

Listed threatened species of the Wet Tropics bioregion

Current as of May 2015

Nature Conservation Act Status (NCA): Extinct in the Wild (PE), Endangered (E), Vulnerable (V), Near Threatened (NT), Least Concern (C), Special least concern (SL).

Environment Protection and Biodiversity Conservation Act Status (EPBC): Extinct (EX), Extinct in the Wild (XW), Critically Endangered (CE), Endangered (E), Vulnerable (V).

Declining (D) faunal species that have undergone significant declines in abundance at monitoring sites over the last decade based on [Williams *et al* \(2015\)](#). Plant species (D) modelled as highly susceptible to extinction in the near future based on [Costion *et al* \(2015\)](#).
