on planting times, soil preparation and seeding techniques.

The following recommendations provide type and purpose information associated with each seed mix, and their location within the catalog. In general, Sunmark Seeds International recommends the use of native species wherever possible; however, in some instances native species may not be appropriate (i.e., you want mowed turf) or they may not perform as well in some applications.

**Note:** Along with the mixes above, you might want a custom mix for your project. Please contact Sunmark Seeds International, Inc. at (503)241-7333 for consultation on your project. We can provide mixture composition based on our SPF "Seeds per Square Foot" using the species you have selected.

### Site Preparation

Proper site preparation is important for prompt germination of seed and healthy growth of seedlings. Best results will be obtained by planting on cleared ground. Remove existing vegetation to avoid competition from other plants by pulling, tilling under, spraying with a general herbicide, or a combination of these methods. The success of these methods will depend on the size of the area, and the type and density of the vegetation. Loosen soil by scraping, tilling or scarifying. Tilling should be utilized only when soil is very compacted and further weed control measures can be taken. See "Weed Control" on the following page for specifics.

### Seed Application

Method of application depends on the size of the area and the terrain. On small areas, broadcast seeds evenly either by hand or by use of a drop or cyclone spreader. It is helpful to mix a carrier such as clean, dry sand with the seed; sand adds volume and aids in even distribution. We recommend using a ratio of 1 or 2 parts sand to 1 part seed. Rake in lightly or drag the area lightly with a piece of chain link fence to mix the seed into the surface of the soil. For seeding large areas, i.e., over one acre, specially designed drills are most effective. Drill to a maximum of ¼ inch and firm soil with a cultipacker; this maximizes seed/soil contact. Hydroseeders are also effective, especially for steep slopes, rocky terrain and other areas where conditions make it impractical for driving equipment.

Hydroseeding is the application of a slurry of seed and water to soil. The slurry may also contain mulch (hydromulching), tackifier, and fertilizer. Mulches are made of weed fiber, paper, or excelsior, and their purpose is to hold seeds in place, help retain moisture and provide protection from erosion. Mulches are usually dyed green as to visually aid in even distribution. Rates of application for most mulches are between 1500 and 2300 pounds per acre. In general, hydroseeding/hydromulching is most successful in moist climates or in irrigated areas.

Most authorities agree that germination is better when seed is applied first with 5-10% of the mulching fiber – the balance of the mulch being applied separately as a second step. This approach assures optimal seed/soil contact; otherwise, many seeds are wasted because they become suspended in the fiber.

### Moisture

All seeds, including wildflowers, need ample moisture to germinate and to develop into healthy seedlings. Best results will be obtained by soaking the planted areas thoroughly and maintaining consistent moisture for 4-6 weeks – then gradually reducing waterings. In non-irrigated situations, plant in the spring or before periods of anticipated rainfall. After seedlings are established, watering may be reduced depending on the climate and rainfall. In arid climates or during drought conditions, up to ½ inch of supplemental water per week may be required to maintain an optimal display. If weeds are present, remember that they benefit from moisture as much as the wildflowers, and may dominate overwatered areas.

### Fertilization

Many species benefit from some fertilization if the soil does not have adequate nutrients. Some species do fine in poor soils, while others require a more fertile environment. We recommend that a soil test be performed when soil quality is unknown. If the soil needs improvement, use a low nitrogen fertilizer with a 5-10-10 ratio or add organic matter such as weed-free straw or grass clippings, well-rotted compost, peat moss, or leaf mold. In addition to adding nutrients, organic materials enhance soil texture and encourage beneficial micro-organisms. Avoid over fertilizing which may promote weed growth and lush foliage rather than flowers.

### Weed Control

Weed control is the biggest problem facing specie establishment and one that has no easy solution. Weed seeds are present in many situations and lie dormant, but viable, for long periods of time. A weedy area to be seeded will have a large reservoir of weed seeds in the soil, ready to germinate when conditions are favorable. In most cases, it is advisable to consider weed control in two phases – as part of site preparation prior to planting and as an important component of the post-germination maintenance program. Before planting, remove existing weeds by pulling, tilling under, applying a general herbicide such as *Roundup* or *KLEENUP*, or by a combination of these methods. For additional weed control after site preparation, a soil fumigant may be used, or the area may be irrigated to encourage weed growth and then sprayed with a general herbicide.

