USB 3.0 Flash Drive

- RAIDDrive - USB 3.0 Extreme Performance
- SuperCrypt - Hardware Encrypted SSD Performance
- Express RAM Cache - 32MB Cache delivers SSD performance
- Express Drive - USB 3.0 Solid Performance
- Express DUO - USB 3.0 Value-line Performance

Five Super Talent USB 3.0 flash drives are displayed in a row, each with its performance specifications listed below it in a blue rounded rectangle:

Model	Up to Read (MB/s)	Up to Write (MB/s)
RAIDDrive	371	196
SuperCrypt	242	175
Express RAM Cache	131	60
Express Drive	130	30
Express DUO	67	25

RAIDDrive SSDs

RAIDDRIVE is designed to break the throughput bottleneck in the storage subsystem by removing the bandwidth limitation of the SATA bus. The PCIe x8 interface used by RAIDDRIVE SSDs supports up to 4GB/sec bandwidth, more than 10 times faster than SATA2.

Using RAID architecture that is optimized for NAND flash memory, RAIDDRIVE is able to support burst read speeds of up to 2.4GB/sec. A turbocharged cache system with up to 512MB of DRAM cache enables burst write speeds as fast as 2.2GB/sec. RAIDDRIVE, which houses up to 8 discrete SATA SSDs, comes in a custom form factor.

RAIDDrive R2S

- PCIe x8 (Gen2) host interface
- Burst Speed (max) : Read 2.4GB/s, Write 2.2GB/s
- Capacities up to 2TB
- Support 230K IOPS

RAIDDrive GS

- PCIe x8 link host interface
- Burst Speed (max) : Read 1.4GB/s, Write 1.2GB/s
- Capacities up to 2TB
- Support 140K IOPS

Solid State Drives

RAIDDrive Specification

		RAIDDrive R2S	RAIDDrive GS
Interface		PCIe x8(gen2)	x8 PCIe
Controller		LSI ROC 2108	Intel IOP 348
Form Factor		PCIe	PCIe
Capacities		500GB, 1TB, 2TB	256GB - 2TB
NAND Flash		MLC	MLC
Performance	Access Time	0.1ms	0.1ms
	Read/Write (MB/sec)	2400/2200	1400/1200
RAID Level Support		0/5	0/5
RAID Cache Size		512MB	512MB
Number of Port		8 port	4/8 (with Expander)
Battery Backup		Optional	Optional
MTBF		>1,500,000 hrs	>1,500,000 hrs
Dimension	mm	224.6 x 94.0 x 20.0	255 x 107 x 25.4
Part Number		R2Sxxxx	RGSxxxx

* Based on CrystalDiskMark v.2.2 and Asus M2N-E Motherboard. Performance may vary. Usable capacity is less than specified after formatting. Windows is a registered trademark of Microsoft.

RAIDDrive R2S - MLC Solution uses low-cost MLC flash to reach lower price points, without sacrificing performance.

RAIDDrive GS - MLC Solution uses low-cost MLC flash to reach lower price points, without sacrificing performance.

TeraDrive SAS

TeraDrive SAS is an SSD designed for the Data Center and Server Market. The TeraDrive SAS supports the new TeraDrive SAS interface which offers: higher signal integrity, more reliability and support for longer cable lengths. For data center, the TeraDrive SAS interface enables the data center to increase the number of drives per server(node). This enables them to increase performance, reliability and capacity while reducing the number of required servers, using less real-estate and reduce their carbon footprint.

