Trip Report

Inca Tern by Rich Lindie

Trip report compiled by Tour Leader: Rich Lindie

Andean and James's Flamingoes by Rich Lindie

The Tour in Detail

For most of us, our adventures in Chile began with a night or two at the Holiday Inn at Santiago's ever-bustling airport. Well-poised and reasonably well-rested as a result, this meant we were all pretty much raring to go by the time we gathered in the lobby to cross the road for our flight to Arica and the dry north. Being a very small group, we were also through check-in and security control in fairly good time (by Santiago airport standards!) – arriving at the gate in time for a cup of coffee, even. Soon, we were on the ground in Arica, and, after a welcome greeting from our final team member, and a brief check-in at our hotel, we were out in the beach north of town – specifically, at the Lluta river mouth.

The area was literally teeming with birds, and we spent several hours jumping from one new species to the next, and back again, for photographs. Hundreds of Franklin's Gulls made up for the bulk of the biomass; while Elegant Terns, Sanderlings and Turkey Vultures vied for second place on the abundance scale. Among these, we picked out several Black Skimmer, a couple of Blackish Oystercatcher, Andean Gulls, Cinnamon Teals, Peruvian Pelicans and our only Semipalmated Sandpipers of the trip. Highlight species for the day, however, were Grey Gull, Belcher's Gull, Croaking Ground Dove, Peruvian Pipit, Peruvian Meadowlark and Slender-billed Finch – the latter four of which were all seen in scrub around the river mouth. A lovely dinner then finished off a great first day.

Osorno Volcano by Dan Bormann

Day two of the tour saw us heading south of town for a change, where our first stop was the Camarones Valley. Paying a brief visit to the rocky shoreline at the mouth of the valley, we picked up a few Red-legged Cormorants and our first Chilean Seaside Cinclodes, before heading to a patch of scrub and reeds a little way up the valley. Our main target there, Pied-crested Tit-Tyrant, took no time at all to find and photograph, whilst other birds attracted to our activities included our first White-crested Elaenias, Vermillion Flycatchers and Cinereous Conebills. Moving further up the valley, a roadside stop eventually turned up a Tamarugo Conebill – and just in time, as rising temperatures were soon to send us scuttling back to the van.

Fortunately, our next targets were hummingbirds, so a leisurely sit near some flowers in the Chaca Valley couldn't have come at a better time. And, speaking of good timing, our main target, the splendid Chilean Woodstar, came in as if on cue, just as we had settled down with our cameras and binoculars at the ready. What's even more is that we were treated to sightings of some wonderfully bright and cooperative males of this now ultra-rare species. Alongside the woodstar, both male and female Oasis Hummingbirds also put on a wonderful show, leaving us with just one more target hummingbird in the valley – Peruvian Sheartail.

Wanting to get to grips with this last species while the day was still warm, we moved on and stopped briefly at a spot for Peruvian Thick-knee – of which we saw around a dozen – before heading to the gardens of an Olive-growing estate, for a sit-down with yet more hummingbirds all around. Needless-to-say, the sheartail put in several appearances there, and we were soon on our way to our next birding spot – Las Cuevas de Anzota.

Buller's Albatross by Rich Lindie

This area is not typically visited on birding tours to the area, but since we had seen all our major targets for the area, we decided to take the opportunity to improve on our views of Chilean Seaside Cinclodes and Red-legged Cormorant, as well as to give us a chance to see Marine Otter. First, however, we had to don some new headgear and brave the near gale-force winds that were sweeping the coast that afternoon. We secured great views of the cinclodes and the otter, but we weren't there long, as the wind seemed to only get worse with time. A brief stop at a nearby beach hotel then gave us views of Surfbird and Willet, before a retreat to our own hotel would see in the remainder of our birding day.

The coast around Arica had been kind to us, though we still hadn't seen any Peruvian Terns by our third day in the area. *Ok, to be honest, we hadn't really expected to see this species from shore, but we did have the possibility on our minds.* And so, a pre-breakfast excursion back to the Lluta River mouth saw us standing on the beach with scopes at the ready. Amazingly, we did find this bird, though nobody was prepared to 'tick' the species, given the distant views. Nonetheless, we enjoyed seeing several of the familiar species found around the mouth again, as well as the peaceful atmosphere on the beach at that time of the morning.

Post breakfast, we began our drive up into the 'hills'. We followed the Lluta Valley for the early part of the drive, where a couple of stops produced new sightings that included our first Chestnut-throated Seedeaters and good looks at Andean Swifts. A detour to the Molinos area then gave us our first views of Lesser Horned Owl, before, finally, we climbed up and out of the coastal plains.

Chestnut-throated Huet-huet by Holger Teichmann

The dry slopes on the first part of our climb then gave us our first Straight-billed Earthcreeper of the trip, whilst the more-vegetated valleys around Socoroma provided us with several goodies, including Spot-winged Pigeon, Giant Hummingbird, Yellow-billed Tit-Tyrant, Ash-breasted Sierra Finch and Greenish-yellow Finch. We eventually reached Putre in the late afternoon, when some of us opted for a short walk while others took a brief rest, before a short drive to the old main road above town provided us with some final new birds for the day. Birds seen around our hotel on the afternoon walk included Aplomado Falcon and Cream-winged Cinclodes, whilst our walk above town produced Canyon Canastero, Streak-backed Tit-Spinetail and Black-hooded Sierra Finch, among others. Post dinner in town, a wonderfully obliging Band-winged Nightjar took the spot for final bird of the day.