In very weedy areas, the following method is suggested: (1) Till soil or spray vegetation with *Roundup* or *KLEENUP*. When using an herbicide, allow vegetation to die, then rake out the dead debris. If perennial weeds such as bindweed are present, using an herbicide is more effective than tilling. (2) Irrigate to encourage germination of weed seeds near the surface; most seeds will germinate within two weeks if consistent moisture is available. Do not till the soil again because this will bring even more weed seeds up to the surface. (3) Spray any new growth with *Roundup* or *KLEENUP*. (4) After raking out dead vegetation, allow soil to recover for 3-4 weeks before planting with wildflowers. From our experience, a recovery period of this duration is advisable because extensive use of these herbicides may cause germination and growth of seedlings to be delayed.

# INDIVIDUAL SEED SPECIES

INDIVIDUAL SEED SPECIES

SPECIES Botanical Name	Common Name	Applications	Price per Pound
Agropyron cristatum	Wheatgrass, Crested		\$3.50
Agropyron desertorum	Wheatgrass, Standard Crested		\$3.50
Agropyron elongatum	Wheatgrass, Tall		\$4.50
Agropyron intermedium	Wheatgrass, Intermediate		\$3.50
Agropyron riparium	Wheatgrass, Streambank		\$4.00
Agropyron sibericum	Wheatgrass, Siberian		\$3.70
Agropyron spicatum x repens	Wheatgrass, Newhy hybrid		\$22.00
Agropyron trichophorum	Wheatgrass, Pubescent		\$2.40
Agrostis alba / gigantea	Redtop		\$11.00
Agrostis exarata	Bentgrass, Spike		\$38.00
Agrostis pallens	Thingrass		\$26.80
Agrostis stolonifera	Creeping Bengrass		\$8.00
Alisma subcordatum	Water Plantain		\$33.00
Alopecurus arundinaceus	Creeping Foxtail		\$18.00
Alopecurus geniculatus	Water Foxtail		\$44.00
Alopecurus pratensis	Meadow Foxtail		\$13.40

## WILDFLOWER SEED

Sunmark Wildflower mixtures are formulated on the basis of climatic conditions (rainfall, temperature range, humidity) and elevation. All mixtures contain 16 to 22 species. Annuals have been included to establish cover quickly and to give color the first year; some may produce new plants the following year (the biennials may also reseed). Perennial plants live for more than two years and flower from the second year onward. All species require full or partial sun, with the exception of those in the Shade Mixture. Sunmark mixtures are blended to give the widest possible range of colors and periods of bloom. Mixtures may vary occasionally from the indicated listing based on availability of individual species.

SPECIES Botanical Name	Common Name	Applications	Price per Pound
Abronia latifolia	Yellow Sand Verbena		\$52.50 oz.
Achillea filipendulina	Gold Yarrow		\$144.00
Achillea millefolium	White Yarrow		\$40.00
Achillea millefolium occidentalis/lanulosa	Western Yarrow		\$42.00
Achillea millefolium rubra	Red Yarrow		\$230.00
Achlys triphylla	Vanilla Leaf		\$126.00 oz.
Aconitum columbianum	Monkshood		\$224.00 oz.
Actaea rubra	Baneberry		\$48.13 oz.

Our Tree and Shrub seeds are of the highest quality available. We can supply your project with Bioregion specific seeds from most of North America through our network of collectors, growers, nurserymen, and industry professionals. Sunmark Seeds takes great pride in providing hard to find native tree and shrub seed. Please contact us with help on specie selection of any kind of specific tree and shrub mixture. We can provide a balanced seed mixture based on seeds per square foot for your project.

LEGUME SEED

In the summer of 2005 Sunmark Environmental Services, LLC came into being as a link for all our businesses. Sunmark Environmental Services, LLC is the exclusive distributor of Agrecol's "Envirolok" vegetated slope protection. This vegetated slope protection has proven to be highly effective in streambank restoration. We have combined the latest systems in streambank erosion control along with the most knowledgeable team of experts in the erosion control industry. We also supply the river and stream restoration industry with the products necessary to make their projects successful. The products we carry are Permamatrix, Native Seeds and Plants, Soil Bags, Biofiltration Soil Media, EcoLog™, EarthLite™, EcoRoof Soil Media™, EcoLive™ and EcoBiotics™ Organics, BioSwale ES™ Soils, Green Choice ES™ products, ARABiotics™ Recycled Fiber, RainClear™ Stormwater Filtration System, StormGuard™ Filtration Bags, Rain Garden™, and the information and expertise to bring it all together. All of our projects are on the cutting edge of environmental restoration. We are strongly committed to "enhancing" not just "fixing" problems. The use of native plants and native seed mixtures ensures that projects will benefit from habitat enhancement, improved water quality, and permanent fixes to erosion. We can provide many options for a successful project, from supplying products, to full turnkey projects. We can work with any budget. **Please see our web site [www.sunmarkenvironmental.com](http://www.sunmarkenvironmental.com) for more information.**

