

Species of Greatest Conservation Need (SGCN) in New Mexico.

Common names in bold print are species that were not SGCN in the Comprehensive Wildlife Conservation Strategy of 2006. Criteria used to place species on the SGCN list for this plan include populations that are declining, vulnerable, endemic (E), disjunct (Di), or keystone (K). Criteria for assigning species to one of five categories (I = Immediate Priority, H = Limited Habitat, S = Susceptible, D = Data Needed, F = Federally listed) include their degree of imperilment globally and at the state level as well as their federal and state listing status. Global and State Rank definitions can be found here:

https://nhnm.unm.edu/sites/default/files/nonsensitive/rank_status.pdf and <http://www.natureserve.org/conservation-tools/conservation-status-assessment>.

Common Name	Scientific Name	Taxon	Declining	Vulnerable	Endemic/ Disjunct/ Keystone	Category	Global Rank	State Rank	Federally Listed	State Listed
Boreal Toad	<i>Anaxyrus boreas</i>	Amphibians	Yes	Yes	Di	I	G4T4
