Trip Report

Regal Sunbird by Duane Morse

Trip report compiled by Tour Leader: Doug McCulloch

Tour Summary

This was a remarkably smooth and enjoyable tour. Uganda is widely regarded as one of Africa's finest birding destinations, and a great infrastructure and some iconic birds and mammals make this a must-visit country. The tour traverses much of the western part of the country, with an altitudinal gradient that supports a wide range of habitats. The wild mountains of the Albertine Rift cover parts of Uganda, the DRC, Rwanda and Burundi, extend above the surrounding mosaic of savanna and lowland tropical forest, forming a terrestrial island of high-altitude forest and heathland habitats. These support the highly sought-after Albertine Rift Endemics, 41 bird species in total of which 24 are found in Uganda. These form many of the key target species for the tour. We managed to record 460 species over the two weeks, with 442 of these seen and including 20 of the Albertine Rift Endemics... a very satisfactory outcome indeed. Birds seen included specials such as the iconic Shoebill, rare Grauer's Broadbill on the nest, challenging Green-breasted Pitta, White-crested Turaco, African Emerald Cuckoo, Grey Parrot, Shining-blue Kingfisher, Nahan's Partridge, Grey-headed Oliveback, Papyrus Gonolek, Jameson's Antpecker, Neumann's Warbler, Archer's Ground Robin, Brown-chested Lapwing, Red-faced Barbet, Slate-coloured Boubou and African Finfoot. A total of 31 mammal species were also seen, including enjoyable interludes with Chimpanzee, Mountain Gorilla and Giant Forest Hog.

The Tour in Detail

The tour started after an early breakfast as we made our way to Mabamba Swamp to the west of Entebbe. This large wetland is connected to Lake Victoria, and consists of a mosaic of Papyrus stands and floating vegetation that is the prime habitat for our main target, the highly sought-after **Shoebill**. Sooty Chat, Lizard Buzzard and African Green Pigeon were seen en route, as well as distant views of a lone Grey Parrot. The Shoebill is the basis for a thriving local eco-tourism industry that hosts a steady stream of international visitors making the pilgrimage to see this most bizarre of species. Within 10 minutes of boarding the boats we had encountered our first Shoebill, a scruffy juvenile.

Shoebill by Duane Morse

The beauty of this place is that the birds are habituated to humans, and they go about their business with scant regard for gawking tourists. Moving into the fringes of the lake we found a superb adult, and we had ample time to view this amazing bird at close proximity. At first it hunkered down out of the wind, occasionally glaring at us as if we owed it money. We savoured the sighting as it hunted lungfish through the rafts of floating vegetation. The remainder of the boat trip also yielded Swamp Flycatcher, Northern Brownthroated Weaver, Lesser Swamp Warbler, African Marsh Harrier, Yellow-billed Duck, Purple Heron, Winding Cisticola, Long-toed Lapwing and Squacco Heron.

A picnic lunch on the shores of Lake Victoria produced African Yellow White-eye, Olive-bellied Sunbird and Yellow-rumped Tinkerbird. We had numerous sightings of Hamerkop, African Fish Eagle, Little Egret and Eastern Plantain Eater and were treated to great views of the stunning Red-chested Sunbird. A pair of Golden-breasted Buntings was a welcome bonus. On the way back to town we saw Long-crested Eagle and the incomparable White-throated Bee-Eater, our only sighting of the trip. Arriving in Entebbe, we made our way to the century-old Entebbe Botanical Gardens for an afternoons birding.

African Emerald Cuckoo by Duane Morse

The Gardens treated us to a most enjoyable birding experience. Highlights were Crowned Hornbill, great views of Grey Parrot (a sought after target), stunning Ross' and Great Blue Turaco, Northern Puffback, African Thrush and White-browed Robin-Chat. The knock-out was an assemblage of no less than three adult male **African Emerald Cuckoos** feeding on caterpillars within a grove of trees on the lake edge. They were joined by a number of females and juveniles, as well as several Klaas' Cuckoo. The sight of these cuckoos in excellent light and at close quarters was truly breathtaking. We also had great views of Black-necked Weaver, Green Crombec, Ashy Flycatcher, Collared and Scarlet-chested Sunbirds, Grey-backed Cameroptera, Vieillot's Black Weaver, Grey-headed Nigrita and Little Greenbul. We rounded off an enjoyable day's birding with Black-and-White Shrike Flycatcher and Northern Black Flycatcher.

