ERGONOMICS

Productivity Through Comfort

- Repetitive motion and unnatural hand and wrist positions can be minimized with an ergonomic keyboard and mouse
- A split keyboard increases the angle to improve comfort for a wider range of users with different body types
- Palm rests on the keyboard are designed to maximize productivity by providing support and comfort to your wrists
- Raised thumb rests on an ergonomic mouse helps encourage vertical wrist posture

Ergonomic Keyboard

A Split Ergonomic Design encourages natural hand, wrist and forearm position. A tilt angle on the keyboard promotes a natural angle for your wrist.

Standard Keyboard

A standard keyboard creates an unnatural hand, wrist and forearm position.

Ergonomic vs. Standard Mouse

MW500

Standard Mouse

A vertical style mouse promotes a gentle natural writing position where the radius and ulna do not cross

A standard mouse puts added pressure to the wrist where radius and ulna crossover