Lauca National Park, with its vast expanses of Puna and wonderfully healthy high-altitude bogs, holds some of the best birding in all of Chile. Not to mention some of the most awesome scenery around. With a full day to explore this exciting part of the world, we made sure to explore everything that the road from Putre to central Lauca and beyond has to offer. Starting just above town, we began our day by bagging great views of both Ornate Tinamou and Andean Deer. A little way up the road, it was then the Las Cuvas bog and surrounding areas that formed the focus of our attention for a little while. There, in the early-morning chill, we secured superb views of our main target, Diademed Sandpiper-Plover, as well as our first Crested Ducks, Grey-breasted Seedsnipe, Cordilleran Canastero and Puna Ground Tyrant. We also thoroughly enjoyed seeing our first of many Southern Mountain Viscachas and several Andean Gulls in smart breeding-attire.

Andean Flicker by Holger Teichmann

Deeper into the park, we focused our attention on finding James's Flamingo – finding a small group of them at our very first stop. Making our way, on foot, to and from the flamingos, we also bagged several other species, including Puna Miner, Andean Avocet, Puna Ibis and Buff-breasted Earthcreeper. We also managed to get great close-ups of the flamingo, side-by-side with the other two species found in the area – Chilean and Andean. Yet deeper into the park, we enjoyed wonderful views of Andean Swallow, before a wander around some bogs and roadside cuttings produced great views and photos of Giant Coot, Andean Flicker, the hulking White-fronted Ground Tyrant and herd-upon-herd of Vicuna. One of the key sightings of the morning, of course, was Lesser Rhea – represented in the area by a subspecies sometimes split as Puna Rhea. By seeing this bird early on in the day, we freed up time to explore new areas of the park, and so we decided to continue along the road to Visviri. Along the way, we finally found Andean Lapwing, whilst the edges of the town itself produced wonderful close-ups of Golden-spotted Dove and Bright-rumped Yellow Finch. Needless-to-say, we also enjoyed the wide-open plains and uninterrupted views of the nearby volcanoes of Pomerape and Parinacota – all the while being the only car and people on the main road!

By that stage, we had seen a late lunch come and go, and it was soon time to make our way back to Putre. Not without a few more stops, of course, though it wasn't until late afternoon, near our hotel, that we started to pick up several new species in quick succession. The first of these, for some, was Black-billed Shrike-Tyrant – a few of which were seen hunting from poles close to our hotel, followed shortly by a Black-throated Flowerpiercer, several gorgeous Andean Hillstars, a White-throated Earthcreeper, a Blue-and-yellow Tanager, and a very obliging Canyon Canastero. We also enjoyed more great looks at the popular Bare-faced Ground Dove. Dinner in town again was, once again, followed by great views of Band-winged Nightjar – this time, right on the edge of the grounds next to our hotel!

Chilean Tinamou by Holger Teichmann

Day two in Lauca National Park was a bit of a clean-up affair – species like White-winged Sierra Finch, White-throated Sierra Finch, Andean Duck, Andean Coot, Rufous-naped Ground Tyrant and Black Siskin had yet to be seen by all or any of us. Clean-up on these we did, however, as stops at various sites in the park produced one after the other of desired species. A few escaped our grasp, of course, but our time in the park had been nothing if not very successful. We also enjoyed different views of Parinacota and Pomerape volcanoes, as a trip out to Chungará Lake provided us with yet more great vistas – en route and at the lake itself. Following all that, we made a brief stop near Socoroma once more, but turned up nothing new before it was time to make our way back down to Arica for the final night of the extension. The final new bird of our Arica extension was none other than Burrowing Owl – a pair of which we 'twitched' at the airport before checking in.

Round two of our Chilean adventures was to follow, as our flight landed in Santiago. We were soon gathering all our new troops, and on the road to Farrellones in the east, stopping en route for lunch. Opting to bird the upper reaches of the road first, it took a while before we were finally birding – not aided by a rather long wait for lunch – but we were soon into the birds. First to fall were Rufous-banded Miner and Greater Yellow Finch – both of which were seen feeding around our parking spot – whilst it didn't take much longer to find some White-sided Hillstars a little further up the trail. Sharp-billed Canastero did take a little longer to find, but we were entertained by the likes of Scale-throated Earthcreeper, White-browed Ground Tyrant, Rufous-tailed Plantcutter and Black-winged Ground Dove during the search, so it mattered little!

Salvin's Albatross by Rich Lindie

After finally seeing the canastero, we took a short drive to the end of the road, where we scanned the buildings of a ski resort but failed to find any perched Andean Condors – unsurprising in the foul weather, but we did have wonderful views of soaring birds on the way down. Much further down the hill, we then tried our luck with Chilean Tinamou, and more than made up for any failures with the condor. Hell, we made up for any failures that would come for the rest of the week! Indeed, we all stood in awe as we drew one of these supposedly shy tinamous out to within a few feet of our snapping cameras. At one point, I tried but failed to chase it away from the road and away from passing cars! A final stop on the mountain for photos of Chilean Mockingbird then saw in our time around Farellones.

The day wasn't over, however, as we decided to undertake yet another twitch – running into a city park in Santiago to see the ridiculously tame Spot-flanked Gallinules that call the park home. We also ticked some Monk Parakeets, and disturbed some wedding photography, before eventually retiring to our hotel for a late-ish dinner. Another super start to our tour!

