PACKING AND DELIVERY.—Boxes of plants or bundles of trees will be carefully packed and delivered in Boston, free of expense of carting, and shipped or forwarded according to directions, or, if none are given, always by express, that being the safest and speediest route. All goods are at the risk of the purchaser, but every care will be taken to ensure the safe and prompt arrival of plants or trees. Our system of packing ensures the safety of the plants, at all seasons of the year, to any part of the country.

ORDERS should be written as plain as possible, and on a separate sheet of paper, which will greatly facilitate their execution; if mixed up in the body of the letter many things are often overlooked.

PAYMENT.—All orders for plants or trees, from unknown correspondents, must be accompanied with a remittance or satisfactory reference. A remittance may be made in current Bank Bills, Post Office Orders, Registered Letters, or Drafts on Boston or New York. Post Office Orders are preferable. Give the Name, P. O. Address, County, and State, in full, distinctly written.

OUR CAMBRIDGE NURSERIES are situated in Cambridge, on the road to Mount Auburn, about two miles from the city, and all persons wishing to examine them can do so easily by Horse Cars, marked "Cambridge Street," which leave Howden Square every fifteen minutes. Time, twenty-five minutes. Our Nurseries contain nearly forty acres, and all amateurs and lovers of plants are invited to visit them. During summer there are magnificent displays of Rhododendrons and Azaleas (covering nearly an acre); Roses, Pæonies, Japan Lilies, Dahlias, Phloxes, &c.; and in winter, Camellias, Azaleas, Roses, Ferns, and rare foliage plants. The collection of Pears comprises 2,000 specimen trees, of 300 varieties.

The following catalogues are issued annually, and sent free to all our customers:—

VERBENA SPICATA

COLEUS, LADY BURRILL.

NEW OR RARE PLANTS FOR 1876.

NEW VARIEGATED ZONAL GERANIUM "HAPPY THOUGHT."

This variety is an entirely new and distinct feature in Geraniums, the variegation being in the centre of the leaf in place of the edge. Every leaf is of a very clear, bright green, with a large and distinct creamy blotch in the centre. The habit is compact and dwarf, and it will prove one of the finest additions to the garden or conservatory.

Price, \$1 each.

NEW FANCY-LEAVED GERANIUM "DISTINCTION."

A very distinct and handsome variety, each leaf being neatly cut or fringed, and marked with a dark zone or line appearing like a border.

Price, \$1 each.

NEW DOUBLE-SCARLET GERANIUM, L'ANNÉE TERRIBLE.

This is without doubt the grandest addition to this class and a great improvement upon all the double scarlets. The trusses are of immense size, and the individual flowers remarkably large, of symmetrical form, perfectly double; color, bright orange-scarlet.

Price, \$1 each.

NEW DOUBLE SCARLET GERANIUM, "INCINDIE DE FONTENAY."

Similar in general habit, size, and color to the last, and like that a marked improvement on the older kinds. The color is a very dark scarlet; free-flowering, dwarf, and good habit.

Price, \$1 each.

DOUBLE SCARLET GERANIUM, JEWELL.

One of the finest of the double scarlets; habit, dwarf and free-flowering, leaves with a slight zone; truss good size, each flower very double, regularly formed, deep scarlet, and fine for button-hole bouquets.

Price, 50c. each; \$4.50 per dozen.

NEW PELARGONIUM, QUEEN VICTORIA.

The most marvellously beautiful and novel variety ever offered. The flowers have crispy petals, and though not double they appear so from their having an extra number of petals. Color, rich vermillion, blotched, and all the petals broadly margined with pure white; a splendid variety.

Price, \$2 each.

NEW GOLDEN BRONZE GERANIUM, GOLDEN GEM.

A new and splendid variety raised by us, and decidedly the handsomest and most distinct in cultivation. The leaves, which are quite round, with a smooth, even surface, are golden-yellow, marked with the broadest and darkest chocolate-brown zone. Its bold and striking colors are unequalled by any other variety.

Price, \$1.50 each.

NEW ZONALE GERANIUM, H. IH. HUNNEWELL.

One of the most remarkable and magnificent geraniums. The trusses of flowers are really enormous, certainly the largest yet seen, well-grown plants producing trusses containing one hundred and forty flowers in each, forming a huge scarlet ball nearly twenty inches in circumference. This variety is unequalled for the bold and splendid effect of its grand trusses of brilliant flowers.

Price, 75c. each; \$8 per dozen.

**ABUTILON BOULE DE NIEGE.**

This variety is a great improvement on the old white, being compact in habit, smaller in foliage, and an abundant bloomer; well adapted for culture in the parlor or greenhouse, flowering during the winter.

Price, 50c. each; \$4.50 per dozen.

ABUTILON INSIGNIS.

An old but scarce variety, of a dwarfish habit, producing clusters of three to five flowers of a deep rose, veined with crimson. Fine for winter flowering.
Price, 50c. each.

ANTHEMIS NOBILIS.

A handsome dwarf, herbaceous plant, with fine-cut foliage and neat, double, white flowers; is well adapted for bedding or carpet work.
Price, 50c. each; \$4.50 per dozen.

ANTHURIUM SCHERZERIANUM.

One of the most beautiful and striking plants of recent introduction, producing large, brilliant scarlet, banner-like flowers at all seasons, each flower remaining in bloom two or three months. This beautiful plant should be in every collection.
Price, \$2 to \$5 each.

ANTHURIUM CRYSTALLINUM.

This is a great novelty, having large foliage in the way of *A. magnifica*. The leaves are dark green, and the upper surface of each is distinctly and beautifully marked with broad silvery lines, rendering it very striking and showy.
Price, \$3 to \$5 each.

AQUILEGIA CHRYSANTHA.

A new hardy and showy variety of the Aquilegia, with pale-yellow flowers; grows three feet high, blooming freely and profusely all summer. It is a decided acquisition.
Price, 75c. each; \$7.50 per dozen.

ARECA LUTESCENS.

A beautiful Palm, adapted to greenhouse culture and the decoration of the garden in summer. Its habit is very graceful, with long pinnate leaves, and the stem and petioles are of a clear bright yellow. Price, \$5 each.

NEW PALM, BRAHEA FILAMENTOSA.

