

# Fostering Social Change Through Dynamic Norms: Encouraging Counternormative Sustainable Behaviors

Gregg Sparkman

Postdoctoral Scholar, Princeton University  
PhD. Social Psychology, Stanford University

behavior, energy & climate change  
**becc**

2019 Conference  
Nov 17 - 20  
Sacramento, CA

# Social Norms: a Tool & a Hurdle

Descriptive behavioral norms suggests:

It's competent, efficient, enjoyable, socially approved, etc.

*'...it must be the norm for some reason.'*

**Self Persuasion → Conformity to Norms**

# Social Norms: a Tool & a Hurdle

Descriptive behavioral norms suggests:

It's competent, efficient, enjoyable, socially approved, etc.

*'...it must be the norm for some reason.'*

Self Persuasion → Conformity to Norms

“Most people do \_\_\_\_\_.”

# Social Norms: a Tool & a Hurdle

Descriptive behavioral norms suggests:

It's competent, efficient, enjoyable, socially approved, etc.

*'...it must be the norm for some reason.'*

Self Persuasion → Conformity to Norms

What do you do if the norm is unsustainable?

# Social Norms: a Tool & a Hurdle

Descriptive behavioral norms suggests:

It's competent, efficient, enjoyable, socially approved, etc.

*'...it must be the norm for some reason.'*

Self Persuasion → Conformity to Norms

What do you do if the norm is unsustainable?

- Driving alone
- Regular meat consumption
- Disposing working products
- Frequent flying
- Switch to solar / renewables
- Buying disposable products

# Social Norms: a Tool & a Hurdle

Descriptive behavioral norms suggests:

It's competent, efficient, enjoyable, socially approved, etc.

*'...it must be the norm for some reason.'*

Self Persuasion → Conformity to Norms

What do you do if the norm is unsustainable?

- Driving alone
- Regular meat consumption
- Disposing working products
- Frequent flying
- Switch to solar / renewables
- Buying disposable products

Norms *perpetuate* unsustainable behavior.

# Meat Consumption & Social Norms

Undeniably common, valued, and salient:

- Eat meat in public and with close others
- It's the default on restaurant menus
- Generally accepted morally (most people do not believe it's wrong)
- It's celebrated (e.g. holidays)
- Vegetarians & vegans are (still) generally derogated

# Meat Consumption & Social Norms

Popular

*The Atlantic*

NATIONAL

## Americans Are Eating Less Meat

## Peak meat: is animal consumption falling out of style in the US?

FOOD & BEVERAGE

## Meatless alternatives are on the rise

# Static & Dynamic Norms

# Static & Dynamic Norms

## Static Norm Information

- Current prevalence or frequency of a behavior others engage in
- Attitudes, opinions or beliefs of others

# Static & Dynamic Norms

## Static Norm Information

- Current prevalence or frequency of a behavior others engage in
- Attitudes, opinions or beliefs of others

## Dynamic Norm Information

- Trends in norms, changes in others' behavior over time
- Changes in attitudes, opinions or beliefs over time

# Exploring Dynamic Norm Effects

**Do people conform to dynamic norms information, even when it goes against existing norms?**

**I.e. Can witnessing others change help dislodge problematic norms?**

# Exploring Dynamic Norm Effects

**Do people conform to dynamic norms information, even when it goes against existing norms?**

**I.e. Can witnessing others change help dislodge problematic norms?**

**How do dynamic norm interventions compare to traditional static norm interventions to increase sustainable behavior?**

**I.e. Is a growing majority more influential than a static one?**

# Study 1: Interest in Counternormative Behavior

(Sparkman & Walton, 2017 *Psych Science*)

## Meat Consumption

# Study 1: Interest in Counternormative Behavior

(Sparkman & Walton, 2017 *Psych Science*)

## Meat Consumption

What the norm is now

# Study 1: Interest in Counternormative Behavior

(Sparkman & Walton, 2017 *Psych Science*)

## Meat Consumption

~~What the norm is now~~ Where the norm is going

# Study 1: Design

118 US participants from MTurk, randomly assigned to condition:

**Static:** “30% of Americans make an effort to limit their meat consumption.”

**Dynamic:** “In the last 5 years, 30% of Americans have started to make an effort..”

# Study 1: Design

118 US participants from MTurk, randomly assigned to condition:

**Static:** “30% of Americans make an effort to limit their meat consumption.”

**Dynamic:** “In the last 5 years, 30% of Americans have started to make an effort..”

**Outcome Measure:** “How interested are you in eating less meat?”

# Study 1: Results

## Interest in Eating Less Meat

Note: Bars = 95% CIs

† $p < .1$ , \* $p < .05$ , \*\* $p < .01$ , \*\*\* $p < .001$  BECC 2019

## Study 2: Psychological Processes

**Why is learning that others are starting to eat less meat influential?**

**“Preconformity” ?**

In the future, the norms may be different. (Future Descriptive Norm)

## Study 2: Psychological Processes

**Why is learning that others are starting to eat less meat influential?**

“Preconformity” ?

