CHANGING PERSPECTIVES

INVENTING THE FUTURE

The consumer electronics market continues to develop at a rapid pace. To maintain your competitive edge as a dealer, you need to offer your customers the latest must-have products, month after month, year after year. But how? By working with a partner that understands the market and can provide you with a constant stream of unique and innovative products. Vogel's is the expert in supports for audio and video equipment. We have been specialising in this area for over 30 years. Our strategic focus on systematic innovation and high quality design has enabled us to produce winner after winner for this demanding market.

Winning design
Vogel's invests heavily in its in-house design and engineering department and that has resulted in many award-winning designs over the years. That tradition continues today. In just the last few months, two of our newest products received highly regarded design awards. Vogel's Click & Switch projector mounting system from the Evolution 6000 Series received the iF Product Design Award 2007. The iF award is one of the world's most well known trademarks for outstanding design. This global recognition puts Vogel's in the top tier of manufacturers. Vogel's new EPC 6545 projector ceiling solution and Mighty Brighty won the coveted 'CES Innovations Award 2007 Honoree' as well. The CES is the biggest consumer electronics trade show in the US.

Fast gains in 2006
In 2006, our insight and understanding of the consumer electronics market enabled us to identify some of its most important new trends, quickly develop new products and bring them to market. We introduced new product categories in 2006. Amongst these, our Mighty Brighty Projection Screen Paint, which is an exciting addition to our successful line of projector supports for the Home Cinema market.

New horizons for 2007
The year 2007 promises to be even more exciting. We anticipate a huge growth in manual and electronic supports for screens and in supports for very large screens. Vogel's has a long history in developing extremely stable, high quality supports for large format screens and the professional market. We will draw upon this experience to rapidly produce inventive new solutions for large screens in the consumer market. Furthermore, a headreast support for portable DVD players has been developed. DVDock will take us into the new category of in-car entertainment. We will also continue to add new internet applications as a way of reducing costs and improving communication with our sales partners and customers.

Working together, we can help each other build a successful future.

Gerdi Vogels
Managing Director

Universal solutions for every home and every TV
On the ground, on the wall or ceiling, on a table or as furniture. Vogel's offers a wide variety of solutions. And in all of these areas we provide innovations that you can easily sell.

Expanding our Home Cinema assortment
Vogel's was one of the first to take advantage of the tremendous growth in Home Cinema projectors with its highly popular Evolution 6000 Series Click & Watch projector mounts. We expanded our assortment with Mighty Brighty Projection Screen Paint. It was introduced in 2006 and has been very well received in the market. Mighty Brighty is a very convenient and cost-effective alternative to expensive stand-alone and built-in projection screens. We will continue to add innovative products in this fast-growing market.

Growing and gaining market share

The Vogel's Evolution 6000 Series LCD/Plasma wall supports continue to gain popularity with retailers and customers. Vogel's is still gaining market share compared to our competitors and is the leading brand in the flat display support market. Vogel's furniture assortment also offers many high quality choices to consumers and sales in this area are doing well.

Gearing up for in-car entertainment with DVDock

Vogel's enters a new product category with DVDock, a new headrest support for portable DVD players that are used for in-car entertainment. It offers a sturdy and stylish alternative to the flimsy and unattractive bags that are usually provided with portable DVD's. Vogel's DVDock is made of robust materials that will stand up to intensive use and it looks great with any style car.

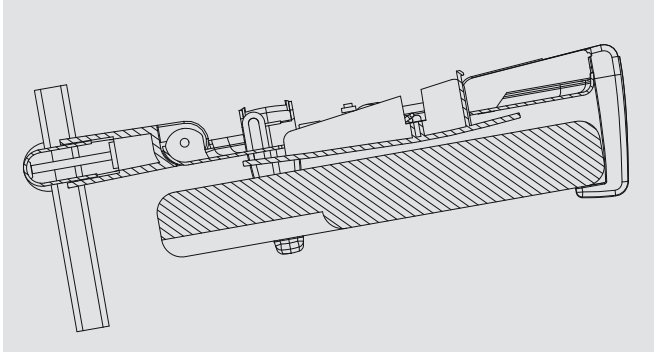
The birth of a new product



CAD models, mockups and prototypes are made to thoroughly test every aspect of the design

EUROPEAN DESIGN BY VOGEL'S

In today's highly competitive marketplace, the most successful companies are those that can anticipate what their customers will want.That requires insight into new market trends and an ability to quickly design and develop products that will meet these new needs. From the very start, Vogel's has had a clear strategic focus on in-house product design, development and engineering and we have always invested heavily in these areas. This has enabled us time and time again to identify new opportunities and quickly bring them to market before our competitors.

Some of our famous firsts include:

- The first and most successful loudspeaker support in the world, the BEK 100 (1973)
- The first universal LCD/Plasma adapter (2001)
- The first flat display supports with gas springs/shocks (2002)
- The first aluminium flat display supports (2002)
- The first LCD/TFT audio-visual modular concept (2002)
- The first aluminium projector support (2003)
- The first Projection Screen Paint which you can adapt at home to every situation (2006)

How has Vogel's achieved so many firsts?

We keep our pulse on market developments

Vogel's has a strong marketing department that has a close relationship with our business partners and end customers. They help keep us up-to-date on the latest developments and trends in our markets. In addition, we carry out independent research and visit all relevant trade shows and events to identify new market opportunities. This provides valuable input for our strategic product decisions.

