Z934BS
Brushed Stainless

CRL Brushed Stainless Z-Series Flat Surface Mount Square Type Glass Clamps

- For use with square tubing or other flat surfaces
- 316 Alloy stainless steel
- For 19 mm glass (flat surface mounting)
- Use monolithic tempered glass

Z734BS
Brushed Stainless

CRL Brushed Stainless Z-Series Radius Surface Mount Square Type Glass Clamps

- For 19 mm glass (radius surface mounting)
- For use with 50.8 mm diameter round tubing
- 316 Alloy stainless steel
- Use monolithic tempered glass

ZBOLT
8mm
25.4mm length
5/16"-18 thread

CRL Z-Clamp Bolt

- For securing Z-Series clamps to tubing
- Simplifies Z-Clamp installation
- For metal attachments
- Minimum order quantity 10

ZLAG
8mm diameter
51mm length
5/16" thread

CRL Z-Clamp Lag Bolt

- Stainless screws for use with CRL's Z-Series clamps
- Simplifies Z-Clamp installation
- For wood attachments
- Minimum order quantity 10

- Brite polished finish

Install glass balustrades with ease...

Conforming to Building Standards Across Europe

At CRL, we are committed to the testing and development of all of our products. All CRL TAPER-LOC® Systems are independently tested to meet British, German, French and US Standards. We have solutions up to and including 3kN load tests.

Simple. Fast. Unique.

TAPER-LOC[®]X
DRY GLAZE RAILING SYSTEM

taper-loc.co.uk

Frameless Glass Balustrade System

- 50% faster to install than alternatives
- Save Time and Money - The horizontal TAPER-LOC[®] design allows the system to be adjusted, dismantled and re-set
- Meets BS 6180: 2011 requirements
- The product is completely unique because it uses a horizontal TAPER-LOC[®] design, which allows the system to be adjusted, dismantled and re-set
- Ideal for replacing scratched and broken panels in existing applications

Taper-Loc.co.uk

EASY INSTALLATION

The process of installing Glass Balustrades is now quick and easy with CRL's new and innovative TAPER-LOC® system.

TAPER-LOC® has a unique design that lets you apply precision tension to lock it in place, securing the glass in your aluminium base shoe without the use of messy cement. Your installation time is reduced by up to 50% while still exceeding code standards.

Adhere the L-Setting Blocks to the bottom of the glass panel.

Insert the Taper set half way down into the Base Shoe as shown, opposite the L-Setting Block, and then squeeze the Tapers together finger tight.

Place Installation/Removal Tool into position onto the Tapers and push them down into the Base Shoe.

Crank the Torque Wrench until the wrench clicks and breaks for a few degrees, letting you know the Tapers are locked to the correct measured torque.

Conforming to Building Standards Across Europe

At CRL, we are committed to the testing and development of all of our products.

All CRL TAPER-LOC® Systems are independently tested to meet British, German, French and US Standards. We have solutions up to and including 3kN load tests.

Base Shoe codes end with either 'D' or 'F' to determine Surface or Side Mounted.
 D = Surface Mounted Base Shoe
 F = Side Mounted Base Shoe

NOTE: Undrilled and fascia drilled base shoe available and in stock - contact Technical Sales for details. Minimum order: 1 each. All Base Shoe can be combined for quantity pricing. Must ship common carrier. Stock lengths have a tolerance of plus or minus 19mm. CRL advise against pre-drilling the substructure prior to installation of base shoe.

INTRODUCING... TAPER-LOC® G

- Our NEW lower cost base shoe designed for use with CRL's patented TAPER-LOC® Glass Balustrade System
- 20% lighter but with all the strength of standard base shoe
- Environmentally friendly while meeting and exceeding BS standards
- Surface and fascia mount designs in 3 metre lengths

For Information on Cladding, Gaskets, Taper options, End Caps and Tools please see www.taper-loc.co.uk or request our TAPER-LOC brochure

TYPICAL INSTALLATIONS

Concrete Substrate Typical Surface Mount Detail

Concrete Substrate Typical Fascia Mount Detail

Steel Tube Substrate Typical Surface Mount Detail

INSTALLATION GUIDELINE:
During the installation process, make sure a certified welder applies a 4.8mm continuous fillet weld on two sides of the weld block.

