## Keypad Cash Drawer

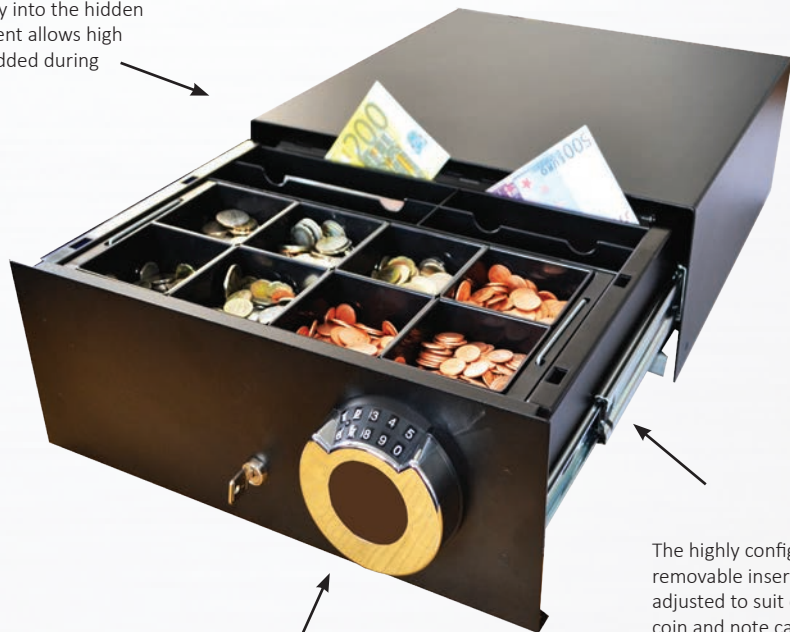

### High Security Cash Drawer with Unique Keypad Operation

APG's Custom & Bespoke range delivers a cash drawer tailored to fit the exact needs of leading retailers worldwide. For over 40 years we have developed solutions to every type of cash handling problem encountered at the Point of Sale. From enhanced security options, to different insert configurations and specially adapted cash drawers to fit unique PoS designs, there is always a solution available to pick from to meet your requirements.

Security at the Point of Sale is becoming increasingly vital to all retailers. This highly secure cash drawer ensures that both checkout staff and cash are protected. The special design of this cash drawer incorporates a hidden security note storage box with a controlled keypad access to maximise note security at the POS. This removes, therefore, the need for a separate note safe while improving ergonomics, speeding up transactions and reducing costs for the retailer.

Posting slots directly into the hidden security compartment allows high value notes to be added during normal operations

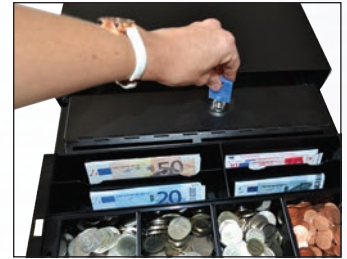

The highly configurable and removable insert can easily be adjusted to suit different needs for coin and note capacity

The Keypad allows access to the hidden security note box through one main and one secondary entry code, optional time delay available to enhance security further

INSTALL IT. FORGET IT.

# How Does the Time-Delay Drawer Work?

**Stage 1:** Fire the drawer for standard operation revealing the coin and note compartments in the insert plus the two media posting slots directly to hidden security note box.

**Keypad:** Access to the rear section can only be made after entering an access code via the Keypad mounted on the drawer front.

**Stage 2:** Successful entry of the code fires a secondary stage and allows the drawer to open fully, allowing full access to the rear section for safe removal of its contents.

**Stage 3:** Unlock the note storage box to access or remove notes.

## Keypad Drawer Specifications:
