Kenwood has been the worldwide expert in food preparation since 1947. Designed and engineered in the UK, every Kenwood product is made with the best materials that last a lifetime and produce consistently high-quality results with the greatest of ease. Whichever Kenwood appliance you choose, you can be sure to create the perfect dish.

KENWOOD

FEED YOUR IMAGINATION

with Kenwood Kitchen Machines

Cooking is about inspiration and creativity, just as much as the end result. The idea of a beautiful dish is what inspires you to put all your skills and passion into your food.

-BOWL TOOLS-

All Kenwood Kitchen Machines comes with three standard bowl tools:

K-Beater a trademark of Kenwood, **power whisk** and **dough hook**.

...

The highest quality stainless steel SYSTEMPRO™ bowl tools, allowing you to beat, knead, whisk, cream and fold with confidence. The unique fold function enables you to carefully mix ingredients without losing air, and the variable speeds give you ultimate control. They are all machine washable and easy to clean.

...

The **Folding Tool** is unique to Chef Titanium. It glides through ingredients carefully, retaining the maximum amount of air needed for light macarons and mousses.

The **Creaming Beater** also comes with Chef Titanium. This flexible tool scrapes all ingredients from the side of the bowl, combining them for the smoothest icing or cake mixture.

POWER WHISK

This powerful tool for the Kenwood kitchen machine makes very short work of heavier cake mixes, mashed potatoes and other stiff blends.

K BEATER

Unlike many other beater designs, your K Beater will reach all areas of the bowl to achieve a superior mix. Use it to create amazing cakes, spicy meat balls, pasta dough, mashed potato, biscuit mixes and pastry.

DOUGH HOOK

The sturdy dough hook can knead all types of dough, from pizza to pasta, for a buttery brioche or a crusty loaf. It distributes yeast evenly throughout your dough, stretching the flour's gluten to get maximum rise.

CREAMING BEATER

The innovative plastic body and removable wiper of the Major-sized Flexi Beater makes for a fast working tool that's perfect for the most delicate cake mixes and toppings. Its pliable wings work around the sides of the bowl to ensure an even consistency throughout the mix

FOLDING TOOL

Create light mousses and fluffy soufflés with this dedicated folding tool attachment for Kenwood kitchen machines. A unique tool to effortlessly fold heavy and light ingredients together and create perfectly airy and fluffy mixtures every time.