Steel Tube Substrate Typical Fascia Mount Detail

INSTALLATION GUIDELINE:
When attaching directly to steel, make sure the steel thickness is 9.5mm thick min. If not use CRL's thick weld blocks.

CRL Juliette Balcony Connector

- For use with the 48.3mm EUGR20 Cap Rail
- 316 Grade Stainless Steel
- Tested to a width of 2400mm certificate available

EUGR20BS
Brushed Stainless Steel 3m Length

EUGR20BS14
Brushed Stainless Steel 4.2m Length

EUGR20PS
Polished Stainless Steel 3m Length

EUGR20PS14
Polished Stainless Steel 4.2m Length

48.3mm Diameter Cap Rail

- For 12mm to 25.52mm glass
- Brushed stainless steel finish
- Connects to a variety of fabricated corners and end caps

For Vinyl Inserts please see page 34

Windshield Clamps

- Also known as spigots
- Gives an 'all-glass' frameless look
- Great for pool fencing, balcony, and deck applications
- Available in two standard architectural finishes
- 316 alloy and duplex 2205 marine grade finishes
- Designed for 12mm toughened glazing

Our Frameless Windscreen Clamps, which are also known as spigots, provide a break from the wind using an almost invisible "frameless" look. No vertical posts are used between the panels of glass; they are solely supported from the bottom by these high strength stainless steel clamps.

Aluminium Railing System (ARS)

CRL's high quality commercial or residential Aluminium Railing Systems are manufactured from extruded aluminium frames utilising toughened glass or aluminium pickets.

Our railing systems provide superior colour retention, impact and weather resistance in any environment.

For more information call FREE on
00 800 0421 6144

f: 00 800 0262 3299

Aluminium Railing Systems

- 60.3mm square posts available
- Available from stock in black, white and silver.
- Custom finishes also available

Design Options

- Exterior and interior hand use
- Infill panel options: aluminium pickets, aluminium pattern panels, clear or coated structural glass, or stainless steel cable
- Custom gates
- ADA compliant grab rails
- Attractive low-voltage, post mounted lighting system for our railing systems. Using a safe, 12 volt power source, these lights provide a subtle glow that is sure to enhance any balcony environment. Contact CRL Technical Sales for further information.

Component Features and Benefits

- Innovative design details for standard or custom applications
- Extruded aluminium for durability, weather resistance, and low maintenance
- Heavy gauge materials and steel embeds for strength
- Uses 6mm to 12mm toughened glass for safety and impact resistance
- 6mm and 10mm using gasket. 12mm using wet glaze

Colour Selection

- Tough, powder-coated or optional kynar paint colours for superior colour retention and weather resistance
- Special coating for resistance to salt water corrosion

Standard Colours

- In-house factory applied
- Baked on TGIC polyester powder coat paint system
- Excellent weather resistance and durability
- Meets AAMA 2603-98 specifications

Additional Colour Options

- A variety of textured and performance enhanced powder coat paint systems
- Custom colour matching
- All paint systems will be applied over state-of-the-art chromate pre-treatment

Stock and custom finishes are shown below with their colour codes. Add the chosen colour code to a Cat No to complete your product code.

Note: Colours shown are representative only, and may vary slightly from actual gloss, colour, and texture. If colour match is critical, please contact Technical Sales for additional information.

CRL ARS Aluminium Railing System Mounting Options

One benefit of the ARS System is that it attaches to just about any substrate with our standard Surface Mount Base Plates. However, you do have additional mounting options, as illustrated below.

Our specially formulated coatings are designed to resist the corrosive effects of salt water, providing a permanent, worry-free addition to your building.