This is a new and very handsome Palm, from Lower California, something in the way of the *Chamærops*. The leaves, which are large and fan-shaped, are of a bright green, beautifully plaited, and the edges of all the pinnate divisions are covered with very slender, white, thread-like filaments six inches long. It will be admirably adapted for planting out in summer, being of rapid growth.
Young Plants, \$3 each; \$24 per dozen.

CROTON WEISMANNI.

A very distinct and beautiful-foliated plant, with long, narrow leaves, striped and mottled with gold of the brightest possible hue. It is of very graceful habit, of free growth, the leaves attaining the length of ten or twelve inches and about three quarters of an inch wide; leaves deep, shining green, with gold blotches, the midrib and margins golden-yellow.
Price, \$3 each.

CROTON MAXIMUM.

A most effective variety, forming a magnificent object when well grown; the habit is robust and the foliage large, upwards of twelve inches long and four broad; ground color rich golden-yellow, with irregular-shaped blotches and bands of deep, glossy green.
Price, \$2 each.

CROTON UNDULATUM.

One of the most showy and ornamental kinds. The leaves are nearly yellow in their early stage, gradually becoming more deeply colored, and when mature are deep bright green, profusely mottled and blotched with bright crimson, and the edges are beautifully waved.
Price, \$3 each.

CROTON VEITCHII.

The leaves of this fine variety are upwards of a foot long and about two and a half inches broad; in a young state, they are beautifully mottled with creamy yellow on a dark-green ground, changing with age to reddish-purple.

Price, \$3 each.

NEW VARIEGATED-LEAVED CAMELLIA (C. FOL. VARIEGATA).

A new and very beautiful variety, with the foliage all blotched and spotted with white; highly ornamental.

Price, \$2 each.

CAMELLIA, MRS. ANNE MARIE HOVEY.

This lovely Camellia surpasses in every quality all other varieties yet produced. In the shape and symmetry of the flower, and in the form, substance, and perfection of petal, it has no equal; but its most remarkable character is its peculiar and distinct quality of producing flowers of MANY DIFFERENT COLORS on the same plant. The prevailing color is a clear waxy white, delicately pencilled with crimson; but often a great number are of the darkest and richest carmine. Some are of the deepest shade of blush; others, blush striped with carmine; some are white, tinted with rose, others white, stained or marbled with carmine; some are half white and half deep rose; and occasionally some are pure white. In fact, entirely new and beautiful combinations of these tints are constantly produced. Every flower remains in perfection a week or more. It begins to bloom in January and continues in blossom till May. The habit of the plant is erect and symmetrical, the leaves medium size, deep green, and it flowers as abundantly and as freely as the old Double White.

Young plants are now offered for sale at \$5 each. Large plants, \$10 to \$25 each.

VARIEGATED-LEAVED CANNA.

This is a new and very distinct variety. It is a hybrid from *C. tricolor* raised by us in 1873, and very much superior to that variety. The leaves are distinctly and profusely striped with yellow and pink. It is dwarf in habit, and a fine acquisition.

Price, \$1 each.

COCOS WEDDELIANA.

One of the most graceful and beautiful of all the smaller Palms. It has a slender, erect stem, furnished with long, arching, finely pinnate leaves, of the richest green color.

Price on application.

CLEMATIS JEANNE D'ARC.

A superb new variety, with very large, pure white flowers.

Price, \$1.50 each.

CLEMATIS LUCIE LEMOINE.

Another magnificent kind, with large, double, white flowers of good form, blooming profusely all summer.

Price, \$2 each.

CUPHEA HYSSOPIFOLIA.

A quite rare though not new species of the Cuphea, but so distinct from other sorts as to have more the appearance of a heath. It is very dwarf and compact in habit, with small, glossy green, heath-like foliage, and the flowers, which are bright lilac, appear all along the slender stems in great profusion and throughout the entire year. It is a very unique and pretty plant.

Price, 30c. each; \$3 per dozen.

NEW SEEDLING CEREUS OR CACTUS.

The following are superb varieties of the Cereus raised by us, and of the most remarkable beauty. They are of dwarf, compact habit, free from spines, and flow-

ering in the greatest profusion, with blossoms ten to twelve inches in diameter. Many of the colors are entirely new, being mauve, pink, salmon, or orange, shaded or tinted with the richest violet.

Exquisite. Flowers very large, ten inches in diameter; color, clear orange-salmon, with pale violet tint; very distinct.

Mauve Beauty. Flowers very large, ten inches in diameter; clear mauve color, deeply tinged with violet; petals very broad, and style two and a half inches long.

Orange Gem. Flowers very large, ten inches diameter; color, clear, deep orange, tinted with violet at the base of the petals.

Pink Queen. Flowers very large, beautiful mauve-pink.

Refulgens. Flowers large; dark scarlet, with very deep violet shading at base of petals.

Superbum. Flowers very large; salmon, tinted with violet-magenta; very large, broad petals.

Price, \$1.50 each; \$7 for the set of six.

NEW GREEN-FLOWERED DAHLIA. D. VIRIDIFLORA.

A new, curious, and very handsome Lilliputian or Pomponne Dahlia, of dwarf habit, with perfect shaped blooms; of a clear, deep, shining green; remaining in perfection a long time. It is a really novel and fine acquisition.

Price, \$1 each; \$9 per dozen.

DRACÆNA AMABILIS.

A magnificent and extremely distinct variety. The ground color of the leaf is light, glossy green, becoming beautifully marked and suffused with pink and creamy white, the young leaves being occasionally of quite a rosy shade. Of robust growth, with leaves twenty-four to thirty inches long and four or five inches wide.

Price, \$3 to \$5 each.

DRACÆNA IMPERIALIS.

A distinct, robust-growing, and superb variety, with leaves eighteen to twenty-four inches long and three or four wide. Ground color dark green, which is much suffused with bright red over the whole of the older leaves and shading to light pink on the young foliage. The whole plant has a peculiar metallic gloss.

Price, \$3 to \$5 each.

DRACÆNA MOOREANA.

A magnificent novelty, with leaves two to three feet long and four inches wide, and very graceful habit. Color light, reddish crimson, changing to a glossy bronze. The color is particularly striking, and forms a grand decorative plant.

Price, \$3 each.

DRACÆNA PORPHYROPHYLLA.

