

Business Wireless

D-Link wireless solutions bring scalable, robust, stable and secure access for your business.

D-Link wireless products offer seamless connectivity, self-healing mechanisms, traffic segmentation and centralized management to achieve a wireless environment as productive and secure as a wired network.

Standalone Access Points

Standalone access points operate autonomously, and are managed individually or centrally (using D-Link AP Manager software) without the use of a wireless controller or switch.

DAP-2310

- 2.4GHz single band
- 2T2R 300Mbps
- High Power Design
- AP/WDS/WDS with AP/Wireless Client
- PoE support
- Limited Lifetime Warranty

DAP-2553

- Dual band selectable
- 2T3R 300Mbps
- AP/WDS/WDS with AP/Wireless Client Mode
- PoE support
- Limited Lifetime Warranty

DAP-2360

- 2.4GHz single band
- 2T2R 300Mbps
- 27dBm o/p power(dual chain)
- AP/WDS/WDS with AP/Wireless Client Mode
- PoE support
- IPv6 support
- Limited Lifetime Warranty

DAP-2590

- Dual band selectable
- 2T3R 300Mbps
- AP/WDS/WDS with AP/Wireless Client Mode
- PoE support
- IPv6 support
- Limited Lifetime Warranty

DAP-2690

- Dual band concurrent
- 2T2R 300Mbps per radio
- AP/WDS/WDS with AP/Wireless Client Mode
- PoE support
- Limited Lifetime Warranty

DAP-3520 (Outdoor)

- Dual band selectable
- 2T2R 300Mbps
- AP/WDS/WDS with AP Mode
- IP65 Certified
- Limited Lifetime Warranty

DAP-3690 (Outdoor)

- Dual band concurrent
- 2T2R 300Mbps
- AP/WDS/WDS with AP/Wireless Client mode
- Dual Gigabit interface
- 802.3at PoE
- IP67 Certified
- Limited Lifetime Warranty

Business Wireless

Unified Wireless Access Points (Standalone or Managed)

Versatile and powerful, these Access Points can be flexibly deployed as standalone wireless access points or as managed access points controlled by a D-Link Unified Wireless Switch or Wireless Controller. Businesses can start with standalone mode deployment, then migrate to a centrally managed system anytime later as the network evolves.

DWL-2600AP

- Single band b/g/n
- 2T2R 300Mbps
- Controller-based and standalone operation mode
- Integrated antennas
- Limited Lifetime Warranty

DWL-3600AP

- Single band b/g/n
- 2T2R 300Mbps
- Controller-based and standalone operation mode
- Integrated antennas
- Plenum-rated housing
- Limited Lifetime Warranty

DWL-6600AP

- Dual Band concurrent
- 2T2R 300Mbps
- Controller-based and standalone operation mode
- Selectable internal or external antennas
- Plenum-rated housing
- Limited Lifetime Warranty

Wireless Controllers and Wireless Switches

DWC-1000

Unified Wireless Controller

- Seamless Roaming, Load Balancing Centralized Management, Guest Access
- Supports up to 24 APs per device
- Supports 24~96 APs per peer group
- Limited Lifetime Warranty

DWS-3160

24-Port Wireless PoE Switch

- Seamless Roaming, Load Balancing Centralized Management, Guest Access
- Support up to 48 APs per device
- Support 48~192 APs per peer group
- Limited Lifetime Warranty

DWS-4026

24-Port Wireless L2+ PoE Switch

- Seamless Roaming, Load Balancing Centralized Management, Guest Access
- Supports up to 64 APs per device
- Supports 256 APs per peer group
- Limited Lifetime Warranty

DWL-8600AP

- Dual Band concurrent
- 2T2R 300Mbps
- Controller-based and standalone operation mode
- External antennas
- Plenum-rated housing
- Limited Lifetime Warranty
