What does the BPAV do?

The **BPAV** represents the interests of its members towards the political and administrative decision-makers at the European, federal and provincial levels. As an association of interests, the BPAV feeds into the political debate.

The **BPAV** engages in a direct dialogue with associations of pharmacies, health insurance firms, the pharmaceutical manufacturers, home health care providers, ambulant mobile care services and various consumer organisations.

The **BPAV** delivers its opinion on current legislative initiatives.

The **BPAV** makes possible for its members to get in touch with the political decision-makers.

The **BPAV** actively campaigns for high quality and an efficient health system in Germany and Europe.

multidos GmbH & Co. KG

Member of the Board of the BPAV

Our Goals

These are our goals:

The Federal Association of medium-sized blister centers (BPAV) represents businesses (blister centers), which have set themselves the following objectives:

- To IMPROVE the quality of drug delivery.
- To REDUCE the costs of drug delivery.
- To GUARANTEE the doctor's freedom to prescribe.
- To ENSURE a complete assortment of pharmaceuticals.
- To CREATE a solid foundation for the blistering process in Germany and Europe by establishing a consistent legal and financial framework.

Advantages of Blistering

Pharmaceutical supply doesn't need to be expensive. However, it must be simple and provide high quality!

Patient-ready blistering of pharmaceuticals meets these requirements: It is a safe process, which has established itself as being innovative and having many advantages and which can improve pharmaceutical supply.

Improves Compliance
Prof. Dr. Karl Lauterbach

Helps to reduce hospitalization, morbidity and to avoid medication errors
Prof. Jens Leker

Helps to ease workload of personal care attendants because of time saving
Institut für Handelsforschung (IFH Köln)

Positive effect on all areas of patient care
Prof. Dr. Rainer Düsing

Helps to reduce expenditure and has a positive effect on quality of care and life
Prof. Dr. Günther Neubauer

Patient-ready blistering of pharmaceuticals