Dedicated industrial design department

Over the last 30 years, our large team of industrial designers and engineers has built up highly specialised knowledge about consumer preferences, materials, functional requirements, ergonomics, and manufacturing processes for designing support products. Our experts provide valuable technical input on the feasibility of new designs before starting a project. They then use advanced tools, such as CAD models and mockups, to test and fine-tune key design aspects. This expertise helps us find new ways of doing things and helps us apply proven methods to new situations. Our specialists also work with an extensive network of suppliers to ensure the fastest and most cost-effective manufacturing methods.

We deliver products at affordable price points

Vogel's products are made of high quality materials, yet they are also affordable because we invest heavily in high volume production methods. Our industrial designs incorporate these production cost advantages and enable us to manufacture our products at affordable price points.

Vogel's industrial designers and engineers each contribute a different perspective and skill to come up with the most innovative solution

PARTNERSHIP WITH VOGEL'S

Vogel's has chosen to work with an indirect and independent distribution channel that has exclusive representation in each country or region where Vogel's products are sold. We are committed to this business model and fully support our importers who represent us locally. As a dealer, you should always contact your local Vogel's importer directly for information about Vogel's products and applications. They can also provide you with sales and marketing support tools. Any questions you might have about the Vogel's product assortment or organisation should be routed through your local Vogel's importer as well.

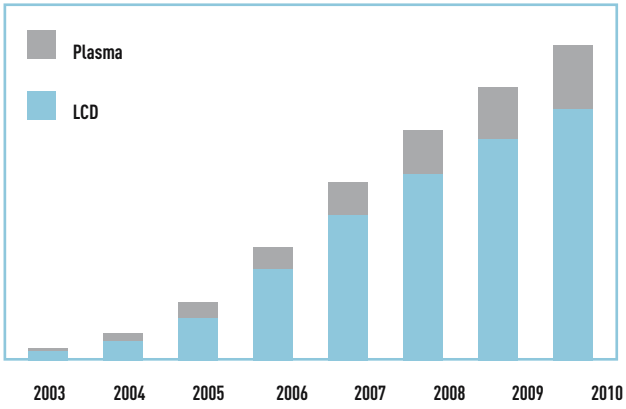
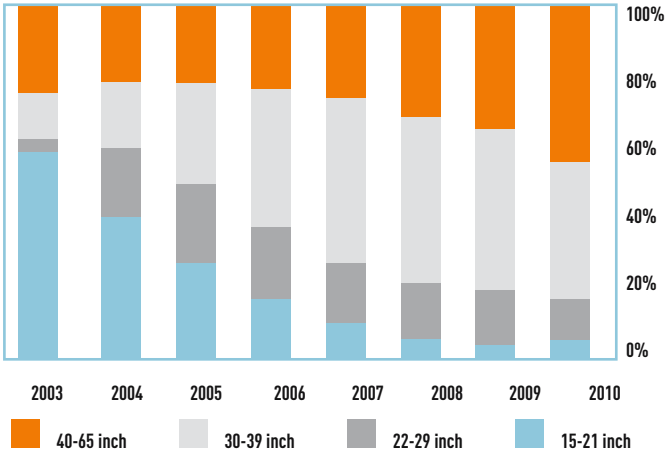
Flat Panel Worldwide

Source: DTC Worldwide, 2006



Screen Sizes EMEA

Source: DTC Worldwide, 2006



GROW WITH THE FLAT MARKET AND HOME PROJECTION

Flat panel continues to grow and diversify

The flat display market continues to grow and change. Medium-size and large screens are the fastest growing volume segments. And consumers want to turn and position their LCD/Plasma for better viewing. Flat displays are now being carried along to use in public transportation, cars and airplanes. Luckily, Vogel's is changing right alongside you.

Take advantage of the flat display boom

Sales are booming. In fact, flat display sales are expected to account for 90% of all TV sales by 2007. At Vogel's, we anticipated this growth and the new consumer demands when we began developing the Evolution 6000 Series. Now we have just the products you need to take advantage of this dynamic market.

Innovative solutions

The Evolution 6000 Series support system offers a unique range of movement and set of innovative features that make it truly stand out from conventional supports. Its Smart Range provides the most advanced solutions for every size of flat display and for every price class - all in one modular system with the same stylish design. Vogel's DVDock is our newest addition. It is a stable and stylish headrest support for portable DVD players that are used for backseat entertainment in cars.

New demand for Home Cinema projection

One of the fastest growing segments in the Home Cinema market is projectors for home use. Good quality projectors are now available for under € 1,000 and we are seeing a clear shift in demand. There is a huge increase in sales of projectors for home use. Vogel's has a great deal of experience in this area from its professional market and recently introduced several important innovations to serve this market, including the Click & Switch projector mounting solution and Mighty Brighty Projection Screen Paint.

VESA COMPATIBLE

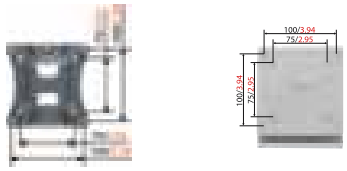
VESA is the worldwide standard for mounting LCD/Plasma screens. The VESA logo tells you, at a glance, which screen complies with the VESA standard so you always get a perfect match. All Vogel's mounts for LCD and plasma screens are VESA compatible. Vogel's has developed a special interface for some of the models that are not VESA compliant.

A few screens still do not have a VESA standard mounting. Vogel's has developed an additional interface (EFA 6875, suitable for EFW 6205, EFW 6225 and EFW 6245) for some of the screens which are not VESA compliant.