The CRL Aluminium Railing System is designed to meet all Guard Rail Safety Codes, and with so many options, there is a railing system for every application.

Surface Mounted Standard Base With Moisture Barrier Gasket Between Bracket and Substrate

Surface

Basic Installation Instructions

1. Post Installation

Install End and Corner Posts first, then continue with Intermediate Posts. Be sure to place Stainless Steel Washers under the Bolts so that the Bolt Cover Buttons can be attached. Ensure that Posts are plumb and level. **NOTE:** When installing Post on top of concrete, brick, masonry, or stucco, always make sure to install the Moisture Barrier Gasket between the substrate and the Bottom Plate.

2. Cap Rail Installation

Measure and cut the Cap Rail to length. Attach the Cap Rail to the Posts using Self Tapping Screws. Install the End Caps with provided screws.

3. Rail Connecting Blocks

Install the Rail Connecting Blocks onto the Posts using the Self Tapping Screws provided. These Blocks are used to support the Bottom Rail.

4. Top Rail Infill and Bottom Rail

Cut Top Rail Infill and Bottom Rail to length. Snap fit the Top Rail Infill into the Top Cap Rail. Mount the Bottom Rail onto the Blocks and secure with Tek Screws.

5. Vinyl Installation (Glass Panels Only)

Snap fit Top Vinyl into Top Cap Rail insert.
Snap fit Bottom Vinyl into Bottom Rail.

6. Glass Installation (Glass Panels Only)

Push Glass up into the Vinyl. Align Glass with Bottom Vinyl and push down into Vinyl. Align Glass horizontally.

7. Picket Installation

Follow above steps 1, 2, and 3 only. Screw Pickets to the Top Cap Infill and the Bottom Rail. Snap fit top into Top Rail and install Bottom Rail over Blocks. Secure Bottom Rail to Blocks with Tek Screws.

200 Series

Our 200 Series Railing System uses a continuous flat top rail, which helps achieve a modern look. While most companies in the industry offer very typical top rails, the 200 Series maintains an extremely low profile while outperforming competitive systems for strength and durability. At 47.6mm it has the lowest profile of all the top rails.

NOTE: As good as the 200 Series is, you cannot use it for a stair application where railing is required. The top cap is too wide in cross section to achieve the status of a hand rail. This being the case, you must use our 100 Series for the stair portion of the job. Contact CRL Technical Sales for further information.

- 6005-T5 aluminium alloy
- Standard rail heights are 914mm, 1066mm and 1219mm. Custom rail heights also available
- 60.3mm square aluminium post
- Infill panel options: 6mm or 10mm glass (not supplied by CRL), 19mm square or round profile aluminium picket panels
- Also 12mm glass when used with wet glaze method 6mm and 10mm using gasket
- Deck (top) mount or fascia mount applications available
- Core mount applications also available
- Can be fabricated with custom gates
- Exterior and interior applications
- A.D.A. compliant guard rails
- 1524mm recommended post spacing

Infill Options

CRL offers glass Infill Panel System or the Picket style shown below.

CRL ARS 300 Series Railing System

300 Series

Top Rail

300 Series

The 300 Series offers the largest profile of all our top rails. At 73mm high the 300 Series offers a stylish and continuous large round top rail, while maintaining the strength and durability of all of our Aluminium Railing Systems.

NOTE: You cannot use the 300 Series for a stair application where railing is required. The top cap is too wide in cross section to achieve the status as a hand rail. You must use our 100 Series for the stair portion of the job. Contact CRL Technical Sales for further information.