Double-toothed Barbet by Bruno Portier

We began the next morning with a roam around the hotel gardens, finding a pair of White-browed Robin Chats, Slender-billed Weavers and a gorgeous Shikra. Leaving Entebbe, our first stop was at the expansive Luwero Swamps, a flat lowland mosaic of farmlands, bushland and marshes. The main target here is the Marsh Widowbird, which we saw together with Fantailed and Yellow-mantled Widowbirds, Moustached Warbler, Grey-capped Warbler, Black-headed Gonolek, Marico and Coppery Sunbirds, and Little, Compact, beautiful Golden-backed and Yellow-backed Weavers. At our picnic we were entertained by several busy African Blue Flycatchers, and a stunning little male Red-cheeked Cordonbleu drinking from a puddle in the dirt road. Other highlights were a spectacular **Double-toothed Barbet** and good views of noisy Meyer's Parrots. Passing through an area of cattle ranches, we connected with our first savanna specials including Lesser Blue-eared Starling, Northern Crombec, White-headed and Spot-flanked

Barbets and a superb White-crested Turaco. The latter sat exposed for a while, allowing excellent scope views and photos. We arrived at our destination in Masindi in the early evening, marking the end of an enjoyable day.

After a good night's rest we tackled the famous Royal Mile at Budongo Forest, a broad, shady arrow-straight track fringed by towering primary forest canopy trees. We started at an area of farm bush, and picked up Marsh and Brown-crowned Tchagras, African Citril, Brimstone Canary, Black-bellied Firefinch, Brown Twinspot, a stunning **Grey-headed**

Oliveback and Compact Weaver. The forest came as a shock to the system since none of us had been exposed to tropical rainforest for the previous 18 months due to the global pandemic. The birding was undeniably tough, with many species presenting themselves only as distant flits and flickers in the green. As with all things, perseverance paid off and we were treated to good views of White-thighed and Pied Hornbills, African Dwarf and African Pygmy Kingfishers (both in the scope), Chestnut-capped Flycatcher (at eye-level), Olive-green Camaroptera, Yellow-crested Woodpecker, Purple-headed Starling, Blue-throated Brown Sunbird, Buff-throated Apalis and Ituri Batis (a white lump at the very top of the canopy). The undoubted highlight of the day was a fantastic view of the rare and endangered Nahan's Partridge, a species seldom seen let alone seen well.

Brown-throated Wattle-eye by Dubi Shapiro

The next day was primarily a travel day, our destination being Kibale National Park. We stopped at a remnant wetland and were treated to views of Grey-headed Oliveback, Blue-cheeked Cordonbleu, Black-crowned Waxbills and Red-billed and Black-bellied Firefinches. A Blue-headed Coucal sunned himself in the early morning light, and we were treated to great views of displaying Flappet Lark, Black Bishop, **Brown-throated Wattle-eye**, African

Grey-headed Oliveback by David Hoddinott

Green Pigeon and Black Coucal. The journey was uneventful, and we arrived at the Sebitole section of the Kibale Forest in the mid-afternoon. We spent some time birding along the road, and were rewarded with Petits Cuckooshrike, Long-crested Eagle, White-breasted Nigrita, Grey-throated Barbet and the gorgeous Lowland Masked Apalis. We also made time to try and find the spectacular Papyrus Gonolek at a Papyrus swamp en route, and while we were unsuccessful we did manage excellent views of a pair of dark-lored Chubb's Cisticolas. We arrived at our picturesque accommodation set within a tea estate adjacent to the Forest in the late afternoon.

