

will attend the closed meetings. Certain staff members who have an interest in the matters may also be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, one or more of the exemptions set forth in 5 U.S.C. 552b(c) (4), (8), (9)(A) and (10) and 17 CFR 200.402(a) (4), (8), (9)(i) and (10), permit consideration of the scheduled matters at closed meetings.

Commissioner Lochner, as duty officer, voted to consider the items listed for the closed meetings in closed session.

The subject matter of the closed meeting scheduled for Tuesday, December 4, 1990, at 2:30 p.m., will be:

- Institution of injunctive actions.
- Authorize the institution of administrative proceedings of an enforcement nature.
- Settlement of administrative proceeding of an enforcement nature.

Settlement of injunctive action.

The subject matter of the open meeting scheduled for Thursday, December 6, 1990, at 10:00 a.m., will be:

Oral argument on an appeal by the Division of Investment Management from the decision of an administrative law judge in the Matter of CSW Credits Inc. and Central and South West Corporation. For further information, please contact Herbert V. Efron at (202) 272-7400.

The subject matter of the closed meeting scheduled for Thursday, December 6, 1990, following the 10:00 a.m. open meeting, will be:

Post oral argument discussion.

The subject matter of the open meeting scheduled for Thursday, December 6, 1990, at 2:00 p.m., will be:

Oral argument on cross-appeals by William L. Kicklighter, Jr., a salesman for the former brokerage firm of Hereth, Orr & Jones, Inc.

and the Division of Enforcement from an administrative law judge's initial decision. For further information, please contact Richard E. Connor at (202) 272-3981.

The subject matter of the closed meeting scheduled for Thursday, December 6, 1990, following the 2:00 p.m., open meeting, will be:

Post oral argument discussion.

At times, changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: Stephen Young at (202) 272-2000.

Dated: November 27, 1990.

Jonathan G. Katz,
Secretary.

Corrections

Federal Register

Vol. 55, No. 231

Friday, November 30, 1990

This section of the FEDERAL REGISTER contains editorial corrections of previously published Presidential, Rule, Proposed Rule, and Notice documents. These corrections are prepared by the Office of the Federal Register. Agency prepared corrections are issued as signed documents and appear in the appropriate document categories elsewhere in the issue.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

7 CFR Part 301

[Docket No. 90-114]

RIN 0579-AA29

Citrus Canker

Correction

In the correction to rule document 90-21351 appearing on page 48208 in the issue of Monday, November 19, 1990, the CFR line in the heading should read as set forth above.

BILLING CODE 1505-01-D

INTERNATIONAL TRADE COMMISSION

[Investigation No. 731-TA-461 (Final)]

Gray Portland Cement and Cement Clinker From Japan

Correction

In notice document 90-27936 beginning on page 49435 in the issue of Wednesday, November 28, 1990, make the following correction:

At the end of the document, on page 49437, in the first column, the signature and title lines were omitted and should appear as follows:

Kenneth R. Mason,
Secretary.

BILLING CODE 1505-01-D

Part II

Environmental Protection Agency

**Asbestos-Containing Materials in Schools;
EPA-Approved Courses; Notice**

**ENVIRONMENTAL PROTECTION
AGENCY**

[OPTS-62097; FRL-3839-4]

**Asbestos-Containing Materials in
Schools; EPA-Approved Courses
Under the Asbestos Hazard
Emergency Response Act (AHERA)**
AGENCY: Environmental Protection
Agency (EPA).

ACTION: Notice.

SUMMARY: Section 206(c)(3) of the Toxic Substances Control Act (TSCA) directs the EPA Administrator to publish (and revise as necessary) a list of EPA-approved asbestos courses and tests which are consistent with the Agency's Model Accreditation Plan required under section 206(b) of TSCA. Also required is a list of those courses and tests which had qualified for equivalency treatment for interim accreditation during the time period established by Congress in AHERA. Effective July 1990, that time period has expired in all States. All courses approved for interim accreditation have therefore been included in this list for information purposes only.

Section 206(f) of TSCA Title II requires the Administrator to publish quarterly in the **Federal Register**, beginning August 31, 1988, and ending August 31, 1991, a list of EPA-approved asbestos training courses. Accordingly, this **Federal Register** notice presents the thirteenth cumulative listing of EPA-approved courses and also includes a list of State accreditation programs that EPA has approved as meeting the requirements of the Model Plan.

FOR FURTHER INFORMATION CONTACT: Michael M. Stahl, Director, Environmental Assistance Division (TS-799), Office of Toxic Substances, Environmental Protection Agency, Rm. E-545, 401 M St., SW., Washington, DC 20460, Telephone: (202) 382-3949, TDD: (204) 554-0551.

SUPPLEMENTARY INFORMATION: Section 206 of Title II of the Toxic Substances Control Act (TSCA), 15 U.S.C. 2646, required EPA to develop a Model Accreditation Plan by April 20, 1987. The Plan was issued on April 20, 1987, and was published in the **Federal Register** of April 30, 1987 (52 FR 15875), as Appendix C to subpart E, 40 CFR part 763. Persons must receive accreditation in order to inspect school buildings for asbestos, develop school asbestos management plans, and design or conduct school asbestos response actions. Such persons can be accredited by States which are required under Title II to adopt contractor accreditation

plans at least as stringent as the EPA Model Plan, or by completing an EPA-approved training course and passing an examination for such course. The EPA Model Accreditation Plan establishes those areas of knowledge of asbestos inspection, management plan development, and response action technology that persons seeking accreditation must demonstrate and States must include in their accreditation programs.

In the **Federal Register** of October 30, 1987 (52 FR 41826), EPA promulgated a final "Asbestos-Containing Materials In Schools" rule (40 CFR part 763, subpart E) which required all local education agencies (LEAs) to identify asbestos-containing materials (ACM) in their school buildings and take appropriate actions to control the release of asbestos fibers. The LEAs are also required to describe their activities in management plans, which must be made available to the public and submitted to State governors. Under Title II, LEAs are required to use specially trained persons to conduct inspections for asbestos, develop the management plans, and design or conduct major actions to control asbestos. The rule took effect on December 14, 1987.

The length of initial training courses for accreditation under the Model Plan varies by discipline. Briefly, inspectors must take a 3-day training course; management planners must take the inspection course plus an additional 2 days devoted to management planning; and abatement project designers are required to have at least 3 days of training. In addition, asbestos abatement contractors and supervisors must take a 4-day training course and asbestos abatement workers are required to take a 3-day training course. For all disciplines, persons seeking accreditation must also pass an examination and participate in annual re-training courses. A complete description of accreditation requirements can be found in the Model Accreditation Plan at 40 CFR part 763, subpart E, appendix C.I.1.A through E.

In Section 206(c)(3) of Title II, and as amended by section 206(f), the Administrator, in consultation with affected organizations, is directed to publish quarterly a list of asbestos courses and tests in effect before the date of enactment of this title which qualified for equivalency treatment for interim accreditation purposes, and a list of EPA-approved asbestos courses and tests which the Administrator has determined are consistent with the Model Plan and which qualify a contractor for accreditation.

This quarterly notice formerly included a list of laboratories accredited by the National Institute of Standards and Technology (NIST) for the polarized light microscopy (PLM) analysis of bulk materials for asbestos. The EPA is no longer publishing this laboratory list because it is now available from the NIST National Voluntary Laboratory Accreditation Program (NVLAP). Persons wishing to obtain current information on the accreditation of asbestos laboratories in general or the accreditation status of any particular laboratory should contact NIST directly for this information by: (1) Writing to: Chief, Laboratory Accreditation Program, National Institute of Standards and Technology, Bldg. 411, Room A124, Gaithersburg, MD 20899 (please include a self-addressed mailing label); (2) computer-to-computer communication with the NVLAP electronic bulletin board on 301-948-2058; (3) Fax on 301-975-3839; or (4) calling NVLAP on 301-975-4016. EPA interim approval for laboratories ended October 30, 1989, and since that date laboratory asbestos accreditation has been administered by NIST through the NVLAP.

The **Federal Register** notice of October 30, 1987, included EPA's initial list of course approvals. In addition, the initial list also included those State accreditation programs that EPA had approved as meeting the requirements of the Model Plan. The second **Federal Register** notice of February 10, 1988 (53 FR 3982), the third **Federal Register** notice of June 1, 1988 (53 FR 20066), the fourth **Federal Register** notice of August 31, 1988 (53 FR 33574), the fifth **Federal Register** notice of November 30, 1988 (53 FR 48424), the sixth **Federal Register** notice of February 28, 1989 (54 FR 8438), the seventh **Federal Register** notice of May 31, 1989 (54 FR 23392), the eighth **Federal Register** notice of August 31, 1989 (54 FR 36166), the ninth **Federal Register** notice of November 29, 1989 (54 FR 49190), the tenth **Federal Register** notice of February 28, 1990 (55 FR 7202), the eleventh **Federal Register** notice of May 31, 1990 (55 FR 22176), and the twelfth **Federal Register** notice of August 31, 1990 (55 FR 35760) were subsequent listings of cumulative EPA course approvals and EPA-approved State accreditation programs.

This **Federal Register** notice is divided into four units. Unit I discusses EPA approval of State accreditation programs. Unit II covers EPA approval of training courses. Unit III discusses the AHERA-imposed deadline for persons with interim accreditation. Unit IV provides the list of State accreditation programs and training courses approved

by EPA as of October 11, 1990.

Subsequent Federal Register notices will add other State programs as they are approved.

As announced in the Federal Register of September 20, 1989, EPA is no longer accepting for review and contingent approval training courses for AHERA accreditation after October 15, 1989. However, a course's status may change after that cut-off date. For example, a contingently approved course may become fully approved and a course with full approval may become disapproved. As mentioned in the September 1989 Federal Register notice, EPA has said it would continue to conduct full approval audits of courses that already have received contingent approval and review for contingent approval and subsequent full approval, courses received by EPA which had been postmarked on or before October 15, 1989. EPA may reach agreements with States that do not currently have an accreditation program, to turn over responsibility for auditing courses with contingent and full approval, as these States develop accreditation programs.

I. EPA Approval of State Accreditation Programs

As discussed in the Model Plan, EPA may approve State accreditation programs that the Agency determines are at least as stringent as the Model Plan. In addition, the Agency is able to approve individual disciplines within a State's accreditation program. For example, a State that currently only has an accreditation requirement for inspectors can receive EPA approval for that discipline immediately, rather than waiting to develop accreditation requirements for all disciplines in the Model Plan before seeking EPA approval.

