

Spill Control Products

Treat chemical spills in the lab or on the plant floor with a single step!

Order Spill-X to treat spills wherever chemicals are used—choose from spill treatment kit, agent refill, or bulk agent refill. Each agent is uniquely colored for easy identification.

Spill-X-A® Acid Neutralizer neutralizes and solidifies most organic and inorganic acids, including hydrofluoric acid.

Spill-X-C® Caustic Neutralizer neutralizes and solidifies many common caustics and organic bases, including sodium hydroxide and hydrazine.

Spill-X-S® Solvent Adsorbent reduces vapors released during cleanup and elevates flash point of flammable organic spills. Treats spills of many common solvents, reagents, and fuels. Does not treat organic peroxides or hydrazine compounds.

Spill-X-FP® Formaldehyde Polymerizer is formulated to rapidly treat formaldehyde spills and reduce their vapors to limit contamination. Reacts with aqueous formaldehyde to form a polyoxylin polymer.

Note: Where formaldehyde solution strength is less than 15%, apply Spill-X-S solvent adsorbent to solidify remaining liquid.

Spill Treatment Kits

Spill cleanup kits feature easy-to-use shaker containers with instructions to make cleanup quick.

What's included:

- One spill treatment guide with instructions for start-to-finish cleanup
- Six easy-to-handle polypropylene containers for pouring or shaker-type application of agent
- Convenient green plastic case for compact storage
- One pair of rubber gloves and safety goggles
- 100 pH test papers with color guide
- Scraper, two pickup pans, and six disposal bags

86292-08

Spill Kit Agent Refills

Refill agents are available in packages of six easy-to-store polypropylene containers. Order to replace specific or multipurpose spill treatment kit containers.

Bulk Agent Refills

Economy-size pails of control agent cover the following size spills:

- Spill-X-A acid neutralizer for 5-gal. (19-L) spill
- Spill-X-C caustic neutralizer for 3-gal. (11-L) spill
- Spill-X-S solvent adsorbent for 3-gal. (11-L) spill
- Spill-X-FP formaldehyde polymerizer agent (coverage is based on formaldehyde strength)

Guide and instructions are included with each six-pack or pail for start-to-finish cleanup.

Hazardous Spill Cleanup Kit

Neutralize, stabilize, and solidify dangerous acids, bases, organics, and aqueous solutions

Sturdy wall-mount dispenser contains:

- Red Z® solidifier
- Green Z® solidifier
- Petro Lock solidifier
- Acid Lock® solidifier
- Alky® solidifier
- One pair of nitrile acid-resistant gloves
- Pick-up scoop with scraper
- Six waste bags
- Hazardous and nonhazardous labels
- Hazardous-material accident reporting kit