The El Yeso Valley was next up on our itinerary, so we dined in the early hours of the morning and set off straight for the park. Just outside the park, a Torrent Duck – spotted by our uber-enthusiastic driver – was much-appreciated. Then, down at the bottom of the valley, our first planned stop produced unbeatable views of Crag Chilia, and a Moustached Turca to boot! A few kilometres up the road, a stroll around the edge of the army barracks yielded superb views of our main target, Black-fronted Ground Tyrant, as well as Yellow-rumped Siskin and a surprise Sharp-billed Canastero.

Crag Chilia by Holger Teichmann

Yet higher up, we passed a scenic lake where several, apparently mostly Brazilian, tourists were beginning to gather, before being dropped off at the edge of a large bog, where two hours of productive birding would take us to lunchtime. Highlight sightings during those couple of hours included the much sought-after Diademed Sandpiper-Plover, Grey-flanked Cinclodes, Cinereous Ground Tyrant, Cordilleran Canastero, Straight-billed Earthcreeper, Grey-breasted Seedsnipe and Andean Goose. Eventually, lunch (warm empanadas) arrived, and we were soon on our way up to our final stop. The reason for climbing higher, of course, was to track down Creamy-rumped Miner, which we successfully did without much trouble, though the views alone would have made the drive worthwhile. Oh, and the sight of several more soaring condors above. The remainder of the day was spent making our way back to Santiago, where an earlier dinner was much-appreciated, as were more celebratory drinks at the end of yet another lovely day.

Day three of our central Chile adventures saw us heading for the coast – specifically, to the Maipo River mouth. Down at the mouth, we got straight into it, finding our first new birds before everyone had even climbed off the bus! Among these, Tufted Tit-Tyrant was the first to create a stir, followed shortly by a Plain-mantled Tit-Spinetail and a Chilean Elaenia. A pair of Dusky Tapaculos was then coaxed into view before we finally began our walk to the edge of the estuary. Along the way, we picked up our first Grassland Yellow Finches and Picui Ground Doves. On the beach, Sanderlings were gathered by the dozen, whilst our arrival at the edge of the reedbeds was heralded by our first Chilean Swallows and Spectacled Tyrants. Many Many-colored Rush Tyrants put in appearances, too. A couple of detours then culminated in views of our main target, Ticking Doradito; while Wren-like Rushbird put in a couple of brief appearances. On our way back to the parking lot, a few Correndera Pipits were seen at our feet, taking us to a short break before one more stroll. The stroll itself started with great views of Rufous-tailed Plantcutter, and some Black-chinned Siskins, though there was little else of interest thereafter.

White-bridled Finch by Dan Bormann

Having done so well, so early, it mattered not, however, and soon we were on our way, way ahead of schedule, to Humedal de Cartagena for some more action-packed birding. Strolling the shoreline of this great little spot, we notched up one new species after another, including Coscoroba Swan, Black-necked Swan, Red Shoveler, Black-headed Duck, Lake Duck, White-tufted Grebe, White-winged Coot, Red-gartered Coot, Brown-hooded Gull and Austral Negrito. On the way out, a Black-crowned Night Heron despatching provided yet more photographic opportunities.

Lunch at a nearby restaurant was pleasantly leisurely, which no doubt contributed to the rapid quietening of the bus during our journey to Viña del Mar. At the end of our journey, our lovely seaside hotel awaited us, replete with Inca Terns on the terrace! And what's best is, we had several hours to enjoy the terns and the settings, to boot! Not to mention Chilean Seaside Cinclodes, Peruvian Boobies, and dozens of elegant South American Terns.

Fast-forward 12 hours and the morning of our pelagic had finally arrived! Twenty minutes from our hotel, we boarded our boat with much anticipation – some good, some not-so – and, not long after, we were on our way. Starting with the first Sooty Shearwaters and Peruvian Diving Petrels, it didn't take long before the action started. Soon after, Pink-footed Shearwaters started putting in appearances, and the first albatrosses – initially comprised mostly of Salvin's, with a few Black-broweds here and there. Chumming brought in hordes of Kelp Gulls, which in turn gave us closer views of the pink-foots and albatrosses; while the occasional Southern Giant Petrels and Chilean Skuas put in appearances. Eventually, Northern Royal Albatrosses showed up, too. Then, just as we were beginning our return journey, two Buller's Albatross rounded off the trip very nicely! A (very) late lunch followed, and then we travelled north, to the seaside town of Cachagua, where we spent a little time with a small colony of Humboldt Penguins! A nice finish to a lovely day at sea.

Golden-spotted Ground Dove by Holger Teichmann

For a drastic change of scenery (and temperature!), we found ourselves in the Palmas de Ocoa sector of La Campana National Park the next morning. Our main targets there were White-throated Tapaculo and Dusky-tailed Canastero, the former of which we heard almost immediately after stepping off the bus. Before we could get to it, however, we were distracted by a Striped Woodpecker in a tree above us. Fortunately, more tapaculos were to be heard. If only it hadn't taken so long to see one! The canastero, mercifully, took almost no effort at all, and while we were on our numerous searches for a cooperative tapaculo, we also saw Chilean Flicker and a handful of other appreciated birds.