Features

- Ultimate Reliability
- Best for Enterprise Data Center
- 2 Full Duplex SAS Interface Port
- Capacity up to 400GB

TeraDrive SAS Solution

Product Family		
Interface		2 full duplex SAS 6Gbps
Form Factor		2.5" SSD
Capacities		100GB - 400GB
NAND Flash		SLC/MLC ONFI2
Performance	Access Time	0.1msec
	Read/Write (MB/sec)	500/500
Data Cache		No
Supporting Sector Size (Byte)		512 / 520 / 524 / 528
Super Cap		Yes
MTBF		>1,000,000 hrs
Dimension	mm	100 x 70 x 10.5
Warranty		2 years (MLC), 3 years (SLC)
Part Number		SExxxxx25S

Solid State Drives

TeraDrive SSDs

TeraDrive™ SSDs are the new pinnacle of performance in enterprise storage. The TeraDrive is based on the advanced new SandForce™ SSD processor. It is designed to deliver exceptional performance, both sequentially and randomly, over the life of the drive with no performance degradation over time. Supporting up to 50,000 IOPS, the TeraDrive is ideal for use in database servers.

The TeraDrive features RAISE™ technology for enhanced reliability and DuraWrite™ technology for significantly increased endurance with super low write amplification, state-of-the-art wear leveling, bad block management, and excellent ECC with up to 24 bits correctable per 512 byte sector. Set to revolutionize enterprise storage, the TeraDrive is available with either MLC or SLC NAND flash, and is offered in capacities of 50GB/100GB/200GB/400GB of FT series and 60GB/120GB/240GB/480GB of CT series.

Features

- Impressively fast Random R/W Speeds
- Up to 500 Read, 500 Write (MB/sec)
- Capacities up to 480GB

SATA II

Specification		TeraDrive FT2	TeraDrive CT
Controller		SandForce 15xx	SandForce 12xx
Form Factor		2.5"	2.5"
Capacities		50,100,200,400GB	60,120,240,480GB

Warranty	MLC	2 years	2 years
	SLC	3 years	
Part Number	MLC	FTMxxF325H	FTMxxC325H
	SLC	FTDxxF325H	

Garbage Collection and TRIM Support

Garbage Collection is an odd term for a utility that erases deleted files from the SSD. Garbage collection basically does the same thing as a wiper utility, except that runs in the background, normally when the SSD is inactive. Garbage collection will keep the SSD's performance fresh without the need for manual execution. Garbage collection utilities, like wiper utilities, have to be developed for specific controller/firmware combinations, meaning that different SSDs require different garbage collection utilities.

TRIM is an operating system feature in which the OS will pass down commands to an SSD controller to erase deleted pages from the SSD. When the TRIM command is enabled, it will execute automatically in the background to always keep the SSD performing like new. TRIM is generally the best method for maintaining SSD performance because it is built into the OS and happens automatically. TRIM is supported by Windows® 7 and Windows Server 2008 R2. It will be integrated into Linux in the near future. Other operating systems do not support TRIM.

UltraDrive SSDs

UltraDrive SSDs are the best of the best in storage. Whether your application is enterprise storage requiring exceptional transaction speeds, or high performance mobile computing for intensive multitasking, or highly secure data storage for confidential information, Super Talent has you covered with an UltraDrive SSD that is ideal for your needs.

These 2.5-inch SATA drives all incorporate the latest reliability features including ECC, wear leveling and bad bit management to ensure reliable performance over the life of the drive. They also offer excellent resistance to shock, vibration and dust. Their industry standard form factor makes integration into servers, desktops and laptops a breeze.

Specification		UltraDrive MX	UltraDrive GX	UltraDrive Martini

Awards & Press Quotes

The SuperTalent UltraDrive GX scored consistently high in our testing, high enough that we can say, with confidence that it's the fastest single drive we've tested to date. -Bjorn3D

The UltraDrive GX from Super Talent delivers a very high transfer performance for a low price. -PC Welt

VSSDs

Super Talent VSSD brings performance and solid-state technology together at an incredible price. By upgrading to VSSD from traditional harddisk, shorter OS booting up time, faster application loading, less system power consumption can be expected. It takes full advantage of the 3Gbps SATA-II bandwidth. The VSSD is capable of sequential read speeds up to 150 MB/sec and sequential write speeds up to 100 MB/sec. Available in capacity of 8GB to 64GB, Super Talent provides customers options to entering SSD world with limit budget, but no compromise in the performance. Customer now can build up system in a money-saving way, running operating system and applications on SSD and storing data on traditional hard-disk.