As listed in Unit IV, Alaska, Arkansas, Colorado, Delaware, Illinois, Indiana, Iowa, Kansas, Massachusetts, Michigan, Minnesota, Montana, Nebraska, New Jersey, North Dakota, Oregon, Rhode Island, South Dakota, Utah, Virginia, Washington, and Wisconsin have received EPA full approval for two accreditation disciplines, abatement workers as well as contractors and supervisors, that are at least as stringent as the Model Plan. In addition, the States of Colorado, Illinois, Indiana, Iowa, Massachusetts, Michigan, Montana, Nebraska, North Dakota, Rhode Island, South Dakota, Utah, Virginia, and Wisconsin have received full approval for their inspector/management planner and project designer disciplines. Any training courses in those disciplines approved by the aforementioned States

are EPA-approved courses for purposes of accreditation. These training courses are EPA-approved courses for purposes of TSCA Title II in these States and in all States without an EPA-approved accreditation program for the discipline. Current lists of training courses approved by Alaska, Arkansas, Colorado, Delaware, Illinois, Iowa, Massachusetts, Michigan, Minnesota, Montana, Nebraska, New Jersey, North Dakota, Oregon, Rhode Island, South Dakota, Utah, Virginia, Washington, and Wisconsin are listed under Unit IV. Indiana and Kansas do not have separate provider listings since these States have not independently approved any additional courses.

Each State accreditation program may have different requirements for State accreditation. For example, New Jersey requires participants of its courses to take the State exam. Therefore, those New Jersey-approved course sponsors who want to provide training in another State must develop their own examination. They must also submit for EPA approval to the Regional Asbestos Coordinator in their Region, a detailed statement about the development of the course examination as required by the Model Plan.

II. EPA Approval of Training Courses

A cumulative list of training courses approved by EPA is included under Unit IV. The examinations for these approved courses under Unit IV have also been approved by EPA. EPA has three categories of course approval: full, contingent, and approved for interim accreditation. As noted in Unit III, interim accreditation is no longer in effect as of July 1990. Each course that had been approved for interim accreditation will show inclusive dates of this approval. EPA's deadlines for interim accreditation are discussed further in Unit III.

Full approval means EPA has reviewed and found acceptable the course's written submission seeking EPA approval and has conducted an on-site audit and determined that the training course meets or exceeds the Model Plan's training requirements for the relevant discipline.

Contingent approval means the Agency has reviewed the course's written submission seeking EPA approval and found the material to be acceptable (i.e., the written course materials meet or exceed the Model Plan's training course requirements). However, EPA has not yet conducted an on-site audit.

Successful completion of either a fully approved course or a contingently approved course provides full

accreditation for course attendees. If EPA subsequently audits a contingently approved course and withdraws approval due to deficiencies discovered during the audit, future course offerings would no longer have EPA approval. However, withdrawal of EPA approval would not affect the accreditation of persons who took previously offered training courses, including the course audited by EPA.

Thus far, EPA has taken formal action to revoke or suspend course approvals in two instances. EPA revoked approval from Living Word College's inspector and management planner training courses offered after May 6, 1988. Living Word College is located in EPA Region VII. In addition, EPA has suspended approval from the Safety Management Institute's training courses and refresher courses for workers, inspectors/management planners, and contractors/supervisors. The effective date for the course suspensions is the first week of October 1989. Safety Management Institute is located in EPA Region III. Certain EPA-approved State programs have also taken actions to suspend or revoke courses within their jurisdictions.

EPA-approved training courses listed under Unit IV are approved on a national basis. EPA has organized Unit IV by EPA Region to assist the public in locating those training courses that are offered nearby. Training courses are listed in the Region where the training course is headquartered. Although several sponsors offer their courses in various locations throughout the United States, a large number of course sponsors provide most of their training within their own Region.

State accreditation programs may have more stringent accreditation requirements than the Model Plan. As a result, some EPA-approved training courses listed under Unit IV may not meet the requirements of a particular State's accreditation program. Sponsors of training courses and persons who have received accreditation should contact individual States to check on accreditation requirements.

A number of training courses offered before EPA issued the Model Plan equaled or exceeded the subsequently issued Model Plan's training course requirements. These courses are listed under Unit IV as being approved. It should be noted that the persons who have successfully completed these courses are fully accredited; they are not only accredited on an interim basis.

III. Phase out of Interim Accreditation

TSCA Title II enabled EPA to permit persons to be accredited on an interim

basis if they had attended EPA-approved asbestos training before the effective date of the AHERA regulation and passed an asbestos exam. As a result, the Agency approved, on an interim basis, a number of training courses which had been offered prior to the effective date of the AHERA regulation. Only those persons who had taken training courses equivalent to the Model Plan's requirements between January 1, 1985, and December 14, 1987, were considered accredited under these interim provisions. Equivalent means that the courses had to be essentially similar in length and content to the curriculum found in the Model Plan. In addition, an examination had to be essentially equivalent to the examination requirements found in the Model Plan. If no examination was offered at the time, course providers seeking interim approval needed to provide an examination.

Persons who took one of the EPA-approved courses for interim accreditation, and could produce evidence that they had successfully completed the course by passing an examination, were accredited on an interim basis. This accreditation was interim since the person was considered accredited for only 1 year after the date on which the State where the person was employed was required to have established an accreditation program at least as stringent as the EPA Model Plan. TSCA Title II requires States to adopt a contractor accreditation program at least as stringent as the Model Plan within 180 days after the first regular session of the State's legislature convened following the date EPA issued the Model Plan.

The deadline for all States to establish a complete accreditation program was July 1989. In fact, most States were required to have developed a program by July 1988. As a result, after July 1989, the period of interim accreditation expired for persons in all States but Arkansas, Montana, Nevada, North Carolina, Oregon, Pennsylvania, and Texas. In these seven States, the legislatures meet on a bi-annual basis and last met in January 1989; therefore, persons with interim accreditation did not lose their interim status in these States until July 1990. Because interim accreditation has now expired in all States, anyone who had previously received interim accreditation is no longer eligible to perform AHERA work unless he or she has subsequently acquired AHERA accreditation by completing an approved course. To receive accreditation, such persons, if they have not already done so, must

complete an EPA-approved course or a State course under a State plan at least as stringent as the EPA Model Plan. For example, a person who had interim accreditation as a supervisor would have to take a 4-day supervisor's course approved by EPA or an EPA-approved State program to become fully accredited.

IV. List of EPA-Approved State Accreditation Programs and Training Courses

The thirteenth cumulative listing of EPA-approved State accreditation programs and training courses follows. As discussed above, quarterly notifications of EPA approval of State accreditation programs and EPA approval of training courses will be published in subsequent **Federal Register** notices. The closing date for the acceptance of submissions to EPA for inclusion in this thirteenth notice was October 11, 1990. Omission from this list does not imply disapproval by EPA, nor does the order of the courses reflect priority or quality. The format of the notification lists first the State accreditation programs approved by EPA, followed by EPA-approved training courses listed by Region. The name, address, phone number, and contact person is provided for each training provider followed by the courses and type of course approval (i.e., full, contingent, or for interim purposes).

As of October 11, 1990, a total of 597 training providers are offering 1,172 EPA-approved training courses for accreditation under TSCA Title II. There are 507 asbestos abatement worker courses, 394 contractor/supervisor courses, 208 inspector/management planner courses, 18 inspector-only courses, and 45 project designer courses. In addition, EPA has approved 765 refresher courses. Twenty-two States have EPA-approved State accreditation programs in one or more disciplines.

An EPA-funded model course for inspectors and management planners is available for use by training providers. In addition, an earlier EPA-developed course for asbestos abatement contractors and supervisors has now been revised and is also available. EPA is also announcing that its newly developed model worker course is now available as well. A fee for each course will be charged to cover the reproduction and shipping costs for the written and visual aid materials. Interested parties should contact the following firm to receive copies of the training courses: ATLAS Federal Services, Inc., EPA AHERA Program,

6011 Executive Blvd., Rockville, MD 20852, Phone number: (301) 468-1916.

The following is the cumulative list of EPA-approved State accreditation programs and training courses:

Approved State Accreditation Programs Alaska

(1)(a) *State Agency*: Department of Labor, Address: P.O. Box 1149, Juneau, AK 99802, Contact: Richard Arab, Phone: (907) 465-4856.

(b) *Approved Accreditation Program Disciplines*:

Abatement Worker (interim from 10/1/85).
Abatement Worker (full from 1/29/90).
Contractor/Supervisor (interim from 10/1/85).
Contractor/Supervisor (full from 1/29/90).

(i)(a) *Training Provider*: Alaska Laborers Training School.
Address: 13500 Old Seward Highway, Anchorage, AK 99515, Contact: Leslie Lauinger, Phone: (902) 345-3853.

(b) *Approved Courses*:

Abatement Worker (Certified 11/1/89).
Contractor/Supervisor (Certified 11/1/89).

(ii)(a) *Training Provider*: Alaska Quality Control & Technical Service, Ltd.

Address: 907 E. Dowling Rd., Suite 18, Anchorage, AK 99518, Contact: Gracita O. Torrijos, Phone: (907) 561-2400.

(b) *Approved Courses*:

Abatement Worker (Certified 5/1/90).
Contractor/Supervisor (Certified 5/1/90).

(iii)(a) *Training Provider*: Arctic Slope Consulting Group, Inc.

Address: 6700 Arctic Spur Rd., Anchorage, AK 99518-1550, Contact: Tom Tessier, Phone: (907) 349-5148.

(b) *Approved Courses*:

Abatement Worker (Certified 12/1/89).
Contractor/Supervisor (Certified 12/1/89).

(iv)(a) *Training Provider*: Asbestos Removal Specialists of Alaska.

Address: 1896 Marika Rd., Unit No. 3, Fairbanks, AK 99709, Contact: J.J. Middleton, Phone: (907) 451-8555.

(b) *Approved Courses*:

Abatement Worker (Certified 5/1/89).
Contractor/Supervisor (Certified 5/1/89).

(v)(a) *Training Provider*: Central & Southeastern Alaska District Council of Carpenters.

Address: 407 Denali St., Anchorage, AK 99501, Contact: William Matthews, Phone: (907) 561-4568.

(b) *Approved Courses:*

Abatement Worker (Certified 2/1/89).
Contractor/Supervisor (Certified 2/1/89).

Inspector/Management Planner (full from 1/23/89).

Inspector/Management Planner Refresher Course (contingent from 1/13/89).

Inspector/Management Planner Refresher Course (full from 2/14/89).

(2)(a) *Training Provider:* Abatement Project Training.

Address: P.O. Box 4372, Kansas City, KS 66104, Contact: Virginia Ireton, Phone: (913) 788-3440.

(b) *Approved Courses:*

Abatement Worker (contingent from 12/15/88).

Abatement Worker (full from 4/27/89).

Abatement Worker Refresher Course (contingent from 3/27/89).

Abatement Worker Refresher Course (full from 4/29/89).

Contractor/Supervisor (contingent from 3/23/89).