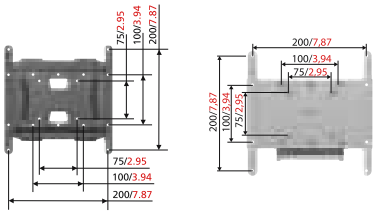
Please check our website **www.flatscreenfitter.com** for information on the specific support that fits a screen.

VESA classification applicable to Vogel's products:

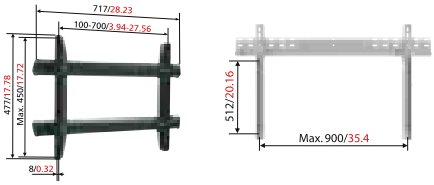
- **VESA MIS-D:**
  - 12-22.9" screen size
  - mounting holes 75 x 75 / 100 x 100 mm



- **VESA MIS-E:**
  - 23-30.9" screen size
  - mounting holes 200 x 100 mm / 200 x 200 mm



- **VESA MIS-F:**
  - ≥ 31" screen size
  - mounting holes in variable pattern
  - horizontal max. 700 mm
  - vertical max. 450 mm on flat back



WHAT DOES TÜV MEAN FOR YOU

For consumers, the 'GS' certification mark provides extra certainty about the safety of their Vogel's product. All Vogel's products have been thoroughly tested beforehand. The GS certification mark is handed out by the TÜV. TÜV is an independent certification body for products and production processes. They carry out quality and safety tests.

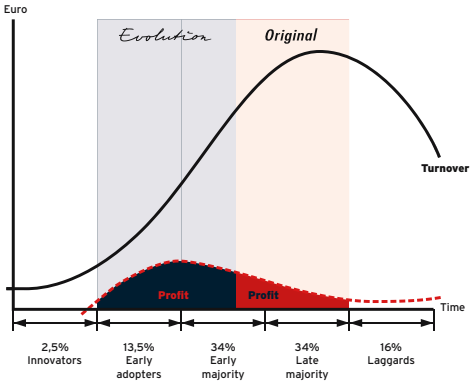
Virtually all Vogel's products have the GS certification mark. Vogel's undergoes this voluntary certification to give consumers extra proof of the safety of their Vogel's product.

Vogel's products are put through an accelerated endurance test. This test simulates the daily cycle of normal use for a product that a consumer would carry out over a 10 year period. Consumer products are also put through an overload test. The overload test for Vogel's Professional products is extra heavy, because these products are used in public areas.

Test situations at Vogel's

SEGMENTATION & POSITIONING

To meet the needs to the Retail and Consumer Electronic markets, two lines of Vogel's products have been sold for years. Each line is designed with its own concept and target audience. Choose for yourself one or two lines depending on your own market demand and opportunities. Vogel's makes it easy for you to succeed on different levels.



Vogel's Evolution Line is the most sophisticated and innovative range of entertainment supports you will find today. Based on the latest developments and styling and made of durable materials, they are designed to adapt to your space. Vogel's Evolution is designed for individuals who are looking for outstanding easy to use products, that enhance the quality of their entertainment experience.

Vogel's Original Line is the most practical range of entertainment supports that enhance the daily use of your audio and video equipment. Vogel's Original is designed for people who enjoy their life and want to move to the next level of usability and comfort.

VOGEL'S INTERNET APPLICATIONS ARE WORKING FOR YOU

Internet: www.vogels.com

Vogel's internet site

Vogel's internet site makes it easy for you and your customers to quickly locate the information that you need. The site is available in 6 different languages to make it more accessible. It provides information about all products and has a Store locator for the U.S. and The Netherlands (other countries on request). The site also has a few special sections that provide valuable information for consumers.

Home Cinema Planner

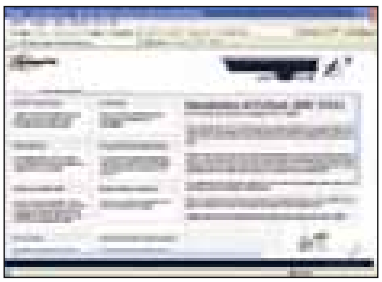
Customised Home Cinema Planner

Screen & Support advice application
Vogel's Home Cinema Planner can be customised for each importer or retailer in your own language and with your own housestyle elements. This example shows the customised site for our importer, the Aurora Group in Scandinavia. With this application, consumers can design their own living room layout using our standard graphic elements. They can try out different viewing positions, screen sizes and layouts for their room to see what screen and support work best for their situation. They can also ask for advice about screen size and features of support products.

Consumer Products

Customised Consumer On-line Product catalogue

Vogel's complete consumer catalogue can now be customised for each importer and dealer, in six languages with your own housestyle elements. This example shows the customised catalogue for our importer, Fa Schnepel GmbH & Co KG in Germany. Consumers can quickly find the right support for their needs. With all specifications and accessories. Also useful for dealers who want to quickly look something up.



