In an establishment of this nature there of course must exist an ardent and continual desire of extending, as well as diffusing the collection. Persons in Foreign Countries, who are animated by a similar passion, are respectfully invited to a Correspondence, which can hardly fail to become mutually advantageous. A liberal price is at all times ready to be given for fresh seeds or living plants, if new or rare, from whatever quarter of the globe they may have been brought.

MARCH 1, 1823.—This Day is published,