Contractor/Supervisor (full from 4/28/89).

Contractor/Supervisor Refresher Course (contingent from 6/21/89).

Contractor/Supervisor Refresher Course (full from 1/8/90).

(3)(a) *Training Provider:* Accredited Project Design Environmental Management.

Address: 1532 S.W. Clontarf, Topeka, KS 66611, Contact: Richard H. Pointer, Phone: (913) 256-2003.

(b) *Approved Courses:*

Abatement Worker (contingent from 11/13/89).

Abatement Worker (full from 2/8/90).

Abatement Worker Refresher Course (contingent from 2/21/90).

Contractor/Supervisor (contingent from 11/16/89).

Contractor/Supervisor (full from 2/8/90).

Contractor/Supervisor Refresher Course (contingent from 2/15/90).

Inspector/Management Planner (contingent from 11/16/89).

Inspector/Management Planner (full from 1/22/90).

Inspector/Management Planner Refresher Course (contingent from 2/16/90).

(4)(a) *Training Provider:* American Asbestos Training Center, Ltd.

Address: 121 East Grand, Monticello, IA 52310, Contact: Steve Intlekofer, Phone: (319) 465-5786.

(b) *Approved Courses:*

Abatement Worker (full from 6/27/88).

Abatement Worker Refresher Course (contingent from 6/23/89).

Abatement Worker Refresher Course (full from 6/26/89).

Contractor/Supervisor (full from 6/27/88).

Contractor/Supervisor Refresher Course (contingent from 6/23/89).

Contractor/Supervisor Refresher Course (full from 6/26/89).

Inspector/Management Planner (contingent from 10/26/88).

Inspector/Management Planner (full from 11/18/88).

Inspector/Management Planner Refresher Course (contingent from 11/10/89).

Inspector/Management Planner Refresher Course (full from 11/16/89).

(5)(a) *Training Provider:* Asbestos Consulting Testing (ACT).

Address: 14953 West 101st Ter., Lenexa, KS 66215, Contact: Jim Pickel, Phone: (913) 492-1337.

(b) *Approved Courses:*

Abatement Worker (full from 1/25/88).

Abatement Worker Refresher Course (full from 1/6/89).

Contractor/Supervisor (full from 1/25/88).

Contractor/Supervisor Refresher Course (full from 1/6/89).

(6)(a) *Training Provider:* Baird Scientific, Inc.

Address: 221 West Fourth St., P.O. Box 842, Carthage, MO 64836, Contact: Mackie Redd, Phone: (417) 358-5567.

(b) *Approved Courses:*

Abatement Worker (contingent from 9/26/89).

- Abatement Worker (full from 10/19/89).
Abatement Worker Refresher Course (contingent from 7/3/90).
Contractor/Supervisor (contingent from 9/26/89).
Contractor/Supervisor (full from 10/19/89).
Contractor/Supervisor Refresher Course (contingent from 7/31/90).
(7)(a) *Training Provider*: CHART Services, Ltd.
Address: 4725 Merle Hay Rd., Suite 214, Des Moines, IA 50322, Contact: Mary A. Finn, Phone: (515) 276-3642.
(b) *Approved Courses*:

Abatement Worker Refresher Course (full from 10/17/88).
Contractor/Supervisor (full from 11/17/87).
Contractor/Supervisor Refresher Course (full from 10/17/88).
Inspector/Management Planner (full from 2/22/88).
Inspector/Management Planner Refresher Course (full from 11/28/88).
(8)(a) *Training Provider*: Construction Industry Laborers' Training Institute for Eastern Missouri.
Address: Route 1, Box 79 H, High Hill, MO 63350, Contact: Jerald A. Pelker, Phone: (314) 585-2391.
(b) *Approved Courses*:
Abatement Worker (full from 1/19/88).
Abatement Worker Refresher Course (contingent from 5/18/89).
Abatement Worker Refresher Course (full from 5/31/89).
(9)(a) *Training Provider*: Construction Laborers Building Corp.
Address: Box 34549, Omaha, NE 68134, Contact: Leonard Schaffer, Sr., Phone: (402) 572-1470.
(b) *Approved Course*:
Abatement Worker (full from 11/2/87).
(10)(a) *Training Provider*: Educational Innovations.
Address: 23 West 3rd St., Lee's Summit, MO 64063, Contact: JoAnn Onwiler, Phone: (816) 525-6911.
(b) *Approved Courses*:
Abatement Worker (contingent from 4/11/89).
Abatement Worker (full from 5/2/89).
Abatement Worker Refresher Course (contingent from 3/29/89).
Abatement Worker Refresher Course (full from 8/2/89).
Contractor/Supervisor (contingent from 4/11/89).
Contractor/Supervisor (full from 5/2/89).
Contractor/Supervisor Refresher Course (contingent from 3/29/89).
Contractor/Supervisor Refresher Course (full from 8/2/89).
- Project Designer Refresher Course (contingent from 6/21/89).
Project Designer Refresher Course (full from 7/31/89).
(11)(a) *Training Provider*: Enviro-Impact Inspections, Inc.
Address: 1515 North Warson, Suite 213, St. Louis, MO 63132, Contact: Denis Boles, Phone: (314) 426-0087.
(b) *Approved Courses*:
Abatement Worker (contingent from 3/8/88).
Contractor/Supervisor (contingent from 3/8/88).
(12)(a) *Training Provider*: Environmental Salvage, Ltd.
Address: 4930 South 23rd St., Omaha, NE 68107, Contact: Lynn A. Kundtson, Phone: (402) 733-2595.
(b) *Approved Courses*:
Abatement Worker (contingent from 1/12/89).
Abatement Worker (full from 2/16/89).
Abatement Worker Refresher Course (contingent from 6/22/89).
Abatement Worker Refresher Course (full from 8/1/89).

9 CFR Parts 317 and 381

Net Weight Labeling of Meat and Poultry
Products; Final Rule

DEPARTMENT OF AGRICULTURE

Food Safety and Inspection Service

9 CFR Parts 317 and 381

[Docket No. 87-025F]

RIN No. 0583-AA69

Net Weight Labeling of Meat and Poultry Products

AGENCY: Food Safety and Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: The rule amends the Federal meat and poultry products inspection regulations to provide uniform net weight labeling requirements, including reasonable variations for label statements of net weight contents of containers of meat and poultry products. The rule incorporates by reference the National Bureau of Standards (NBS) Handbook 133, "Checking the Net Contents of Packaged Goods", Third Edition, September 1988, for compliance testing of net weight contents statements on packaged meat and poultry products. The rule also incorporates by reference the National Institute of Science and Technology (NIST) Handbook 44, "Specifications, Tolerances and other Technical Requirements for Measuring Devices", 1990 Edition, September 1989. The rule establishes objective, numerical variations from the labeled net weight which are to be determined by prescribed procedures adopted by way of incorporation by reference of the Third Edition of NBS Handbook 133. The rule is designed to enhance the ability of Federal, State and local agencies to enhance the industry-wide use of strict net weight standards at the packing, warehouse and retail level, and will establish greater uniformity with regulations for net weight compliance used by the Food and Drug Administration (FDA) for other types of foods.

The Food Safety and Inspection Service (FSIS) received 38 comments to the proposed rule. The analysis of the comments showed that the majority were generally supportive of the proposal. Of the total of 38 letters, 76 percent generally supported the rule, and 24 percent opposed it. FSIS has concluded that the proposed rule should be promulgated into a final rule with minor revisions as explained elsewhere in this document.

EFFECTIVE DATE: May 29, 1990. The incorporation by reference of certain publications listed in the regulations is

approved by the Director of the Federal Register as of: May 29, 1990.

FOR FURTHER INFORMATION CONTACT:

Dr. Karen Wesson, Acting Director, Processed Products Inspection Division, Science and Technology, Food Safety and Inspection Service, U.S. Department of Agriculture, Washington, DC 20250, (202) 447-3840.

SUPPLEMENTARY INFORMATION:**Executive Order 12291**

The Administrator, FSIS, has determined that this rule is not a "major rule" under Executive Order 12291. It will not result in an annual effect on the economy of \$100 million or more; a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies or geographical regions; or have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. The rule will standardize weights and measures practices for the Federal government and State and local governments for federally inspected meat and poultry products.

The rule will not create a significant economic or administrative burden upon these regulatory agencies or upon the industry. The changes standardize similar Federal, State and local government net weight compliance procedures. Federal, State and local weights and measures officials will be spending the same amount of time conducting their compliance activities as before.

Moreover, the changes will not significantly alter the prices of products or practices of the meat and poultry industry. Industry will not need to spend much, if any, additional time or money to adjust to these procedures. One new requirement imposed by this rule is having their weighing devices tested and certified annually. However, this only makes explicit a common practice of most firms. Moreover, many State and local governments already annually test and certify weighing devices in the federally inspected meat and poultry establishments for free. In some cases, weighing devices which do not meet NIST Handbook 44 specifications will need to be replaced. The total replacement costs of these weighing devices will be less than \$1 million.

Effect on Small Entities

The Administrator of FSIS has determined that this rule will not have a significant economic impact on a

substantial number of small entities, as defined by the Regulatory Flexibility Act, Public Law 96-354 (5 U.S.C. 601). The changes will not significantly alter the prices of products or practices of the meat and poultry industry. Small firms will not be at a competitive disadvantage because the changes, as noted above, standardize weights and measures practices. Small firms, like large firms, may benefit by reducing the amount of time and effort they spend on adjusting their weights and measurement practices to suit different jurisdictions.

Paperwork Reduction Act

The rule does not appreciably increase the burden of recordkeeping on meat and poultry plants. All in-plant weighing devices will need to display proof that the device's accuracy has been annually validated. This will merely incorporate into the regulations a requirement that is currently being adhered to by the majority of the meat and poultry industry and, therefore, will not have a substantial effect on the industry.

Many meat and poultry plants have FSIS approved net weight quality control programs in which tare and net weight data are automatically collected and maintained by production lot. In this way producers can properly monitor that they are neither under packing nor over packing. Those plants without an FSIS approved quality control program may want to get one, or collect and maintain net weight and tare measurements on production lots in order to controvert a potential finding made outside of the plant. This rule will not require the industry to obtain new label approvals; it will only require compliance with what is already on the label.

Public reporting burden for this collection of information is estimated to average 5 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Department of Agriculture, Clearance Officer, OIRM, room 404-W, Washington, DC 20250; and to the Office of Management and Budget, Paperwork Reduction Project (OMB #0583-0064), Washington, DC 20503.

Effective Date

The Agency has determined that the regulation will become effective 6 months from the date of publication in the Federal Register. This is to provide the Agency with sufficient time to train its inspection personnel to properly implement the revised regulation.