Product	Description	Application	Price
 <b>PermaMatrix™</b> A HYDRAULICALLY APPLIED SOIL AMENDMENT	PermaMatrix™ Biotic Soil Amendment, is a new LID product that at its core focuses on sustainability by creating a living ecological membrane for depleted soils. Applied hydraulically using readily available equipment, it significantly reduces the impact and the cost associated with replacing topsoil and compost. Native plant diversity and vegetation create sustainable systems.	4000 lbs per acre	<b>\$72.50</b> 50 lb bag
	Biochar is pyrolyzed biomass, or biomass that has been burned in the absence of oxygen. This process creates a highly porous structure that provides the optimum host for soil microbes. Biochar also holds 50% of the biomass's carbon and when applied to soil, sequesters that carbon for centuries, reducing the overall amount of atmospheric CO2 by removing it from the active cycle. Biochar also enhances plant growth which absorbs more CO2 from the atmosphere. Overall, these benefits make the biochar process carbon negative	400 lbs per acre	<b>\$1.50 lb</b>
 <b>Envirolok™</b> Vegetated Slope Protection	The Envirolok System is a patent pending erosion control and slope stabilization system that creates vegetated slope protection in combination with deep-rooted native plants. The Envirolok™ vegetated slope protection by Sunmark Environmental are strong, environment-friendly alternatives to conventional erosion control systems. Envirolok™ vegetated slope protection create beautiful natural landscapes with native plants.	Erosion Control, Shoreline Stabilization, Stormwater Management, Stream Restorations, Residential Lakeshore Preservation and Remediation, Landscape Enhancements, Creating Naturalized Buffers Along Tributaries	<b>\$8.50 unit</b>
 www.fishwayrx.com.com	The FishWay Rx™ system incorporates a naturally vegetated slope protection utilizing Envirolok™ and a pre-engineered pre-built grated bridge. The Fishway Rx™ bridge span will allow light and water into the stream bed enhancing the native plants community, while providing a seamless passage for aquatic organisms. FishWay Rx™ can be designed to storm events minimizing washouts and extending the life of the crossing. The Envirolok™ system is locked into place with geosynthetic strapping, anchor spikes, and completed with native plant vegetation that provides a natural habitat for fish migration.	Fish Passage Improvement Culvert Replacement Roadsides Bridges Embankments	Call
 <b>ECO Live™</b> ORGANICS	<b>EcoLive™ Organics</b> Natural Growth Enhancer with Mycorrhiza, is a natural highly concentrated organic material with the addition of mycorrhizal fungi. This unique combination provides a critical linkage between the plant, root, and soil. A key part of water conservation, EcoLive™ Organics absorbs and holds water and nutrients for a improved plant community. Blended into a seed mixture or soil blend, EcoLive™ will increase germination, improve soil micronutrients, develop greater root mass, and produce a more sustainable and healthy ecosystem."	1.5 lbs per 1000 sq ft.	<b>\$7.50</b> per lb
 <b>eco biotics™</b> MICROBIOLOGICAL ORGANICS	<b>EcoBiotics™ Microbiological Organics</b> are a formulation of microbes and organics that aid in germination and plant establishment. EcoBiotics™ contain a mixture of finely powdered raw materials amended with micro-organisms that consume and eliminate dangerous or unwanted hydrocarbon based contaminants such as petroleum products and other pollutants. This process is called bioremediation. They also provide a nutritional benefit along with root stimulation for a healthy plant community and delivers active beneficial micro-organisms to the germinating seeds and surrounding rhizosphere.	1.5 lbs per 1000 sq ft.	<b>\$7.50</b> per lb