We gathered at the rangers station at the Kibale National Park at before dawn the next day, and headed into the forest. Before long we heard the distinctive call of a pair of Green-breasted Pittas high in the canopy. We spent the following few hours stalking these shy and elusive birds across the forest undergrowth, and after considerable application and commitment the entire group managed to get good views of this special bird. We moved on to look for **Chimpanzees**, and were fortunate to have two encounters. The first was with a group of females with babies. These were understandably shy, moving calmly away as we tried to approach to view them. Later we came across another group within the community that contained males. These animals were far more confiding, paying scant attention to us as we watched them take their midday siesta. The special aspect of Kibale's Chimpanzee Research Programme is that one is afforded a chance to view Chimps that are habituated to humans. They carry on doing their Chimpanzee things oblivious to their audience.

Chimpanzee by Markus Lilje

After our own short siesta we headed back into the forest, birding along a road wide enough to enable unobstructed views of canopy trees and the forest edges. The afternoon was productive, and we saw Red-headed Malimbe, Narrow-tailed Starling, Grey-chinned and Green-throated Sunbirds, Slender-billed Starling, Yellow-mantled Weaver, Mountain Wagtail, Sooty Flycatcher, Western Oriole and Honey-guide Greenbul. During the day various members of the group had good views of African Goshawk, Purple-banded Sunbird, Bronzy Sunbird, Bocage's Bush-shrike, Double-toothed and Hairy-breasted Barbets, Yellow-throated Tinkerbird, Chestnut Wattle-eye, Yellow-bellied Waxbill and the rare Speckle-throated Woodpecker.

Guereza Colobus by Markus Lilje

After an adventurous breakfast we made our way to the community-run nature reserve at Bugodi Swamp, on the edge of Kibale National Park. Great Blue Turaco, Ross's Turaco and Bocage's Bushshrike were in evidence at the office. The swamp forest is protected and regenerating well, providing good habitat for birds and animals in accessible surroundings. We saw Yellow-billed Barbet, Hairy-breasted Barbet, stunning Red-headed Bluebill, Plain Greenbul, Western Nicator, Black-and-White Shrike Flycatcher, perched **Shining Blue Kingfisher**, Giant Kingfisher, Red-bellied Paradise

Flycatcher, Dusky Blue Flycatcher and Black-and-White Mannikin on our walk around the swamp. One or two members of the group also managed to get on to a very elusive White-spotted Flufftail. On our stroll of several hours around the nature reserve we encountered no less than six monkey species: L'hoests Monkey, Blue Monkey, Vervet Monkey, Red-tailed Monkey, **Guereza**, and Grey-cheeked Mangaby. This proved a wonderful experience, since the monkeys were relaxed and allowed us lovely views of them. This surely is a unique experience in Africa.

African Skimmers by Markus Lilje

After lunch at the lodge we packed up and embarked for Queen Elizabeth National Park, collecting a lovely pair of Joyful Greenbuls, as well as Red-headed Malimbe, along the way. A late afternoon sojourn into the park produced Black Coucal, Black-lored Babbler, Cardinal Woodpecker, Marsh Tchagra, Buff-bellied Warbler and Senegal Lapwing as well as our first Kob and Defassa Waterbuck. A distant African Elephant Bull was also spotted before we arrived at our accommodation in the evening.

The day began with a dawn breakfast before we headed out to look for specials. The veld was remarkably dry, with many of the animals congregating around the dwindling water sources. Queen Elizabeth National Park (QENP) has remarkably beautiful and unique scenery, with large herds of African Buffalo roaming open grassland plains interspersed with thickets and large *Euphorbia candelabrum* trees. We had brief glimpses of Common Buttonquail and African Crake, and soaring White-backed Vulture, Tawny Eagle and several Bateleur. A waterhole provided fantastic scope views of a pair of Greater Painted Snipe out in the open, Wood Sandpiper, Red-capped Lark, Three-banded Plover, Spurwinged Lapwing and Common Pratincole. We managed to track down the target endemic

Red-throated Bee-Eater by Ken Hashagen

White-tailed Lark, while Black-bellied Bustard was a highlight. An unfortunately brief view was had of a Dwarf Bittern.