Background

On March 6, 1989, FSIS published a proposed rule in the Federal Register (54 FR 9370) to amend various provisions of the Federal meat and poultry products inspection regulations to permit the Agency to implement a new net weight regulation.

A revised regulation will serve several purposes. It will: (1) Create standards that will assure that the net weight statement is as accurate as can be reasonably required for the consumer; (2) enable Federal, State and local regulatory agencies to enforce uniform net weight standards at retail and other locations within their jurisdictions where meat and poultry products are sold; (3) provide clear and uniform notice to packers, wholesalers and retailers of net weight compliance procedures and requirements.

Comments and Responses

A total of 38 comments were received during the comment period. For purposes of analyzing the comments, they were divided into eight groups.

One Federal Department, the Department of Commerce, has responded. The Department of Commerce has the primary Federal leadership role for setting standards and procedures for determining net weight and acceptable weighing devices. The greatest number of comments came from State governments, 13, or 35 percent. They included four responses from States that use "wet tare" net weight determinations. Of the 13, two came from the same State. Ten of the responses came from the States' Departments of Agriculture, and one each from the States' Departments of Consumer Protection, Labor and Justice.

There were four responses from local governments, three of which were from the same State. The rule greatly expands the role the State and local governments may play in net weight compliance with Federal meat and poultry products.

The second largest number of comments came from the trade associations representing meat and poultry producers and processors. The six responses, representing 16 percent of the total, are all from national organizations. Two of the organizations represent only the meat industry, two

only the poultry, and two combined meat and poultry concerns.

Four private companies responded. Two are very large national firms producing both meat and poultry products. The other two are medium sized regional meat firms.

Three comments came from professional organizations representing the State and local government weights and measures community. Two came from the leadership of the same national organization, which represents about 2,100 members, most of which are State and local weights and measures officials from almost every State. This organization provides a national forum for the resolution of questions related to weights and measures issues. The third letter came from an organization representing a State's county weights and measures officials.

There were three comments from consumer groups, all from the same State. Two of the groups were Statewide and one local. Finally, there were three comments from private individuals. Two came from the same State.

General Tenor of Comments

Of the 38 comments, 76 percent generally supported the rule, and 24 percent opposed it. However, of the commenters who supported the proposal, some expressed reservations regarding certain specifics of the proposal; the reservations are addressed in the response to the comments. The greatest support is with the State governments, with 12 out of 13 supportive comments, or 92 percent acceptance.

The majority of trade associations and private companies who commented favored the change as well. Only one poultry trade association opposed the proposed rule. This was mainly because they feel that it did not yet go far enough in one area, which is discussed in the comments. Also, only one company, a medium sized regional meat processor, objected to the rule.

The professional organizations generally supported the rule. One of the organizations sent a letter focusing their comments to just one point in the rule but did not indicate their support or opposition. However, the same organization also sent a very positive endorsement of the rule in a separate letter.

The opposition to the rule came from three consumer groups from the same State. Two individuals from this same State also objected to the rule. Their opposition was based on the belief that the rule would weaken their State's enforcement ability.

The Major Issues

FSIS analyzed the comments and identified 22 separate issues addressed by the commenters. The following is a discussion of the comments according to the issues raised, and the Agency's responses to the comments.

NBS Handbook 133 Issues

Comment 1: There were four comments favoring the publication of significant parts of NBS Handbook 133 within the net weight regulation as opposed to incorporating NBS Handbook 133 by reference. These commenters also wanted FSIS to create its own book. One comment was from a trade association and three were from companies. The commenters feared that adoption of a document, which would be incorporated by reference, would make USDA dependent on another organization, The National Conference on Weights and Measures (NCWM), for its net weight policy.

Response: The information that will be incorporated by reference from the NBS Handbook 133 is essentially instructions to inspection personnel on the procedures and methods to do their net weight compliance tasks. It includes such things as how to select a lot and how to select a random sample.

Furthermore, FSIS is looking towards the NCWM to provide the expertise in the net weight area. NBS Handbook 133 is comprehensive and is the standard in the commercial world. By incorporating by reference the relevant portions of NBS Handbook 133, FSIS is acknowledging NIST as the government's standard-bearer in these matters, and accentuates the need for harmony throughout Federal, State, and local jurisdictions. However, FSIS will retain its authority to take exception to provisions in these handbooks and exclude them from our regulation, as is being done. FSIS is excluding a number of chapters that are not relevant to the meat and poultry industry practices and procedures. FSIS will announce in the Federal Register the exceptions and other changes to each new edition. If the changes are significant an opportunity will be provided to the public to comment on the proposed changes.

Comment 2: There were six comments—two from the States, two from local governments, and two from professional associations—favoring continually using the latest edition of NBS Handbook 133 instead of a specific edition.

Response: FSIS has decided to incorporate by reference the Third Edition of NBS Handbook 133, as was

stated in the proposed rule. However, FSIS intends to adopt the latest editions as they occur by making an announcement in the **Federal Register** and if the changes are significant, providing an opportunity for public comment. FSIS values the expertise of NCWM for its net weight policies and procedures.

NIST Handbook 44 Issues

Comment 3: There were three comments favoring FSIS adopting its own version of NIST (formerly NBS) Handbook 44 instead of relying on someone else's. Two came from trade associations and one from a company. Similar to the concerns from industry to NBS Handbook 133, these commenters wanted FSIS to incorporate the necessary portions of NIST Handbook 44 into the regulation. They said this would avoid the confusion that might result from the latest edition of NIST Handbook 44 not being in total harmony with FSIS procedures.

Response: As with the FSIS position on NBS Handbook 133, FSIS disagrees with this position. NIST Handbook 44 is generally revised on an annual or biannual basis. The changes are usually minimal. Moreover, this handbook is already officially used by most State and local government officials. By adopting this handbook, FSIS is making it easier for the standardization of policies and procedures for weighing devices. Also, FSIS expects that State and local weights and measures officials would be doing, as they now do, the vast majority of the scale testing and accuracy certifications in federal inspected meat and poultry establishments, as well as wholesale and retail operations.

Comment 4: There were seven comments favoring FSIS continually adopting the latest edition of NIST Handbook 44 instead of relying on a specific edition. Three comments came from the States, two from local governments, and two from professional organizations. This would permit FSIS regulations to automatically track NIST Handbook 44 revisions as they occur.

Response: FSIS has decided to incorporate by reference the 1990 edition of NIST Handbook 44, instead of the 1989 one stated in the proposed rule. FSIS intends to adopt the latest editions as they occur by making an announcement in the **Federal Register**. If there are any significant changes in the latest editions, the public will be provided an opportunity to comment on the changes. Since there are no significant differences between the 1989 and 1990 editions, FSIS is adopting the latest edition in the rule. This approach

will enable FSIS to benefit from the latest advances in this area.

Comment 5: There were four comments stating that compliance with the requirements of NIST Handbook 44 would be very costly to industry. Two comments came from trade associations and two from companies. One commenter said that compliance with NIST Handbook 44 would cost about \$100,000 per plant.

Response: FSIS does not agree with this estimate. While some scales might need to be replaced due to the rule, they would represent a very small portion of the scales in service. In fact, the vast majority of scales used for weighing the vast majority of product sold would meet NIST Handbook 44 specifications now.

Comment 6: There were six comments supporting the idea that State certified repair persons should be allowed to inspect and test repaired scales to see that they meet NIST Handbook 44 requirements and grant permission to use them in commerce. Two comments came from the States, two from local governments and two from professional associations.

Response: FSIS agrees with this position and has changed the final rule to reflect that State certified repair persons be allowed to test, validate accuracy of weight, and place scales back into service. However, if a "Retain" tag has been put on a scale, indicating some problem such as inaccuracy, only an FSIS official can remove the tag. As long as the tag is on the scale it may not be used.

Sampling Issues

Comment 7: There were two comments favoring the use of 100 percent sampling on small lots as an alternative to Sampling Plan A by State and local weights and measures officials. One came from a State and the other from a professional association. The State commenter said many local agencies conduct 100 percent tests in lieu of Sampling Plan A when testing small retail lots because checking the few additional packages available for inspection is no more trouble than doing the additional calculations called for in Sampling Plan A. Furthermore, the commenter indicated that the results when conducting a 100 percent test are not different from the results obtained when conducting a Sampling Plan A test.

Response: FSIS agrees with this comment. Sampling the whole lot may be the most efficient approach with small retail samples. There was no intention in the proposal to exclude the use of 100 percent sampling on small

lots. NBS Handbook 133, Third Edition discusses the use of 100 percent sampling on page I-6, which is part of the handbook to be incorporated by reference.

Comment 8: There were two comments favoring State and local government officials being allowed to use a sampling plan which is equivalent to Sampling Plan A when this plan is part of a research and development program to improve the sampling plans. One came from a State and one from a local government.

Response: FSIS will permit alternative State and local government testing approaches. However, these test results cannot be used for compliance decisions. For compliance purposes, only the use of the procedures specified in this rule are acceptable in making determinations to pass or reject a lot.

Comment 9: There were four comments that favored using Sampling Plan A instead of Sampling Plan B in the in-plant testing program because Sampling Plan B has no maximum allowable variations (MAV's) for individual packages. Two comments came from trade associations and two from companies.

Response: FSIS has conducted computer simulations tests to assess the statistical comparability of its current sampling plan for in-plant tests with NBS Sampling Plans A and B. FSIS found that its current in-plant sampling plan is statistically equivalent to NBS Sampling Plan B. Both are much more stringent than Sampling Plan A. Sampling Plan A is intended to be applied at the retail level and is thus more lenient than the in-plant or wholesale test, which is supposed to be the major barrier to ferret short weight products. FSIS intends to use Sampling Plan B because it is equivalent to its current test.

Comment 10: There were four comments favoring the increase of an MAV for Sampling Plan B. Three of these comments came from trade associations and one from a company.

Response: FSIS disagrees with this idea for two reasons. By adding an MAV, FSIS would be making Sampling Plan B into a less stringent test. Moreover, FSIS would no longer have an approach that was uniform with NBS Handbook 133.

Maximum Allowable Variations (MAV's) Issues

Comment 11: One trade association and two private companies suggested that group 5, the over 10 pounds category, should be changed to a 1 percent allowance from the current 2 or

4 ounces. The lower limit for individual weights for groups 5 is a fixed amount—2 ounces—if the plant has a 2- or 4-ounce scale graduation. It is 2 or 4 ounces if the product is 11 pounds, 55 pounds or 111 pounds. Many packers have complained that this allowance is much too restrictive, especially for products over 50 pounds.

Response: FSIS has conducted a study on this issue and has decided to replace the current over 10 pounds MAV with an allowance of 1 percent of the total net weight of the product.¹ The study found that the over 10 pounds category of using either 2 or 4 ounces as an allowance for shortweight for an individual package is too restrictive.