 www.earth-lite.com	<b>Earthlite™ Filter Media</b> will solve stormwater problems naturally. Reducing harmful runoff during events where large amounts of water from rooftops or impervious surfaces inundate the stormwater system. Earthlite™ Filter Media will cleanse the water, and release it back to groundwater storage naturally, without chemicals, high maintenance or major facility upgrades. This ultra porous ceramic media gives the engineer or landscape architect the design flexibility to provide both onsite water treatment and preserve or create an aesthetically pleasing landscape.	55# per yard	<b>.50 per lb.</b>
 <b>StormGuard™</b> FILTRATION BAGS New Product	<b>StormGuard™ Filtration Bags</b> are made of an advanced geosynthetic material that provides high flow rates and is UV resistant. These bags are filled with Earthlite™ filter media. Independent testing shows that the filter media removes, TSS, Heavy Metals, Phosphorus, Oil and Grease, and E.Coli.	Filtration Bags in swales, ditches, as check dams and in high flow areas. Can be used around storm drains to filter stormwater before being discharged to watershed.	<b>\$38.50 ea</b>
 <b>RainClear™</b> 2-STAGE STORMWATER FILTER	<b>RainClear™ Two Stage Stormwater Filtration</b> System is a highly effective storm water filtration system capable of treating large and sustained stormwater events. Each RainClear™ system is custom engineered for site specific needs and utilizes a unique 2 stage approach which includes a native plant biofiltration swale and filter bay with Earthlite™ Filter Media. This unique system is designed for treatment and removal of Turbidity (TSS), Chemicals (Nitrogen, Phosphorus), Heavy Metals (Copper, Zinc, Lead), and Oil & Gas (Petrochemicals).	Commercial, Residential, Municipalities, Agencies anywhere with stormwater issues on sensitive waterways. Can be designed for large or small sites.	Call
 www.earth-lite.com	<b>Earthlite Extensive™ Performance Green Roof Media.</b> This mix has been developed for optimum performance in a shallow profile lightweight EcoRoof media. It is a key element in phytoremediation and bioremediation treatment for EcoRoofs. This EcoRoof media was designed to meet specific engineering requirements and LEED accreditation, along with superior plant performance, stormwater filtration, and low maintenance. Able to support a wide variety of native plants, grasses, and sedums, this mix is the foundation of a successful EcoRoof. Benefits include runoff reduction, storm water flow mitigation, extended roof life, improved air quality and better insulated buildings.	16# 6 in deep	<b>\$98.50</b>
 New Product	<b>Earthlite™ in a Bag</b> – One of the issues that green roof installers and homeowners have encountered is getting the media onto the roof. Whether it's a skyscraper or a tool shed this can be a daunting task. Sunmark has developed a method that allows for ease of media installation through a sustainable approach. Earthlite™ bags are now available in a 100% biodegradable burlap bag that has been made for green roof applications. The bag is made from hemp fibers which allows for direct placement and planting on the roof. This Eco-Bag has benefits of moisture retention, wind erosion prevention, and will biodegrade into a food source for the plants.	1 bag = cu ft 2.75 sq ft. @4" deep 37# per pag	<b>\$8.95</b> per bag
 www.earth-lite.com	<b>Earthlite™ BioStructure Soil Mix</b> is a designed medium which can meet or exceed pavement design and installation requirements while remaining root penetrable and supportive of tree growth. BioStructure™ is the complete package with everything needed to grow and sustain large urban street trees.	91#	<b>\$85.50</b>

In 1996 Sunmark Seeds International, Inc. expanded its product line to include sports field products, engineered soils and conditioners. **Sunmark Sports** was born. We have quickly grown to provide Oregon, Washington, Northern California, Idaho, Montana, and Utah with the best product solutions for sports fields in the industry. We have extensive knowledge of infield soils, turf zone soils, soil conditioners, top dressing, mound repair kits, tarps, warning track material, tools and equipment as well as technical assistance. Please visit our web site [www.sunmarksports.com](http://www.sunmarksports.com) for more information and to meet our highly trained and professional sales staff.

Players Choice™ Professional Grade ES 4.6 Infield Soil Mixture is a premium, sand based soil blend, amended with a moderate amount of red clay.

Players Choice™ ES 4.6 will drain well and recover quickly, yet has enough clay to remain firm. This blend works best in regions with more than 40" of annual rainfall.

**Specifications:**  
1 Cubic Yards equals = 1.14 tons

**Availability:**  
Bulk Only

Players Choice™ Professional Grade ES 5.5 Infield Soil Mixture provides a high quality playing surface, to programs desiring a balance between red clay, silt, and sand.

Players Choice™ ES 5.5 resembles the infield of most professional baseball fields. This blend works best in regions with less than 40" of annual rainfall.

**Specifications:**  
1 Cubic Yards equals = 1.2 tons

**Availability:**  
Bulk Only

Players Choice™ Professional Grade ES 6.4 Infield Soil Mixture provides a high quality playing surface, to programs wanting the benefits of a red clay infield.

Players Choice™ ES 6.4 will shed water rather than passing it, yet has enough sand to remain soft when wet. This blend works best in regions with

less than 35" of annual rainfall.