Of noble habit, having bold, erect, broadly-oblong leaves, which are of a fine, deep-bronzy hue, and remarkable for the contrast presented by the glaucous hue of the under surface.

Price, \$3 to \$5 each.

DRACÆNA SHEPHERDI.

One of the finest in cultivation. It is free-growing, of ample proportions, with leaves two feet long and five inches broad, arranged in a distinctly spiral manner. Young leaves pale green, with paler green stripes, which, as they grow older, change to a bronzy, orange hue, a shade distinct and unlike any other variety.

Price, \$3 to \$5 each.

DRACÆNA YOUNGI.

A bold, robust, spreading, and fine kind. Older leaves of a glossy, copper color, whilst the younger ones are of a beautiful light green, suffused with a rosy tinge, and all are frequently striped with dark red.

Price, \$3 to \$5 each.

DRACÆNA HENDERSONI.

One of the most distinct and novel of all the *Dracænas*, with striped leaves from one and a half to two feet in length and four to five inches in width; color a light green, beautifully striped and marbled with white and rosy pink.

Price, \$5 each.

DRACÆNA GUILFOYLI.

A superb species, with long, pendent, lanceolate acuminate leaves; ground color bright green, but one half of the leaf is striped with white and bright, rosy red.

Price, \$2 each.

DRACÆNA REGINA.

A magnificent variety, with large, handsome, deep-green leaves, each leaf, as the plant attains age, being distinctly edged with pure white.

Price, \$2 each.

DRACÆNA ALBICANS.

A fine variety, with long, narrow-pointed leaves, bright green, with a pale green or whitish border.

Price, \$2 each.

DRACÆNA MACLEAYI.

A dwarf, robust-growing variety, with rather broad, bronzy, dark-brown leaves, covered with a metallic lustre.

Price, \$2 each.

DIEFFENBACHIA BAUSEI.

The finest of all the *Dieffenbachias*. A stocky-growing, broad-leaved variety, of dwarf habit, with leaves of a yellowish green, irregularly edged and blotched with dark green, and also spotted with white. A striking and distinct hybrid.

Price, \$2 each.

ECHEVERIA AGAVOIDES.

We are highly gratified in being able to offer a few plants of this very rare and beautiful species, so difficult to procure. It is, without doubt, one of the most unique and symmetrical-growing plants. It has somewhat the aspect of a small *Agave*, forming, as it does, a rosette of short, compact, fleshy, grayish-green, sharply-pointed leaves, imbricated from circumference to centre.

Price, \$2 to \$5 each.

ECHEVERIA FARINOSA.

A very distinct and fine variety of this interesting class, from California. The leaves are long and pointed, with a dense, mealy surface, which gives the plant a perfectly silvery hue.

Price, 50c. each; \$4.50 per dozen.

ECHEVERIA MEXICANA, OR ROSACÆA.

A new and fine variety, somewhat in the style of *E. secunda glauca*, but far superior in every way, forming a perfect rosette of a beautiful, pale-bluish color. This variety will supersede all others for edging purposes.

50c. each; \$4.50 per dozen; small plants, \$20 per 100.

EUONYMUS LATIFOLIUS ELEGANTISSIMUS.

The most distinct of this group; of compact habit, with green and gold leaves, which retain their variegation. A fine acquisition.

Price, \$1 each; \$9 per dozen.

EUONYMUS FLAVESCENS.

This is a new variety, with leaves of a deep chrome-yellow, and of dense and compact habit; its bright leaves are very conspicuous, and it is one of the most desirable of golden-leaved evergreens for the garden or greenhouse, or for baskets.

Price, 50c. each; \$4.50 per dozen.

EULALIA JAPONICA VARIEGATA.

A new, distinct, and very ornamental grass, of easy culture, and said to be hardy. The leaves are long and narrow and striped white and green. The flower stem is from four to six feet high, and is terminated with a cluster of flowers, the flowers being arranged in separate stems, but forming a large head or panicle of blossoms, which, from their silky texture, has a beautiful, feathery appearance, and when cut retain their beauty a long period.

Price, \$1 each.

FICUS PARCELLI.

A very grand addition to our variegated plants, from Brazil. The leaves are as large as *Ficus Elastica*, but thinner in texture and serrated on the edge. They are bright green, irregularly and profusely blotched with creamy white and dark green, which retain their variegation throughout.

Price, \$3 each.

FICUS BONNETI.

A magnificent novelty, with very large, cordiform-shaped leaves, of a beautiful, deep, shining green. The growth is very rapid, young plants attaining the height of three or four feet in a year. It is admirably adapted for sub-tropical gardening, and is a decided acquisition.

Price, \$2 each.

NEW FUCHSIA, SUNRAY.

One of the most beautiful plants recently introduced, almost disputing the palm with the golden Tricolor Geraniums, the leaves, which are very large, being of a bright crimson and bronzy-green, broadly edged with white. It is of free growth and fine habit, and will form a superb object for the greenhouse or garden.

Price, 40c. each; \$4 per dozen.

GEONOMA PUMILA.

An elegant Palm, of dwarf growth, and admirably adapted to small collections or for dinner-table decoration.

Price, \$5 each.

HIBISCUS ALBO VARIEGATUS.

A beautiful, variegated-leaved klud, similar in growth and habit to *H. Cooperi*, with this difference, that its ovate leaves are finely mottled and variegated with white. The flowers are large, pale, rosy red, with a crimson blotch at the base.

Price, \$1.50 each.

HIBISCUS PUNICEUS FULGIDUS.

A new and magnificent variety, remarkable for the size, color, and marking of its brilliant flowers; flowers very large, five inches in diameter, of an intense crimson scarlet, with a large, oblong blotch of deep crimson at the base of each petal, forming a star in the centre of each flower. One of the finest varieties yet introduced.

Price, \$1 each.

HIBISCUS JAUNE D'OR.

A brilliant, golden-yellow variety, with very large, double flowers.
Price, \$1 each.

IBERIS GIBALTARICA.

A very robust-growing species of the Candytuft, producing trusses of flowers fully two inches broad, and blooming freely and abundantly all winter. We have found it very valuable for winter bouquets.

Price, 50c. each; \$4.50 per dozen.

IXORA COLEI.

A fine, free-flowering variety, of compact habit; flowers pure white, produced abundantly in very large, dense, globose, terminal corymbs.