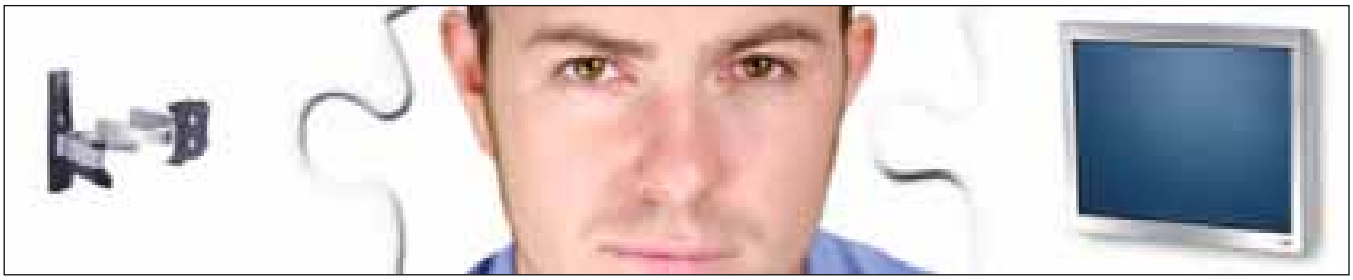
Information Store

Information Store to support your business

Extranet
This site, **informationstore.vogels.com**, was created to support local marketing and sales activities.

Press site
A new press portal is now available, **press.vogels.com**, for members of the trade and general press. They can use it to access specific company and product information from Vogel's. Members of the press must first register and they can then access all information.

Press site



Quickly find the product that fits your flat screen

At **www.flatscreenfitter.com** we will tell you the Vogel's supports that fit each brand of flat screen TV. Consumers can find the exact support that fits their favourite TV. And you as dealer can make sure that you sell the right support for the right TV.

To do this, the Vogel's team maintains a complete database with all of the A brands of flat screen TVs that are available. All hole patterns are measured, whether they are VESA compatible or not. We also track all of the trends in the flat screen area.

Interfaces
Some televisions are not VESA compatible. Models that do not fit the standard supports can be mounted using an interface. This allows the support and screen to be attached to each other. These interfaces are available from our importers.

Customised Home Cinema Tips

Vogel's Home Cinema tips booklet can now be customised in your language and with your housestyle elements. Contact your local Vogel's importer for more information.

When you are considering buying Home Cinema equipment, you can spend days surfing the web to find information about all the aspects of creating a Home Cinema experience. What flat screen technology is best for your situation? What size should you go for? Is projection an option? What are the most important ergonomics for TV viewing? Or you can go to one independent resource (sponsored by Vogel's) to find the answers to all of these questions and more: **www.homecinematips.com**. On demand it is possible to create a branded booklet, like we did for the MediaMarket retailer.

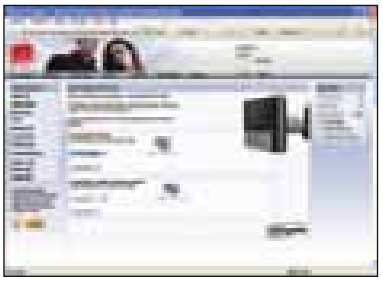
This web site is an initiative of Vogel's. But you will not find any Vogel's products on this site. Over the years, Vogel's has amassed a wealth of practical insights about creating the ideal Home Cinema and we created this site to provide an objective source of information for consumers.

Customised Flatscreenfitter

Vogel's offers several tools for importers and dealers to support sales of Vogel's solutions. Some of these tools are customised versions of the Flatscreenfitter. They come in On-line and Off-line Flatscreenfitter versions, in printed publications and in e-tailer versions. Contact your local Vogel's Importer for more information.

On-line Flatscreenfitter
Vogel's offers an On-line Flatscreenfitter that can be integrated within your corporate website or intranet and is available in two versions:
- Universal On-line Flatscreenfitter: contains all Vogel's products, brands and types of LCD/Plasma screens. See example from the Aurora Group.
- Branded On-line Flatscreenfitter: can be edited to display only the brands and LCD/Plasma types that you sell and shows only Vogel's solutions available in your shops.

For more information, please contact marketing@vogels.com.

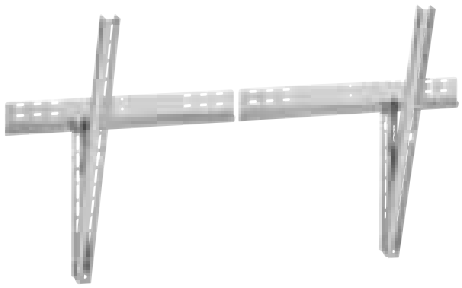


Flatscreenfitter

DVDock - LCD Headrest support EMC 5000

- Universal via adjustable arms to ensure a perfect fit for portable DVD player
- Tilt function (forward or backwards) to eliminate reflections and get the best viewing angle

See page 15 for more detailed information



LCD/Plasma wall support XL - PFW 185

- Universal – complies with VESA MIS-F
- Tilt function 0-5-10-15º

See page 26 for more detailed information

PROJECTOR SUPPORTS

Projector wall solution - EPW 6565

- Reversible mounting, possible to mount the projector facing either straight up or upside down
- Universal, fits virtually every projector

Projector table solution - EPT 6525

- Tilt, turn & roll feature to easily position the projected image
- Universal, fits virtually every projector

Ceiling solution - EPC 6545

- Adjust & secure feature to lock the projector in position
- Ceiling cover included to hide cables and support when not in use

See pages 32, 33 for more detailed information

MIGHTY BRIGHTY PROJECTION SCREEN PAINT

Projection Screen Paint - MPW 10

Ready to use paint that creates a projection screen on your wall.

See page 31 for more detailed information

Projection Screen Paint - MPW 20

Create the optimal screen, with the best brightness and reflection for your projector and lighting situation. Everything you need to create a tailor-made projection screen of up to 6 m^2 with a dark border on your wall.