- 6005-T5 aluminium alloy
- Standard rail heights are 914mm, 1066mm and 1219mm. Custom rail heights also available
- 60.3mm square aluminium post
- Infill panel options 6mm or 10mm glass (not supplied by CRL), 19mm square or round profile aluminium picket panels, stainless steel cable, or decorative cast panels
- Also 12mm glass when used with wet glaze method 6mm and 10mm using gasket
- Deck (top) mount or fascia mount applications
- Core mount applications also available
- Exterior and interior applications
- Can be fabricated with custom gates
- A.D.A. compliant guard rails
- 1524mm recommended post spacing

Infill Options

CRL 90 Degree Horizontal Corners

2TRHXX

CRL 200 Series 90 Degree Horizontal Corners

- Welded and finished
- Matches shape of top rail
- Includes aluminium connector splice plates
- 6005 Alloy aluminium/T5 temper
- Custom angle corners also available

3TRHXX

CRL 300 Series 90 Degree Horizontal Corners

- Welded and finished
- Matches shape of top rail
- Includes aluminium connector splice plates
- 6005 Alloy aluminium/T5 temper
- Custom angle corners also available

CRL 135 Degree Horizontal Corners

CODE

DESCRIPTION

2TRH3XX

CRL 200 Series 135 Degree Horizontal Corners

- Welded and finished
- Matches shape of top rail
- Includes aluminium connector splice plates
- 6005 Alloy aluminium/T5 temper
- Custom angle corners also available

3TRH3XX

CRL 300 Series 135 Degree Horizontal Corners

- Welded and finished
- Matches shape of top rail
- Includes aluminium connector splice plates
- 6005 Alloy aluminium/T5 temper
- Custom angle corners also available

CRL Corner Brackets

45CB

135 Degree Corner Bracket

- For use with 200 and 300 Series
- Designed to fit underneath our top rails.
- Brackets are held in place with four Cat. No. TEK1 self-tapping tek screws
- Aluminium brackets are concealed under the top rail to connect corners.

90CB

90 Degree Corner Bracket

- For use with 200 and 300 Series
- Designed to fit underneath our top rails.
- Brackets are held in place with four cat. No. TEK1 self-tapping tek screws
- Aluminium brackets are concealed under the top rail to connect corners.

CRL Splice Plates

TCP1

CRL Splice Plates for Rails

- For use with 200 and 300 Series
- Aluminium splice plates fit under top rail to splice top rails together over a post
- Plates are held in place with two self-tapping screws (Cat. No. TEK1)
- Two plates are required at each splice point

CRL Adjustable Fastening Plates

CB350L
Left Hand Plate

CB350R
Right Hand Plate
(not shown)

CBS1
19mm Screw

CRL Adjustable Fastening Plates for Top Rails

- For use with 200 and 300 Series
- Aluminium plates attach to top of vertical post then to top rail
- No exposed screws design

CRL Horizontal Mid Rail and Infill for Glass

XX = Colour Code. Refer to page 43 for colour range and codes

CODE

DESCRIPTION

MR1XX

CRL Horizontal Mid-Rail

- For use with 200 and 300 Series
- Designed to accommodate 6mm to 12mm glass or 19mm square pickets. 6 and 10mm using gasket. 12mm glass when used with wet glaze method
- Custom powder coat colours also available
- Designed to be anchored between posts using RCB2 mounting blocks

MR1FXX

CRL Horizontal Snap-In Infill for Glass

- Designed to accommodate 6mm to 12mm glass. 6 and 10mm using gasket. 12mm glass when used with wet glaze method
- Designed to be anchored between posts using RCB2 mounting blocks
- Custom powder coat colours also available
- Snaps in from the underside of the horizontal mid-rail

CRL Bottom Rails

BRGLSXX

CRL Bottom Glass Rail

- For use with 200 and 300 Series
- Bottom rail designed to accommodate 6 to 12mm toughened glass. 6 and 10mm using gasket. 12mm glass when used with wet glaze method

BRPKTXX

CRL Bottom Picket Rail

- For use with 200 and 300 Series
- Designed to accommodate 19mm square or round pickets
- Optional bottom rail filler available

BRF241XX

CRL Standard Bottom Rail Filler

- Snaps in to conceal the underside of bottom rails and create a flush look
- Works with bottom rail for glass or bottom rail for pickets
- Also works with horizontal mid rails

CRL Intermediate Bottom Support

1BSXX

CRL Intermediate Bottom Support

- For use with all of our aluminium railings
- Connects to bottom rail with two self-tapping screws (Cat. No. TEK1)

Aluminium Windscreen System (AWS)

The AWS Aluminium Windscreen System was developed to provide an attractive, maintenance-free glass wall. All AWS Systems can be used in conjunction with a concrete slab, block wall or individual footings.