Price, \$1.50 each.

IXORA, PRINCE OF ORANGE.

A distinct and beautiful variety, of a free, compact habit, with rich, orange-red flowers, tinged with violet towards the centre, and produced in large, dense, terminal corymbs.

Price, \$1.50 each.

IXORA WILLIAMSII.

A superb hybrid. It is a free-growing plant and an abundant bloomer, producing immense trusses of large flowers, of a very distinct and handsome shade of reddish salmon. One of the best in cultivation.

Price, \$2 each.

KENTIA FORSTERIANA.

A graceful Palm, with finely-divided and elegantly-arranged leaves, of a beautiful, dark-green color; of dwarf habit, robust, and free-growing.

Price, \$5 each.

LAPAGERIA ROSEA.

Nothing can exceed the beauty of this most charming of all the climbing greenhouse plants. It has slender, twining stems, enriched with small, glossy, evergreen foliage, which produce in great abundance very large, brilliant, deep-carmine crimson, bell-shaped flowers, four inches long, more or less spotted on the inside; the flowers remain in perfection two or three weeks, and it blooms the greater part of the year. It is admirably adapted to conservatory culture, flourishing best in a cool temperature and partial shade in summer, its slender stems and small foliage, when trained over the roof, in no way injuring the plants beneath; grown in pots on a balloon trellis, it is a superb plant.

Price, \$2, \$3, and \$5 each.

LAPAGERIA ALBA.

A variety with pure white flowers, equal in size and beauty to the well-known *L. rosea*, and produced in the same profusion; similar in habit, and requires the same treatment. A superb plant. Price, on application.

LOBELIA PUMILA GRANDIFLORA FLORE PLENO.

This is one of the greatest novelties of last year. With the habit of the other *Lobellias*, it produces a profusion of beautiful, light-blue flowers, full and very double, throughout the summer.

Price, 30c. each; \$3.00 per dozen.

NEW LANTANAS.

America. This and the following are two seedlings selected from a large number, and remarkable for their brilliant colors; flowers bright orange, with yellow centre, changing to rosy crimson.

Aurora. Compact, dwarfish habit and a profuse bloomer; color deep, reddish orange, with small, clear, yellow eye, changing to purplish crimson; very brilliant. Price, 50c. each; \$4.50 per dozen.

MENTHA CORSICA FOL. VARIEGATA.

A new, variegated mint, which we think will prove one of the most beautiful of dwarf, variegated plants for edgings or borders. The leaves have the most distinct marking of silver and white of any plant we have seen.

Price, 75c. each.

MESEMBRYANTHEMUM CORDIFOLIUM VARIEGATUM.

One of the most admired and beautiful of variegated foliaged plants for summer bedding. The growth is dwarf, compact, and dense, and the fleshy, heart-shaped leaves are distinctly margined with creamy-white, forming a complete carpet of soft, silvery foliage which covers the entire surface of the ground.

Price, 30c. each; \$3 per dozen; \$20 per 100.

MIKANIA VIOLACEA.

A rare plant of great beauty, having very distinct foliage, deeply and finely cut, of a rich velvety-green, the stems and under side of the leaves of a violet-purple. It is a rapid and free grower, like the well-known German Ivy. Beautiful for baskets.

Price, 50c. each; \$4.50 per dozen.

PANDANUS VEITCHII.

One of the most beautiful plants ever introduced by Messrs. Veitch, and far superior for exhibition or decoration to any other Pandanus. The leaves are light green, beautifully striped with broad bands and lines of pure white, and are gracefully recurved, forming an elegant specimen.

Price, \$5 each.

PAPYRUS ANTIQUORUM.

A very handsome, rush-like looking plant, growing 6 to 8 feet high, throwing up long stems, terminated by a tuft of slender, drooping branchlets, tipped with small, greenish flowers. For the lawn, as a single specimen, it produces a grand effect.

Price, \$1.00 each.

PAULLINIA THALICTRIFOLIA.

A lovely, half-climbing plant, of slender growth, producing very freely its beautifully cut leaves, which resemble the fronds of the Maiden Hair Fern; old leaves bright green, the young shoots and foliage being of a beautiful, rosy tint.

Price, \$3 each.

PHORMIUM ATRCPURPUREUM.

A very distinct kind, of the habit of *P. tenax*, but with leaves of a beautiful, reddish purple.

Price, \$10 each.

PHORMIUM COLENZOI VARIEGATUM.

A beautiful variegated species, of smaller growth and more graceful habit than *P. tenax*, with its foliage uniformly margined with a creamy-white border.

Price, \$5 to \$10 each.

PHORMIUM TENAX VARIEGATUM.

A vigorous and robust-growing form of *P. tenax*, with very long and broad leaves of a dark-green color, distinctly marked with broad stripes of yellow, more than half the leaf being of the latter color.

Price, \$10 each.

PHORMIUM TENAX VEITCHII VARIEGATUM.

This is a highly ornamental and noble plant. The leaves are three feet long and two inches wide, of a light glaucous green, with broad, clear, white stripes throughout their entire length. For either conservatory or garden decoration, or as an exhibition plant, it is one of the finest introduced.

Price, \$5 each.

PHILODENDRON PINNATIFIDUM.

A half-climbing variety, with very large, showy, deep-green foliage and highly ornamental, suitable for the store or conservatory.

Price, \$3 each.

NEW TREE-PÆONY, "GLORIA BELGARIUM."

This new variety is the most remarkable of all the great number of kinds that have been produced since the introduction of the Pæony from China. It was raised by M. Gœthals, an amateur cultivator of Ghent, more than forty years ago; flowered for the first time in 1838, and was so highly prized by the raiser that he would not part with a plant, although offered almost fabulous sums. He retained it in his own garden until his death, a few years ago, when the plants were sold, and the variety introduced to cultivation. It has been the wonder of the Belgian florists, and styled the "Colossal Queen" of Tree-Pæonies. The flowers attain the enormous size of forty to forty-five inches in circumference, perfectly double to the very centre, and combining all the tints of red, crimson, cherry, and soft rose; it is also highly fragrant. This variety flowered in our collection last year; and no description, or even colored plate, can do justice to the truly wonderful beauty of its magnificent blossoms; only a very few plants are offered for sale.

Price, \$8 each.

