## Common name

Native Wintercress

## Family

Brassicaceae

## Where found

Damp areas near high-altitude streams. Kosciuszko National Park, and the Brindabella Range ACT.

## Notes

**Annual** or **biennial** herb to 0.90 m high, hairless. Basal leaves oval, sometimes lobed, with long stalks. Stem leaves **alternating** up the stems, the lower leaves **dissected**, with up to 6 pairs of lobes, upper stem leaves **simple** and more or less toothed or dissected with one pair of **lateral** lobes, the **terminal** lobe much larger. Flowers with 4 **petals** each 5–6.6 mm long. Flowers in clusters. Flowers summer. Seed cases 2–6 cm long, 2–2.5 mm wide, its stalk **erect** to **spreading**, 3–7 mm long, to 1 mm wide. Seeds with a narrow warty **wing**.

All native plants on unleased land in the ACT are protected.

Vulnerable Vic.