Specification		Value SSD
Interface		SATA-II
Form Factor		2.5" HDD
Capacities		8GB - 64GB

Part Number		FTMxxGL25V

Solid State Drives

MasterDrive SSDs

Super Talent's MasterDrive series SSD brings the solid state drive to a whole new audience. No longer just for the military, enterprise and elite users, the MasterDrive Series SSD is truly affordable. And Super Talent doesn't strip out features to bring down the price. Models can include no-compromise features like SATA-II technology for exceptionally fast read speeds of up to 230MB/sec, and the same resistance to shock and vibration as all Super Talent's SSDs. MasterDrive SSDs deliver the performance and reliability today's mobile enthusiasts demand. Super Talent's Flash management techniques increase reliability and endurance, and continue to provide unprecedented vibration and shock tolerance. Our software and hardware testing ensures the utmost quality of each MasterDrive SSD.

Netbook / Embedded Solution

Super Talent produces a selection of SSDs designed specifically for upgrades of popular netbook models. Upgrading the SSD in a netbook is by far the fastest, easiest and most economical way to boost performance and get more utility from the netbook. These netbook SSDs offer dramatically faster bootup and application load speeds compared to default SSDs or HDDs. They also have outstanding reliability, lower power consumption and are completely silent.

Super Talent's DuraDrive SSDs represent the state-of-the-art solid-state storage solutions for Industrial, Embedded, Military and Mission Critical applications. Available in a variety of configurations, features include: iTemp (-40°C to +85°C) and Commercial Temp, SLC and MLC, Secure Erase, SATA, PATA and ZIF. When reliability becomes mission critical, think DuraDrive.

Since SuperTalent manufactures our own drives in California, we can offer customized solutions to our customers.

Here are some of the optional features that we can support with the DuraDrive:

- SLC Flash – Many of our designs can be built using SLC flash for added durability and longevity
- Legacy Interfaces – In addition to SATA, we are pleased to be able to offer PATA and ZIF interfaces as well
- Secure Erase – Secure Erase is a feature that many of our customers seek. We've designed the DuraDrive series to support the Secure Erase feature across the product line.
- iTemp Spec – Many Mission Critical applications require operating temperatures well above consumer spec. We've designed the DuraDrive series to be easily extended to support temperature ratings of -40°C to 85°C.
- Made in the USA – A world wide company with manufacturing lines both here and in Asia, we can build product to fit your specs, time lines and budget. If your requirements include, Made in the USA, we are please to be able to offer this to our customers.

Super Talent's line of SSDs also extends to small form factor systems. NAND Flash based IDE Flash Disk Modules (FDMs) are ideal for embedded computing applications. The industry standard IDE connector plugs directly into a motherboard using a 40- or 44-pin IDE connector, and uses a 5V power input. Add extra storage to embedded systems with our Flash Disk Modules (FDMs). I-temp available by request.

CF Cards

NEW

CF Cards 600X PRO
90 Read / 90 Write (MB/s)

• CFast

Capacity: 64GB, 32GB, 16GB

- Seq. Read & Write speed: 120MB/s, 90MB/s
- Operating shock rating of 2000Gs – impact-resistance.
- Power requirement: 3.3V.
- Supports ATA command set.
- Dimensions (approx.): 42.8 x 36.4 x 3.3mm.
- Weight: 13g (max.).
- Operating temperature: 0°C - 70°C
- Warranty: 1 Year
- Serial ATA 3Gbps interface

• High Speed CF Cards

Capacity: 64GB, 32GB, 16GB, 8GB, 4GB, 2GB

- Operating shock rating of 2,000Gs - impact-resistance.
- Speed 600x, 533x, 450x, 350x, 80x
- Power requirements: 3.3V or 5.0V.
- Supports ATA command set.
- Dimensions (approx.): 42.8 x 36.4 x 3.3mm
- Weight: 13g (max.).
- Warranty: 1 Year.