PTYCHOSPERMA ALEXANDRÆ.

A beautiful Palm, similar to *Seaforthia elegans*, of vigorous and rapid growth and adapted to greenhouse or conservatory culture.

Price, \$5 each.

PLATYCERIUM ALCICORNE MAJUS.

A large-foliaged and free-growing form of the old Stag's Horn Fern, but far surpassing that kind in beauty and habit. Fine for baskets.

Price, \$5 each.

PYLOGENE SUAVIS.

This is a very beautiful twining plant, with the habit of the German Ivy, and leaves similar in shape though not so large. It grows with great rapidity, and is well adapted for covering trellises, arbors, or rustic work. The flowers are small, white, and fragrant.

Price, 50c. each; \$4.50 per dozen.

RUDGEA MACROCEPHALA.

A fine plant, with large, broad, thick, deep-green leaves, producing terminal, globular heads of pure white flowers, similar to the orange-blossom.

Price, \$3 each.

RETINOSPORA LYCOPODIOIDES.

A very handsome Japan evergreen, with a dense habit of very dark-green color; distinct and beautiful. Believed to be quite hardy.

Price, \$1 each.

RONDELETIA BRILLIANTISSIMA.

This is a fine variety, as free in growth as *R. speciosa*, but a much freer bloomer. The flowers are rich scarlet, with golden-yellow centres, produced in large trusses.

Price, \$1.50 each.

NEW TEA ROSE, DUCHESS OF EDINBURGH.

A beautiful Rose, entirely new and distinct in color, being the first deep-crimson Tea Rose yet raised. It is a vigorous and free-growing variety, with flowers almost as dark as *Gen. Jacqueminot*; of fine form and very fragrant. Beautiful in bud, full, double, and the greatest acquisition to any collection.

Price, \$1.50 each.

NEW TEA ROSE, CHESHUNT HYBRID.

A hybrid between the Tea and Hybrid Perpetuals, of very vigorous habit, and flowers of a pure, deep carmine; large, very double, and a superb rose with the delicate tea odor.

Price, \$1 each; \$9 per dozen.

SACCHARUM OFFICINALE PURPUREA.

This is a purple-leaved variety of the common Sugar Cane, something in the style of the Pampas grass, growing five or six feet high, with slender, grass-like leaves of a light purplish color, distinct and very ornamental.

Price, \$1.50 each.

SANCHEZIA GLAUCOPHYLLA.

A bold and conspicuous variety, in the style of *S. nobilis*, but the foliage is much more deeply variegated, with wide, golden stripes.

Price, 75c. each.

SARRACENIA DRUMMONDI.

A fine species of the Pitcher Plant, so called, the pitchers growing two to three feet high, of a bright-green color, the lid and throat of the pitcher being streaked with crimson.

Price, \$3 each.

SENECIO MACROGLOSSUS.

A novelty in the style of the German Ivy, with thick, fleshy leaves of a dark, metallic green, veined with silvery gray, resembling in texture the real Ivy. It is a vigorous climbing plant, producing large, golden-yellow blossoms.

Price, 50c. each; \$4.50 per dozen.

SEMPERVIVUM TABULÆFORME.

A curious and handsome species, each leaf being laid over the other so closely as to form a perfectly flat surface, like an inverted plate. One of the rarest and most desirable plants.

Price, \$1.50 each.

SPIRÆA PALMATA.

One of the very finest of this tribe; of recent introduction from Japan, where it was discovered by Mr. Fortune; certainly one of the most beautiful hardy plants, the deep purple-red of the stems and branches passing into the crimson-purple of the glorious, broad corymbs of flowers.

Price, \$1.50 each.

SCIADOPITYS VERTICILLATA.

A new and beautiful coniferous plant from Japan, which has proved entirely hardy at Mr. Hunnewell's, at Wellesley. Our large plant, imported some eight or ten years ago, is one of the finest specimens in the country. It is entirely distinct from other evergreens. Price, for small plants, \$2 each.

NEW DOUBLE CHINESE WISTARIA.

The Chinese Wistaria is well known, and universally acknowledged to be the most beautiful of all our hardy climbing shrubs, growing with great rapidity, and its long shoots covered in early spring with an immense number of long, pendulous racemes or bunches of beautiful, pale-bluish flowers. This new double variety is similar in all respects, except that its flowers are perfectly double, which gives the cluster a more compact appearance and presents a greater mass of bloom. It is one of the finest acquisitions from Japan.

Price, \$3 each; \$25 per dozen.

Clerodendron fragrans, fl. pl., very fragrant. 75c. each.

CLEMATIS.

The great number of new varieties recently introduced, comprising new shades of color as well as flowers of immense size, have added greatly to the merits of the Clematis as an ornamental plant either for the garden or conservatory. Most of them are quite hardy, and all bloom freely in the open air, some in the early part of summer, and others all the autumn. They should be but slightly pruned, as the flowers are produced on the old wood.

LILIPUTIAN ZONAL GERANIUMS.

This is a new and highly interesting form of the Zonal class, originated by an eminent cultivator in Saxony, and recently introduced into England. The growth is distinct from the ordinary dwarf kinds, but is proportionally vigorous, while the foliage is small, and the flowers equal in size to the Zonal kinds of large growth. Their compact habit and neat style of growth will render them universal favorites, particularly for vases and pot culture.

SHOW AND SPOTTED PELARGONIUMS.

The Pelargonium is made a specialty of culture, and all the new and choice varieties originated by the English and French florists are added to our collection. The recent new kinds are very great improvements upon the Pelargoniums of former years, and they are now justly considered to be among the most attractive and beautiful of greenhouse plants, — easily grown, flowering profusely, and presenting in their varied as well as exquisite tinting, spotting, and pencilling, an array of beauty almost unsurpassed.

COLEUS.

The introduction of the Coleus as a decorative plant has changed the aspect of our gardens. By their grand masses of crimson, bronze, and gold, or green foliage, effects are produced which no array of the gaudiest flowers accomplish. For planting in detached groups, or for forming ribbon lines, they are unequalled. Our warm summers are just suited to them; and their growth is so rapid that, in a few weeks, they form a mass of magnificent foliage. Heretofore we have been mostly indebted to foreign cultivators for new varieties, but new seedlings of our own growth are among the most distinct and beautiful. The following comprise a varied and splendid collection:—

- Albert Victor**, centre purplish red, with broad yellow margin.
Baroness Rothschild, rich, bronzy-crimson centre, fringed, yellow edged.
Butterfly, rich, velvety crimson, with deeply-fringed golden margin.
Beauty of Widmore, light green, chocolate centre and pink zone.