**Specifications:**  
1 Cubic Yards equals = 1.16 tons

**Availability:**  
Bulk Only

Players Choice™ Red Infield Conditioner is a premium vitrified soil conditioner. Improve infield playability, reduce rain outs and create a safer playing surface. PC Red Infield Conditioner will absorb moisture during wet times, help retain moisture during dry times, and add pore space back into compacted soils.

**Specifications:**  
1.3 Cubic Yards = 1 Ton

**Availability:**  
50 lb. all weather bags – 40 bags / ton  
2,000 lb. Super Sacks  
Bulk (24 & 32 ton full truck loads)

Red Diamond CC Conditioner is professional grade calcined clay infield conditioner improves infield surface safety and performance. Highly absorbent, all natural, kiln fired clay performs well in wetter climates keeping your athletes on the field.

**Specifications:**  
1.4 Cubic Yards = 1 Ton  
2,000 lb. Super Sacks

**Availability:**  
50 lb. bags – 40 bags / ton

Red Diamond CC Drying Agent™ Drying Agent Is the perfect choice for a game day emergency. Prevent rain outs, soak up wet spots, and improve safety during the wet season. Red Diamond CC Drying Agent will quickly absorb water and dry the field faster, reducing rain delays and unsafe, muddy conditions.

**Specifications:**  
1.7 Cubic Yards = 1 Ton

**Availability:**  
25 lb. & 50 lb. bags – 80 & 40 bags / ton

Players Choice™ Mound & Home Plate Clay is a premium blend of red clay, silt, and sand. PC Mound & Plate Clay is used to construct, repair, or re-build pitcher's mound, batters boxes, & the catcher's box. This professional grade product easily tamps into place, conforms to existing soils, and helps to provide greater durability to high-stress areas.

**Specifications:**  
1.2 Cubic Yards = 1 Ton  
1 – 50 lb Bag = 4 Sq. Ft.,  
2" Thick

**Availability:**  
50# Bags - 40 Bags / Ton

Players Choice™ Clay Bricks are premium unfired compressed clay bricks, perfect for building or repairing the high stress areas of your ball field. When the bricks are placed and watered in, they simply turn to firm clay mass to provide durability and reduce maintenance in the high stress areas.

**Specifications:**  
5.5 lbs. per brick  
4" wide, 8" long, 2.5" Thick

**Availability:**  
Per Brick  
Per Pallet = 400 bricks

Players Choice™ Marking Dust  
Bright premium marking dust complies with the NCAA rules for athletic field marking dust. Product is non-toxic, non-irritating and will not burn or effect turf grass, or soil.

**BASEBALL**

Players Choice™ MHP Kits are an all inclusive mound and home plate repair package. Players Choice MHP Kits include the following materials:

- 275 Players Choice™ Clay Bricks
- 10 Bags – Players Choice™ Mound Clay
- 10 Bags – Players Choice™ Infield Conditioner

Each MHP Kit contains enough bricks, mound clay, and infield conditioner to do the following: 1 - Pitching Mound High Stress Area, 1 - Catcher's Box, 2 - Batters Boxes

Players Choice™ Bull Pen Kits is a modified MHP Kit. Material includes:

- 50 Players Choice™ Clay Bricks
- 5 Bags – Players Choice™ Mound Clay
- 5 Bags – Players Choice™ Infield Conditioner

A BP Kit will be able to repair both visitor and home bull pens in front of the rubber, and at the foot strike zone of the mound

**MOUND HOME / PLATE**

**LAYOUT OF MHP KIT**

BRICK = 4" x 8" x 2.5"

**PITCHER'S MOUND:**  
Approximate number of bricks needed: 91

**HOME PLATE BATTERS AND CATCHERS BOXES:**  
Approximate number of bricks needed: 200

Availability: see MHP Kit above for product list to make a MHP Kit

**SOFTBALL**

Players Choice™ PCHP Kits are an all inclusive pitching circle and home plate repair package designed specifically for softball. Players Choice™ PCHP Kits include the following materials:

- 305 Players Choice™ Clay Bricks
- 10 Bags – Players Choice™ Pitchers Circle
- 10 Bags – Players Choice™ Infield Conditioner

**PITCHING CIRCLE / HOME PLATE**

**LAYOUT OF PCHP KIT**

BRICK = 4" x 8" x 2.5"

**PITCHERS CIRCLE**  
Approximate number of bricks needed: 111

**HOME PLATE BATTERS AND CATCHERS BOXES:**  
Approximate number of bricks needed: 200

Availability: see PCHP Kit above for product list to make a MHP Kit