In the future, the norms may be different. (Future Descriptive Norm)

**Perceived importance to others?**

If people believe change is not easy:

**Change → Effort → Importance to others**

(Current Prescriptive Norm)

## Study 2: Psychological Processes

**Why is learning that others are starting to eat less meat influential?**

**“Preconformity” ?**

In the future, the norms may be different. (Future Descriptive Norm)

**Perceived importance to others?**

If people believe change is not easy:

Change → Effort → Importance to others

(Current Prescriptive Norm)

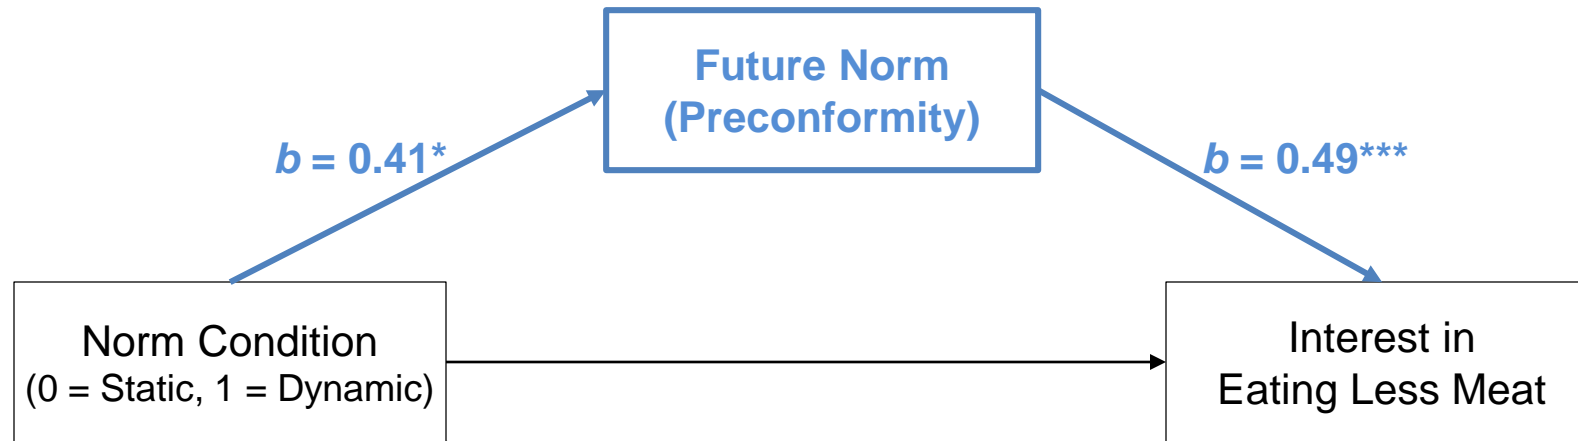

**Repeated Study 1 procedure + process measures**

# Study 2: Results

**Mediational Analyses (5k Bootstrap, Simultaneous)**

# Study 2: Results

## Mediational Analyses (5k Bootstrap, Simultaneous)

- **Future Norm:**  $z = 2.24^*$  (indirect effect = 0.20)

