## PREFACE

### NATURAL SCIENCES AND TECHNOLOGY – CURRICULUM 2005

The National Language Service (NLS) of the Department of Arts and Culture and its stakeholders are taking some bold steps towards the development and modernisation of all the official languages of South Africa. They include the development of technical vocabularies in all the indigenous languages for effective communication among the people of South Africa. Terminology is essential to communication in technical fields and domains of specialised activity, and the most effective way of creating awareness about terminology is to introduce it at school level. This publication is essentially a multilingual list containing the source language terms in English with equivalents in the other five official target languages.

The primary school Natural Sciences and Technology term list for Curriculum 2005 has been completed on the Multiterm database by a team from the Terminology Coordination Section of the National Language Service.

The list is based on the learning material for Grades 4 to 6 initially obtained from the Your Pal Study Skills and the Brainline electronic study guide for science and technology. Terms were identified, excerpted and documented. The team identified the terms that required definitions. Several reputable and online dictionaries were used to aid the writing of these definitions. The meaning of the terms as set out in the definitions formed the basis according to which collaborators found or coined equivalents in the target languages.

The NLS contacted the Gauteng Educational Union to check for the comprehensiveness of the data corpus. The NLS was referred to the Chief Author of the Natural Sciences and Technology 2005 Curriculum.

Advice was sought for the validation and evaluation of the relevance and register of the contents. The response received was very favourable. A number of additional technological terms were furnished with example definitions, and were then incorporated in the terminological data corpus together with other comments.

As the Natural Sciences and Technology learning areas in the curriculum are intertwined at this level of education, the Chief Author advised that a single list including the terms in both these learning areas would be of greater use than two separate lists. For this reason Natural Sciences and Technology have been incorporated into a single database.

The target users of the dictionary are educators and learners for Grades 4 to 6. The indirect beneficiaries are the Departments of Education at national and provincial level and other educational institutions, developers of learner support materials, curriculum implementers, authors and examiners.

The source text comprises some 2 896 term records, approximately 90% of which were defined to facilitate the secondary term-creation process handled by the collaborators.

The collaborators were also tasked to work on the project. They formed terminology working groups for the various target languages. Each of the groups consisted of a chairperson, coordinator and secretary, as well as

several members with special expertise. These expert members of the committees included subject specialists who were also mother tongue speakers of the languages concerned, lexicographers, linguists and members of the National Language Bodies (NLBs).

In the secondary term-creation phase the source text was taken to the collaborators for them to supply target language equivalents. The final step was to take the terms to the terminology technical committees of the NLBs for verification.

The concepts covered in the term list range from atoms to elephants, natural phenomena such as air, ventilation, water, evaporation, magnetism, lightning and tornados to different forms of energy, from potential to nuclear, from chemistry and electronics to air pollution, the ozone layer and outer space.

The compilers of this product do not claim that it is comprehensive or entirely without errors and scope for improvement. Feedback, especially on the layout, the accuracy of the equivalents and the comprehensiveness of the dictionary, will be welcomed.

The compilers of this corpus hope that it will make a difference to mother-tongue education in classrooms throughout the country.

September 2005

Johannesburg

## **ACKNOWLEDGEMENTS**

Special thanks are due to Ms Susan Roets, and each and every member of the Working and Editorial Committees of the Terminology Coordination Section (TCS) who did the spadework on this project. Without their valuable inputs this data would not have been possible.

A word of special thanks and appreciation to Ms Joey Fraser, the chief author of the Natural Sciences and Technology for Curriculum 2005, for her valuable input and additional information that was ultimately incorporated in the list.

The National Language Service of the Department of Arts and Culture would like to thank Dr Hugh Davies of the Gauteng Educational Union and Ms Wilkens, the educational curriculum coordinator for their assistance. Many thanks go to all the collaborators in the provinces for their great assistance in the finalisation of the project. The collaborating terminology groups consisted of first language speakers of the target languages. These collaborators were linguists, language practitioners, lexicographers, science educators and curriculum implementers of the respective languages. Their involvement was critical to the success of the Multilingual Natural Sciences and Technology Dictionary.