Duke of Edinburgh, light crimson, with yellow border.
Fascination, dark crimson, velvet centre, with beaded border of yellow.
Golden Robin, golden yellow, with distinct black spot in centre of leaf.
Golden Beauty, light reddish-crimson, with broad yellow border.
Hollandii, centre crimson-maroon, pale yellow fringed edge.
Lady Burrill, or Shah, lower half of leaf rich crimson, upper half deep golden-yellow; very striking.
Nellie Grant, light crimson centre, deep yellow edge; distinct.
Little Miss Muffit, yellow and crimson; very dwarf, beautiful.
Princess Royal, crimson centre, bright, yellow edge.
Queen Victoria, deep reddish crimson, golden edge.
Ring of Gold, crimson leaves, deeply edged and tipped with gold.
Setting Sun, bronze, crimson centre, bright yellow edge.
Sunlight, light crimson, with deeply-frilled yellow edge.
Souvenir, light reddish centre, with double-beaded yellow border.
Yellow-Bird, clear yellow, exquisitely veined with crimson.

CANNAS.

A group of plants of a grand and tropical aspect, of tall and stately growth, with broad and massive foliage, and covered with bright scarlet, crimson, orange, or yellow flowers. The foliage also comprises the varied tints of light and pale green, and brown and chocolate, which contrast pleasingly, and add to the effectiveness and display of groups. Several of them are also admirable for pot-culture in large conservatories, where their rich foliage is scarcely less showy than the *Dracenas* and other rare plants much more difficult to cultivate. The following comprise several of the most distinct and beautiful varieties:—

CANNAS.

- Annei**, large, long, sea-green leaves, of very tall and vigorous growth.
Annei rosa, tall, free-growing; orange flowers.
Aurea perfecta.
Aurea fulgida.
Bihorelli, stem and foliage dark, with very large scarlet flowers. \$1.
Bonneti major, broad leaves, suffused with brown; bright red flowers.
Bonneti, bronze-green leaves.
Discolor, dark-veined stem and leaf margin.

- Gigantea**, very long massive leaves, ribbed with purple.
Glauca, silvery foliage, scarlet and yellow flowers.
Gabouensis.

TRITONIA AUREA.

A very showy bulb, growing about two feet high, with long, narrow leaves and spikes of glowing, orange-colored blossoms, forming a fine bed.
 Price 30c. each; \$3.00 per dozen.

DOUBLE TUBEROSES.

These are beautiful, pure white, delightfully-scented flowers, produced in long spikes of thirty or forty blossoms, on tall stems about three feet high, and flowering nearly all summer. The bulbs should be planted in pots or boxes and placed in a gentle heat, where they will soon begin to grow, and in May should be repotted and plunged in the border, or planted out in the open ground. Bulbs well started in pots, 25c. each; \$2.50 per dozen.

JAPAN LILIES.

These superb flowers are usually planted in the autumn, but we generally keep a full supply for spring planting. The bulbs keep sound and fresh and bloom freely. Our autumn catalogue of bulbs enumerates all the fine kinds in cultivation. The following are recommended for planting at this season, the others in the autumn only.

		Per doz.
Lilium auratum , the magnificent Golden Lily50	\$5.00
Lilium lancifolium album , pure white; beautiful50	5.00
rubrum , white, with crimson spots25	2.50

Melpomene , blood-crimson, edged with white. This is much the finest of all the lilies	1.00	

VALLOTA PURPUREA.

One of the most beautiful and desirable of summer-flowering bulbs, producing through the months of August and September clusters of six or eight large, very showy, brilliant scarlet flowers, growing on stems about a foot high; cultivated in pots or in beds. Price, 75c. each; \$7.50 per dozen.

GLADIOLUS.

One of the finest collections, embracing all the choice varieties of Souchet, the names and descriptions of which will be found in our seed catalogue. We have also a collection of seedlings, raised by an amateur, which quite equal many of the

fine named sorts. They have been awarded the highest prize by the Massachusetts Horticultural Society. These we are enabled to offer at very reasonable rates. For planting for masses of color they are unequalled.

Price, 15c. each; \$1 per dozen; \$5 per hundred; \$40 per thousand.

ROSES.

Our plants are upon their own roots, and are mostly grown in pots for the better convenience for transporting at any season and the certainty of their growth. It is well known that roses transplanted from the open ground often fail to grow; and of those that succeed, scarcely any of them bloom the first season. Those from pots take root at once, and flower abundantly. Purchasers leaving the selection to us will get a fine assortment of varieties, and generally better plants.

To obtain a fine display of roses, the soil should be well enriched with old manure, covering the ground in autumn four inches deep. If the season is dry, give them plenty of water, and occasionally liquid manure.

BON SILENE.

This old variety, which will be found enumerated in our catalogue twenty years ago, is now considered the best Rose for winter-blooming, and is extensively cultivated around Boston for bouquets. The color of the flower-buds, just before they open, is very bright and fresh, and it grows and blossoms very freely.

Price, 50c. each; \$4.50 per dozen; \$20 per hundred.

CLIMBING DEVONIENSIS.

This is one of the most exquisite Roses. The flowers are large, quite double, and of a fine creamy white, slightly tinted with blush. The growth is remarkably vigorous, making annual shoots ten feet long, which are loaded with its beautiful blossoms.

Price, 50c. to \$2 each; \$4.50 to \$8 per dozen.

MARSHAL NIEL.

No yellow Rose yet produced equals Marshal Niel. The flowers are of the largest size, highly fragrant, and of the richest and deepest golden-yellow, the flowers remaining in perfection several days. It is a vigorous grower, like the Lamarque, and a plant with several hundred blossoms is one of the finest objects among flowers.

Price, 50c. to \$2 each; \$4.50 to \$15 per dozen.

Madame de Longchamps, blush.
Solitaire, large; sulphur-yellow.

Strong plants, \$1 each; \$8 per dozen.

HYBRID PERPETUAL ROSES.