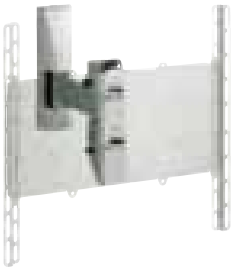
Projection Screen Paint - MPW 30

Turn your complete wall into the optimal projection screen that looks like a normal wall when not in use. We call this the Invisible Wall Solution because when you are not using your screen you simply remove the magnetic dark border and all you see is a normal white or light grey wall.

IN THE SPOTLIGHT

Vogel's makes a wide range of support products and accessories for the Audio/Video world. We would like to highlight a few of our special products that clearly stand out in their market.

ORIGINAL



LCD wall support – VFW 365
- Turn & tilt function guarantees optimal viewing position
- Cable Inlay System (CIS®) – all cables cleverly concealed

See page 45 for more detailed information

LCD wall supports - VFW 232 / 332 / 432
- One, two or three pivot points
- Tilt and turn functions guarantee optimal viewing position

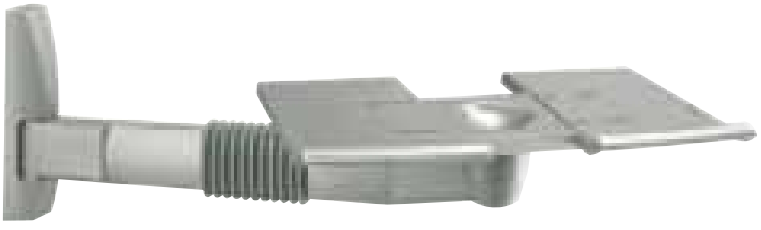
Loudspeaker stand - VLS Glass
- Stylish glass base with stainless steel top plate
- Choice of three speaker - mounting options - suitable for most brands of surround speakers

See page 36 for more detailed information



TV wall supports - TVB 2200 / 2250 / 2375
- Two or three turning points
- Cable Inlay System (CIS®) - all cables cleverly concealed

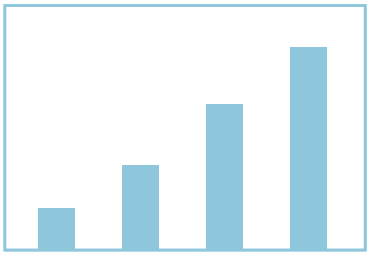
See page 47 for more detailed information

PROFIT FROM THE PORTABLE DVD MARKET

The revolution in portable audio devices (MP3 players) was just the start. Now it's time for portable video: sales of portable DVD players are growing fast and this growth is expected to continue.

Most of these players are attached to headrests for "backseat" entertainment in passenger cars. This is usually done with flimsy bags that are difficult to install. They are very unstable, unattractive to look at and make a car look cheap and tacky.

Vogel's DVDock™ is the perfect solution to address this problem and fills a big gap in the market. It's easy to mount, easy to use and has a stylish design that enhances any car interior. It's the right product, at the right time, at the right price.



Fast market growth of portable DVD players in Europe

Easy install
Easy install with only an Allen key. Also cable connections and control buttons stay easily accessible

PROFITABLE SUPPORT

Vogel's has developed marketing materials to support you in selling this product. It includes special Point of Sale material that is designed to clearly stand out and attract the attention of your customers. Vogel's will carry out an international press campaign for trade and consumer press. Information about the DVDock™ can be found on the Vogel's web site: www.vogels.com/dvdock.

The DVDock™ packaging has a double-facing design, one dark side and one light side, so you can create an eye-catching checkerboard display. Comes with Eurolock to hang the packaging.

The self-selling display with a top card in 5 languages holds four DVDock™ products and clearly communicates the most important selling arguments to customers.

HUGE GROWTH IN BIG SCREEN TVS

Flat displays are getting bigger and bigger in the home. The large LCD/Plasma segment is becoming more popular than ever. Even though the largest commercially available display today is 83" that will probably grow to LCD and plasma screens as large as 103". New developments in digital television and Home Cinema are driving this demand and we expect this trend to continue and increase in the future. The major display manufacturers are already moving into the 60" plus market and that will create a need for larger wall mounts in the home.

With our extensive experience in the professional market, Vogel's can help you profit from this growing market. The stylish and elegant design of our supports complements the most sophisticated interior. Our products are built to exact specifications from the most durable materials available, including high quality, solid steel and aluminium alloy frames. Vogel's high quality supports for oversized flat screens are TÜV certified which guarantees enduring strength and value. Our Vogel's Professional products are supplied in neutral white packaging.

Largest and strongest support

Vogel's has the largest and strongest support for this market. The new PFW 185 LCD/Plasma support can be used to support extra large flat displays in the most demanding professional environments for home use. It provides stable and secure support for LCD/Plasma screens from 55" to 103".

