Honorary Senior Lecturer of Oral Medicine at the University College London (UCL). Researcher, member of the Teaching Committee, professor, and deputy of the Multiprofessional Residency in Oncology (Dentistry) at the National Cancer Institute of Brazil (INCA). Graduation in Dentistry (2002) and specialization in Stomatology, both from the Federal University of Rio de Janeiro (2003). Oral Pathologist and PhD in Oral Pathology from UCL in collaboration with the Health Protection Agency (HPA) - London, UK (2010). After working at FIOCRUZ, he has already co-implemented a NB-2 Molecular Pathology Laboratory for investigation of HPV and EBV in the Integrated Unit of Specialized Pathology (UnIPE), associated with the Pathology Service of the Hospital Antônio Pedro - Fluminense Federal University (UFF). Finally, he implemented the first Molecular Pathology Laboratory at the Dental School from the Federal University of Rio de Janeiro (UFRJ) during the three-year Post-Doc in Dentistry completed in August 2015. Second and last Post-Doc in Oncology held at the INCA between 2020 and 2021 on the epidemiology of malignant neoplasms of major salivary glands. Reviewer of several journals with impact factor and indexing of relevance and Associate Editor of the Brazilian Journal of Cancerology (RBC). Collaborating professor of the Postgraduate Program in Public Health and Cancer Control (PPGCan) and the Postgraduate Program in Oncology (PPGO) from INCA. Assistant Professor at the Dental School of Universidade Santa Úrsula (USU), responsible for the disciplines of stomatology and oral and maxillofacial pathology.