The name would indicate that they are perpetual bloomers, but this is uncertain. They flower with the June Roses, in great perfection, but the succeeding bloom is very limited; if the autumn is fine quite a number of blooms open; but in the average of years only a very few scattering flowers appear after June. Still they are magnificent roses, and many of the new varieties are unsurpassed in depth and brilliancy of their color.

Aurora du Matin, fine aurora-color.
Alice Durieu, globular; bright rose.
Alphonse Fontaine, bright cherry.
Auguste Mie, light, glossy pink.
Baron Prevost, rich pink.

GREENHOUSE AND HOTHOUSE PLANTS.

ACHIMENES.

Our collection of these beautiful, summer-flowering plants comprises upwards of twenty-four varieties. For the ornamentation of the greenhouse, throughout the whole summer, they are among the most desirable plants. The following are some of the new varieties of recent addition.

Cocconeum Pygmæa.	Longiflora Henderson.
Dazzle, bright scarlet.	Longiflora Macrantha.
Fairy Queen.	Longiflora Rosea.
Grandiflora Caspar Schinz.	Skinneri.
Grandiflora François Cardisraux.	Vivicans.
Grandiflora Louis Van Houtte.	Violacea plena.

Price, 50c. each; \$3 per dozen.

AGAVES AND YUCCAS.

The Agaves and Yuccas are specialties of culture, and our collection, embracing over fifty species, is unsurpassed in this country, the first prize of the Massachusetts Horticultural Society having been awarded to us in 1873 and 1874. Many of them are yet so rare and scarce that we have but few plants for sale, but we invite amateurs to examine them. No plants are more decorative or more effective than these: and for the conservatory in winter, or lawn and garden in summer, they are highly ornamental as well as tropical in aspect. We possess many fine, large specimens of the older kinds, the prices of which will be given on application.

CACTUS, CEREUS, ETC.

The Cacti tribe are both curious and beautiful plants; and those with showy flowers, when well grown, are magnificent ornaments of the greenhouse, and deserve a more prominent place than has heretofore been given them. Some few are only desirable for their novel form of growth, but the greater part of those we offer are superb flowering kinds, more especially our seedlings, which are unequalled in size and color.

Cereus coccinea, scarlet.
crenata, large; white.
cærulescens, white.

Larger plants, \$12, \$18, and \$24 per dozen.

CALADIUMS.

A magnificent collection of these most beautiful of all the ornamental-folliaged plants for the decoration of the conservatory or greenhouse in summer, with large-sized leaves, spotted, blotched, marbled, speckled, or flecked with white or crimson on a green ground. They are of the easiest culture, simply potting them in small pots, in a sandy, peaty soil, and starting them in a warm bed; afterwards putting

them in larger pots, and watering freely. When the foliage begins to fade, dry them off, and keep them in a warm situation till March, when they may be repotted, and treated as before. The following embrace some of the newest and finest varieties:—

- Adolph Adam**, densely speckled with white and rose spots.
Alfred Bleu, pure white spots and pink centre.
Auber, densely marked with white and pink spots.
Auguste Reviere, with white centre and bright crimson spots.
Argyrites, dwarf, dotted all over with white.
Baron de Rothschild, blood-red centre and spots on mottled green.
Beethoven, white, veined with green, centre rose; beautiful.
Brongniarti, large; dark crimson centre.
Bicolor, nearly covered with deep red.
Baraquinf, dark green, with very large crimson centre.
Chantini, superb; spotted with crimson.
Charles Verdier, spotted with pale rose.
Belleymer, nearly covered with white spots.
Boisduval, crimson centre, with snow-white blotches.
De Candolle, rich green, with rose-colored spots and creamy white centre.
Devosianum, dotted and flecked with pure white.
Devinck, delicate pink centre, ribs interspersed with white spots.
Dr. Lindley, crimson centre, the green ground marked with rose.
Duchatre, white, flushed with rose, green veins and spots.
Enckel, spotted with white.
Ed. Moreaux, crimson spots and rich, red centre.
E. G. Henderson, flecked with rosy spots.
Hastatum, pale, with white spots.
Houletii, thickly spotted with white.
Halevy, white spot and crimson blotches.
Isidore Leroy, metallic green, and crimson spots.
Keteleeri, thickly spotted with crimson.
Lamartine, deep crimson centre and dense white spots.
Marmoratum, spotted with white.
Mars, large; crimson centre.
Mad. Andrieu, flecked with rosy spots.
Mad. Houlet, pink and white spotted.
Meyerbeer, white leaf-ground, with green veins and red midribs; fine.
Napoleon III, crimson centre and carmine spots on rich green ground.
Mozart, delicate rose centre and veins on green ground.
Prince Albert Edward, emerald green, with rich crimson midrib, radiating to the edges and densely spotted with white. \$1.
Picturatum, red centre; long, narrow leaves.
Pictum, very conspicuous; large white spots.
Reine Victoria, white, green veins and crimson spots; very fine.
Regale, dark green, with silvery spots.
Rossini, pale centre, pink midribs, and red blotches.
Raulinii, crimson nerves and white spots.
Triomphe de l'Exposition, crimson centre, with red ribs and green border.
Wightii, white and pink blotches.

Price, 50c. to \$1 each; \$4 to \$10 per dozen.

GLOXINIAS.

Gloxinias are a beautiful group of plants, with large, foxglove-shaped flowers of an infinite variety of tints, and produced in great profusion from the base of a deep, rich-green, velvety foliage. They flower all the summer, and are the finest ornaments of the greenhouse from June to September.

Fine named varieties, 50c. to \$1 each.

Extra fine seedlings, beautiful colors, 25 to 50c. each; \$3 to \$4 per dozen.

NÆGELIAS.

The Nægellas are superb plants, flowering from August to November, and invaluable for the decoration of the greenhouse at that season. The foliage is rich, velvety, and variously colored, and the plants produce a profusion of magnificent flowers on tall spikes, among which "not a single color of the rainbow fails to find its representative." The following are some of the newest varieties raised by M. Van Houtte, who has been devoted to the improvement of this flower:—

- Chromatella**, flowers open, yellow, lightly shaded towards the interior.
Cinnabarina rosea, vermilion, marbled with scarlet and speckled with gold.
Dauw, magnificent floral spike, formed of innumerable rows of flowers; white, sprinkled with rose, a golden throat with dots of vermilion.
Donderstraal, spikes erect, very beautiful; flowers deep carmine, throat golden-yellow, spotted with cochineal.
Droom, splendid floral pyramid; flowers flesh color, marked with chrome-yellow.
Geroldtiana, flowers red on the outside, yellow inside, mottled.
Morgenlicht, superb foliage, with spikes of pure, golden-yellow flowers.
Nachtegaal, flowers carnation color, with flesh-colored spots on white ground.
Zonnedaal, flowers distinctly and beautifully blotched with chamois.