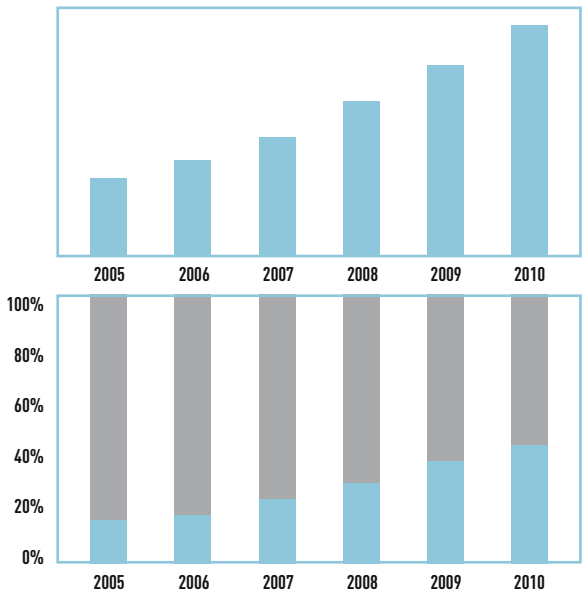
CLICK & SELL

Get ready for the new kid in town!
Home Cinema Projection is coming to the home. As prices continue to go down and quality goes up, consumer demand will climb as well. It's clear that initial buyers will be early adopters. Many of them will be opinion leaders who will have a strong influence on future buyers. They have higher expectations for convenience and prefer complete solutions. This is a great opportunity for selling projectors with complementary supports.

Increase your sales
Vogel's versatile projector mounting solution can increase your sales revenues. It is a complete solution that includes a universal connector that fits the separate ceiling mount, wall mount and table mount. You can sell the connector and one mount for initial sales and mention the fact that other mounts are available for other areas in the house. This creates easy return sales. Each product sold has very high margins so you can quickly boost your income.



Projector Worldwide
Source: DTC Worldwide, 2006

CLICK & SWITCH

Create multiple viewing environments with just 1 projector!
The Click & Switch system enables you to mount your projector on the ceiling, wall or on a table using the same basic set of components. Simply click your projector on to the universal connector and then attach it to the projector ceiling mount, wall mount or table. Easily store it when not in use by just unclicking it. No screwdriver is needed to detach it.

Mount your projector on the ceiling, wall or table with the Versatile Vogel's Click & Switch line of projector supports. Its universal design enables you to use your projector in every room. Mount your projector in any location, using the the same basic set of components. Now you can easily enjoy your projector – wherever you like.

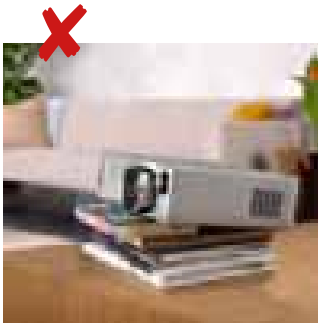
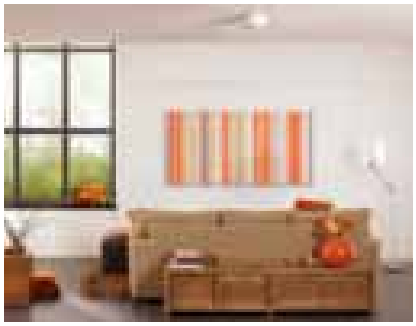
Table Solution
The EPT 6525 lets you easily position your projector anywhere on a table or shelf without resorting to a wobbly stack of books. Once in place, you simply position the projected image on a screen or wall for viewing. The rubber anti-slip pads prevent sliding and protect your furniture from scratches. The Table Solution can also be permanently attached to prevent theft.



Ceiling Solution
The EPC 6545 lets you mount your projector to the ceiling. The Adjust & Secure feature enables you to lock the projector into position. When not in use, simply remove your projector and hide the cables and support from sight using the ceiling cover provided.



Wall Solution
The EPW 6565 lets you mount your projector on the wall with style. The module can be combined with the column system (EFA 6830 / 6835 / 6840) and Audio/DVD support (EFA 6825) from the Vogel's 6000 Series. The Audio/DVD support keeps your audio/visual equipment out of the way. The Wall Solutions flexible horizontal arm can be reversed so that you can mount your projector facing either straight up or upside down for the best projection at any height.

VOGEL'S HELPS YOU SELL A COMPLETE PROJECTOR SOLUTION

MIGHTY BRIGHTY®
Another innovation from Vogel's

Projection
Screen Paint

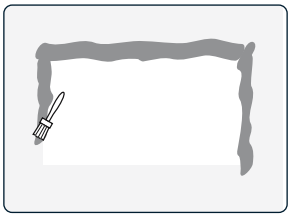
Mighty Brighty is a new and unique concept for creating the perfect projection screen right on a normal wall. Consumers just paint it on, sit back and enjoy. Always exactly the right size and format (4:3, 16:9, etc.). Always exactly flat and straight. Always exactly the right screen surface for the type of projector, projector position and the amount of light in the room. Plus it's invisible when the projector is not being used (MPW 30 only).

Consumers have more choices than ever when it comes to creating the ultimate Home Cinema experience. One option is a projector solution: buying a high quality projector and projection screen to create the big screen experience. But there are many decisions that a consumer needs to make if you are going to make the sale. Vogel's now gives you all the tools you need to sell a complete solution to your customers.

