"The Greenhouses Down From The Road"

FOREWORD

First allow us to thank those friends who helped increase our 1929 business by a good margin over 1928. May we continue to serve and to please you.

We will have special lists this year as follows: Easter, Fall Bulbs, and Christmas. Any of these will be sent you if desired.

Many items that we handle are not listed. In particular may we mention trees and shrubs. Prices of any particular kinds are gladly sent upon request.

Our catalogue is somewhat condensed from that of last year. As usual the emphasis is on Perennials. We bespeak particular notice for our rock-garden plants.

Visitors are welcome. We take pride in the fact that six colleges are represented on our staff thus assuring you of first-class service.

General Directions

Order in Time. This is particularly important in the spring and fall on account of the danger in planting many items too late in either season. Moreover, you are surer of obtaining your full list although we strive to fill your orders at any time.

Forwarding. Most of our goods are sent by express, purchaser paying charges. Cut flowers and floral designs are sent by mail whenever possible, purchaser paying postage. If customers desire plants or bulbs sent by parcel post, simply add fifteen per cent of order to payment.

Local Delivery. We give free delivery on all orders of one dollar and fifty cents or more in the towns of Wakefield and Stoneham, besides the Winchester, Melrose and Choate Memorial Hospitals, and the New England Sanitarium and Hospital. A delivery charge of fifteen cents is placed on all orders of less than one dollar and fifty cents in Wakefield and Stoneham and to the above-mentioned hospitals.

Free delivery is provided on all orders of \$5.00 or more in all places within a ten-mile radius; on all orders of \$10.00 or more within a fifteen-mile radius; and on all orders of \$20.00 or more within a twenty-mile radius.

In any cases not covered above, delivery charges are made according to distance and value of order.

IMPORTANT: The above free delivery statements do not necessarily hold in regard to materials supplied for landscape work and do not hold for items listed under Garden Accessories.

Errors. While we do not wish to make errors, we are but human. Therefore, kindly inform us at any time—and immediately—of any error that may occur in any order.

Cash With Order. This is absolutely necessary except in the case of those who have regular accounts with us.

Non-Warranty. Customers realize, of course, that it is to our best interests to send out material of good quality. As so many accidents happen after goods are out of our hands, it is obviously impossible for us to guarantee our products in any way, shape or manner. We, therefore, give no warranty as to description, quality or productiveness of any of the plants, bulbs or other materials we send out, and will not be in any way responsible for any results therefrom, and every order for articles named in this catalogue will be executed on these conditions only.

To Reach Our Place. Visitors coming from Boston should take the Fellsway to Stoneham, thence on the Wakefield road about one mile. Coming from the North Shore, come through South Lynnfield. Coming from the north, take the road to Reading from either Lowell or Lawrence; from Reading take the Quannapowitt Lake road to Wakefield, thence about one mile on the Stoneham road. Visitors coming by train will find the following stations about equidistant from our place: Wakefield Junction, Wakefield Upper Station and Farm Hill (Stoneham). We are on Route 128 about half-way between Wakefield and Stoneham Squares.

Landscape Design and Execution

A Sample of Our Work

Good landscape design is the only type in which we are interested. In general we believe that competitive propositions are not to the advantage of either the architect or the client, especially if the award is made solely or largely on the amount of the bid.

As a prominent cement construction man once said: "I would no more have you execute a landscape design for me at a contract price than I would have an interior decorator do a room for me at a stated figure."

We welcome inquiries where high-grade work is desired and will be glad to call on you at your convenience. The size of the grounds is not a vital factor.

Our force is equipped to do pruning of shrubs, and deciduous and coniferous trees. Proper pruning is necessary for the best results from your plantings.

Rock garden work is a special line with us as those who have seen our exhibits at the Massachusetts Horticultural Society and elsewhere realize.

(N. B. See our list of Perennial Transplants on Page 16)

Annual Plants

We have reduced our list of annuals, keeping those for which there is a marked demand.

Prices are for flatted plants. Our customers will find them of good quality, yet inexpensive.

Mail orders are acceptable. Add 15 per cent of order value to your check for carrying charges. For less than six of a kind the price is ten cents straight. Fifty or more of a kind take the hundred rate. (Simply multiply the dozen price by 7 to find the price of a hundred.)

Perennial Border Plants

We are proud of our collection of perennials. It is the type that prompts the words: "You have one of the most interesting gardens we have ever walked through." Variety, with special emphasis on the unusual, is our aim.

Sedum is our first concentrated genus. Here we are ever on the lookout for the rare species and varieties. Several kinds that we imported from Holland are now released by the government and will be sold by us this spring. *SEDUM ELEGANS* is perhaps the outstanding specie of these releases and is a wonderful addition to our rock-garden list.

Many kinds of perennials are not listed here due to the small numbers of them in our gardens. Some of these, however, may be sold to interested customers.

The distinction between the "Perennial Border Plant" list and that of "Rock Garden Plants" is bound to be somewhat artificial. Rock gardens vary so much that a standardized list of suitable species is impossible.

Unless otherwise noted, 30 CENTS EACH, \$2.50 PER DOZEN.

Where price is \$3.00 per dozen, 35 cents is the charge for a single plant. Where price is \$3.50 or \$4.00 per dozen, 40 cents is the charge for a single plant. Where price is \$4.50 or \$5.00 per dozen, 50 cents is the charge for a single plant.

Dozen prices not good for less than six of a variety.

The given price is always the dozen price unless otherwise noted.

These prices refer, of course, to young plants or divisions of older ones where division is practicable. If you are interested in larger plants we will quote prices on same if we have them in stock.

All prices subject to change without notice.

Look over our List of Transplants immediately following our regular lists. Many good plants may be purchased from that list at a considerable saving.