The trend of MAV's from under 2 ounces and above is a downward percentage going from 10 percent for 2 ounces, 2.34 percent for 4 pounds, 1.88 percent for 5 pounds, 1.24 percent for 10.1 pounds (using 2 ounce graduation), 0.625 percent for 20 pounds (using a 2 ounce graduation), 0.25 percent for 50 pounds, and 0.125 percent for 100 pounds. This is much too restrictive for these higher weights. A 1 percent over 10 pounds allowance appears to be the most practical and fair alternative.

Also, the graduated and ungraduated difference is not necessary since practically all the scales are graduated to 2 ounces or where 2 ounces is sufficiently easy to estimate on a 4 ounce scale.

The NBS Handbook 133 will be changed accordingly.

Comment 12: Three trade associations and two companies suggested that group 5, the over 10 pounds category, should be changed to a 2 percent allowance from over 10 to 25 pounds and 1 percent over 25 pounds (2 percent/1 percent alternative).

Response: After careful consideration, FSIS decided to use the 1 percent suggested from comment 12, because the 2 percent from over 10 pounds to 25 pounds would be increasing actual percentage allowance from a trend that is declining. While the current approach may be considered too restrictive, FSIS considers the 2 percent/1 percent alternative to be too generous.

Gray Area Allowance Issues

Comment 13: There were eight comments supporting the gray area concept—one from the Federal Government, the Department of Commerce; three from the States; one from a local government; and three from trade associations. They all believed

that the gray area concept in the rule would strengthen the ability of officials to enforce net weight regulations.

There were three comments opposing the gray area concept. One came from a State, one from a local government and one from a company. The State official claimed that the impact of the gray area would have the consumers paying for water instead of usable product. The company said gray area testing is an unnecessary and complicated procedure.

Response: FSIS agrees with those favoring the gray area concept, such as NIST and the National Conference on Weights and Measures (NCWM). FSIS believes that the gray area concept will strengthen net weight enforcement. Moreover, there is no conclusive evidence that the consumer is paying for water, as is often claimed. On the contrary, economic theory and all the data available to FSIS suggest that competitive market forces push producers to price meat and poultry products as competitively as possible.

Comment 14: There were five comments supporting more gray area product determinations. Also, the commenters indicated that these determinations should be subject to change from future research findings. One of the comments came from a State, one from a local government, two from trade associations, and one from a producer. One trade association said it wanted the proposal withdrawn until more gray areas have been determined. The other trade association noted that it does not regard gray areas as fixed numbers and believes provisions should be made for them to be restudied at any time to be certain they are in keeping with new products, processes and delivery systems.

Response: FSIS agrees with these comments for more gray area products. As noted earlier, FSIS has formally submitted a request to NCWM to work on five new gray area products or product classes over the next 2 years. In addition, FSIS has committed resources necessary to conduct the product testing and analysis. The addition of these five products will provide gray area product determinations on the vast majority of products that experience moisture loss. Also, these determinations must be restudied on a timely basis. The percentage allowance must be changed to reflect new market products and market conditions.

Comment 15: There were three comments supporting no "0" (zero) gray area product determinations. Two of the comments came from trade associations and one from a producer company.

Response: FSIS disagrees with this position. Usually when moisture loss occurs, it comes soon after packaging, and quickly reaches a maximum for its shelf life.

The gray areas for bacon, luncheon meats and fresh sausage are zero. There are no data to support gray areas for moisture loss after packaging in bacon, luncheon meats and fresh sausage at this time. Until such time as the data are presented to and considered by the NCWM to support gray areas for these products, FSIS will allow zero variation. Besides, gray areas were established for use only with the "wet tare" determinations. Products subject to moisture loss after packaging may be added to the list of gray area products, with sufficient documentation. Requests may be made at any time in the future to the NCWM for inclusion as gray area products.

Other Issues

Comment 16: There were seven comments supporting use of separate tare and net weight declarations in poultry products where the meat and stuffing or gravy are separately wrapped. Three of these comments came from the States, two from local governments and two from professional associations.

Response: FSIS believes this proposed change would set a new precedent in the direction of labeling products by the percentage of components or contents. Labeling each component in a product has major implications for the regulators, the public, and the industry. Any change in the current FSIS policy on component labeling would warrant a comprehensive evaluation extending beyond the scope of this rulemaking.

Comment 17: There were six comments urging FSIS to delete from the preamble its recommendation for State and local governments to use "unused tare" (dry tare) compliance testing instead of "used tare" testing, which includes wet tare and dried used tare testing.

Response: FSIS agrees with this comment and has deleted that sentence from the preamble in the final rule. Both "used tare" and "unused tare" compliance testing are acceptable and viable approaches. While FSIS prefers "unused tare," States and local governments can choose which approach they wish to use.

Comment 18: There were three comments saying that FSIS must reassert Federal preemption over State and local government laws and practices with regard to federally inspected meat and poultry products.

¹ "Bulk Pack MAV's," Washington DC: USDA/FSIS/ST/PPID, July 1988. Free copies are available at PPID/ST, FSIS, USDA, Washington DC 20250.

One came from a trade association and two from private companies. They feared that the new rule might mean the loss of Federal preemption over State and local meat and poultry regulations.

Response: While the rule emphasizes concurrent jurisdiction with State and local authorities which is encouraged in the Federal Meat Inspection Act of 1967 and the Poultry Products Inspection Act of 1968, Federal law prevails. Participating State and local officials must use only Federal law and rules.

Comment 19: There was one comment from a private company objecting to State and local inspectors' entry into the federally inspected establishments. The commenter opposed having an additional and potentially conflicting authority in the plants.

Response: FSIS does not agree. The authority of the non-Federal inspector is limited to testing, certifying, and repairing scales following the Federal regulations.

Comment 20: There were two comments, one from a State and one from a private company, that said that the State and local role in weighing federally inspected meat and poultry products is unnecessary. The commenters said that the implementation of the rule would be too time consuming and unsatisfactory for local officials to pursue.

Response: FSIS disagrees with this assessment. The participation of the State and local governments is essential to the effectiveness of the rule. The rule provides for a true partnership, in which the State and local officials will have new enforcement powers.

Comment 21: There were four comments, all from within the same State, fearing that the rule would weaken its State's strong enforcement program. The comments came from a State official, a local government official, a consumer group and an individual.

Response: FSIS disagrees with this comment. FSIS believes the adoption of this rule will strengthen, not weaken the level of compliance and will support enforcement. By using the new rule, which provides greater specificity and uniformity for net weight compliance testing, FSIS believes that the compliance levels will increase for the nation.

The Key Characteristics of the Rule

1. *Establishing definitions of tare and alternative methods of compliance testing.* FSIS is adopting the definitions of "tare," "unused tare," and "used tare" that are given in the National Bureau of Standards (NBS) Handbook 133, "Checking the Net Contents of Packaged

Goods," Third Edition, Washington, DC, U.S. Government Printing Office, September 1988. The "tare weight" is "the weight of a container, wrapper, or other material that is deducted from the gross weight to obtain the net weight". With regard to the liquids absorbed by the packaging material and free flowing liquid (free liquid), FSIS allows, under certain conditions, the use of two alternative tests, "unused tare" and "used tare."

"Unused tare" (or dry tare) is the weight of "all packaging materials (including glue, labels, ties, etc.) that contain or enclose a product, including prizes, gifts, coupons, or decorations that are not part of the product." The free-flowing liquid and moisture in the packaging materials is assumed to be product except for those few products which are packed in substances which are normally discarded before consumer preparation and/or serving such as vienna sausage packed in a gelatin and canned chorizos packed in lard. "Unused tare" is weighed before the product is introduced into the container. "Unused tare" measurement is used for all compliance testing within the federally inspected establishment.

"Used tare," is the weight of "all packaging materials that can be separated from the product, either readily (e.g. by shaking) or by washing, scraping, ambient air drying, or by other techniques involving more than normal household recovery procedures, but not including laboratory procedures such as oven drying." There are two types of used tare: wet tare and dried used tare.

"Wet tare" is the same as used tare "when no effort is made to reconstruct unused tare weight by drying out the absorbent portion (if any) of the tare. Free flowing liquid is part of the wet tare for meat and poultry products from federally inspectee" establishments. FSIS does not allow "used tare" testing in the federally inspected establishment. "Wet tare" testing uses "gray areas", defined below for applicable products, in net weight determinations. This testing takes place outside the federally inspected establishment.

"Dried used tare refers to used tare that has been air dried, dried in a microwave oven, over a heating element, or in some other manner, to simulate the unused tare weight." Dried used tare testing uses the same testing procedures as unused tare (dry tare).

"Gray area" is the allowable variation or reasonable variation below the labeled net weight within which no determination of net weight compliance can be made by net weight alone. The >gray area> is used only with >wet tare> compliance testing procedures

outside the federally inspected establishment.

If a product's net weight falls below the product's gray area percentage, the product fails the compliance test. If a product's net weight is at or above its labeled net weight, the product passes the compliance test. However, if the product's net weight falls within the gray area or >no decision area,> further information is sought before a determination is made.

The data on specific lots may well substantiate compliance with net weight requirements. On the other hand, if no such data exists, then the State or local weights and measures authority as well as Federal authorities could take appropriate regulatory enforcement actions. This process appears to be the best means to use effectively the concurrent jurisdiction available to both the Federal government and state and local authorities and to meet the Federal standard of reasonable variation caused by unavoidable deviations in good manufacturing and distribution practices.

2. *Defining the currently permitted "reasonable variations" due to loss or gain of moisture during the course of good distribution practices or by unavoidable deviations in good manufacturing practices through numerical variations which appear to be reasonable when determined by specific procedures in the National Bureau of Standards (NBS) Handbook 133, "Checking The Contents of Packaged Goods," Third Edition, Washington, DC, U.S. Government Printing Office, September 1988.* These variations would be used and enforced at the time of production, during distribution, and at retail sale by Federal, State and local regulatory officials within their respective authorities. There are two basic types of reasonable variations in the rule. The first type is the gray area percentages for products in conducting wet tare compliance testing. The second type is the Maximum Allowable Variations (MAV's) that individual packages can vary from the labeled weight.

The rule provides for specific "gray areas" by product type to define the product "reasonable variation," for purposes of determining net weight compliance. There are five meat and poultry products that have been assigned gray area percentages. These are bacon, fresh sausage, and luncheon meats with a gray area of 0 (zero) percent, vacuum-packed frankfurters with 2 1/2 percent and fresh poultry with 3 percent. These products with gray areas are listed in NBS Handbook 133,

Third Edition, 1988, section 3.18.2., "Meat and Poultry from Federally-Inspected Plants: Types of Products."