• I-Temp CF Cards

Capacity: 32GB, 16GB, 8GB, 4GB, 2GB, 1GB

- Operating shock rating of 2,000Gs - impact-resistance.
- Power requirements: 3.3V or 5.0V.
- Supports ATA command set.
- Dimensions (approx.): 42.8 x 36.4 x 3.3mm
- Weight: 13g (max.).
- Operating temperature: -40° to 85° C.
- Warranty: 1 Year.

USB 3.0 Flash Drives

Zero Limits with USB 3.0 - Until now, you had to give up Performance for Portability or Compatibility for real Security, but with the introduction of USB 3.0, now you can have it all; the performance of an SSD, the security of AES Hardware Encryption while retaining full backward compatibility with the millions of USB 2.0 ports already on the market.

USB 3.0 RAIDDrive

The RAIDDrive is our fastest USB 3.0 drive with speeds up to 375 MB/sec. It is backward compatible with USB 2.0.

"[It] is the fastest USB device that we have ever benchmarked in the history of the site."

Features:

- USB 3.0 Interface for unprecedented speed
- Compatible with USB 3.0 & USB 2.0 standards
- Highly Reliable MLC NAND Flash

Device	USB 3.0 RAIDDrive
Physical Specification	
Interface	USB 3.0
Capacity	32GB - 128GB
NAND Flash	MLC
Dimensions	95 x 34 x 15.4 mm
Performance Specification	
Seq. Read*	350 MB/s
Seq. Write*	180 MB/s
Reliability Specification	
Data Retention	10 years
Data Reliability	Built-in EDC/ECC
Environmental Specification	
Operating Temperature	0°C to +70°C
Internal Cache Size	128MB
Warranty	5 years
Part Numbers	ST3U32SRK ST3U64SRK ST3U28SRK

* Performance varies depending on drive capacity, system configuration, application and other factors. Usable capacity is less than specified after formatting.

USB 3.0 SuperCrypt

SuperCrypt USB 3.0 drives are extremely fast, include hardware encryption to keep your data secure, and are offered in a wide range of capacities.

Features:

- All data written to drive is automatically encrypted
- Secure partition locks upon removal
- Hardware Encrypted partition does not appear until password is authenticated
- 64MB Cache support elevates small block reads and writes
- Key is stored in hardware and never passed on the USB or System bus

"The Super Talent SuperCrypt was a dream to work with."

Fast Drives...

USB 3.0 Express RAM Cache

The USB 3.0 Express RAM Cache is a slim, high performance flash drive with an on-board caching system for improved performance.

Features:

- USB 3.0 Performance
- Fully Backward Compatible with USB 2.0
- 32MB on-board Cache
- Accelerated Writes and Small block performance
- Available in 32GB & 64GB

Device	USB 3.0 Express RAMCache
Physical Specification	
Interface	USB 3.0
Capacity	16GB - 64GB
NAND Flash	MLC
Dimensions	87.5 x 25 x 8.0 mm
Performance Specification	
Seq. Read*	130 MB/s
Seq. Write*	60 MB/s
OS Support	Windows XP, Vista, Window 7 (32/64-bit)
Reliability Specification	
MTBF	1,000,000 hours
Data Retention	10 years
Data Reliability	Built-in EDC/ECC
Environmental Specification	
Operating Temperature	0°C to +50°C
Warranty	5 years
Part Numbers	ST3U32ERS ST3U64ERS

USB 3.0 Express Drive

The USB 3.0 Express RAM Cache is a slim, high performance flash drive with an on-board caching system for improved performance.

