

The complete project studio for editing your videos!

Cameo Convert 800 and the full version of VideoStudio 8 are the complete solution for editing your videos like a pro. Use the high quality external converter to capture analogue and digital movies via notebook and PC. Let your creativity direct the show – easy usability and many clever functions support you in making your final cuts effortlessly. Now you can transfer your movies both to analogue and digital devices or directly burn them to DVD or Video-CD. All these steps can be realised in realtime – this means less waiting and more time for creating!

1 Capture

Get your videos from analogue and digital camcorders, VCRs, satellite receivers, TV tuners and DVD players. Cameo Convert 800 features suitable connectors for any purpose: Two lightning-fast FireWire™ interfaces, S-Video and Composite connectors as well as stereo audio I/Os – everything you need to go from analogue to digital and back again.

2 Create

VideoStudio 8 provides you with a great deal of options to edit your videos and jazz them up with a wide-ranging palette of effects – no more boundaries for your creativity! Spice up your movies with video-in-video effects, animated titles, audio tracks and live comments. In face of the wide functional range your work will be easy, efficient, smooth and always in realtime.

3 Share

The flexible converter assists you in transferring your finished movie to analogue media like VHS tapes and digital data carriers like DV cassettes. Of course you can also create DVDs and Video-CDs with your own titles, menus and buttons. Even mobiles/PDAs with video function and web-based video albums are supported – present your movies whenever and wherever you want!

Complete right from the start!