Lunch at a nearby restaurant preceded an early afternoon drive to Batuco Lake – albeit not exactly directly so! At the lake, some serious heat-haze and very skittish birds made for less-than-desirable conditions, though we did eke out a few new species for the trip, including Rosy-billed Pochard, Collared Plover and White-faced Ibis. An evening back at our now-familiar hotel in Santiago was the final stop on our agenda that day.

The next morning, we headed out to the Maule River to catch up with Burrowing Parrot. Along the way, we stopped a couple of times at some highway rest stations to break up the journey and to buy lunch for later in the day. This provided us with extra time to explore the region, which we used to our full advantage. To start with, we found and photographed the parrots with ease, despite the wind, *and* had looks at a family of Torrent Ducks and some Bronze-winged Ducks. Retracing our steps a little, a little birding at Colbun Lake gave us the opportunity to study several species of waterfowl in much better conditions than those we had at Batuco Lake, as well as great views of Band-tailed Sierra Finch.

Magellanic Horned Owl by Rich Lindie

Around the corner, we checked into our lodgings along the road to Lomas de Lircay before heading out to the reserve for our first spot of birding in some real forest. Along the way, we had our first looks at Chilean Pigeon, whilst our arrival coincided with some great views of a pair of Common Diuca Finch in the track. Some managed their first views of Chucao Tapaculo, too, though bigger highlights included our only sighting of Austral Pygmy Owl and some great close-ups of White-throated Treerunner. That evening, back at our cabins, we heard our first Rufous-legged Owl, but we would have to wait until morning to see one.

And see one, we did! A definite highlight of the day, only it was soon eclipsed by the incredible views we had of Chestnut-throated Huet-huet – one of which sat out in the open, on a bare stump, a few meters away, for several minutes! Impossible to beat, really. Then, as if that wasn't enough, although it took a lot more effort, we went on to see both Chucao and Magellanic Tapaculos almost as well! And with that, we had time to return to the peaceful surroundings of our hotel one more time, to eat our boxed lunches before the longish journey back to Santiago.

Much like the previous day, our first day in the Lake District involved quite a bit of travel, and not so much in the way of birding. We did, however, see some great birds, and some lovely new scenery along the way. *But isn't that just one of the many things that makes birding and travel in Chile so enjoyable?* Starting with a flight to Puerto Montt – during which we also saw some spectacular scenery – the first half of the day was well and truly over by the time we hit the ground.

Chilean Woodstar by Rich Lindie

A quick lunch at the airport then followed, before we finally found ourselves in the field, this time on the shores south of town, where some roadside bamboo and scrub yielded our first and only views of the strange Des Murs's Wiretail and Ochre-flanked Tapaculo. Both, of course, took a little effort to see, so it was late in the day by the time we began our journey north, into the Lake District and Puyehue National Park. Along the way, we stopped for a young *Buteo* that initially had us thinking White-throated or Rufous-tailed Hawk, and our only Slender-billed Parakeet of the trip, before a race through the forest finally brought us to our accommodation at the Ski Resort in Antillanca.

We needn't have rushed to bed, though, as the following morning was completely washed out. As was much of the early afternoon. Eventually, however, the skies cleared enough for a little birding, prompting us to rush out and grab what we could. We did pretty well under the circumstances, though we still ended the day with plenty of work to do the next day. Of what we did see, highlight sightings included close-ups of Austral Parakeet – feeding just above our heads, a wonderfully cooperative Green-backed Firecrown, three Patagonian Tyrants – including one on a nest, a Dark-bellied Cinclodes, a handful of Patagonian Sierra Finches and, for some, a wonderful White-throated Hawk.

By the following morning, Black-throated Huet-huet and Magellanic Woodpecker must have been just about the only birds occupying the minds of most of the group. We had tried, unsuccessfully, to get a few huets-huets to show, and we had had neither sight nor sound of the woodpecker at all by that point – our final chance for both species!

Austral Negrito by Rich Lindie

The woodpecker, mercifully, put in an appearance during our first attempt to see a huet-huet – drumming just loud enough for us to hear it above the recording of the huet-huet, and staying around long enough for us to find and photograph it. And then some! That was before breakfast, too, so things were looking up. Heading up above the treeline after breakfast, we quickly found our two main targets – Yellow-browed Finch and Dark-faced Ground Tyrant, before taking a little time to admire the truly spectacular scenery. Not only had the weather finally cleared up enough for us to go birding, but the skies had finally opened up to reveal the awe-inspiring setting we had been in all along! Osorno volcano was visible in all its glory, as were near and distant peaks – varying from forested knolls to barren mountaintops and scree-slopes. Much picture taking ensued. Before long, we were back on the trail of huet-huets, though. One after the other, they gave us the slip until, finally, one decided to perch in a visible spot. More importantly, for long enough to get everyone on it; nothing short of eleventh-hour magic! Or was it just pure relief? We drove back to Puerto Montt after that, not seeing a single Slender-billed Parakeet along the way, but pretty happy with our time in Puyuhue, regardless. From Puerto Montt, we took the short hop to Punta Arenas, where a late dinner saw in the remainder of the day's light.

Two seriously action-packed and long days lay ahead of us as we awoke the following morning – much of it to be spent on the main island of Tierra del Fuego. We began the epic with a 2-hour ferry ride across the Strait of Magellan, to the small town of Porvenir. During the ferry ride itself, we saw dozens upon dozens of Black-browed Albatrosses, as well as many Wilson's Storm Petrels, several Southern Giant Petrels and, our main target, Magellanic Diving Petrel – also in good numbers. On the island, we dropped our bags off at our guesthouse and made our way straight towards the King Penguin colony in Useless Bay.