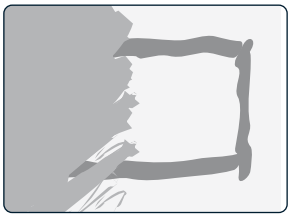
- High quality projector display: use the Vogel's special projector display to demonstrate how it works
- Click & Switch projector solution: so you can use your projector on a wall, ceiling or table – wherever, however you want
- Mighty Brighty Projection Screen Paint: a low cost alternative for expensive screens that lets you create the perfect projection screen right on a normal wall

DESIGN & ENGINEERING SHOWCASE HONORS
INNOVATIONS INTERNATIONAL CES
2007

Create your own projection screen in 4 easy steps

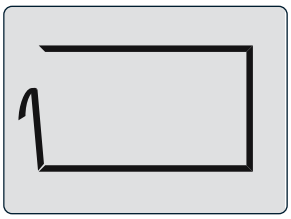


1 Define the exact size and location of your screen. Apply the MagneCoat on the border of your screen.



2 Mix and apply BaseCoat to the wall

3 Mix and apply TopCoat to the wall



4 Add the MagneBorder around your screen. And easily remove it when you are not using your screen! Enjoy the Enormous Fun of Mighty Brighty

"Now you can enjoy your Home Cinema experience with 40% higher Contrast and at least 20% higher Brightness compared to a normal white wall"

(Tested by Konica Minolta)

MPW 10 Standard Screen NEW

Pre-mixed highly reflective paint to easily apply a standard projection screen of up to 5 m² on your wall or board.

Contains
- 1 litre BaseCoat (Light Grey)
- 1 litre TopCoat (Brightness / Gain 1.1)

330 cm 130"

5 m² 54 sq.ft.

MPW 20 Tailor-made Screen & Border NEW

Everything you need to create a tailor-made projection screen of up to 6 m² with a dark border on your wall. It comes with paint for your wall and additional paint components (ContrastBooster and BrightnessBooster) to easily create the perfect screen surface for your situation. In addition, magnetic paint and magnetic borders are included to easily place (and remove!) a dark border around your screen. This border greatly heightens the contrast perception of images on the screen.

Contains • 1.4 litre BaseCoat • 0.1 litre ContrastBooster for BaseCoat • 0.9 litre TopCoat • 0.1 litre BrightnessBooster for TopCoat • 0.4 litre MagneCoat • 10 metres / 32.8 ft. of MagneBorder (width 5,5 cm / 2.2") • Also includes all necessary tools

343 cm 135"

6 m² 64 sq.ft.

MPW 30 Invisible Wall Solution NEW

Same as the MPW 20, except this version has everything you need to paint the entire wall so you do not see the edges of the projection screen. We call this the Invisible Wall Solution because when you are not using your screen you simply remove the magnetic dark border and all you see is a normal white or light grey wall. Nobody sees that it is also an excellent projection screen.

Contains • 2.3 litres BaseCoat • 0.2 litre ContrastBooster for BaseCoat • 1.8 litres TopCoat • 0.2 litre BrightnessBooster for TopCoat • 0.4 litre MagneCoat • 10 metres / 32.8 ft. of MagneBorder (width 7,7 cm / 3.0") • Also includes all necessary tools

343 cm 135"

11 m² 118 sq.ft.

vogel's® Original

BEST VALUE FOR THE MONEY

Vogel's Original product line offers consumers the best value for their money on a wide range of basic solutions that are practical and functional. All with Vogel's outstanding quality and durability.

This range of proven products enables you as a retailer to create more differentiation in your store. Plus, it gives you more cross-selling opportunities in a whole new customer segment, sensitive for a certain price point. The basic range of flat display supports fits most LCD/Plasma screens. This proposition should make it easier for you to satisfy every type of customer, while improving your margins.

All products from this budget line are included in the Flatscreen fitter website. See **www.flatscreenfitter.com** for more information.

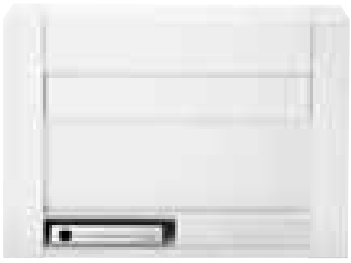
FURNITURE COLLECTION



Our versatile range of mounting solutions helps you place your audio and video components where they best fit your space and where they will look and sound great. Vogel's extensive line of sophisticated furniture offers even more possibilities. It is specially designed to support and enhance your costly LCD/Plasma, Hi-Fi and audio/video components. Only the highest quality materials are used in their construction. These stylish mounting solutions give you more placement flexibility and they outperform and outlast most standard products.

The right style for every taste

Vogel's furniture is available in a variety of colours and finishes, including matte, high gloss and wood grain. For example, we offer contemporary styles with metallic finishes and glass components to fit every taste. You can choose from standalone cabinets and floor stands.

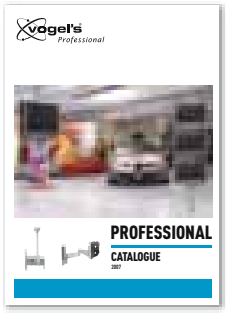
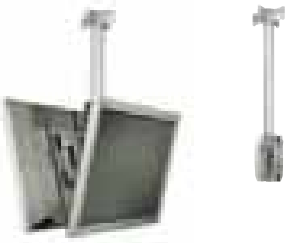
Professional solutions

Vogel's Professional offers a complete line of mounting solutions for the professional market. Over the years Vogel's products have found their way all over the world. We could not wish for a better endorsement of the quality and representative image of our products by the professional world. Vogel's supports for LCD and plasma displays and projectors have proved their worth over the years. At major airports, shopping centres, football stadiums and hospitals but also in filling stations, service organisations, department stores and in the hotel and catering industry.



For more information ask for our brochure or visit www.vogels.com



LCD/Plasma supports

Our range of modular universal flat display supports are internationally acknowledged as one of the best and most flexible systems on the market. They accommodate virtually all LCD and Plasma displays.