Features:

- High Performance USB 3.0
- Fully Backward Compatible with USB 2.0
- Available in 16GB & 32GB

Device	USB 3.0 Express Drive
Physical Specification	
Interface	USB 3.0
Capacity	32GB
NAND Flash	MLC
Dimensions	67 x 27 x 7.5 mm
Performance Specification	
Seq. Read*	125 MB/s
Seq. Write*	42 MB/s
Reliability Specification	
MTBF	1,000,000 hours
Data Retention	10 years
Data Reliability	Built-in EDC/ECC
Environmental Specification	
Operating Temperature	0°C to +50°C
Warranty	5 years
Part Numbers	ST3U16EDK ST3U32EDK

"The Express Drive USB 3.0 certainly delivers blazing fast speeds for those who demand the performance now."

USB 3.0 Flash Drives

- RAIDDrive - USB 3.0 Extreme Performance
- SuperCrypt - Hardware Encrypted SSD Performance
- Express RAM Cache - 32MB Cache delivers SSD performance
- Express Drive - USB 3.0 Solid Performance
- Express DUO - USB 3.0 Value-line Performance

USB 3.0 Express DUO

The Express DUO is USB 3.0 performance at a USB 2.0 price. Small, fast, backward compatible and completely affordable, the Express Drive makes the conversion to USB 3.0 easy.

Features:

- USB 3.0 Performance
- Fully Backward Compatible with USB 2.0
- Available in 8GB & 16GB

Device	USB 3.0 Express Duo
Physical Specification	
Interface	USB 3.0
Capacity	8GB - 16GB
NAND Flash	MLC
Dimensions	67.8 x 17.2 x 7.7 mm
Performance Specification	
Seq. Read*	67 MB/s
Seq. Write*	25 MB/s

Storage POD – 500H

USB 3.0 is perfect for external storage devices. Over twice as fast as USB 2.0 and with three times the available bus power, this 500GB drive enclosure truly delivers on performance and convenience. Completely powered by the USB bus, the Storage POD requires no external power adapter.

Features:

- USB 3.0 - unlock the true performance of your drive
- Portable – Compact, Bus Powered Design
- Capacity – 500GB HDD
- Compatible – Supports USB 3.0 & USB 2.0*
- Durable – Anti-shock (6-axis) enclosure

* USB 3.0 Speeds requires a USB 3.0 port

Storage POD mini

Ultra-Portable Solid State Drive with a high performance USB 3.0 interface, One-touch Backup and Write Protection

Features:

- Capacity : 60/120/240/480GB SSD
- Compatible - supports USB 2.0 & 3.0
- Special Features :
 - 3 LED Status Indicator : Monitor drive Connection Status and Activity at a glance
 - Write Protection Switch : Prevent unintentional writes, protecting your drive from Viruses and Malware
 - One Touch Backup: Incremental Backup at the touch of a button.
- Performance : 260MB/s Sequential Read and 220MB/s Sequential Write
- Light Weight : only 80g (up to 250% lighter than 2.5" solutions)
- Dimensions : 110x68x10mm (about the size of a cellphone)

STT USB Drives

World's smallest 64GB USB drive

PICO USB Drives

Pico Series USB drives are incredibly small and stylish Flash drives offering up to 64GB data storage. Pico drives feature up to 30 MB/s transfer speeds. Not only are Pico drives ideal for transporting data, digital images, and presentations, they are also the perfect accessory to adorn keychains, mobile phones, or wearing as a necklace.

Dimensions:

A = 38.7 x 12.4 x 3.9mm B = 31.8 x 18.8 x 4.4mm
 C = 31.3 x 12.4 x 3.4mm D = 39.7 x 13.5 x 4.9mm
 E = 34.8 x 15.8 x 5.2mm

Features:

- World's smallest 64GB USB drive
- Up to 200X transfer speed
- Water resistant
- Over 80 press awards to date

LUXIO USB Drives

Luxio USB drives are first and foremost a sleek and classy mobile storage solution. But there's a lot more to Luxio than meets the eye. These small drives store up to 128GB of data -- as many as 40,000 six megapixel photos! With transfer rates as high as 200X (30MB/sec), copying files to and from the Luxio is a breeze. We also include AES-256 hardware Encryption with every Luxio drive, and a custom made leather carrying case.