Far South

Our first stop along the way produced a trip-highlight in the form of a vagrant Hooded Grebe, followed shortly by a Patagonian Yellow Finch. Several groups of Upland Goose and Guanaco were also enjoyed, as well as small numbers of Ruddy-headed Goose. The King Penguins were, naturally, one of the day's biggest highlights, and, while we were watching them, we also got to enjoy great sightings of Two-banded Plover, White-rumped Sandpiper, Austral Negrito and singing Long-tailed Meadowlarks. On the return journey, we took a close look at Magellanic Oystercatcher during a stop for some Ashy-headed Geese, stopped for a couple of Short-billed Miners, and were brought to a halt by a roadside Large Hairy Armadillo. Our penultimate stop of the day, just on the edge of town, was for a South American Snipe that was spotted from the bus; while our final stop was for steamer ducks in the bay below town.

Day two of our adventures in the far south began even earlier than the one before; and just as well, as we had a lot of ground to cover and a lot of birds to see! Starting with a journey to the north of the island, we watched as the miles and miles of steppe passed, ever vigilant for new birds along the way. Vigilance that paid off, of course, as a Magellanic Plover was spotted right next to the road! This saved us at least an hour of walking later in the day. We also enjoyed great views of a family of Lesser Horned Owls by the roadside – even on a post beside the bus at one point. We then bought chocolates as payment for the use of a bathroom before jumping on the short ferry back to the mainland and the port of Punta Delgada – the ferry ride itself providing us with great views of Magellanic Penguin. A little way north of Punta Delgada, we then successfully twitched Silver Teal, *and* picked up a Red-fronted Coot as a bonus.

We hit the main road south for an hour or so after that, before heading north, straight toward the border with Argentina. After stopping to photograph a Lesser Rhea, that is. At our first planned stop en route, Band-tailed Earthcreeper and Austral Canastero gave up without any trouble. Then it was a Chocolate-vented Tyrant that put in an appearance a little further along the road. After that, miles and miles passed until we successfully found our first Tawny-throated Dotterels, preceded only briefly by our first Common Miner. The final major target, White-bridled Finch, also took some searching to find, though they turned out to be pretty common once we did. Not that we appreciated that first gorgeous male any less by the end of the day! Finally, reaching route 9, we headed south to Punta Arenas for the remainder of the afternoon, arriving just in time for a short foray to the pier, to study the shags and gulls, before retiring to bed for a much-needed night's rest.

Sadly, that evening saw in the last day we would spend together as a group, as many would not be on the same flight back to Santiago the next day. For those of us on the same flight, things ended not long after, as we said our goodbyes later that morning – the end to yet another highly successful Rockjumper tour to wonderful Chile, and one I (and Kim) were thrilled to have shared with such a lovely group!

Annotated List of species recorded

Note: Number in brackets () indicate number of days on the tour the species was recorded.

List powered through the report generator of our partner iGoTerra.

Birds (273 in total: 273 seen)

Nomenclature and taxonomy follows Gill, F and D Donsker (Eds). 2018. IOC World Bird List (v 8.2).

Status codes: **E** = Endemic, **NE** = Near-endemic, **I** = Introduced

IUCN codes: **CR** = Critically endangered, **EN** = Endangered, **VU** = Vulnerable, **EW** = Extinct in the Wild, **NT** = Near Threatened, **DD** = Data Deficient

Rheas *Rheidae*

Lesser Rhea (NT)

Rhea pennata

(2) Lauca NP 6.12 and Pali Aike area, Patagonia, Región de Magallanes 19.12.

Tinamous *Tinamidae*

Ornate Tinamou

Nothoprocta ornata ornata

(1) Putre, Región de Arica y Parinacota 6.12.

Chilean Tinamou

Nothoprocta perdicaria

(1) Farellones, Región Metropolitana 8.12.

Ducks, Geese & Swans *Anatidae*

Coscoroba Swan

Coscoroba coscoroba

(4) Cartagena--Humedal de(wetland), Región de Valparaíso 10.12, Laguna de Batuco, Región Metropolitana 12.12 and Tierra del Fuego 18.12.

Black-necked Swan

Cygnus melancoryphus

(4) Cartagena--Humedal de(wetland), Región de Valparaíso 10.12, Puerto Montt--Chinquihue, Región de los Lagos 15.12 and Tierra del Fuego 18.12.

Flying Steamer Duck

Tachyeres patachonicus

(1) Tierra del Fuego 18.12.