# Study 2: Results

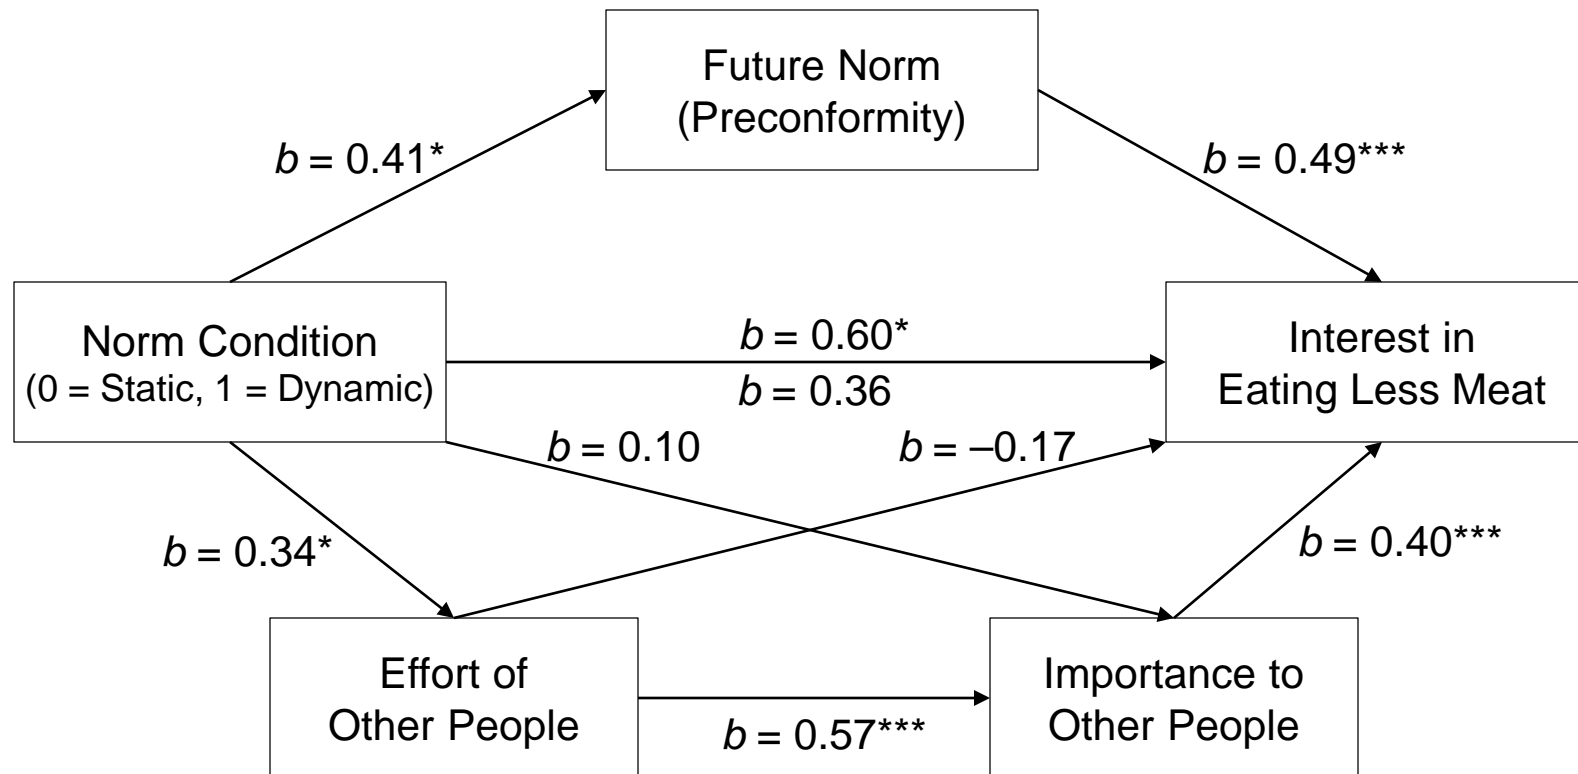

## Mediational Analyses (5k Bootstrap, Simultaneous)

- **Future Norm:**  $z = 2.24^*$  (indirect effect = 0.20)
- **Effort & Importance:**  $z = 1.98^*$  (indirect effect = 0.08)

† $p < .1$ , \* $p < .05$ , \*\* $p < .01$ , \*\*\* $p < .001$

# Study 2: Results

## Mediational Analyses (5k Bootstrap, Simultaneous)

- **Total mediation:**  $z = 2.84^{**}$  (indirect effect = 0.28)

## Study 2: Results

**Test the causal effect of “preconformity”:**

**Manipulate the mediator (future descriptive norms) directly**

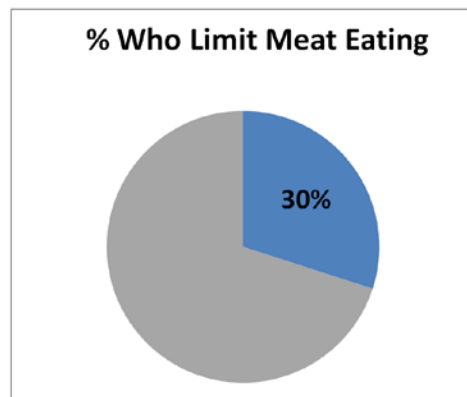

# Study 2: Results

Test the causal effect of “preconformity”:

Manipulate the mediator (future descriptive norms) directly

Follow up: Study 3

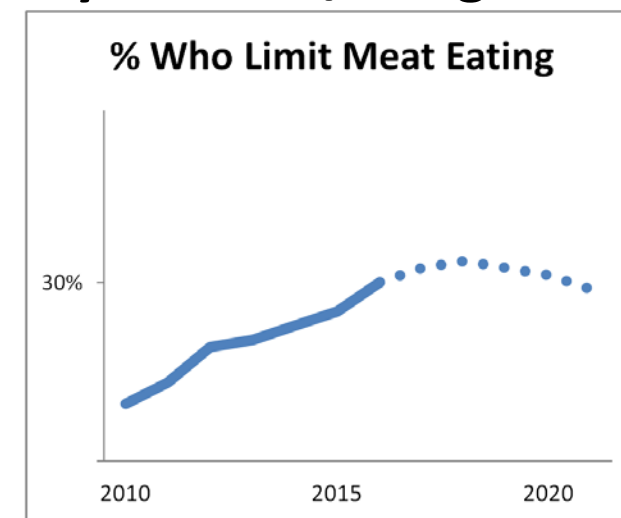

**Static**

**Dynamic with growth**

**Dynamic w/out growth**

# Study 3: Results

## Interest in Eating Less Meat

Note: Bars = 95% CIs

† $p < .1$ , \* $p < .05$ , \*\* $p < .01$ , \*\*\* $p < .001$  BECC 2019

# Why Are Dynamic Norms Effective?

# Common Psychological Barriers to Behavior Change

(Sparkman & Walton, 2019)

# Common Psychological Barriers to Behavior Change

(Sparkman & Walton, 2019)

- Behavior is not important enough

Overcome habit, try something unfamiliar, give up something they like

# Common Psychological Barriers to Behavior Change

(Sparkman & Walton, 2019)

- Behavior is not important enough

Overcome habit, try something unfamiliar, give up something they like

- Don't believe change is possible

Learned helplessness, Fixed mindsets

# Common Psychological Barriers to Behavior Change

(Sparkman & Walton, 2019)

- Behavior is not important enough

Overcome habit, try something unfamiliar, give up something they like

- Don't believe change is possible

Learned helplessness, Fixed mindsets

- Behavior is not for “people like me”

Identity based motivation, Relevant norms

# Common Psychological Barriers to Behavior Change

(Sparkman & Walton, 2019)

- Behavior is not important enough

Overcome habit, try something unfamiliar, give up something they like

- Don't believe change is possible

Learned helplessness, Fixed mindsets

- Behavior is not for “people like me”

Identity based motivation, Relevant norms

- Most people don't do that behavior

Social influence, informational influence

# **But...What If You Saw Many People Changing?**

(Sparkman & Walton, 2019)

**Dynamic norms invite us to reconsider..**

# Broader Implications

- Hope for entrenched environmental problems (where norms are bad):
  - Many sustainable behavior are not the norm now—but *are increasing over time*
  - Current energy & water use levels are not great—but some *are improving*

# Broader Implications

- Hope for entrenched environmental problems (where norms are bad):
  - Many sustainable behavior are not the norm now—but *are increasing over time*
  - Current energy & water use levels are not great—but some *are improving*
- Stronger effects than prior norm techniques
  - Both for normative and counternormative behavior
  - Witnessing change helps resolve common psychological barriers to change

# Future Work

## Dynamic Norm Menu Project:

**vina**  
enoteca

*We proudly make all of our pasta, bread, and pizza dough in house*

**ANTIPASTI**  
- add grilled chicken breast \$ 8 -

**CAPRESE** | 12  
heirloom tomatoes, mozzarella di bufala espuma, basil sponge

**GAZPACHO** | 9  
heirloom tomatoes, compressed watermelon, croutons

**INSALATA DI STAGIONE** | 9  
mixed baby lettuce, shaved seasonal vegetables, golden balsamic vinaigrette

**PROSCIUTTO E PESCHE** | 13  
24 month Prosciutto di Parma, stone fruit, saba, candied almonds

**PRIMI**

**SPAGHETTI CACIO E PEPE** | 15  
spaghetti pasta, mixed peppercorn pan sauce, pecorino romano

**CAMPANELLE** | 15  
campanelle beet pasta, carrot puree, carrot top pesto, walnuts

**TAGLIETTELE VERDI BOLOGNESE** | 19

**We've noticed that our customers are starting to choose our meatless dishes for lunch more often.**

We delight in bringing you the best of Italian food inspired by California's bounty: all of our dishes feature carefully sourced ingredients and fresh produce.