The afternoon was dedicated to a cruise on the Kazinga Channel linking Lake George to Lake Edward. We had excellent water-birding, with great views of magical African Skimmers, magnificent Goliath and Grey Herons, Malachite and Pied Kingfishers, Fish Eagle, Pink-backed and Great White Pelicans, African Hoopoe, African Openbill, Common Sandpiper and Olive bee-eater. The waterway was lined by wallowing herds of African Buffalo and several large menacing Nile Crocodiles. We had a

superb look at a foraging Nile Monitor, and several wallowing African Elephant bulls. An interesting observation was of a very sick-looking Giant Forest Hog lying in the shallow water. A while later we saw another of these rare animals drinking, before he also limped up the river bank. These animals are known to fight very aggressively over females and territory, and we surmise that we had viewed the recent aftermath of one of these bitter battles.

We left our accommodation after breakfast the next morning en route to Bwindi Impenetrable Forest, via Ishasha, the southern section of the QENP. The bridge across the Kazinga channel

Papyrus Gonolek by David Kidwell

had been washed away the previous wet season, and my heart sank when I saw the queue for the ferry. Fortunately Livingstone is well known in Ugandan tourism circles, and he soon prevailed upon the local drivers to let the visitors go ahead of them, and we were soon fording the river in traditional style to continue our travels. We had fantastic views of a spectacular **Red-throated Bee-Eater**, Snowy-Crowned Robin Chat and the incomparable **Papyrus Gonolek** shortly afterwards, all in gorgeous morning sunlight. Several stops on the road south brought Purple-banded Sunbird, Black-headed Batis, Trilling and Stout Cisticolas, Red-faced Crombec, White-browed Scrub Robin, Red-chested Sunbird and Blue-naped Mousebird. Red-shouldered Cuckoo-shrike and beautiful Orange-breasted Bushshrike were also encountered. We had lunch within the riparian forest a stone's throw across the river from the Democratic Republic of the Congo, accompanied by Woodland Kingfisher and African Paradise Flycatcher. We searched in vain for Lions, but the dearth of tourists in these troubled times meant only a few vehicles out looking and hence less chance of encountering these special cats. We were rewarded instead with Ruppels, White-backed and White-headed Vultures, a majestic perched Martial Eagle, Nubian Woodpecker, Temmincks Courser, Lesser Moorhen and Pearl-spotted Owlet. We then made our way up into the mountains to the forests and our date with the Gorillas.

Eastern Gorilla by Rich Lindie

An early start saw most of the group going in search of **Mountain Gorillas**. After a physical hike all were successful in spending a rewarding and fulfilling time with these enigmatic apes. The remainder of the group chose to bird in the Buhoma section of Bwindi Impenetrable Forest National Park. There is something special about Bwindi with its steep slopes, dense tall moss-covered trees, crystal clear mountain streams and lush undergrowth of vines and ferns. One almost expects a semi-clad, sinewy figure to

swing noisily from vine to vine between the trees. Access to this wonderland is provided by a management track, and we connected with Many-coloured, Bocages and Luhders Bushshrikes, Elliot's and Tulberg's Woodpeckers, Blue-headed and Purple-chested Sunbirds (both Albertine Rift endemics), Grey-winged Robin-Chat, and the understated but rare Chapin's Flycatcher. Further highlights of the day were Brown-capped and beautiful Black-billed Weavers, Red-tailed and Anson's Greenbuls, White-breasted Nigrita, Petit's Cuckoo-shrike, and Grey, Buff-throated and stunning Black-throated Apalises. We finished a typically full and enjoyable day with an enquisitive African Wood Owl on a night walk.

Black-billed Weaver by Markus Lilje

Today we had a full day in Bwindi Forest to look forward to, this time with the entire group. Luhder's and Bocage's Bushshrikes were quickly located once again, together with Brown-capped and **Black-billed Weavers**. A gorgeous Many-coloured Bushshrike had us enthralled, and moving up the trail we also had views of Bar-tailed Trogon, Anson's, White-throated and Red-tailed Greenbuls and Elliot's Woodpecker. Grey-winged Robin Chat showed beautifully in the undergrowth, and we also made acquaintance with Equatorial Akalat and brief Brown Illadopsis. Purple-banded, Collared and Northern Double-Collared Sunbirds were also present. Making our way up the trail, we periodically had varied views of the forest specials under the expert guidance of local bird guide Matthew. Other birds seen were Petit's Cuckooshrike, White-breasted and Grey-headed Nigritas, Green Hylia, Olive Green Camaroptera, and Blue-throated Brown Sunbird. A picnic lunch was spent on one of the side-trails beside a clear mountain stream and surrounded by beautiful jungle ferns. Shortly afterwards we spent the better part of an hour playing hide-and-seek with a vocal and very special Neumann's Warbler, with four of the group eventually managing to get decent views of this exceptionally tricky little customer. The remainder of the trail produced Red-