Visual Appeal The Homeowner will love the clean look of this wall and the virtually unobstructed view it provides.

Noise Reduction The AWS System is superbly suited as a sound wall along busy streets and highways. Our system provides a much higher sound transmission rating than conventional fencing.

Maintenance The AWS System is low maintenance. All components are specially coated to prevent corrosion and ensure that the homeowner will be satisfied for many years.

Flexibility The AWS System adapts to a wide variety of terrain and wall designs. The system is ideal for pool areas, decks and balcony applications.

Integrity The AWS System has been designed to provide a safe, transparent fence during high wind conditions. All glass installed must be fully toughened to meet all safety requirements and building codes.

CRL AWS Aluminium Windscreen System

- **Steel embedment keeps aluminium posts out of contact with concrete, and adds structural strength**
- **Ready to install**
- **Low maintenance with special coating to prevent corrosion**
- **Custom colours also available**

Unlike other glass wind wall systems, the AWS Aluminium Windscreen System keeps all aluminium out of contact with concrete.

The AWS System was designed to be a wind wall that is very aesthetically pleasing. Because of the great design and the interaction with the steel insert, AWS has enhanced structural properties, allowing for increased height and span capabilities.

- Custom colour matching
- All paint systems will be applied over state-of-the-art chromate pre-treatment

CRL AWS Aluminium Windscreen System Mounting Options

Unlike other glass wind wall systems, the AWS Aluminium Windscreen System keeps all aluminium out of contact with concrete. The lime in concrete is very corrosive to aluminium, and over time will degrade the physical properties of the components. The AWS System utilises a painted steel embedment that supports the vertical post and eliminates the possibility of damaging corrosion.

An added benefit of the steel embedment is that the contractor can install the steel components early in the construction process, then install the painted aluminium post later when the chances of damage by other tradesmen are greatly reduced. These are strong attributes of the AWS System, and have a real value to the builder and homeowner.

Typical Mounting Options

Core Mounted Installation for a Concrete Slab

Core Mounted Installation for CMU Block Walls

Surface Mounted Installation for a Concrete Slab

Basic Installation Instructions

- 1.**
- Core mount or surface mount the Steel Stanchions, starting with the End and Corner Posts first.
 - Then run a straight line between your End Posts and/or Corner Posts before you set the Intermediate Posts.
 - Be sure the Stanchions are plumb and level.
 - Note: When surface mounting to concrete, brick, masonry, or stucco make sure to install the Moisture Barrier Gasket between the bottom plate and substrate to prevent metal corrosion.

- 2a.**
- Once the Steel Stanchions are installed, apply CRL 95C Silicone to the Stanchion before mounting the Post into place.
 - If you are installing a Surface Mount Bottom Rail, measure and cut to the desired size, then install the Surface Mount Bottom Rail onto the substrate using CRL 95C Silicone.
 - Note: Surface Mount Bottom Rails are optional when installing the AWS System.

- 2b.**
- If you are installing an Elevated Bottom Rail, Rail Connecting Blocks must be installed first.
 - Install the Rail Connecting Blocks onto the Post using Cat. No. RCBS Self Tapping Screws. These Blocks are used to support the Bottom Rail.
 - NOTE: Elevated Bottom Rails are optional when installing the AWS System.

- 2c.**
- Cut Elevated Bottom Rail to length. Mount the Bottom Rail onto the Blocks and secure with Cat. No. TEK1 Tek Screws.