Price, 50c. each; the set of ten for \$3.

ERICAS OR HEATHS.

PALMS, PANDANADS, ETC.

The Palms are among the noblest of decorative plants, and are invaluable for ornamenting the garden in summer or the conservatory in winter. They are easily cultivated and require but little attention, and many of them flourish well if wintered in the greenhouse. Their stately form, ample foliage, and tropical aspect render them especially attractive and desirable in every collection.

ORCHIDS.

These lovely plants are yet but little cultivated, undoubtedly, in a great degree, from the general impression that they are difficult to manage, requiring special care and a house expressly for them. Nothing is more erroneous. Many of the most beautiful kinds are no more difficult to grow than ordinary hothouse plants, and some of them flourish in a warm greenhouse. With proper care in watering, and potting them at the right time, they can be successfully grown by all who are familiar with good cultivation. A few experiments with some of the cheaper kinds will show that all the supposed difficulties of treatment will soon disappear, and a rich show of blossoms amply repay all extra care and attention.

VARIEGATED IVIES.

The Ivies are all admirable plants for the conservatory or parlor, growing freely in the shade or the temperature of the house. The variegated kinds are very handsome, many of them having deep-green foliage, mottled and spotted with silver or gold. For suspended baskets or rustic vases they are almost indispensable. The following are a few of the best:—

- Aurea densa*, leaves netted and margined with gold; growth very compact.
- Aurea maculata*, leaves large, spotted, blotched, and clouded with gold.
- Arborea marginata aurea*, leaves large, dark-green, margined with gold.
- Arborea marginata argentea*, green, edged white, and margined with rose.
- Arborea minor lutea*, light green, edged with pale-yellow.
- Algeriensis variegata*, glaucous green, with large silver blotches.
- Aurea spectabile*, large, dark-green leaves, blotched with gold.
- Canariensis maculata*, deep-green leaves, blotched with gold.
- Canariensis marmorata*, leaves small, beautifully margined with gold.
- Elegans variegata*, green leaves, blotched with gold.
- Japonica variegata*, leaves small, delicately edged with white.
- Marginata argentea*, leaves large, blotched and margined with silver.
- Maculata*, curiously mottled with gold.
- Marmorata*, leaves small, clouded with gold.
- Rhombia variegata*, leaves small, deeply margined with silver.

SEDUMS.

These interesting and very pretty plants are too much neglected. They will thrive in almost any soil, or upon rocks, where many other plants would scarcely live. The flowers are of various shades of rose, yellow, orange, and white, and the leaves different shades of green. They are often beautiful as edgings for beds of fancy shapes or for carpet bedding, covering the ground with their compact verdure. All are HARDY except those marked with a star (*). Our collection comprises upwards of fifty varieties, among which are the following:—

Acre.
*Aizoidium var.**
Altaicum.
Anglicum.
Brevifolium.
*Carneum variegatum.**

HARDY HERBACEOUS FLOWERING PLANTS.

The hardy herbaceous flowering plants are the most valuable of all garden flowers. They are not only perfectly hardy, but are of easy culture, grow in any good soil, increase freely, and give a succession of bloom from April to November. Especial pains have been taken to make our collection very complete; and it is with much pleasure that we are enabled to offer one hundred and fifty species and varieties, comprising the most showy and beautiful kinds. Many of them, especially the dwarf varieties, are well adapted to rock-work and small flower-borders, where the abundance of blossoms renders them very ornamental.

Prices, from 30c. to 50c. each; \$3 to \$4.50 per dozen.

Our selection of 50 varieties, \$10.

ORNAMENTAL GRASSES.

All these grasses are highly ornamental, and some of the larger growing kinds especially adapted for massing in beds or for sub-tropical gardening. The smaller growing sorts are admirable for hanging baskets and vases. Some of them are perfectly hardy.

NEW HARDY GRAPE. THE CAMBRIDGE.

A NEW SEEDLING OF THE HIGHEST MERIT.

It originated in Cambridge, six or eight years ago, and after continued bearing for four or five years has fully proved its excellence.

It is a black grape, somewhat resembling the Concord, but with more oval berries. The bunches are large and shouldered; berries large, with a very thin skin, covered with a delicate bloom, and adhering firmly to the bunch; flesh, rich, brisk, and refreshing, without pulp, and more nearly approaching the Adirondac in quality than any other native grape. Its period of ripening is a few days before the Concord. The vine has all the luxuriance of growth and the firmness and handsome foliage of the Concord, while it is quite as hardy, if not hardier than that grape, not an inch of wood ever having been injured by our coldest winters. The parent vine has never been protected since it sprung up from seed. It is entirely free from mildew, not a leaf having been affected.

Summing up all its qualities, it may be placed, without doubt, at the head of our hardy grapes. They are as follows:—

1. Vigorous and healthy growth and freedom from mildew.
2. Perfect hardiness, requiring no protection whatever in winter.
3. Earliness of ripening, preceding the Concord three to eight days.
4. Size of bunch and berry, and freedom from pulp.
5. Productiveness, and firm adherence of the berry to the bunch.
6. Superior quality, full of a rich, brisk, and refreshing juice.

Young plants, \$1.50 each; \$12 per dozen. Strong vines, \$2 to \$5 each.

NEW HYBRID RASPBERRY. THE NORWOOD.

This is a new variety of the raspberry, quite unlike any in cultivation, being a hybrid between the Red Raspberry and the Black Cap, having the large berry of the former and the strong growth and prolific bearing of the latter. Its growth is truly astonishing, the canes attaining the height of six feet or more, and an inch in diameter at the base; these shoots produce numerous side branches, which are covered with fruit.

Fine young plants, 25 cents each; \$2.50 per dozen; \$15 per 100.