Mountain Masked Apalis by David Kidwell

throated Alethe, White-bellied Robin Chat, glorious views of a pair of **Jameson's Antpeckers**, Speckled Tinkerbird, Yellow-spotted Barbet, African Shrike Flycatcher, Cassin's Honeybird, Pink-footed Puffback and Kakamega Greenbul. Some members of the group also had good views of Tulbergs and Buff-spotted Woodpeckers in the late afternoon.

Leaving Buhoma the next morning, we made our way up to Ruhija via the Neck. Red-rumped and Lesser Striped Swallows were waiting for us on the telephone wires, and we

also saw McKinnon's Shrike perched on the road-side snags. Our first stop gave us great views of Tropical Boubou and Holub's Golden Weaver. We spent some time birding the Neck, a narrow belt of rainforest connecting the Ruhija section with the Buhoma part of Bwindi NP. Birding was slow, but we managed to get good view of the endemic White-browed Crombec, Black Bee-eater, Black-faced Prinia, Chestnut Wattle-eye, Narrow-tailed Starling, Green Hylia, Chestnut-throated Apalis, the river-dwelling Cassin's Flycatcher, African Harrier Hawk, and Elliot's Woodpecker. Good views were had of Auger Buzzard at our lunch spot among the tea plantations high up in the mountains. We arrived at our accommodation in Ruhija in the early afternoon.

Jameson's Antpecker by Duane Morse

That afternoon we headed to a nearby spot for our first taste of high altitude forest birding. Over the course of the next couple of hours we encountered African Olive Pigeon, Tambourine Dove, Cinnamon-chested Bee-Eater (God still hasn't made an ugly Bee-Eater), Rwenzori Batis, sleek Grey Cuckooshrike, Mountain Oriole and endemic **Mountain Masked Apalis**. The undoubted highlights were a stunning male Regal Sunbird (a miniature riot of green, red and yellow) and great views of Black-billed Turaco. We also managed to see the Albertine Rift endemic Stripe-breasted Tit and Red-faced Woodland Warbler. Towards the end of the day we tracked down a small, shy covey of sought-after Handsome Francolin.

The next day was scheduled for the hike down to Mubwindi Swamp, and the opportunity to connect with one of the rarest birds in Africa and a key target bird for the tour. We started at first light, and quickly connected with Yellow-

Lühder's Bushshrike by Markus Lilje

eyed Black Flycatcher, Rwenzori Apalis, and vociferous Black-faced Rufous Warbler. Birding was challenging, a recurring theme in the forests on the tour likely related to the dry season and the breeding activity of the birds. With quick reactions, patience and application we had good views of Rwenzori Hill Babbler and a stunning Doherty's Bushshrike, together with an active Evergreen Forest Warbler. Great Blue and Ross's Turacos were also seen. We were teased by a trio of Barred Long-tailed Cuckoos, and had good views of several Bar-tailed Trogons, Tullberg's Woodpecker and Rwenzori and Chinspot Batises. The local

guides had fortunately found an active **Grauer's Broadbill** nest site, and we had views of a brooding adult with its face protruding from the lichen-covered nest entrance. We settled down to wait, being entertained by a pair of confiding Archer's Ground Robin busily collecting food for their hidden brood. We all managed to get excellent views of this normally very difficult rift endemic. We also had good views of a flock of White-headed Woodhoopoes. Eventually a Grauer's Broadbill flew in, generating frenetic activity as we tried to get bins on the bird. We managed swift decent views as the adults changed positions in the nest, with the other adult moving off to forage.