DataGuardian

DataGuardian™ is plug and play security for USB. Finally, there's a solution to keep your data safe without public and private partition or even the need for software. Simply plug in the DataGuardian and an application is automatically launched from the drives firmware (on-chip). Simply enter your password and you will have access to your data; unplug the drive and the drive is locked again. And DataGuardian also blocks all Autorun-based malware attacks. These kind of malware propagation techniques have become the #1 distribution method of recent viruses. With Super Talent DataGuardian™, your data is safe from both the predators you can see and those you don't.

Features:

- Password Security without software (Hardware-based)
- Protects from all Autorun-based Malware attacks
- Available in 8GB and 16GB capacities

Encryption Solutions

Your USB Flash drive holds all your most valuable data. Maybe it contains your personal financial records, confidential medical or legal records, customer databases, or other secrets that you wouldn't want to fall into the wrong hands. By encrypting your data, it will be inaccessible to anyone without your encryption password (beware, do not lose your password!).

Super Talent now offers two easy ways to protect the contents of your USB drive. Our state-of-the-art 256-bit encryption solutions conform to AES-256 standards.

USBENC-H1

- AES-256 compliant hardware encryption
- Supported on most USB models
- Factory enabled only; specify when ordering

USBENC-S1

- EncryptX SecurFlash® AES-256 compliant software encryption
- Supported on all USB models
- FIPS 140-1 certified
- Factory pre-load only

STT USB Drives

CKB Series

You can't leave home without this one because it will always be with you. Designed to be placed on your keychain, this flash drive is housed in a rugged metal enclosure.

Flash Media Cards

Super Talent offers a full range of Flash media cards to suit all your mobile storage needs. These products have been tested extensively to ensure compatibility with every conceivable consumer gadget. These cards are all backed with Super Talent's 1-year warranty.

MicroSDHC Cards

Capacity: 32GB, 16GB, 8GB, 4GB

Features:

- Power requirements: 2.7V to 3.6V.
- Operating temperature: -25° to 85° C.
- Dimensions (approx.): 15 x 11 x 1mm
- Weight: 0.5g.
- Warranty: 1 Year.
- Optional SD adapter for use in SD devices.

MicroSD Cards

Capacity: 8GB, 4GB, 2GB, 1GB

Features:

- Power requirements: 2.7V to 3.6V.
- Operating temperature: -25° to 85° C.
- Dimensions (approx.): 15 x 11 x 1mm
- Weight: 0.5g.
- Warranty: 1 Year.
- Optional SD adapter for use in SD devices.

SDHC Cards

Capacity: 32GB, 16GB, 8GB, 4GB

Features:

- Erase protection switch to prevent accidental deleting of data.
- Operating shock rating of 2,000Gs - impact-resistance.
- Power requirements: 2.7V to 3.6V.
- Dimensions (approx.): 32 x 24 x 2.1mm
- Weight: 2.0g (max.).
- Power consumption: Active < 35mA; Standby < 100uA .
- Operating temperature: -25° to 85° C.
- Warranty: 1 Year.

- Operating temperature: -25° to 85° C.
- Warranty: 1 Year.

Desktop Memory

Super Talent Desktop memory is fully compliant with industry standards to ensure compatibility with motherboards and OEM systems. As a member of the JEDEC association, Super Talent helps define future memory standards. All new products, new component suppliers, and technology changes are subjected to stringent hardware and software testing in our Compatibility Labs prior to production. Super Talent's award-winning Desktop memory is also qualified and recommended by leading industry partners such as Asus and MSI. This additional level of testing ensures the highest possible levels of quality and compatibility.

Server Memory

Our server memory is designed for ultimate reliability. These modules conform to JEDEC specifications and use only the highest quality components. Our server memory is subjected to our own extensive in-house qualifications before being qualified by leading server board manufacturers on their newest server platforms. Super Talent Server memory is 100% tested and backed with a lifetime warranty.