Fuegian Steamer Duck	<i>Tachyeres pteneres</i>
(1) Tierra del Fuego 18.12.	
Torrent Duck	<i>Merganetta armata</i>
(2) El Yeso Valley, Región Metropolitana 9.12 and Rio Maule--Laguna Colbun, Región del Maule 13.12.	
Andean Goose	<i>Chloephaga melanoptera</i>
(3) Lauca NP 6.12, Lauca NP 7.12 and El Yeso Valley, Región Metropolitana 9.12.	
Upland Goose	<i>Chloephaga picta picta</i>
(4) Tierra del Fuego 18.12.	
Ashy-headed Goose	<i>Chloephaga poliocephala</i>
(2) Tierra del Fuego 18.12.	
Ruddy-headed Goose	<i>Chloephaga rubidiceps</i>
(1) Tierra del Fuego 18.12.	
Crested Duck	<i>Lophonetta specularioides</i>
(5) Lauca NP 6.12, Lauca NP 7.12, El Yeso Valley, Región Metropolitana 9.12 and Tierra del Fuego 18.12.	
Bronze-winged Duck (NT)	<i>Speculanus specularis</i>
(1) Rio Maule--Laguna Colbun, Región del Maule 13.12.	
Puna Teal	<i>Spatula puna</i>
(2) Lauca NP 6.12 and Lauca NP 7.12.	
Silver Teal	<i>Spatula versicolor</i>
(1) Pali Aike area, Patagonia, Región de Magallanes 19.12.	
Red Shoveler	<i>Spatula platalea</i>
(2) Cartagena--Humedal de(wetland), Región de Valparaíso 10.12 and Laguna de Batuco, Región Metropolitana 12.12.	
Cinnamon Teal	<i>Spatula cyanoptera</i>
(3) Arica--Humedal Rio Lluta, Región de Arica y Parinacota 3.12, Arica--Humedal Rio Lluta, Región de Arica y Parinacota 5.12 and Laguna de Batuco, Región Metropolitana 12.12.	
Chiloe Wigeon	<i>Mareca sibilatrix</i>
(6) El Yeso Valley, Región Metropolitana 9.12, Cartagena--Humedal de(wetland), Región de Valparaíso 10.12, Laguna de Batuco, Región Metropolitana 12.12, Rio Maule--Laguna Colbun, Región del Maule 13.12 and Tierra del Fuego 18.12.	
Yellow-billed Pintail	<i>Anas georgica spinicauda</i>
(5) Lauca NP 7.12, Cartagena--Humedal de(wetland), Región de Valparaíso 10.12, Laguna de Batuco, Región Metropolitana 12.12 and Rio Maule--Laguna Colbun, Región del Maule 13.12.	
Yellow-billed Teal	<i>Anas flavirostris</i>
(5) Lauca NP 6.12, Lauca NP 7.12, El Yeso Valley, Región Metropolitana 9.12, Cartagena--Humedal de(wetland), Región de Valparaíso 10.12 and Laguna de Batuco, Región Metropolitana 12.12.	
Rosy-billed Pochard	<i>Netta peposaca</i>
(1) Laguna de Batuco, Región Metropolitana 12.12.	
Black-headed Duck	<i>Heteronetta atricapilla</i>
(1) Cartagena--Humedal de(wetland), Región de Valparaíso 10.12.	
Andean Duck	<i>Oxyura ferruginea ferruginea</i>
(1) Lauca NP 7.12.	

Lake Duck*Oxyura vittata*

 (3) Cartagena--Humedal de(wetland), Región de Valparaíso 10.12 and Tierra del Fuego 18.12.
- Andean Negrito** *Lessonia oreas*
 (2) Lauca NP 6.12 and Lauca NP 7.12.
- Spectacled Tyrant** *Hymenops perspicillatus andinus*
 (2) Rocas de Santo Domingo--Humedal Rio Maipo, Región de Valparaíso 10.12 and Rio Maule--Laguna Colbun, Región del Maule 13.12.
- Puna Ground Tyrant** *Muscisaxicola juninensis*
 (2) Lauca NP 6.12 and Lauca NP 7.12.
- Cinereous Ground Tyrant** *Muscisaxicola cinereus cinereus*
 (1) El Yeso Valley, Región Metropolitana 9.12.
- White-fronted Ground Tyrant** *Muscisaxicola albifrons*
 (1) Lauca NP 6.12.

- Ochre-naped Ground Tyrant** *Muscisaxicola flavinucha*
 (3) Lauca NP 6.12, Lauca NP 7.12 and El Yeso Valley, Región Metropolitana 9.12.
- Rufous-naped Ground Tyrant** *Muscisaxicola rufivertex*
 (1) Lauca NP 7.12.
- Dark-faced Ground Tyrant** *Muscisaxicola maclovianus mentalis*
 (1) Putre, Región de Arica y Parinacota 17.12.
- White-browed Ground Tyrant** *Muscisaxicola albilora*
 (2) Farellones, Región Metropolitana 8.12 and El Yeso Valley, Región Metropolitana 9.12.
- Black-fronted Ground Tyrant** *Muscisaxicola frontalis*
 (1) El Yeso Valley, Región Metropolitana 9.12.
- Black-billed Shrike-Tyrant** *Agriornis montanus*
 (2) Putre, Región de Arica y Parinacota 5.12 and Putre, Región de Arica y Parinacota 6.12.
- Fire-eyed Diucon** *Xolmis pyrope*
 (6) El Yeso Valley, Región Metropolitana 9.12, Cachagua, Región de Valparaíso 11.12, La Campana NP--Palmas de Ocoa, Región de Valparaíso 12.12, Puerto Montt--Chinquihue, Región de los Lagos 15.12 and Tierra del Fuego 18.12.
- Chocolate-vented Tyrant** *Neoxolmis rufiventris*
 (1) Pali Aike area, Patagonia, Región de Magallanes 19.12.
- Patagonian Tyrant** *Colorhamphus parvirostris*
 (1) Puyehue NP--Antillanca, Región de los Lagos 16.12.

Cotingas Cotingidae

- Rufous-tailed Plantcutter** *Phytotoma rara*
 (3) Farellones, Región Metropolitana 8.12 and Rocas de Santo Domingo--Humedal Rio Maipo, Región de Valparaíso 10.12.