- 3.**
- When installing the glass panels, make sure the rigid vinyl is installed into the glass pocket before installing the panels.
 - Slide the glass panels down from the top of the Post. Make sure the vinyl is lubricated to protect the vinyl from damage during installation.

- 4.**
- Install Post Caps with CRL 95C Silicone.
 - To protect the glass from debris over time, use CAT. No. N56025 Surface Protector to seal the glass.

- Three standard lengths available

XX = Colour Code. Refer to page 43 for colour range and codes

Structural Standoffs

- Complete with mounting plate
- For use with 12mm and 19mm monolithic toughened glass or 13.5mm and 21.5mm laminated toughened glass using DuPont™ SentryGlas® Interlayers
- Brushed or polished 316 grade stainless finishes available
- Designed for steel, wood, and concrete substrates

CRL's heavy-duty, point supported Glass Rail Standoff Fittings gives the installer more adjustment during installation for those tricky job site mounting conditions. The steel back plate can be fastened directly to steel, concrete, or wood substrates and shimmed as required with blocking.

Grade 316 Stainless steel

CRL Heavy Duty Standoffs

Grade 316 Stainless steel

- For use with 12mm and 19mm monolithic toughened glass or 13.5 and 21.5mm laminated toughened glass using DuPont™ SentryGlas® Interlayers
- Brushed or polished 316 grade stainless finishes available
- Designed for steel, wood, and concrete substrates
- Standard 51mm caps

These heavy-duty Rail Standoffs are designed for glass handrail or guardrail applications standard. The Standoff Fittings have a 44mm standard projection from the installed attachment point. Custom lengths and diameters are also available.

Glass Awning Support System

- Used on flat or curved top segmented glass
- Fabricated from 304 alloy stainless steel
- Available in brushed or polished stainless
- Custom angles or 45 degree corner brackets are available on special order
- Requires 13.52mm thick toughened laminated glass

These universal wall mounted glass awning brackets have really become popular, not just for their looks but also their versatility.

CODE	DESCRIPTION
GAB24BS	CRL universal wall mounted brushed stainless 610mm glass awning bracket

RB50SPS	

Swivel Fitting

Designed for segment applications. Each Swivel Fitting is adjustable up to 8 degrees.

- High grade 316 stainless steel for durability in even the harshest of environments.
- Complete hardware system for 13.52mm toughened laminated glass awnings
- Provides protection from the weather without obstructing the view
- Adjustable slope for most weather conditions
- All high grade 316 alloy stainless steel components for panel sizes up to 1219mm wide and 1829mm long with two rods and mounting kits
- Easy Installation

The CRL Glass Awning Support System will give any entrance an uncomplicated, graceful look, enhancing the design of any building.

With the use of toughened laminated glass you can add a range of glass colours, textures, and special effects not available with typical monolithic glass. This complements and enhances the design of any building.

The use of eye and fork connections makes the installation of our Awning System quick and easy. The Connecting Rods are designed to make field adjustments on varying job conditions a snap. All components are 316 alloy stainless steel for durability in even the harshest of environments.

Specifications

Material: All 316 alloy stainless steel construction.

Typical Panel: 13.52mm thick toughened laminated glass comprised of 6mm toughened glass, 1.52mm interlayer, and 6mm toughened glass.

Glass Fabrication Required: Two 16mm and two 27mm diameter holes per panel.

Ordering Tip: Though sold individually, two Connecting Rods and two Mounting Kits are required for each panel.

See crlaurence.co.uk for glass fabrication details

System Components

Stainless Steel Mounts (A and B) and Pivots (C) are contained in the GAS190BS Mounting Kit. Order Connecting Rods (D) to suit panel width and application conditions. These are contained in GAS137BS, GAS145BS and GAS154BS.

NOTE: Glass panel not included.

CRL Mounting Kit

Oval top mounting bracket and pivot for edge of glass furthest from building are connected by one of three available rod lengths.

Bottom Mount and Pivot are connected to each other to support edge of glass nearest the building.