We would also like to extend our word of thanks to the Pan South African Language Board (PanSALB) for allowing the various National Language Bodies to authenticate the terminology lists.

The NLS would also like to acknowledge the contributions made by the other stakeholders and likewise extend our thanks to them as well for their advice and input.

A particular word of thanks is addressed to all the following collaborators who not only attended the terminology meetings, but also prepared and committed themselves to this project and worked extended hours in contributing to this terminological data corpus.

## **EXPLANATORY NOTES**

### **Dictionary entry**

The terminological information that was documented in the term records on the terminology database is contained in the dictionary entries in the alphabetical section of the dictionary. The dictionary entries reflect all the languages incorporated in this data corpus.

### **Source language**

The source language, that being English for this dictionary, is the language in which the terms were initially collected and documented and for which an equivalent and equivalent synonyms were found in the different target languages.

### **Target language**

The language in which an equivalent and equivalent synonyms where applicable were found or coined. This dictionary incorporates Afrikaans, isiZulu, isiXhosa, Siswati, isiNdebele, Setswana, Sepedi, Sesotho, Tshivenda and Xitsonga as target languages.

### **Treatment of the source language**

**Headword** Each dictionary entry consists of a headword in the source language, which is English. All headwords appear in bold print and the size of the letters is slightly bigger than that of the equivalents. The following information is provided for headwords:

**part of speech** in the case where the compilers deemed it necessary to indicate that the same term is multifunctional in the sense that it is used as a noun and an adjective, or a noun and a verb for example. Part of speech is indicated by the editorial abbreviations of n. (for noun); v. (for verb), adj. (for adjective) and adv. (for adverb), e.g. It is important to inform the user that not all the headwords in the alphabetical list have an indication of the part of speech.

**synonym** or more than one synonym for headwords that have other terms for the same concept;

**special note(s)** about the term such as an unusual plural form, or a headword in the plural form, indicating the singular for example

**context indication** which helps the user to know in what context the term and all of its related information is used. This applies especially in cases where the same terms are repeated below one another but in different meanings.

The initial letter of headwords appears in lower case. Compound terms, however, of which the first constituent component is a proper name starts with an initial capital letter, e.g.

**Examples:**

<b>bird of prey</b>	→	headword
Afrikaans	<b>roofvoël</b>	→ equivalent
IsiZulu	<b>inyoni ephila ngenyama</b>	→ equivalent
IsiXhosa	<b>intaka ephila ngamaxhoba</b>	→ equivalent
SiSwati	<b>inyoni lesidlanyama</b>	
IsiNdebele	<b>inyoni edla ezinye</b>	
<b>Bunsen burner</b>	→	headword – compound term with proper name
IsiZulu	<b>isishisisi sika-Bunsen</b>	
<b>Yorkshire terrier</b>	→	headword – compound term with proper name
Afrikaans	<b>Yorkshire-terriër</b>	
IsiZulu	<b>isimaku</b>	
IsiXhosa	<b>uhlobo lwenja</b>	
SiSwati	<b>Iuhlobo Iwesamaku</b>	
IsiNdebele	<b>umavukuvukwana wenja</b>	
<b>access n.</b>	→	part of speech
Afrikaans	<b>toegang</b>	→ equivalent
IsiZulu	<b>ukuvumeleka</b>	→ equivalent
IsiZulu	<b>ukukwazi ukungena</b>	→ equivalent synonym
IsiZulu	<b>ukugunyazwa</b>	→ equivalent synonym
IsiZulu	<b>imvume yokungena</b>	
IsiXhosa	<b>ukungena kwikhompyutha</b>	→ equivalent
IsiXhosa	<b>ukufikelela kwikhompyutha</b>	→ equivalent synonym
SiSwati	<b>imvume</b>	→ equivalent
SiSwati	<b>kutfola indlela</b>	→ equivalent synonym
IsiNdebele	<b>ilungelo</b>	→ equivalent
<b>access v.</b>	→	part of speech
Afrikaans	<b>toegang verkry</b>	→ equivalent
IsiZulu	<b>-vumeleka</b>	→ equivalent
IsiZulu	<b>-ngena</b>	→ equivalent synonym
IsiZulu	<b>-finyelela</b>	