The regulations incorporate FSIS's current average and individual net weight requirements. That is, the average net weight of the lot must meet or exceed the labeled weight of the product, while individual reasonable variations are permitted for individual packages in accordance with Table 2-12, "U.S. Department of Agriculture, Meat and Poultry, Groups and Lower Limits for Individual Packages", NBS Handbook 133, Third Edition, 1988, page B-15. The table provides limits for two classes of product, "Homogenous fluid when filled" and "All other products." "Homogenous fluid when filled" products are those which are of uniform consistency throughout. Baby food is homogenous; beef stew is not. "Fluid" at time of filling refers to liquid and solid products (like shortening) which are heated and filled as a liquid.

In Table 2-12 the MAV's for individual package net weights from the labeled net weight generally becomes a decreasing percentage as the product's net weight increases. For example, a package with a labeled net weight of under 3 ounces in Group A has an MAV of 10 percent. That is, the package's net weight must be accurate to within 10 percent of the labeled weight.

For the other groups, 1-5, the lower limits for a group are a specific amount for the whole range. For example, in Group 1 the lower limit is either 7.1 grams, 0.25 ounce, $\frac{3}{32}$ ounce, $\frac{1}{16}$ ounce, $\frac{1}{10}$ ounce, $\frac{1}{8}$ ounce, or $\frac{1}{4}$ ounce. The selection of the particular scale graduation depends on the characteristics of the packer's scale. Therefore, a Group 1, 3-ounce package with an allowance of 0.25, using a digital scale, would have a percentage allowance of 8.3 percent, while a 16-ounce package with an allowance of 0.25 would have a percentage allowance of 1.6 percent.

The maximum allowable variation from the labeled net weight on a meat or poultry product over 10 pounds is 1.0 percent of the labeled net weight of the package.¹

3. *Using NCWM to determine gray area percentages for meat and poultry products.* In the first five product determinations described above, cooperating industry and trade groups worked together with FSIS and State and local weights and measures officials to gather data on moisture loss characteristics of these products. The Laws and Regulations Committee of NCWM, composed of NCWM members as well as associated members such as FSIS, FDA, the American Meat Institute,

the National Broiler Council, consumer representatives, and others developed and agreed for each product a percentage allowance which best captured the results of the data in the pilot study called "Report of the Task Force on Commodity Requirements to the Executive Committee." This report is appendix E of the *National Conference on Weights and Measures: Program and Committee Reports for the 73rd Annual Meeting*, U.S. Department of Commerce: National Bureau of Standards, NCWM Publication 16, 1988. The report's recommendations were submitted to the NCWM's national conference for approval. The NCWM's recommendations were then sent to the NIST, formerly the National Bureau of Standards, for their incorporation in the Third Edition of NBS Handbook 133. FSIS believes that this same procedure should be followed for the next gray area determinations.

Industry or trade groups are encouraged by FSIS to request product gray area determinations by NCWM's Laws and Regulations Committee. The committee's address is: NCWM, Office of Weights and Measures, National Institute of Science and Technology, Gaithersburg, MD 20899.

FSIS has already made a written request for additional gray area product determinations to the NCWM. On March 17, 1989, the Administrator of FSIS said in a letter to the Executive Secretary of the NCWM that FSIS would like to see NCWM determine, approve and publish five additional gray area product percentages within the next 2 years. The five products or product classes nominated were:

- Ice packed bulk poultry,
- Cured pork products (hams, shoulders, and loins),
- Cured beef products (corned beef, corned beef brisket, and tongues),
- Raw meat products (chopped beef, ground beef, hamburger, and beef patties),
- Ham patties, chopped ham, pressed ham, spiced ham and similar products.

The addition of these five products or product classes should go a long way into making the use of wet tare testing a viable alternative to those State and local governments that wish to use it. (Wet tare may only be used outside the federally inspected establishment.)

4. *Providing new regulations on weighing and measuring devices in federally inspected establishments which are described in the NIST Handbook 44, "Specifications, Tolerances and other Technical Requirements for Measuring Devices", 1990 Edition, Washington, DC, U.S. Government Printing Office, September*

1989.

FSIS officials and others who may test or certify the accuracy of the weighing and measuring devices, such as State and local weights and measures officials, will be using the same set of procedures. This NIST handbook is already widely known and used by many State and local enforcement officials. The proposed rule cited the 1989 Edition for incorporation. Since the proposed rule was published, a new edition, the 1990 Edition of NIST Handbook 44, has been published. Because there are no significant differences between the two editions that impact the meat and poultry industry, the final rule is incorporating the latest edition, the 1990 Edition of NIST Handbook 44.

5. *Establishing specific sampling procedures to assure consistent weight measurement and compliance determinations by Federal, State and local regulatory personnel.* All testing within the federally inspected establishment shall be conducted according to Sampling Plan B, but outside the establishment Sampling Plan A shall be used. Sampling Plan B is the more stringent plan because it is at the point of packing, the first point in the distribution system. Sampling Plan A is at the point of sale at the retail level, to make sure the last line of enforcement before the consumer's purchase is working properly. In such dual-testing situations the latter test is less stringent.

Both plans are described in NBS Handbook 133, Third Edition, 1988. The current FSIS plan and the proposed one for in-plant compliance testing are statistically equivalent in terms of stringency. That is, they each afford the same degree of protection. In conducting net weight compliance activities, lots will be sampled according to Sampling Plan B of NBS Handbook 133, Third Edition, 1988. In general, for up to and including 250 units or packages, the sample size would be 10. For over 250, the sample size would be 30. This method for determining sample sizes is very similar to current FSIS practice. For lots of 30 packages and under, 100 percent sampling may be done in lieu of selecting a random sample as specified in Sampling Plan A. Many States and localities are already familiar with Sampling Plan A.

6. *Establishing consistent limited labeling exemptions for meat and poultry products which meet the criteria for "small packages" and individual "random weight packages."* It has been the practice of FSIS to require that the net weight labeling of these products be applied to the bulk package shipped from the official establishments. Many

retailers prefer to have individual "random weight packages" weighed at the retail level on their own weighing equipment. This rule change enables random weight packages, weighed at the retail store, to be exempt from the type size, dual declaration and placement requirements of product weighed in the federally inspected establishment.

Changes to the March 1989 Proposal

There are a number of changes in the final rule from the March 6, 1989, proposed rule. These changes are a result of FSIS's analysis of the comments received. First the changes in the meat inspection regulations, 9 CFR part 317, are discussed then the changes in the poultry inspection regulations, 9 CFR part 381, are discussed.

Meat Regulations: Part 317

The changes to part 317 cover a variety of items including exempting random weight packages from certain labeling requirements; delimiting the scales and other weighing devices covered in the regulation; incorporating by reference the 1990 edition of NIST Handbook 44; enabling State registered or licensed repair firms to inspect, test and place scales back in service; enabling State licensed or registered firms to provide valid certification of a scale's accuracy; deleting NBS Handbook 133 references to previous USDA regulations.

Random weight packages exemptions and requirements. Two sentences were added to § 317.2(h)(9)(i) to continue to require that the net weight declarations for random weight packages weighed at the retail level be applied directly to such packages prior to retail sale and display. Provisions were also added to these sections to continue to exempt such net weight statements from the type size, dual declaration, and placement requirements of the regulations.

The additional sentences are: "The net weight also shall be applied directly to random weight consumer size packages prior to retail display and sale. The net weight statement on random weight consumer size packages for retail sale shall be exempt from the type size, dual declaration, and placement requirements of this paragraph (h), if an accurate statement of net weight is shown conspicuously on the principal display panel of the package."

Only certain scales covered. Section 317.20(a) limited the types of scales and weighing devices covered by the regulation. The scales and other weighing devices covered by this rule are only those used for weighing products used in the distribution and

sale of meat and poultry products. This change narrows the focus of inspection activity to scales used in net weight determinations for commerce.

The first sentence of the section has been changed to reflect this limitation. The sentence in the proposal reads: "All scales used in federally inspected meat establishments used for weighing of meat and poultry products shall be installed, maintained and operated to insure accurate weights." It has been replaced in the final rule by: "All scales used to weigh meat products sold or otherwise distributed in commerce in federally inspected meat establishments shall be installed, maintained and operated to insure accurate weights."

The 1990 Edition of NIST Handbook 44 is adopted. The second sentence of § 317.20(a) has been changed to reflect that the "1990 Edition issued September 1989" of NIST Handbook 44 is incorporated by reference instead of the "1989 Edition issued September 1988" stated in the proposal. The new edition is not significantly different from the old one.

State and local role in inspecting, testing and placing scales back in service. Section 317.20(c) has been changed so State weights and measures officials and State licensed or registered scale repair firms or persons as well as USDA officials can inspect and test a scale that has been taken out of service because it is inaccurate or it has had repairs, adjustments or replacements made to it, and place it back in service unless it has had a "Retain" tag placed by a USDA inspector. Only a USDA inspector can remove this tag.

In the second sentence of this paragraph, after the phrase "has been inspected by and tested by a USDA official" the following phrase has been added to the sentence: ", or a State or local government weights and measures official, or State registered or licensed scale repair firm or person,".

State licensed or State registered repair firms or persons role. Section 317.21(b) has been changed to enable State licensed or State registered repair firms or persons to be able to provide a valid certification of a scale's accuracy as well as State and local weights and measures and USDA officials.

The following phrase has been added to the sentence after the phrase "State or local government's weights and measures authority": "or from a State registered or licensed scale repair firm or person,".

Deleting reference to previous USDA regulations on net weight. Section 317.19(b) adds "D.1.2. U.S. Department of Agriculture." This new rule replaces this section.

Poultry Regulations: Part 381.

The changes to part 381 cover a variety of items including exempting random weight packages from certain labeling requirements; delimiting the scales and other weighing devices covered in the regulation; incorporating by reference the 1990 edition of NIST Handbook 44; enabling State registered or licensed repair firms to inspect, test and place scales back in service; enabling State licensed or registered firms to provide valid certification of a scales accuracy; deleting NBS Handbook 133 reference to previous USDA regulations.

Random weight packages exemptions and requirements. Two sentences were added to § 381.121(c)(9)(i) to continue to require that the net weight declarations for random weight packages weighed at the retail level be applied directly to such packages prior to retail sale and display. Provisions were also added to these sections to continue to exempt such net weight statements from the type size, dual declaration, and placement requirements of the regulations.

The additional sentences are: "The net weight also shall be applied directly to random weight consumer size packages prior to retail display and sale. The net weight statement on random weight consumer size packages for retail sale shall be exempt from the type size, dual declaration, and placement requirements of this paragraph (c), if an accurate statement of net weight is shown conspicuously on the principal display panel of the package."

Only certain scales covered. Section 381.121(c)(a) limited the types of scales and weighing devices covered by the regulation. The scales and other weighing devices covered by this rule are only those used for weighing products used in the distribution and sale of meat and poultry products. This change narrows the focus of inspection activity to scales used in net weight determinations for commerce.