Grauer's Broadbill by Andre Bernon

Continuing to Mubwindi Swamp, we quickly found Grauer's Swamp Warbler and Carruther's Cisticola before eating lunch and beginning our trek out of the valley. We had decent views of White-bellied Crested Flycatcher, Blue-headed Sunbird, Olive-breasted Greenbul and Cardinal Woodpecker before having agonizingly swift views of the exquisite Dusky Crimsonwing. The mythical **Lagden's Bushshrike** teased us on our way out, although we did get superb views of White-starred Robin as we ended our strenuous but rewarding and enjoyable day's hike.

We spent the late afternoon birding the nearby School Track on the forest edge, which afforded us additional views of birds we had already become acquainted with. There were great views of Mountain Oriole, African Paradise Flycatcher, and Abyssinian Thrush. A most unusual sighting was a pair of **Striped Pipits**, providing excellent scope views. This widespread but thinly distributed woodland species is considered a wonderful sighting throughout its range, which doesn't include Uganda. It is very rare in Uganda, a remarkable sighting, and provided lifers for both of our highly experienced local guides.

Brown-chested Lapwing by David Kidwell

Spending dusk on a nearby hilltop, we were treated to a flyover by a hunting Bat Hawk. We enveloped ourselves in the sights and sounds of nightfall in Central Africa, the experience enhanced by an interlude with a local family on their way home after a long day with several children, a flock of goats and at least three pigs in tow. As darkness fell we were treated to a spectacular sighting of a Rwenzori Montane Nightjar. The bird hawked insects for a while before settling on the path to feed on ants. This capped a long, busy and wonderful day.

We left Ruhija before Dawn had bothered to crack, heading east and down in altitude into the southern savanna region of the country. We stopped briefly for White-necked Raven and an undignified Grey Crowned Crane sitting on a roof in Kasane town, before pushing on to Lake Mburo National Park. Our lunch was taken beneath a tree in a dry, dusty field surrounded by Plains Zebra and Ankole Cattle that also yielded a flock of **Brown-chested Lapwings**. These enigmatic birds migrate between East and West Africa following the bush fires, and are very difficult to see because much of their range is politically unstable. We had superb views of these birds, together with African Pipit, Marico and Purple-banded Sunbirds and Black-cheeked Waxbills. Continuing after lunch we found Bare-cheeked Go-Away Bird, had stonking views of the localized Red-faced Barbet, Crested Barbet and a fantastic and uncommon Slate-coloured Boubou before arriving at our accommodation. After a short siesta we headed out on a late afternoon game drive that turned out to be a highlight in a tour of highlights. The late afternoon golden light was wonderful for viewing birds, and we had magical views of Green Woodhoopoe, Pearlspotted Owlet, African Grey, Cardinal and Bearded Woodpeckers, Green-winged Pytilia, Lilac-breasted Roller, Greater Blue-eared Starling, Brubru, perched Bateleur and White-headed Vulture. Mammals seen were African Dwarf Mongoose, Defassa Waterbuck, African Buffalo, Olive Baboon, Vervet Monkey, Topi, Plains Zebra, Warthog, Impala, Hippopotamus, and a fine male Bushbuck. The dusk produced a Swamp Nightjar before we adjourned to our accommodation for the night.

Striped Pipit by David Kidwell

We began the final day with a pre-dawn walk around the camp, which produced a Black-shouldered Nightjar. After breakfast we headed out for an unavoidably shortened cruise on nearby Lake Mburo. The light was perfect, and we quickly saw Striated Heron, Hamerkop, Pied, Malachite and Woodland Kingfishers, Water Thick-knee, Common Sandpiper and Common Greenshank. Several majestic African Fish Eagles were in attendance before we had excellent views of several elusive and highly sought-after African Finfoots. A further highlight was a pair of Saddle-billed Storks foraging on the shoreline. Our birding concluded, we commenced the long, dry, dusty and bumpy road back to Entebbe in time to have our Covid tests and prepare for the long journey back to our respective homes. The patience and kindness of all of the tour participants was integral to making this a very smooth, successful, memorable and enjoyable tour.
