### Container Stabiliser

- In order to create a stable construction it is recommendable to join the containers back to back
- If this kind of connection is impossible due to lack of space at the archive location and a single wall placement is the most obvious solution, we recommend the use of archive stabilizers (panels that are placed underneath)
- This type of construction allows the containers to be placed tightly against the wall
- Since the polystyrene panels are slanted – the height at the front side is 4 cm/1.57 inch and at the back side 2 cm/0.79 inch they will prevent the containers on top from tilting forwards
- Made of polystyrene
- Pack of 2 pieces

# PLANT A TREE

BANKERS BOX® has partnered with Tree Nation, an established, global organisation with the mission to tackle climate change by planting trees. This addresses the major problems faced by our generation, namely - climate change, deforestation and CO2 emissions.

25% of climate change can be attributed to deforestation. Our Plant-a-Tree initiative proactively increases reforestation while tackling wider humanity issues caused by deforestation.

As a brand that has been around for over 100 years, we at BANKERS BOX® believe in durability and sustainability – whether they are our products or the planet we live on. And with you, we can truly make a difference, one tree at a time.

1. Simply buy a BANKERS BOX® corrugated archival product
2. Register your product and personal details
3. We will email you with a unique link to complete registration
4. Tree-Nation will plant the tree on behalf of you and BANKERS BOX®