The first sentence of the section has been changed to reflect this limitation. The sentence in the proposal reads: "All scales used in federally inspected poultry plants used for weighing of meat and poultry products shall be installed, maintained and operated to insure accurate weights." It has been replaced in the final rule by: "All scales used to weigh poultry products sold or otherwise distributed in commerce in federally inspected poultry plants shall be installed, maintained and operated to insure accurate weights."

The 1990 Edition of NIST Handbook 44 is adopted. The second sentence of

§ 381.121c(a) has been changed to reflect that the "1990 Edition issued September 1989" of NIST Handbook 44 is incorporated by reference instead of the "1989 Edition issued September 1988" stated in the proposal. The new edition is not significantly different from the old one.

State and local role in inspecting, testing and placing scales back in service. Section 381.121d(b) has been changed so State weights and measures officials and State licensed or registered scale repair firms or persons as well as USDA officials can inspect and test a scale that has been taken out of service because it is inaccurate or it has had repairs, adjustments or replacements made to it, and place it back in service unless it has had a "Retain" tag placed by a USDA inspector. Only a USDA inspector can remove this tag.

In the second sentence of this paragraph, after the phrase "has been inspected by and tested by a USDA official" the following phrase has been added to the sentence: ", or a State or local government weights and measures official, or State registered or licensed scale repair firm or person,".

State licensed or State registered repair firms or persons role. Section 381.121c(c) has been changed to enable State licensed or State registered repair firms or persons to be able to provide a valid certification of a scale's accuracy as well as State and local weights and measures and USDA officials.

The following phrase has been added to the sentence after the phrase " * * * State or local government's weights and measures authority": "or from a State registered or licensed scale repair firm or person,".

Deleting reference to previous USDA regulations on net weight. Section 381.121b(b) adds "D.1.2. U.S. Department of Agriculture." This new rule replaces this section.

Final Rule

List of Subjects

9 CFR Part 317

Incorporation by reference, Meat inspection, Net weight.

9 CFR Part 381

Incorporation by reference, Poultry products inspection, Net weight.

For reasons set out in the preamble, title 9, parts 317 and 381 of the Federal meat and poultry products inspection regulations are revised as follows:

PART 317—[AMENDED]

1. The authority citation for part 317 continues to read as follows:

Authority: 34 Stat. 1260, 79 Stat. 903, as amended, 81 Stat. 584, 84 Stat. 91, 438; 21 U.S.C. 71 *et seq.*, 601 *et seq.*

2. Section 317.2 (9 CFR 317.2) is amended by revising paragraphs (h)(1) and (h)(2), adding a new sentence to the end of paragraph (h)(5), revising paragraph (h)(9) (i) and (ii), redesignating (h)(9) (iii) and (iv) as (h)(9) (iv) and (v), respectively, adding a new (h)(9)(iii) and revising (h)(11) to read as follows:

§ 317.2 Labels: Definition; required features.

* * * * *

(h)(1) The statement of net quantity of contents shall appear on the principal display panel of all containers to be sold at retail intact, in conspicuous and easily legible boldface print or type in distinct contrast to other matter on the container, and shall be declared in accordance with the provisions of this paragraph.

(2) The statement as it is shown on a label shall not be false or misleading and shall express an accurate statement of the quantity of contents of the container. Reasonable variations caused by loss or gain of moisture during the course of good distribution practices or by unavoidable deviations in good manufacturing practices will be recognized. Variations from stated quantity of contents shall be as provided in § 317.19. The statement shall not include any term qualifying a unit of weight, measure, or count such as "jumbo quart," "full gallon," "giant quart," "when packed," "minimum," or words of similar importance.

(5) * * * Paragraph (h)(9) of this section permits certain exceptions from the provisions of this paragraph for margarine packages, random weight consumer size packages, and packages of less than ½ ounce net weight. Paragraph (h)(12) of this section permits certain exceptions from the provision of this paragraph for multi-unit packages.

(9) * * * (i) Individually wrapped, random weight consumer size packages shipped in bulk containers (as specified in paragraph (h)(11) of this section) and meat products that are subject to shrinkage through moisture loss during good distribution practices and are designated as gray area type of products as defined under § 317.19 need not bear a net weight statement when shipped from an official establishment, provided that a net weight shipping statement which meets the requirements of paragraph (h)(2) of this section is applied to their shipping container prior

to shipping it from the official establishment. Net weight statements so applied to the shipping container are exempt from the type size, dual declaration, and placement requirements of this paragraph, if an accurate statement of net weight is shown conspicuously on the principal display panel of the shipping container. The net weight also shall be applied directly to random weight consumer size packages prior to retail display and sale. The net weight statement on random weight consumer size packages for retail sale shall be exempt from the type size, dual declaration, and placement requirements of this paragraph, if an accurate statement of net weight is shown conspicuously on the principal display panel of the package.

(ii) Individually wrapped and labeled packages of less than ½ ounce net weight and random weight consumer size packages shall be exempt from the requirements of this paragraph if they are in a shipping container and the statement of net quantity of contents on the shipping container meets the requirements of paragraph (h)(2) of this section:

(iii) Individually wrapped and labeled packages of less than ½ ounce net weight bearing labels declaring net weight, price per pound, and total price, shall be exempt from the type size, dual declaration, and placement requirements of this paragraph, if an accurate statement of net weight is shown conspicuously on the principal display panel of the package.

* * * * *

(11) As used in this section, a "random weight consumer size package" is one which is one of a lot, shipment or delivery of packages of the same product with varying weights and with no fixed weight pattern.

* * * * *

§§ 317.23 and 317.24 [Redesignated from 317.19 and 317.20]

3. Sections 317.19 and 317.20 (9 CFR 317.19 and 317.20) are redesignated as §§ 317.23 and 317.24 respectively (9 CFR 317.23 and 317.24), new §§ 317.18 through 317.22 (9 CFR 317.18 through 317.22) are added to part 317, and the Table of Contents is amended accordingly, to read as follows:

Sec.

* * * * *

317.18 Quantity of contents labeling.
317.19 Definitions and procedures for determining net weight compliance.
317.20 Scale requirements for accurate weights, repairs, adjustments, and replacement after inspection.
317.21 Scales: testing of.

Sec.

- 317.22 Handling of failed product.
317.23 Jar closure requirements.
317.24 Packaging materials.

§ 317.18 Quantity of contents labeling.

Sections 317.18 through 317.22 of this part prescribe the procedures to be followed for determining net weight compliance and prescribe the reasonable variations from the declared net weight on the labels of immediate containers of products in accordance with § 317.2(h) of this part.

§ 317.19 Definitions and procedures for determining net weight compliance.

(a) For the purpose of §§ 317.18 through 317.22 of this part, the reasonable variations allowed, definitions, and procedures to be used in determining net weight and net weight compliance are described in the National Bureau of Standards' (NBS) Handbook 133, "Checking the Contents of Packaged Goods," Washington, DC: U.S. Government Printing Office, Third Edition, September 1988, which is incorporated by reference, with the exception of the NBS Handbook 133 requirements listed in paragraph (b) of this section. Those provisions incorporated by reference herein, are considered mandatory requirements. This incorporation was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. (These materials are incorporated as they exist on the date of approval.) A notice of any change in the Handbook cited herein will be published in the Federal Register. Copies may be purchased from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. It is also available for inspection at the Office of the Federal Register Information Center, room 8401, 1100 L Street NW., Washington, DC 20408.

(b) The following NBS Handbook 133 requirements are not incorporated by reference.

Chapter 2 General Considerations

- 2.13.1 Polyethylene Sheeting and Film
2.13.2 Textiles
2.13.3 Mulch

Chapter 3 Methods of Test for Packages Labeled by Weight

- 3.11. Aerosol Packages
3.14. Glazed Raw Seafood and Fish
3.15. Canned Coffee
3.16. Borax
3.17. Flour

Chapter 4 Methods of Test for Packages Labeled by Volume

- 4.7. Milk
4.8. Mayonnaise and Salad Dressing

**4.9. Paint, Varnish, and Lacquers—
Nonaerosol**

- 4.11. Peat Moss
4.12. Bark Mulch
4.15. Ice Cream Novelties

Chapter 5 Methods of Test for Packages Labeled by Count, Length, Area, Thickness, or Combinations of Quantities

- 5.4. Polyethylene Sheeting
5.5. Paper Plates
5.6. Sanitary Paper Products
5.7. Pressed and Blown Glass Tumblers and Stemware

Appendix D: Package Net Contents Regulations

- D.1.1. U.S. Department of Health and Human Services, Food and Drug Administration
D.1.2. Department of Agriculture, Food Safety and Inspection Service
D.1.3. Federal Trade Commission
D.1.4. Environmental Protection Agency
D.1.5. U.S. Department of the Treasury, Bureau of Alcohol, Tobacco, and Firearms

§ 317.20 Scale requirements for accurate weights, repairs, adjustments, and replacement after inspection.

(a) All scales used to weigh meat products sold or otherwise distributed in commerce in federally inspected meat establishments shall be installed, maintained and operated to insure accurate weights. Such scales shall meet the applicable requirements contained in National Institute of Science and Technology Handbook 44, "Specifications, Tolerances and Other Technical Requirements for Weighing and Measuring Devices," Washington, DC: U.S. Government Printing Office, 1990 Edition, September 1989, which is incorporated by reference. This incorporation was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. (These materials are incorporated as they exist on the date of approval.) Copies may be purchased from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. It is also available for inspection at the Office of the Federal Register Information Center, room 8401, 1100 L Street NW., Washington, DC 20408.

(b) All scales used to weigh meat products sold or otherwise distributed in commerce or in States designated under section 301(c) of the Federal Meat Inspection Act, shall be of sufficient capacity to weigh the entire unit and/or package.

(c) No scale shall be used at a federally inspected establishment to weigh meat products unless it has been found upon test and inspection, as specified in NIST Handbook 44, to provide accurate weight. If a scale is

reinspected or retested and found to be inaccurate, or if any repairs, adjustments or replacements are made to a scale, it shall not be used until it has been inspected and tested by a USDA official, or a State or local government weights and measures official, or State registered or licensed scale repair firm or person, and it must meet all accuracy requirements as specified in NIST Handbook 44. If a USDA inspector has put a retain tag on a scale it can only be removed by a USDA inspector. As long as the tag is on the scale, it shall not be used.

§ 317.21 Scales: Testing of.

(a) The operator of each official establishment that weighs meat food products shall cause such scales to be tested for accuracy, in accordance with the technical requirements of NIST Handbook 44, at least once during the calendar year. In cases where the scales are found not to maintain accuracy between tests, more frequent tests may be required and monitored by an authorized USDA program official.