Swallows Hirundinidae

- Chilean Swallow** *Tachycineta leucopyga*
 (9) Rocas de Santo Domingo--Humedal Rio Maipo, Región de Valparaíso 10.12, Puyehue NP--Antillanca, Región de los Lagos 16.12, Putre, Región de Arica y Parinacota 17.12 and Tierra del Fuego 18.12.
- Blue-and-white Swallow** *Notiochelidon cyanoleuca patagonica*
 (8) Lluta Valley, Región de Arica y Parinacota 5.12, Putre, Región de Arica y Parinacota 6.12, Farellones, Región Metropolitana 8.12, El Yeso Valley, Región Metropolitana 9.12 and Rocas de Santo Domingo--Humedal Rio Maipo, Región de Valparaíso 10.12.
- Andean Swallow** *Haplochelidon andecola andecola*
 (1) Lauca NP 6.12.
- Barn Swallow** *Hirundo rustica erythrogaster*
 (2) Rocas de Santo Domingo--Humedal Rio Maipo, Región de Valparaíso 10.12.
- American Cliff Swallow** *Petrochelidon pyrrhonota pyrrhonota*
 (1) Lluta Valley, Región de Arica y Parinacota 5.12.

Wrens Troglodytidae

- Grass Wren** *Cistothorus platensis hornensis*
 (1) Rocas de Santo Domingo--Humedal Rio Maipo, Región de Valparaíso 10.12.

House Wren*Troglodytes aedon*

(10) Lluta Valley, Región de Arica y Parinacota 5.12, El Yeso Valley, Región Metropolitana 9.12, Rocas de Santo Domingo--Humedal Rio Maipo, Región de Valparaíso 10.12, La Campana NP--Palmas de Ocoa, Región de Valparaíso 12.12, Puyehue NP--Antillanca, Región de los Lagos 16.12 and Tierra del Fuego 18.12.

Mockingbirds, Thrashers *Mimidae***Chilean Mockingbird***Mimus thenca*

(6) Farellones, Región Metropolitana 8.12, El Yeso Valley, Región Metropolitana 9.12, Rocas de Santo Domingo--Humedal Rio Maipo, Región de Valparaíso 10.12 and La Campana NP--Palmas de Ocoa, Región de Valparaíso 12.12.

Thrushes and Allies *Turdidae***Chiguanco Thrush***Turdus chiguanco*

(3) Socoroma, Región de Arica y Parinacota 5.12, Putre, Región de Arica y Parinacota 6.12 and Putre, Región de Arica y Parinacota 7.12.

Austral Thrush*Turdus falcklandii magellanicus*

(10) Farellones, Región Metropolitana 8.12, El Yeso Valley, Región Metropolitana 9.12, Puyehue NP--Antillanca, Región de los Lagos 16.12, Putre, Región de Arica y Parinacota 17.12 and Tierra del Fuego 18.12.

Old World Sparrows *Passeridae***House Sparrow***Passer domesticus domesticus*

Observed 6 day(s) in total.

Wagtails, Pipits *Motacillidae***Peruvian Pipit***Anthus peruvianus*

(1) Arica--Humedal Rio Lluta, Región de Arica y Parinacota 3.12.

Correndera Pipit*Anthus correndera*

(4) Rocas de Santo Domingo--Humedal Rio Maipo, Región de Valparaíso 10.12, Laguna de Batuco, Región Metropolitana 12.12 and Tierra del Fuego 18.12.

Finches *Fringillidae***Black-chinned Siskin***Spinus barbatus*

(3) Rocas de Santo Domingo--Humedal Rio Maipo, Región de Valparaíso 10.12.

Hooded Siskin*Spinus magellanicus urubambensis*

(3) Putre, Región de Arica y Parinacota 5.12, Lauca NP 6.12 and Putre, Región de Arica y Parinacota 7.12.

Black Siskin*Spinus atratus*

(1) Lauca NP 7.12.

Yellow-rumped Siskin*Spinus uropygialis*

(2) Farellones, Región Metropolitana 8.12 and El Yeso Valley, Región Metropolitana 9.12.

New World Buntings and Sparrows *Passerellidae***Rufous-collared Sparrow***Zonotrichia capensis*

(16) Arica--Humedal Rio Lluta, Región de Arica y Parinacota 3.12, Puyehue NP--Antillanca, Región de los Lagos 16.12 and Tierra del Fuego 18.12.

Oropendolas, Orioles & Blackbirds *Icteridae***Peruvian Meadowlark***Leistes bellicosus albipes*

(3) Arica--Humedal Rio Lluta, Región de Arica y Parinacota 3.12, Arica--Humedal Rio Lluta, Región de Arica y Parinacota 5.12 and Arica City, Región de Arica y Parinacota 7.12.

Long-tailed Meadowlark*Leistes loyca loyca*

(4) El Yeso Valley, Región Metropolitana 9.12, Rocas de Santo Domingo--Humedal Rio Maipo, Región de Valparaíso 10.12 and Tierra del Fuego 18.12.

Shiny Cowbird*Molothrus bonariensis bonariensis*

(2) Lluta Valley, Región de Arica y Parinacota 5.12 and Santiago--City, Región Metropolitana 8.12.

Austral Blackbird*Curaeus curaeus*

(4) Rocas de Santo Domingo--Humedal Rio Maipo, Región de Valparaíso 10.12 and Puyehue NP--Antillanca, Región de los Lagos 16.12.

