

AMERICAN REGENT®

Reliable. Responsive. Respected.

Product Catalog

We're proud to be an American manufacturer.

For more than 50 years American Regent® has been developing, manufacturing, and supplying quality generic and branded injectables for healthcare providers and their patients. For more than 20 years, we have been a leader in IV iron therapy.

We are committed to setting a higher standard for responsiveness and reliability as a US-based manufacturer. To that end, we have made significant investments in expanding and modernizing our manufacturing facilities in Ohio and New York.

We're expanding our footprint as well. Our recent merger with HBT Labs now brings a new US location to our company. This expansion will nearly double our capacity, creating redundancies across our manufacturing sites and strengthening our expertise in the development of complex drug products and delivery systems.

What that means for you is a flexible, fast-moving partner. One that is uniquely positioned to mobilize resources or change production scheduling to quickly respond to and help mitigate shortages or meet changes in market need. A partner committed to delivering essential medications now and in the future.

Speed counts. Flexibility matters. Quality and reliability are paramount. Because patients should never have to wait for the medications they need.