(b) The operator of each official establishment shall display on or near each scale a valid certification of the scale's accuracy from a State or local government's weights and measures authority or from a State registered or licensed scale repair firm or person, or shall have an FSIS approved net weight program under a Total Quality Control System or Partial Quality Control Program in accordance with § 318.4 of this subchapter.

§ 317.22 Handling of failed product.

Any lot of product which is found to be out of compliance with net weight requirements upon testing in accordance with § 317.19 shall be handled as follows:

(a) A lot tested in an official establishment and found not to comply with net weight requirements may be reprocessed and must be reweighed and remarked to satisfy the net weight requirements of this section and be reinspected, in accordance with the requirements of this Part.

(b) A lot tested outside of an official establishment and found not to comply with net weight requirements must be reweighed and remarked with a proper net weight statement, provided that such reweighing and remarking shall not deface, cover, or destroy any other marking or labeling required under this subchapter and the net quantity of contents is shown with the same prominence as the most conspicuous feature of a label.

PART 381—[AMENDED]

4. The authority citation for part 381 continues to read as follows:

Authority: 21 U.S.C. 451 *et. seq.*; 7 U.S.C. 450 *et. seq.*

5. Section 381.121 (9 CFR 381.121) is amended by revising the first sentence of paragraph (a), revising paragraph (b), adding a new sentence to the end of paragraph (c)(1), adding a new sentence to the end of paragraph (c)(5), and revising paragraphs (c)(6) and (c)(9), and adding new paragraph (c)(10) to read as follows:

§ 381.121 Quantity of contents.

(a) The label shall bear a statement of the quantity of contents in terms of weight or measures as provided in paragraph (c)(5) of this section. * * *

(b) When a poultry product and a nonpoultry product are separately wrapped and are placed in a single immediate container bearing the same name of both products, the net weight on such immediate container may be the total net weight of the products, or such immediate container may show the net weights of the poultry product and the nonpoultry product separately.

Notwithstanding the other provisions of this paragraph, the label on consumer size retail packages of stuffed poultry and other stuffed poultry products must show the total net weight of the poultry product, and in close proximity thereto, a statement specifying the minimum weight of the poultry in the product.

(c)(1) * * * An unused tare weight, as defined in section 381.121b of this subchapter, may be printed adjacent to the statement of net quantity of contents when the product is packaged totally with impervious packaging material and is packed with a usable medium.

(5) * * * Paragraphs (c) (8) and (9) of this section permit certain exceptions to this paragraph for multi-unit packages, and random weight consumer size and small packages (less than ½ ounce), respectively.

(6) The statement as it is shown on a label shall not be false or misleading and shall express an accurate statement of the quantity of contents of the container. Reasonable variations caused by loss or gain of moisture during the course of good distribution practices or by unavoidable deviations in good manufacturing practices will be recognized. Variations from stated quantity of contents shall be as provided in section 381.121b of this subchapter. The statement shall not include any term qualifying a unit of weight, measure, or count such as "jumbo quart," "full gallon," "giant quart,"

"when packed," "minimum," or words of similar importance except as provided in paragraph (b) of this section.

(9) The following exemptions from the requirements contained in this section are hereby established:

(i) Individually wrapped, random weight consumer size packages of poultry products (as specified in paragraph (c)(10) of this section) and poultry products that are subject to shrinkage through moisture loss during good distribution practices and are designated as gray area type of products as defined in NBS handbook 133, section 3.18.2, need not bear a net weight statement when shipped from an official establishment provided a net weight shipping statement which meets the requirements of paragraph (c)(6) of this section is applied to the shipping container prior to shipping it from the official establishment. Net weight statements so applied to the shipping container are exempt from the type size, dual declaration, and placement requirements of this paragraph if an accurate statement of net weight is shown conspicuously on the principal display panel of the shipping container. The net weight also shall be applied directly to random weight consumer size packages prior to retail display and sale. The net weight statement of random weight consumer size packages for retail sale shall be exempt from the type size, dual declaration, and placement requirements of this paragraph if an accurate statement of net weight is shown conspicuously on the principal display panel of the package.

(ii) Individually wrapped and labeled packages of less than ½ ounce net weight and random weight consumer size packages shall be exempt from the requirements of this paragraph if they are in a shipping container and the statement of net quantity of contents on the shipping container meets the requirements of paragraph (c)(6) of this section;

(iii) Individually wrapped and labeled packages of less than ½ ounce net weight bearing labels declaring net weight, price per pound, and total price, shall be exempt from the type size, dual declaration, and placement requirements of this paragraph if an accurate statement of net weight is shown conspicuously on the principal display panel of the package.

(10) As used in this section a "random weight consumer size package" is one of a lot, shipment or delivery of packages of the same product, with varying weights and with no fixed weight pattern.

6. New §§ 381.121a–381.121f (9 CFR 381.121a–381.121f) are added to part 381, and the Table of Contents is amended accordingly, to read as follows:

Sec.

- 381.121a Quantity of contents labeling.
- 381.121b Definitions and procedures for determining net weight compliance.
- 381.121c Scale requirements for accurate weights, repairs, adjustments and replacement after inspection.
- 381.121d Scales: testing of.
- 381.121e Handling of failed product.

§ 381.121a Quantity of contents labeling.

Sections 381.121a through 381.121e of this Part prescribe the procedures to be followed for determining net weight compliance and prescribe the reasonable variations from the declared net weight on the labels of immediate containers of products in accordance with § 381.121 of this part.

§ 381.121b Definitions and procedures for determining net weight compliance.

(a) For the purpose of § 381.121b of this part, the reasonable variations allowed, definitions, and procedures to be used in determining net weight and net weight compliance are described in the National Bureau of Standards (NBS) Handbook 133, "Checking the Contents of Packaged Goods," Washington, DC: U.S. Government Printing Office, Third Edition, September 1988, which is incorporated by reference, with the exception of the NBS Handbook 133 requirements listed in paragraph (b) of this section. Those provisions, incorporated by reference herein, are considered mandatory requirements. This incorporation was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. (These materials are incorporated as they exist on the date of approval.) Copies may be purchased from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. It is also available for inspection at the Office of the Federal Register Information Center, room 8401, 1100 L Street NW., Washington, DC 20408.

(b) The following NBS Handbook 133 requirements are not incorporated by reference.

Chapter 2—General Considerations

- 2.13.1 Polyethylene Sheeting and Film
- 2.13.2 Textiles
- 2.13.3 Mulch

Chapter 3—Methods of Test for Packages Labeled by Weight

- 3.11. Aerosol Packages

- 3.14. Glazed Raw Seafood and Fish
- 3.15. Canned Coffee
- 3.16. Borax
- 3.17. Flour

Chapter 4—Methods of Test for Packages Labeled by Volume

- 4.7. Milk
- 4.8. Mayonnaise and Salad Dressing
- 4.9. Paint, Varnish, and Lacquers—
Nonaerosol
- 4.11. Peat Moss
- 4.12. Bark Mulch
- 4.15. Ice Cream Novelties

Chapter 5—Methods of Test for Packages Labeled by Count, Length, Area, Thickness, or Combinations of Quantities

- 5.4. Polyethylene Sheeting
- 5.5. Paper Plates
- 5.6. Sanitary Paper Products
- 5.7. Pressed and Blown Glass Tumblers and Stemware

Appendix D: Package Net Contents Regulations

- D.1.1 U.S. Department of Health and Human Services, Food and Drug Administration
- D.1.2 U.S. Department of Agriculture, Food Safety and Inspection Service
- D.1.3 Federal Trade Commission
- D.1.4 Environmental Protection Agency
- D.1.5 U.S. Department of the Treasury, Bureau of Alcohol, Tobacco, and Firearms

§ 381.121c Scale requirements for accurate weights, repairs, adjustments, and replacement after inspection.

(a) All scales used to weigh poultry products sold or otherwise distributed in commerce in federally inspected poultry plants shall be installed, maintained, and operated to insure accurate weights. Such scales shall meet the applicable requirements contained in National Institute of Science and Technology Handbook 44, "Specifications, Tolerances and Other Technical Requirements for Weighing and Measuring Devices," 1990 Edition, Washington, DC: U.S. Government Printing Office, September 1989, which is incorporated by reference. This incorporation was approved by the

Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. (These materials are incorporated as they exist on the date of approval.) A notice of any change in the Handbook cited herein will be published in the *Federal Register*. Copies may be purchased from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. It is also available for inspection at the Office of the Federal Register Information Center, room 8401, 1100 L Street NW., Washington, DC 20408.

(b) All scales used to weigh poultry products sold or otherwise distributed in commerce or in State designated under section 5(c) of the Poultry Products Inspection Act, shall be of sufficient capacity to weigh the entire unit and/or package.

(c) No scale shall be used at a federally inspected establishment to weigh poultry products unless it has been found upon test and inspection as specified in NIST Handbook 44 to provide accurate weight. If a scale is inspected or tested and found to be inaccurate, or if any repairs, adjustments or replacements are made to a scale, it shall not be used until it has been reinspected and retested by a USDA official, or a State or local government weights and measures official, or a State registered or licensed scale repair firm or person, and it must meet all accuracy requirements as specified in NIST Handbook 44. If a USDA inspector has put a "Retain" tag on a scale it can only be removed by a USDA inspector. As long as the tag is on the scale, it shall not be used.

§ 381.121d Scales; Testing of.

(a) The operator of each official establishment that weighs poultry food products shall cause such scales to be tested for accuracy in accordance with the technical requirements of NIST Handbook 44, at least once during the calendar year. In cases where the scales

are found not to maintain accuracy between tests, more frequent tests may be required and monitored by an authorized USDA program official.

(b) The operator of each official establishment shall display on or near each scale a valid certification of the scale's accuracy from a State or local government's weights and measures authority or from a State registered or licensed scale repair firm or person, or shall have an FSIS approval net weight program under a Total Quality Control System or Partial Quality Control Program in accordance with § 381.145 of this subchapter.

§ 381.121e Handling of failed product.

Any lot of product which is found to be out of compliance with net weight requirements upon testing in accordance with § 381.121b of this subchapter shall be handled as follows:

(a) A lot tested in an official establishment and found not to comply with net weight requirements may be reprocessed and must be reweighed and remarked to satisfy the net weight requirements of this section, and be reinspected in accordance with the requirements of this part.

(b) A lot tested outside of an official establishment and found not to comply with net weight requirements must be reweighed and remarked with a proper net weight statement, provided that such reweighing and remarking shall not deface, cover, or destroy any other marking or labeling required under this subchapter and the net quantity of contents is shown with the same prominence as the most conspicuous feature of a label.

Done at Washington, DC, on: November 26, 1990.

Lester M. Crawford,
Administrator, Food Safety and Inspection Service.
