

Plants of South Eastern New South Wales

Line drawings. e. flowering branch; flower; leaf lower surface detail. A. Barley, National Herbarium of Victoria, © 2021 Royal Botanic Gardens Board

Common name

Brown pomaderris, Rufous pomaderris

Family

Rhamnaceae

Where found

Dry **forest**, **woodland**, and stream banks. Around the Colo, Nepean and Hawkesbury Rivers, including the Bargo area and near Camden. Also in Gippsland, Vic.

Notes

Shrub to 4 m high. Stems with long **spreading** brownish, greyish, or pale **simple** hairs above a short white **tomentum**. Leaves **alternating** up the stems, 1.5–4 cm long, 8–15 mm wide, upper surface dark green and hairless with **veins impressed**, **lateral** veins extending to the margins, terminating in minute hair tufts; lower surface densely hairy with long brownish or greyish hairs above a short white or greyish **stellate** tomentum, margins more or less toothed, and sometimes curved down, tips blunt. Flowers yellowish to cream, externally grey- or brownish-hairy, with 5 **sepals** each 1.5–1.7 mm long, falling early, and 0 **petals**, in dense many-flowered branched clusters 30–50 mm long overall. Flowers Spring.

Vulnerable Australia. Endangered NSW. Provisions of the NSW Biodiversity Conservation Act 2016 No 63 relating to the protection of protected plants generally also apply to plants that are a threatened species.

Vulnerable Vic.