Proves to be GREEN Solution

Green DDR3

1.35V DDR3 SDRAM-VLP RDIMM

We are now shipping their new "Green DDR3" to support low-voltage platforms. JEDEC standard 1.35V DDR3 SDRAM-VLP is 2GB based on a 1Gb component. This DDR3 memory product features: lower cooling costs, higher efficiency, and most importantly dramatic power savings.

Overclocking Memory

Extreme Performance DDR3

- Up to 2400 MHz Clock Speeds
- XMP-pre-tuned for Low Latencies
- 8GB Dual-and 12GB,24GB Triple-Channel Kits

Speed Series DDR3 The World's Most Advanced DDR3 Memory

Speed Series represents the most advanced DDR3 memory available. It is developed and built in Super Talent's Silicon Valley Engineering Labs to deliver the highest attainable DDR3 memory performance. Speed Series memory combines blistering fast clock speeds with aggressively tuned latencies. Speed Series employs an extreme cooling solution that offers double the surface area and 106% more aluminum mass than standard heat spreaders. With Super Talent's special thermal adhesive, this cooling solution provides superior heat dissipation that results in a cooler, faster memory device. Super Talent builds Speed Series using the fastest available, carefully screened DRAM chips, and are hand tested as a matched pair in a popular enthusiast motherboard.

Overclocking Memory

Performance Series DDR3

Our Performance series is designed by hardware enthusiasts for maximum performance with the Core i7 CPU. These modules are hand tested in the latest Core i7 motherboards in triple channel configuration to guarantee phenomenal speed. Each Performance series module is equipped with a chrome plated heatsink that is designed by our thermal engineers to wick away heat from the components more efficiently than traditional heatsinks, resulting in higher clock speeds. The Performance series is built expressly for extreme overclockers and gaming enthusiasts.

Laptop Memory

Super Talent Laptop memory is designed for compatibility with a wide range of portable computers. Our fully JEDEC compliant SO-DIMMs are built with only the highest quality components. All new products, new component suppliers, and technology changes are rigorously tested in a multitude of laptop computers in our Compatibility Labs prior to production. Super Talent Laptop memory is 100% tested. Every SO-DIMM module we build is tested at its rated specs to guarantee functionality. Our SO-DIMMs are backed with Super Talent's lifetime warranty, and are perfect for upgrades.

Awards & Reviews

Our products have captured over 500 press awards worldwide since 2006, making Super Talent one of the industry's most highly acclaimed brands. Our line of Pico USB drives alone has won over 80 awards to date including being featured on the cover of Popular Science, being named to Ladies Home Journal's list of "Things We Can't Believe We Ever Lived Without", and being named to Gizmodo's list of "Top 10 Biggest & Baddest Record-Breaking Consumer Gadgets".

ABOUT SUPER TALENT TECHNOLOGY, CORPORATION

Headquartered in San Jose, California – the heart of Silicon Valley, Super Talent Technology designs and manufactures system memory and Flash-based storage devices for computers and consumer electronics. Our award-winning system memory products are based on industry standard DDR, DDR2 and DDR3 technology. Our Flash storage solutions include Solid State Drives (SSDs), stylish USB drives and compact removable card formats.

With over 20 years of experience in manufacturing memory products, Super Talent has emerged as a leader in advanced product development and manufacturing processes.

ENGINEERED IN SILICON VALLEY

Super Talent's electrical, mechanical, and software Engineering teams, based in Silicon Valley, develop leading-edge custom DRAM and Flash memory solutions. An ISO 9001 certified company, Super Talent utilizes its state-of-the-art factories and leading - edge components to produce award winning products with outstanding reliability. As an active member of JEDEC and ONFI, the industry standards associations for DRAM and Flash, Super Talent's engineers help define future memory standards. With over 230 patents in DRAM and Flash technology, Super Talent has become one of the world's top patent holders in memory device categories.