LCD/Plasma trolley/stands

This sturdy and stable trolley PFT 2100 allows flat screens to be positioned anywhere. It has a sleek modern design and includes an Autolock® locking system, Cable Inlay System (CIS®) and optional accessory tray.

Universal projector supports

Vogel's offers a wide range of supports for projectors. Fixed or height adjustable, for compact or large projectors, Vogel's has a solution. Ask for our special projector supports brochure and/or our projector lift system leaflet.

TV wall and ceiling supports

Vogel's offers an extensive range of models with a solution for every size of TV in every situation. The stylish, award winning TV supports are available in various colours and show the TV off to its best advantage in every environment.

SUSTAINABLE PROFITABILITY

Profitable support

The exceptional sales and marketing support from Vogel's makes it easy to grow sales. Highlights from our broad assortment of sales tools are shown on this page:

- Easy to sell: Sales information is clear and easy to understand, so you can quickly sell the product to consumers in just a few minutes.
- Reliable distribution network ensures fast, accurate service that saves time and effort for retailers.
- Partnering with a leader in support equipment ensures a continuing stream of innovative solutions that satisfy the demanding consumer market
- Easy for consumers to choose the right product. There's a solution for virtually every screen and every size.
- Improved self-selling packaging has an attractive design that clearly identifies the hardware group and gives an overview of all choices for consumers.
- Helpful internet information, including an easy guide to find matching supports for specific screens. See www.flatscreenfitter.com.

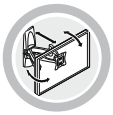
EXPLANATION OF ICONS 6000 SERIES FLAT SCREEN

Spacesaving
Mount your LCD or Plasma TV to the wall to free up space and give your interior a stylish look. Truly the best way to fully enjoy the benefits of your flat-screen TV.

Close-to-wall
The Evolution 6000 'fixed' support enables you to mount your LCD or Plasma screen close to the wall, while leaving sufficient room for air circulation.

Tilt & turn
The Evolution 6000 'adjustable' support lets you tilt and turn your screen any way you want for an optimal viewing experience.



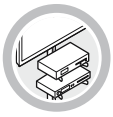
Tilt, turn & reach
Flexibility and freedom of movement are the key benefits of Evolution 6000 optimally adjustable support: tilt and turn your screen any way you want for an optimal viewing experience.

Solid, steady & easy
Your cherished LCD/Plasma TV deserves only the best possible wall mount. The Evolution 6000 Series optimally adjustable support combines high quality engineering and extreme strength, which brings you the benefit of many years of reliable and comfortable operation.

Screen Protection System
Don't worry about damaging your screen or wall: the Evolution 6000 'optimally adjustable' support has Vogel's unique Screen Protection System (SPS™) which protects both screen and wall.

CIS®
Get those unsightly cables out of sight using Vogel's unique Cable Inlay System (CIS®).

CIS®
Get those unsightly cables out of sight using Vogel's unique Cable Inlay System (CIS®).



Modular system
Combine supports of the Evolution 6000 Series with our modular column system and Audio/DVD support to store all your audio and video equipment in one single, sleek-looking solution.

AdvanCIS™
The Column system features our flexible and unique AdvanCIS™, giving you the freedom to easily hide and guide cables at any height.

Adjustable, fits all
The adjustable arms of the Audio/DVD support, which are equipped with an anti-slip edge, fit a wide range of audio and video equipment sizes.

Adjustable height
The Audio/DVD support can be placed at any height in the column. You can also add up to three arms in a row.

EXPLANATION OF ICONS 6000 SERIES PROJECTOR

Easy connect
Simply move your projector from room to room by clicking it on the table, ceiling or wall module.

Tilt, turn & roll
Easily position the projected image using the flexible tilt, turn and roll feature.

Anti-slip pads included
Rubber anti-slip pads prevent your projector from slipping and protect furniture and flooring from scratches and damage.

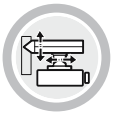
Easy connect
Simply move your projector from room to room by clicking it on the table, ceiling or wall module.

Easy connect
Simply move your projector from room to room by clicking it on the table, ceiling or wall module.

Cable inlay system
Get those unsightly cables out of sight using Vogel's unique cable inlay system (CIS®).

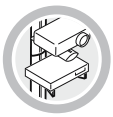
Adjust & secure
Your projector can be locked in position to maintain a stable image while viewing. Even after removing your projector and putting it back.

Ceiling cover
When your projector is not connected to the support, the cables and support can be hidden from sight using the ceiling cover.



Adjustable arm
No matter what size your projector is, with the adjustable arm you can easily position your projector horizontally (near to the wall) and vertically (for the ideal height).

Reversible mounting
Mount your projector facing either straight up or upside down for the best projection at any height.



Modular system
Store all your audio and video equipment in one single, sleek-looking solution with our modular column system (EFA 6830 / 6835 / 6840) and additional accessories.

EXPLANATION OF ICONS 6000 SERIES DVDOCK

Quick Release
Slide the DVD player in the DVDock and click it into place. To take the DVD player with you or change a disc, just press the button and slide it out. Its'quick and easy!

Safety Arms
Thanks to their unique design, our patented safety arms fold back upon impact.

Tilt
The player can be tilted forward or backwards to eliminate reflections and get the best viewing angle.

Easy Install
Enjoy your DVDock in just three easy steps. All you need is a simple Allen key. It's stored on the back of the DVDock so you can always adjust the arms or remove the DVDock from the headrest.