IsiZulu **-gunyaza**

IsiXhosa **ukungena**

IsiXhosa **ukuvula**

Siswati **vumeleka**

Siswati **ngeña**

IsiNdebele **fikelela**

**airtight adj.** → part of speech

Afrikaans **lugdig**

IsiZulu **-ngangenimoya**

IsiXhosa **evingcela umoya**

Siswati **valeke-nci**

IsiNdebele **-ngavumeli mmoya**

**bacteria** <pl / see bacterium> → special note - in angle brackets

**beard** {tuft of hairs on certain plants} → context indication – in curly brackets

Afrikaans **baard** → context indication – in curly brackets

IsiZulu **intshakaza**

IsiXhosa **ubulembu**

IsiXhosa **intshatshoba**

IsiNdebele **itjhatjhani**

**beard** {hair growing on the skin} → context indication – in curly brackets

Afrikaans **baard**

IsiZulu **intshebe**

IsiXhosa **iindevu**

Siswati **silevu**

IsiNdebele **iindevu**

### Treatment of the target languages

Apart from the source language the dictionary entries also treat the various target languages in terms of an **equivalent** which is the term in the target language most frequently used or best known for the concept;

**equivalent synonym** which is another term in the language referring to the same concept as the equivalent. Some equivalents have more than only one synonym;

**context indication** in the target language

See examples above

#### Treatment of synonyms

In the case of both the source and target languages the synonyms take the second, third, and even following positions for each language, introduced by the specific language designation in the case of the target languages. In the case of the source language a synonym is introduced by **English synonym**, following immediately below the headword.

<b>vertebral column</b>	→	headword
English synonym	<b>spinal column</b>	→ synonym (source language)
English synonym	<b>backbone</b>	→ synonym (source language)
Afrikaans	<b>ruggraat</b>	→ equivalent (target language)
Afrikaans	<b>werwelkolom</b>	→ equivalent synonym (target language)
IsiZulu	<b>umgogodla</b>	→ equivalent (target language)
IsiXhosa	<b>umqolo</b>	
IsiXhosa	<b>umchachazo</b>	
Siswati	<b>umhloto</b>	
Siswati	<b>umgogodla</b>	
IsiNdebele	<b>ithambo lomgogodlha</b>	
IsiNdebele	<b>umhlandla</b>	

Each synonym is also listed in the alphabetical section of the dictionary, showing the arrow sign. The users should therefore know that a term where an arrow refers to another term all the relevant information will be available in the entry of the referred term.

**backbone** ⇒ vertebral column

**chrysalis** ⇒ pupa

#### Treatment of abbreviations and symbols

These are shortened forms of the full forms of terms both in the source and target languages. In the dictionary entries these are treated like synonyms.

<b>Aluminium</b>	→	headword
English	<b>AI</b>	→ abbreviation for source language

IsiNdebele	<b>i-aluminiyamu</b>	
Afrikaans	<b>aluminium</b>	
Afrikaans	<b>Al</b> →	abbreviation for target language
IsiZulu	<b>i-aluminiyamu</b>	
IsiXhosa	<b>i-aluminiyami</b>	
<b>World Wide Web</b>	→	headword
English	<b>WWW</b> →	abbreviation for source language
Afrikaans	<b>Wêreldwye Web</b>	
Afrikaans	<b>WWW</b> →	abbreviation for target language
IsiZulu	<b>isizindalwazi smhlaba jikelele</b>	
IsiXhosa	<b>i-intanethi enguzwelonke</b>	
IsiNdebele	<b>iWebhusayidi yePhasi Zombelele</b>	

### Context indication

Context is provided to help the user to discern between different meanings of the same term or simply serves the purpose of helping the user towards an understanding of the meaning of the terms, at least relating the headword and the equivalents to the context in which they are used.