Yellow-winged Blackbird*Agelasticus thilius thilius*

(3) Santiago--City, Región Metropolitana 8.12, Rocas de Santo Domingo--Humedal Rio Maipo, Región de Valparaíso 10.12 and Laguna de Batuco, Región Metropolitana 12.12.

Tanagers and allies *Thraupidae***Blue-and-yellow Tanager***Thraupis bonariensis darwinii*

(2) Putre, Región de Arica y Parinacota 6.12 and Socoroma, Región de Arica y Parinacota 7.12.

Cinereous Conebill*Conirostrum cinereum littorale*

(3) Caleta Camarones, Región de Tarapacá 4.12, Lluta Valley, Región de Arica y Parinacota 5.12 and Putre, Región de Arica y Parinacota 6.12.

Tamarugo Conebill (VU)*Conirostrum tamarugense*

(1) Chaca Valley, Región de Arica y Parinacota 4.12.

Black-throated Flowerpiercer*Diglossa brunneiventris brunneiventris*

(1) Putre, Región de Arica y Parinacota 6.12.

Black-hooded Sierra Finch*Phrygilus atriceps*

(2) Putre, Región de Arica y Parinacota 5.12 and Socoroma, Región de Arica y Parinacota 7.12.

Grey-hooded Sierra Finch*Phrygilus gayi*

(6) Farellones, Región Metropolitana 8.12, El Yeso Valley, Región Metropolitana 9.12, Cachagua, Región de Valparaíso 11.12, La Campana NP--Palmas de Ocoa, Región de Valparaíso 12.12 and Tierra del Fuego 18.12.

Patagonian Sierra Finch*Phrygilus patagonicus*

(2) Puyehue NP--Antillanca, Región de los Lagos 16.12 and Putre, Región de Arica y Parinacota 17.12.

Mourning Sierra Finch*Phrygilus fruticeti*

(5) Socoroma, Región de Arica y Parinacota 5.12, Lauca NP 6.12, Putre, Región de Arica y Parinacota 7.12, El Yeso Valley, Región Metropolitana 9.12 and Tierra del Fuego 18.12.

Plumbeous Sierra Finch*Phrygilus unicolor unicolor*

(3) Lauca NP 6.12, Lauca NP 7.12 and El Yeso Valley, Región Metropolitana 9.12.

- White-throated Sierra Finch** *Phrygilus erythronotus*
 (2) Lauca NP 6.12 and Lauca NP 7.12.
- Ash-breasted Sierra Finch** *Phrygilus plebejus plebejus*
 (3) Socoroma, Región de Arica y Parinacota 5.12, Lauca NP 6.12 and Socoroma, Región de Arica y Parinacota 7.12.
- Band-tailed Sierra Finch** *Phrygilus alaudinus*
 (1) Rio Maule--Laguna Colbun, Región del Maule 13.12.
- White-bridled Finch** *Melanodera melanodera princetoniana*
 (1) Pali Aike area, Patagonia, Región de Magallanes 19.12.
- Yellow-bridled Finch** *Melanodera xanthogramma*
 (1) Putre, Región de Arica y Parinacota 17.12.
- White-winged Diuca Finch** *Diuca speculifera speculifera*
 (2) Lauca NP 6.12 and Lauca NP 7.12.
- Common Diuca Finch** *Diuca diuca*
 (3) El Yeso Valley, Región Metropolitana 9.12, Laguna de Batuco, Región Metropolitana 12.12 and Altos del Lircay, Región del Maule 13.12.
- Slender-billed Finch (NT)** *Xenospingus concolor*
 (3) Arica--Humedal Rio Lluta, Región de Arica y Parinacota 3.12 and Arica--Humedal Rio Lluta, Región de Arica y Parinacota 5.12.
- Bright-rumped Yellow Finch** *Sicalis uropigyalis uropigyalis*
 (1) Visviri 6.12.
- Greater Yellow Finch** *Sicalis auriventris*
 (2) Farellones, Región Metropolitana 8.12 and El Yeso Valley, Región Metropolitana 9.12.
- Greenish Yellow Finch** *Sicalis olivascens chloris*
 (3) Socoroma, Región de Arica y Parinacota 5.12, Putre, Región de Arica y Parinacota 6.12 and Socoroma, Región de Arica y Parinacota 7.12.
- Patagonian Yellow Finch** *Sicalis lebruni*
 (1) Tierra del Fuego 18.12.
- Grassland Yellow Finch** *Sicalis luteola luteiventris*
 (3) Rocas de Santo Domingo--Humedal Rio Maipo, Región de Valparaíso 10.12 and Rio Maule--Laguna Colbun, Región del Maule 13.12.
- Blue-black Grassquit** *Volatinia jacarina peruviensis*
 (1) Lluta Valley, Región de Arica y Parinacota 5.12.
- Chestnut-throated Seedeater** *Sporophila telasco*
 (1) Lluta Valley, Región de Arica y Parinacota 5.12.
- Band-tailed Seedeater** *Catamenia analis analis*
 (3) Lluta Valley, Región de Arica y Parinacota 5.12, Putre, Región de Arica y Parinacota 6.12 and Putre, Región de Arica y Parinacota 7.12.

Mammals (14 in total: 14 seen)

Status codes: **E** = Endemic, **NE** = Near-endemic, **I** = Introduced
